Transcript:

I am calling to voice my objections to the Canadian National's proposed purchase of the EJ&E Railway, due to the negative environmental impacts on all the communities, ranging from noise to pollution to safety issues around all of the at-grade crossings that are in and around my community, not to mention the fact that with the proposed changes in schools that many more children will be crossing those railroad tracks to get to the high schools in Naperville/Aurora area. Having worked on the EJ&E for a couple of summers, I'm very familiar with the tracks and the layout and also having worked in industry now for 20 years, familiar with the Canadian National Railway and we should talk to neighbors to the north in Wisconsin after the Canadian National's purchase of the tracks up there and their concerns and this pleasure with the servicability that Canadian National has been providing them. So, the Canadian National is not somebody that I would feel comfortable with running trains and they only know what type of hazardous materials down the tracks that run through my community and within a mile of my house. That's my, those are my comments and feel free to give me a call or send me a letter 630-904-3609 is my home number. Thank you very much.
