This railroad is proposed to carry a non renewable resource - fuel, over a non renewable resource soil. This soil will be permanently destroyed to carry a product we supposedly are trying to replace with renewable energy.

This soil is the finest on earth with the exception of a small area in Russia. Our soil came here with the glacier.

NOTE: When an individual chooses to submit an Environmental Comment or some Other Submissions, his or her personal contact information is considered public information and is shared within and outside of STB without additional authorization.
