Transcript:

I was just calling um about this rail um proposal for, to bring more trains through our community. I live, like I said, I live in New Lennox, this town is um already very difficult to get around in, the traffic gets very heavy here, there's only a few through streets and, you know, if they increase um the trains coming through, like they're talking about, it's gonna add like, it's gonna be very inconvenient to add several minutes for people to try to go get through these lights, sometimes you have to sit through several lights at Lake Alger Road just to get across 30 and like I said almost the whole town is only like 3 or 4 streets that can even take you from north to south through the town and at 30, you have to cross railroad tracks and south of 30 on all those through street you have to cross railroad tracks, and you know, since the traffic is so difficult already to get around, I just can't imagine that they're gonna add, you know, trains coming through like that, where we're gonna have several delays added to the already inconvenience we see here, these roads are too small and too crowded already. So I really hope that something can be done to keep this railroad traffic down. So, I appreciate you letting me leave a comment. Thanks. Bye
