Environmental Impact Statement

Comment Form

Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

STB Finance Docket No. 35087

Date: August 27, 2008

Comments must be submitted by September 30, 2008.

The STB report stated that Barrington would loose it's quiet zone status. My home is on the corner of Otis Rd and Country Drive in the Village of Barrington. Although we are not close to the tracks, we still hear the train and train horns at night anel these horns are blowing from some point on Lake Zurich Rd. This is about 2 miles away. We hear them and they sometimes wake us up in the middle of the night. When the CN freight trains begin blowing their horns in our corridor we will not be able to sleep at all. We don't live in the city because the noise and pollution of the city don't appeal to us. Now with the CN we will have the noise and traffic and pollution of the city but without any of the benefits of actually living in the city. We don't have an "el" in the burbs. We don't have all the services, shops & conveniences a block or two away — we have to drive to most of these things. We will not be able to get to anything without the traffic backups the CN will cause. Barrington will have the worst of both worlds if the CN purchase is approved. Please deny the CN purchase.

We were just given a very large property tax increase on our home. Why? Just the cloud of the CN proposal has impacted the worth of our home.

YOUR INPUT IS IMPORTANT!
