

Environmental Impact Statement

Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date: 8/27/08

Based on The Knowledge I've gain regarding The Proposed CNRC Acquisition, I feel our community as well as many neighboring villages, will be adversely effected. The Metra line which I commute on everyday will find a real Challenge in maintaining there on-time performance. There's absolutely no way it want this congestion in our community. The environment impact to our area will be devastatng. The only possible way is if overhead Bridges were built which takes time & money

[illegible]

Joliet
