Message: Mr. Navecky

I can't believe that there is a need for another railroad when there is a down turn in rail shipping by 15% due to less coal movement and other factors. This rail port that is proposed sits atop my familys farm, church and cemetery not to mention another cemetery. 15,000 acres that they want to just take and change the lives of hundreds of family farmers for there legalese. What about all of ours, our farm has been in our family well over 125 years and don't need it to meet it's demise at the hands of some wealthy person who wants to leave a railroad for his grand kids. Buy them a HO scale and have at it. This is unneeded and definitely unwanted.
