Subject Safe transport of nuclear material

Surface Transportation Board ,
To whomever it may concern:,

I am writing to urge the Surface Transportation Board to issue the Certificate of Public Convenience and Necessity required by the Department of Transportation in order to move ahead with the shared-use Caliente rail plan -- a plan that would allow for the safe transport nuclear waste through cities across America.

The chances of an accident or sabotage are remote, and current and future design of transportation casks protects against accidental spills or intentional spillage by terrorists.

Thank you for taking my comments seriously.
