Message:

After attending the public meeting on September 9th, I was appalled to learn how little research has been conducted before considering CN Railroad to purchase EJ&E. I live right by the railroad tracks. It is completely unfair to make our property values suffer when CN, a private company, continues to have a surplus in money. In addition, the traffic on Ogden is already horrendous. It literally can take a motorist twenty minutes to drive 3 miles. Imagine how that will change with the increased freight traffic. Finally, two teenagers recently attempted (and one succeeded) at committing suicide on the EJ&E railroad tracks near Normantown. Increased train traffic means increased opportunities for accidents such as these. There are already several crosses placed around the railroad tracks. We do not want anymore. Thank you for your consideration in this matter.
