

Environmental Impact Statement

Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date: August 27th

Dear Canadians / To whom it may concern,

You may not understand how much of an impact these trains will have on our community. Barrington is a close community that takes pride in the fact that it is untouched by congestion. We need to be able to get to hospitals quickly and honestly, what is the chance that the tracks will always be open in an emergency. If one of the community is lost - we all lose.

This year alone, 2 very much loved BHS students were killed in train wrecks. This has made such a big impact on our high school and it would devastate us to see that happen again. more likely this time because of the higher frequency.

If you won't listen to the reasons the adults give about the congestion + such, listen to high school students who don't want to lose the community they grew up in.
