I am writing in opposition to the GLBT Rail project as it is proposed. It will be going through my family farm Venable Farms Inc. at 8525 E County Rd MM. It will divide our farm and make it very inefficient to farm our farmland. The noise and environmental impact is so great that it is even hard to comprehend. We raise cattle and have problems when semis coming to the farm with the cattle being spooked and it is hard to think what it would be like with 100 trains going by a day. We are trying to fatten cattle and with the noise factor it makes animals very uneasy. That is why we do it in the countryside. My family purchased this farm 58 years ago to be on some of the richest farmland in the country. Our farming practices have been that we preserve the land for future generations not negatively impact our farm with a railroad. My mother-law and sister-in-laws farms would also be impacted with the train also passing through their woods. Much of the wildlife in these areas would be gone and gone forever.

I strong object to this project
