Transcript:

I'd like to make my comments on STB Finance Docket number 35087. We would like the STB to disapprove the acquisition by Canadian National of the EJ&E Railroad for a number of different reasons. It would basically cause a safety and health concern in our area, due to the fact that it would cut our village in half and emergency services would be unable to get to half of our village residents. We understand Canadian National Railroad feels that it's not necessary to put overpasses or underpasses in our community and if they are, they would only pay 5 to 10 % of the cost, which would be minimal. Our governments, local, state, and federal do not have any money to give our community to put these overpasses and underpasses in and would severely, this severely affect the safety and health of our citizens, the environmental impact on air and noise pollution would be devastating to our area and affect our quality of life tremendously. We ask that you deny approval for this acquisition. Thank you
