Part of
Public Record

I write to oppose/object to the investor/investor information being allowed to remain private in regards to the GLBT railroad/toll road proposal. I find it totally unfair for the people who want to take your land and ruin your farm to be anonymous. I also find it ridiculous for Frank Patton to be dishonest and deceitful in his past representation of his total transportation plan. I find it very difficult to comment on a plan that was not disclosed in its entirety including the fact that much of the investor money that was talked about was actually for a toll road that was not disclosed at all. I feel his proposal should be terminated just for the fact that he is dishonest and has not been truthful in his proposal. He has shown himself to be unethical. This is a devastating project to many people who do not deserve to be guessing what will be proposed next. All information including investor information should be public information.
