DRAFT SCAOG PA Attachments A-E.pdf DRAFT SCAOG PA 2-3-15.docx

Susan,

Thank you for your help last year with the Six Counties Rail Project, especially figuring out the responsibilities for agencies with respect to Yuba Lake. After consulting with a number of folks to invite participation, we are ready to move forward with the development of a Programmatic Agreement in accordance with Section 106 of the NHPA.

I've attached a Draft PA with attachments. This document addresses a full range of consultation, inventory, evaluation and mitigation issues. See below for a list of PA highlights.

Please review this draft and share any comments, concerns or edits that you have. I am sending this to all signatories and concurring parties. Your agency is one of the latter. BLM is a signatory since they are the landowner at Yuba Lake.

Thanks for your help. Feel free to contact me via email or phone (# below) and I'd be happy to answer questions.

PA Stipulations Highlights

- Establishes STB as primary coordinator of consultation
- Identifies Signatories and Concurring Parties
- Ensures applicant will support survey and evaluations and mitigation planning prior to construction
- Establishes existing inventory and provides process for additional inventory, as required
- Provides for a records search to update the existing inventory with any recently identified historic properties in the APE
- Provides for evaluation of properties not in the existing inventory
- Ensures process for review and comment on survey, testing, mitigation plans by all signatories and concurring parties
- Provides for consideration of archaeological connection to the Old Spanish Trail at a particular site within the right-of-way (42SV2738)
- Calls for effect determinations as construction plans are refined and finalized
- Establishes avoidance as a preferred approach to historic properties but allows for mitigation
- Ensures a public component of any mitigation
- Identifies standards for professionals executing stipulation requirements and documentation standards for mitigation
- Calls for protective measures during construction and notes potential monitoring opportunities
- Notes permits required for archaeological work on federal and state land
- Establishes curation standards for archaeological collections
- Includes confidentiality provision for archaeological data and information sensitive to tribes

- Includes procedures for inadvertent discovery of archaeological materials and human remains or cultural items
