1                   It's just that I think that the  
2           impact on not only property values, but  
3           more importantly just the lives of the  
4           individuals that live in Barrington with  
5           these existing trains or additional trains,  
6           an emergency vehicle, an ambulance, police  
7           car, fire department, that would literally  
8           take all the citizens of Barrington and put  
9           them at risk due to the corporate dollar.  
10          On top of that, that it's a foreign company  
11          that's doing so is the icing on the cake.  
12          It's absolutely ridiculous that we even  
13          have to be here to consider this. On top  
14          of that, that any government official would  
15          allow something like this to occur to their  
16          citizens is just astonishing.
