Transcript:

My wife and I live in Buffalo Grove and we are both disabled and we have many visits to doctors at Highland Park Hospital and each visit is an experience because we have to time it basically when there is not a freight train coming through Buffalo Grove. In order to get to our doctors in Highland Park Hospital, we have to use Deerfield Parkway, and inadvertently we hit a freight train and the freight trains take 10-15 minutes to go by--sometimes even longer--and it is like 19 times a day and very difficult for us. We hope this goes through and make our lives a little easier and for other people in our area who are experiencing the same thing.
