To Whom It May Concern:

PLEASE STOP the Canadian National Rail Take Over. This will destroy my home property value and my quality of life. I have read the study which states only those living within 500 feet of the rail will be effected. Obviously the people conducting the study did not focus on the sheer volume of the fog horns that a train must use at each crossing.

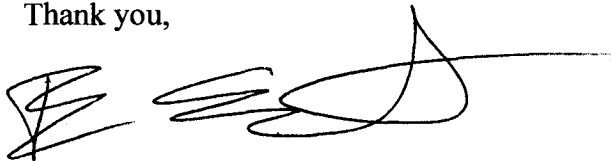

At my home, which is located at 3132 Quincy Ln, Aurora, IL, 60504, the fog horns are already to loud and to often. To triple the number of trains would be like building an airport in my back yard. I purchased my home with the knowledge of the rails existence and current usage.

I will further my cause by highlighting the number of delays and how road designs can not handle any increase at all. If CN is allowed to do this, I will be grid locked into my subdivision throughout the majority of the day.

CHICAGO'S PROBLEM IS NOT MY PROBLEM!! CHICAGO'S PROBLEM IS NOT AURORA'S PROBLEM. CHICAGO'S PROBLEM IS NOT THE SUBURBS PROBLEM.

I cannot stress enough, **DO NOT LET THIS PASS!!**

Thank you,
