

Environmental Impact Statement

Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date: 8/26

My concern, as well so many, is the congestion that will develop as a result of both the frequency as well as the length of freight trains. These delays will, without doubt, be bad, but what might happen in the future - Will it get worse. The construction of underpasses or bridges are most unlikely unless funds are provided by Canadian National, which realistically is unreasonable.

[illegible]

Joliet
