Ms. Sinnott -

I'm unable to provide you with technical support in downloading the Google Earth software. However, Item 7 in our download instructions on the project website contains a hyperlink for download support from Google Earth.

Thanks,

Dave

I downloaded the google earth software. I could not get the desktop version to work so I downloaded the web plugin. This is the message that I get when I try to open the map.

Ms. Sinnott -

The Applicant's proposed rail alignment can be found on the STB-sponsored website, provided below. Once at the home page, click on the "Maps" button in the left-hand column. The map is labeled "Complete Route Map." To view the map, you will need to use the Google Earth platform. Instructions to download this free software are provided on that same web page as "Google Earth KMZ Instruction Sheet."

Subject: Great Lakes Basin Rail Line Project

Dear David,

I am interested in seeing a detailed map of where this rail line is proposed to lay. I live on our family's sesquicentennial farm in Verona, IL and am concerned how this is going to effect our land, let alone our home values.

Thank you,

Alaina Sinnott
