Transcript:

Uh, my children are currently in 4th grade and 2nd grade, but will be um attending the Barrington schools in District 220 by the time they enter middle school, um my son in a couple of years, and I anticipate that this expansion of the railway or the acquisition of the railway that goes through the town of Barrington will greatly hamper our ability to um access our son's school um and greatly impede the bus transportation and increase his commute time from our home in Carpentersville all the way to the Station campus, I believe from our home he'd probably need to cross the tracks at least twice on the bus, um and if he encountered freight traffic it could just, you know, greatly increase his commute time which isn't satisfactory to us. Um, I am not happy with the plan for this railway to have freight traffic greatly increased through this acquisition and wanted to express my um disapproval of the plan. Thank you
