Subject: [JIRA] (IMOV-8642) Abandonment of Out-of-Service Rail Line

A comment is added on your issue:

Re: Abandonment of Out-of-Service Rail Line

This map was a little tough to interpret, because of how it spans 4 different USGS quadrangles. But after overlaying all 4 of the quadrangles and georeferencing the attached map of Tresckow Branch, there is only one mark anywhere near the lines to be abandoned. An examination of said mark indicates that it is some 500 m (more than 1/4 mile) away from Milepost 0.0 as shown on the map.

I see no impact to any NGS published control for this abandonment.
