Subject re: CN buy of EJ&E railroad

With reference to the buyout of the EJ&E Railroad by CN, as the wife of a railroad employee and also someone who works beside the EJ&E tracks in Warrenville, Illinois, I would state that the public needs to be more informed about this buyout and the increase in rail traffic. Personally, I am all for it since it will reduce the road congestion and repairs needed. However, as I understand from my husband, who was a long term employee of the EJ&E and who now works for Amtrak, the impact to the rails will result in the tracks being used more and thus it would require maybe some under/over passes. Since we live in West Chicago, we know what the increased rail traffic will mean and we would rather have the train traffic over the road traffic.
