Draft Environmental Impact Statement for the
Proposed Canadian National Railway Company
Acquisition of the Elgin, Joliet and Eastern Railway
Company

STB Finance Docket No. 35087

Date: 8/29/08

Comments must be submitted by September 30, 2008.

Seems as a safety warning against crossing the tracks than noise and vibration from the clearing and some heavy loads to the CTE track. My concern is the STB want to give approval to a foreign company that has a horrible track record in their home country. I do want have a right to be concerned our children have to cross the tracks to get to school 5 days a week at least 1/2 mile with a car take a day. Will they be safe if what our children, myself, our spouse or neighbor need emergency help will our local emergency vehicle be able to get to us as we need them. Not to let the road construction go through our communities will be a disaster. Would it be worth that. Our property values will be in the toilet, the taxes raised to build on tracks to complete work taxpayer should not be responsible for it. The railroad (CN) to be in our communities they should have to adequately mitigate all areas of concern and that expense and burden should not fall on us taxpayers so that their operations profits can see deeper profits. Environmentally the impact seems so great. We implore you to stop this transfer from any other place considering the thousands and millions of people who will be negatively impacted by this transfer.

YOUR INPUT IS IMPORTANT!
