Ms. Grove -

Regarding goods that could move on the proposed rail line, the only information that Great Lakes Basin Transportation, Inc. (GLBT) has provided my agency to date, is that the line could see unit commodity trains (such as coal trains), mixed carload trains, and intermodal trains. This information comes from material that was provided to us on October 15, 2015, which you can find here:

[see Attachment, page 2, last paragraph in link above]

As my agency gets into the environmental review process, we will be requesting additional information on this topic from GLBT.

Thanks,

Dave

Hello:

I am just curious what types of things would be transported on these rail lines if they are built. Thank you for any information you can provide.
