Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date: 8-27-08

There is no way you can assure the safety of the children and community at large if this plan is allowed to go through. It would also greatly negatively effect the quality of life of all. The congestion caused by the commuter train is bad enough with cars idolling as they wait for trains to clear add to that 20 times more with the freight it will choke and kill. Please choose to do the right thing for the people and not side with a large money hungry company.
