Subject: Uinta Basin Railway Environmental Impact Statement Docket No. FD 36284
Date: Friday, August 02, 2019 4:57:26 PM

This is from Savannah L Chapman in regards to Docket No. FD36284
Her email is savannahleigh220@gmail.com

My name is savannah and I am 19 years old. My grandpa is Michael Dennis and my family has owned this property for 92 years. I grew up coming up here and camping. I honestly can't think of one bad memory at the cabin. We grew up watching the deer eating the grass. And the squirrels running free. My whole life I have been waiting until it was going to my turn to pick out my property so my kids can have the same experiences that I did growing up. Smelling the fresh air and having a nice quiet place to relax and put our cell phones down and spend some time together as a family. I wanted my kids to be able to go up and build mud pies and get dirty. But with this train I am not sure it is possible anymore. It will ruin all the animals homes, food source and water source. It will be loud as well as ruin the air quality. What happens if the train sparks a fire? Having the train there is going to push the animals away and kill all the vegetation. We have some beautiful springs up there and this train is going to destroy at least one of them and honestly it is the most beautiful spot on our property. There are beavers living there and other animals. I am writing this in hoping you will change your mind about this train and try another solution. I would love for my kids to have the same experiences I did. As well as my mother, aunts, uncles, cousins and grandparents got to have.
