

Environmental Impact Statement

Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date: 8/27/08

As it stands everything a train (Metra) goes through Barrington the gates go down twice (2) and interrupt traffic twice (2). During rush hour that can already make commuting through Barrington incredibly difficult. To suggest increasing trains through town, not to mention longer freight trains is going to screw the Barrington economy because no one is going to want to travel through town between the hours of 3 and 7! This proposal is ridiculous!

[illegible]
