Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date: 9-19-08

Our home is located 200 yards south of the E. J. + E. railroad tracks. Between our home and these tracks is a Wildlife area and wet lands. We fear for this area in case of a train accident now. And the train traffic has already increased by 4 times during the past year. We have noticed C.N. Trains using the E. J. + E. rail lines already, they must pay for the right of way in form of a toll agreement. The noise and horn blowing is bad enough now. If more train traffic is added it will be unbearable. Not to mention the increased safety issues. We like hundreds of other people moved into this area because of the old country feel and quiet. C.N. railroad is a Billion dollar company. They shouldn't be allowed to ruin the lives of thousands of people, just to add to there bottom line. We are against the sale of the E J + E. to the C.N. - railroad. Please rule in the favor of the little people from the Calumet area. Thank You.

P.S. Stop any action in this sale, till after the Federal elections.
