

Environmental Impact Statement

Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date: 8/27/08

I am in opposition to the Canadian National R.R. planning on at least 24 trains per day on the E & E tracks. A one track R.R. cannot handle this traffic. Schools will be interrupted and students delayed.

Emergency vehicles will be slowed in assisting injured people to the hospital north of the ESE line. Police cars will be interrupted.

Rush hour traffic is now slowed and will be terrible if this R.R. is put through.
