To Whom it may Concern!

The train track should go above the state Canal, Below the power lines all the way to the Hi Way 50 junction that goes to scipio.

The loading complex could be on the North side of the Hiway. The trucks could haul coal up to it and save Salina from all that dust... and it's on a level grade

This would be the cheapest, cleanest, and best way.

This would

LEAVE THE FARMERS
ALONE!

That way there would be no interference with canals and irrigation systems

please notify us of
meetings or decisions
