Subject: Great Lakes Basin Railroad Project
Docket #FD35952

Dear Sirs:

As a farm owner in Serena Township I am very much apposed to the plan to place a railroad line through the area from Wisconsin to Indiana.

It will destroy many farmers farmland, disrupt homes, create road closures, cause concern for our water supply, noise pollution, cut field tile causing water flow to be miss directed, create problems for bus routes, and many other problems for this tranquil rural area.

What if there is a hazard spill? Who is responsible for being respondents to that clean up? It will not create jobs nor help our economy.

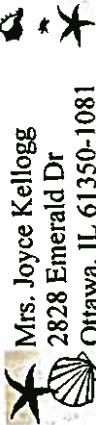

Please, do not let this railroad proposal go through.

Sincerely yours,

Joyce Kellogg
