3/24/2018	2256		B12	DELAY	18	Freight interference	83	8223	2256 showing 18 minute delay at Tower BI2 for freight interference. Please advise circumstances. It was a 6300' 17V that came out of 4L to MT2 after 2254 cleared. That route fired offat 2210 and 17V knocked it down at 2214. 17V cool west on MT3 because G47 was on that track. BI2 dispatcher lined up 17V at B12 MT2 to 6L at 2210. I7V knocked down BI2 at 2230 an(clear the interlocking until 2316.
4/25/2018	2251		Galewood East	DELAY	15	traffic holding on line to be used by Metra train	74	8381	Metra 2251 last night delayed 15 minutes at Galewood East waiting for 2252 who was using 41 MT Tower BI2 to Galewood East due to traffic holding on both #2 and #3 MT.
4/25/2018	2251		B17	DELAY		Following slow freight train from 1317 to B12	74	8381	Then 2254 delayed II minutes following EWD freight from 1317 to B12. Please advise why freight tri moved in a way that did not keep routes available Ibr these scheduled Metra trains.
6/8/2018	2227		Bensenville	DELAY		Slow crew going into Bensenville	78	8291	2227 10" due to NS 17V going into Bensenville yard at B12 from #2 MT to 4 —lead. Yardmaster told Elgin Dispatcher that route for 17V was lined, but crew (who dragged their feet all the way from the BRC) still had to stop and get one switch. Had to turn 2225-7412 on #1 MT at Franklin Park and 17V was still not clear when 7412 came back. 7412 and 2227 waited on #1 MT looking at each other until 17V finally cleared and 7412 could cross over.
6/8/2018	2245		B12	DELAY		Dispatcher dispatched freight ahead of Metra train	78	8291	2245 7" CP-287 off BRC to go to B17 and Bryn Mawr to C&M came off #3 MT at Cicero East and ran #3 MT to B12 with 2245 running on #1 MT. Elgin Dispatcher had B12 run 287 right in front of 2245 to B17 instead of crossing 287 over behind 2245.
7/24/2018	2200		Spaulding	ALT TRACK		Metra dispatched on alternative track, forcing passengers to cross track	78	8219	Please refer to passenger complaint received today regarding operation of Metra 2200 on #1 MT between Tower B35 and Roselle West yesterday due to CP G35 working at Spaulding with Control point blocked. Also see our response below the complaint. As we have discussed before, operation of Metra trains on other than their regular tracks can create unique challenges for our customers, as well as a potential for more serious issues should someone arriving at the last minute somehow misjudge the speed of the approaching train and dash across the tracks in their zeal to not miss their train. This is particularly important in the case of Bartlett where the #2 MT platform and the #1 MT platform are a good city block away from each other. We understand that track work, signal problems, and some unforeseen occurrences necessitate operating on the opposite main, but we again request this only be done where it cannot otherwise be avoided. As to G35 switching at Spaulding, if they keep their train on #2 MT West of the Spaulding control point with the East Electric Lock switch lined for #2 MT except when needed for an immediate movement, there should be no problem bringing EWD Metra trains on #1 MT from B35 to Spaulding and then crossing back over to #2 MT before reaching the first passenger station at Bartlett. Please share this with Elgin Dispatchers and B17 Operators. Thanks for your assistance.
8/17/2018	2250		B17	DELAY	17	Dispatcher error squeezing freight trains in front of Metra, compounding signal problem and slow train crews.	70	8443	Metra 2250 delayed 17 minutes at Tower 1317 waiting for inbound freight from C&M Sub to clear plant going in yard. Delays to 2250 carrie flips 2251 and 2256. Please advise why freight was released to come into yard with insufficient time to clear.
8/17/2018	2251			DELAY		Cascading delay	70	8443	
8/17/2018	2256			DELAY		Cascading delay	70	8443	
8/23/2018	2231		B17	DELAY	15	CP 198 12k foot train slow entering Bensenville; dispatched with impossible timing and without yard switches lined up	79	8269	This evening, Metra 2231 was held at Tower B17 approximately 15 minutes for CP 198 at 12,000 feet to enter Bensenville Yard from the Cut-off. The delay to 2231 carried over to 2233, and 2235 who all arrived their destinations 13 minutes late, and 2237 who arrived 8 minutes late. 2231 and 2237 carry an average of 1100 Metra customers each, and 2233 approximately 700. At 12,000 feet, it would have been next to impossible for 198 to clear in the 25 minute window between 2227 and 2231 without causing delay, even if all the yard switches had been lined for 198, which they were not. Moving 198 in this manner not only inconvenienced thousands of our customers, but also represented a gross disregard for the terms ofthe Me CP Operating Agreement which specifically prohibits interference with Meitaak Period trains. Please review the handling ofthis situation this evening and advise what steps will be taken to prevent a recurrence
8/23/2018	2233			DELAY		Cascading delay	79	8269	
8/23/2018	2235			DELAY		Cascading delay	79	8269	
8/23/2018	2237			DELAY		Cascading delay	79	8269	
8/25/2018	2708		Galewood East	DELAY	16	Crew swap on mainline	92	18484	1. crew swap was set up at Galewood involving two CP trains, one of which was on #2 MT and one on #3 MT (I believe one may have been G52). This impacted Metra 2708 who was delayed 16 minutes in the process (see attached GPS report).
8/25/2018	2716		B17	DELAY		CP train parked on mainline #2 for 7 hours	92	18484	1. A CP-470 train (Loco BNSF 4930) went by Tower B17 at 1425 hrs on #2 MT and was parked West of Scott Street. For whatever reason this train remained Parked on Metres #2 MT for almost 7 HOURS. It did not get by BI2 until 2127. The single track situation ultimately affected Metra 2716 who was running out of slot due to an earlier pedestrian strike. And, yes, the pedestrian strike was unforeseen (although it did occur and was cleaned up long before 470 went down #2 Main), but the point is this is precisely why the Metra mains need to be fluid. We should not be forced into a single track operation when unforeseen occurrences take place.

METRA_PUBLIC_0001956.07

Summary of CP Delay Events 2016 - 2021

DATE	TRAIN	PEAK	LOCATION	TYPE	MIN	DESCRIPTION	Exhibit A-2 PAGE #	DOC ID	BACKGROUND
9/5/2018	2158		Rondout	DELAY		Intentionally held to allow for freight with short crew time to proceed ahead, then forced to follow freight	75	8356	On Wednesday, September 5, 2018, Metra Train #2158 due Rondout 2031 stopped at Rondout per GPS data at 2040 hrs. and was held! 812 empty coal train who had to operate via Tower A5 and then make a main line crew change on the Elgin Sub. My understanding is tht Dispatcher was directed by the Chief Dispatcher to intentionally hold the scheduled Metra train in order to follow 812 due to the crew on 8 on "short time". Doing this resulted in not only the initial delay to 2158 at Rondout, but additional delay as 2158 following 812 enroute on signals. Bear in mind that 812 had to negotiate the UP controlled crossing at Mayfair as well as the 10 MPH move around the wye at Toy directly ahead of2158. To help mitigate the delay, Dispatcher arrange for 2158 to run on #1 MT from Mayfair to Tower A5, however this help as 2158 still had to wait at each station while passengers who were blocked by 812 made it across to the opposite platform. 2158 ar Chicago at 2146, 12 minutes late causing their "flip" 2155 to depart Chicago 12 minutes late and arrive Fox Lake 9 minutes late. Both tra considered to be "reportable" delays. A fact also to be considered is that with 812's remaining time short enough to have prompted a mop% any of the many unforeseen variables that frequently cause freight trains to stop even briefly would have resulted in 812 being stranded o trackage for an extended period of time while a qualified re lie fcrew was located or called and transported.
9/5/2018	2158			ALT TRACK		Dispatcher used alternative mainline to accommodate delay	75	8356	
9/5/2018	2155		CUS	DELAY		Cascading delay	75	8356	
10/18/2018	2207	PEAK	B12	DELAY	22	Dispatcher dispatched train to cross that wasn't ready	68	8479	Delays were due to a CP-Q165 which had apparently been called out to move from IHB Norpaul Yard to Schiller Park yard crossing the Elgin Sub at Tower B12 in the process. CP Elgin Dispatcher instructed Metra Operator Tower B12 to line 0165 across, however 0165 was apparently not actually ready to move when the line-up was put in. Then, when it became apparent that Q-165 was not moving, many attempts were made to contact the crew on 0165 on several radio channels in order to get their authority to drop the signal. Q-165 could not be contacted for an extended period of time.
10/18/2018	2226	PEAK	B12	DELAY	17	Dispatcher dispatched train to cross that wasn't ready	68	8479	
10/18/2018	2230		Big Timber Road	DELAY		Cascading delay	68	8479	
10/29/2018	2251		Galewood East	DELAY	18	Delay caused by reduction of mainlines due to CP train pulling into Bensenville	81	8244	Metra 2251 on Mon Oct 29' was delayed 18 minutesat Galewood East due to being held for inbound 2252 who had to run East on #1 MT due to CP-198 (11,300 feet) pulling into yard at Tower B12 from #2 MT, thus leaving only #1 MT open to run trains. As
10/29/2018	2256		Big Timber Road	DELAY	12	Cascading delay	81	8244	
11/12/2018	2248	MD-W	Spaulding	DELAY	13	Following freight train from Spaulding to B17	90	18289	#2248 delayed 13 minutes following freight from Spaulding to Tower B17
11/12/2018	2256	MD-W	Galewood East	DELAY		Delay caused by 2-287 doubling out of Galewood Yard	90	18289	#2256 at Galewood East for a 2-287 doubling out of Galewood Yard
11/12/2018	2255	MD-W	B17	DELAY		Metra train blocked at B17 for inbound freight pulling in yard from cut-off.	90	18289	2255 blocked at Tower B17 for inbound freight pulling in yard from Cut-Off.
11/20/2018	2255		B17	DELAY	13	Slow freight train clearing yard	66	8558	Metra 2255 last night arrived Big Timber Road 17 minutes late last night. They were held 13 minutes at Tower B17 waiting fora lengthy 198 to clear the plant. 198 was moved between 2256 and 2255, a window that is clearly not big enough for a train ofthat size.
11/20/2018	2255		Spaulding	DELAY	8	Dispatcher held Metra train to cross freight train	66	8558	To make matters worse, B17 then ran a CN freight across Spaulding ahead of them delaying 2255 for an additional 8 minutes.
12/5/2018	2256		B17	DELAY	25	slow entry into yard	67	8515	Metra 2256 Wednesday Dec 5 2018 waited 25 minutes at Tower BI7 while a lengthy (14,000 plus feet) CP-198 was brought into Bensen' from the Cut Oft While we can certainly appreciate the challenges ofrunning trains ofextreme lengths, we ask that if this must be done. i done at the expense of Melfffficheduled operations and our customers. We are hearing that part of the issue in tarring 198 last night was t another yard movement was blocking their route in the yard? Moving forward. when trains ofthis length are run, we ask that trains be sta arrive B17 when there are windows large enough to move them, and that entire route in yardbe pre-lined before train is released at Towei
4/4/2019	2201			DELAY	22	9900 foot freight dispatched from Norpaul to Schiller Park across B12 directly ahead of Metra trains	156	13276	This morning, a 9900 foot Q-165 was dispatched from Norpaul to Schiller Park across Tower B12 directly ahead of Metra 2201 and 2204. 2201 was already stopped at B12 before Q165 even showed up. 2201 delayed 23 minutes and 2204 delayed 14 minutes. 2204 is a Peak Period train. 2201 is not but turns for 2222 atBig Timber who is Peak Period and will be late. Late 2204 will ultimately affect Peak Period train 2220 out of Roselle. 2201 delayed 22 minutes, arrived Big Timber 17 mins late.
4/4/2019	2204	PEAK	B12	DELAY	14	9900 foot freight dispatched from Norpaul to Schiller Park across B12 directly ahead of Metra trains	156	13276	2204 delayed 14 minutes arrived CUS 12 mins late.
4/4/2019	2220	PEAK	B12	DELAY	7	Cascading delay	156	13276	2220 departed Roselle 7 minutes late, will arrive CUS 5 to 6 minutes late.
5/1/2019	2221		Big Timber Road	ALT TRACK		Re-crewing at Randall Road blocked acced to Big Timber Road depo and #1 main because of train length, forcing Metra trains to board/deboard on tracks with no depot	160	16673	Reference delays to Metra Milwaukee District West Line trains on attached sheet: On Wednesday, May 1, 2019, a lengthy CP-473 was dispatched from Bensenville with the intent of re-crewing the train at Randall Road. CP-473 stopped on #1 MT and due to train length completely blocked access to Metra's Big Timber Road depot and #1 main platform. metra 2221¬2244 were sent up #2 MT to make their turn, however there is nothing at Big Timber on the #2 main side of the platform. Passengers were completely cut off from depot, parking lot, etc. passengers off 2221 had no place to go and passengers for 2244 could not get to train. Because of this, 2244 was held 17 minutes waiting for CP-473 to clear. In order to make flip at CUS to 2243, 2244 was expressed from River Grove to Chicago. 7452 was held on #1 MT at B12 to follow 2244 and handle shorts. Peak period train 2231 had to wait st B12 for #1 MT clear. This also affected Metra Peak Period trains 2233, 2235, and 2237

5/30/2019	2200		Bartlett	ALT TRACK	6	Metra dispatched on wrong track	141	7692	The Delay Report shows #2200 6 down due to passengers on the wrong side Bartlett to Schaumburg, freight train . Announcements were made, not sure why Customers were on the wrong side. I called Track #19 to see if Blake had any insight as to why this train was late yesterday and today and he said he would look into it and call me back.
6/7/2019	2141		Rondout	DELAY	5	Metra train held for Amtrak, although Metra train is scheduled to go first	162	19346	Please see delay to Metra 2141 at Rondout on attached Milwaukee North delay report. 2141 was held approximately 5 minutes for Amtrak 340 to go first. Regarding this please note that: 1. 2141 is scheduled to go through Rondout ahead of 340. 2. 340, as scheduled, catches up to and follows Metra 2152 in route to Chicago. Running 2141 first will not in any way affect 340's arrival into Chicago.
6/11/2019	2250		Spaulding	DELAY	15	Freight train put ahead of Metra train	93	8563	Train #2250, scheduled to arrive Chicago Union Station at 8:29 PM, is operating 15 to 20 minutes behind schedule due to freight train interference. CP G35 was the reason. He had an hour window to get them out and heading east from Spaulding, their longest window but their move took too long. G35 departed there in advance of MW2250's arrival but they caught up to them before getting to Roselle. He was finally able to get MW2250 over 2-1 at Roselle of course by then the damage was done.
7/13/2019	2708		Cicero West	DELAY	15	Freight train set out in front of Metra train with reduced lines due to maintenance work	154	13273	Be advised that the above listed train wi ll take a significant delay at CI' Cicero West for a meet with M W2708. We have MT2 out of service for MOW and a CP 281 on MT3. MW 2707 will probably take a 15+ minute delay. With tracks out of service. it is expected that freight trains will he dispatched judiciously and only where there is an opportunity for them to run without intentionally delaying scheduled Metra trains. I have asked repeatedly to have 281 sent via UP during track work and these requests have been ignored. If you insist on running 281 via A5 during track work. our expectations are that train will only be moved when there is a window that does not impact our operation - not simply on a basis as to when the train happens to be ready to go.
7/19/2019	2117		Fox Lake	DELAY	56	Blocked by CP freight train with broken knuckle	142	7652	2117 Expressed from Deerfield to Round Lake, arrived Fox Lake at 15:08 3:08 56 min late, 58 min A¬20 blocked by CP freight with a broken knuckle and 2 main out of service due to scheduled track (it is summer time) work.
7/19/2019	2136			DELAY		Cascading delay	142	7652	2136 arrived CUS at 14:40 2:40 18 min late, 10 min Grayslake waiting on a late 2115, 10 picking up and delivering CP (knucklehead) Conductor with a replacement Knuckle.
7/19/2019	2138		A20	DELAY	69	CP freight blocking 1 main between A20 and Deerfield	142	7652	2138 arrived CUS at 16:31 4:31 69 min, 1 hour 9 min late, CP freight blocking 1 main between A-20 and Deerfield, had to make a see-saw move to west of Rondout to clear a path for a late 2117, 335 and 2119 and Amtrak (buffoonery) 7.
7/19/2019	2121		Rondout	DELAY	9	Following CP freight train (with knuckle fixed)	142	7652	2121 arrived Fox Lake at 16:26 4:26 13 min late, 8 min following CP (with a new knuckle) freight to Rondout, 9 min waiting on a Late 2140 to clear Rondout.
7/19/2019	2142			DELAY	10	Cascading delay	142	7652	2142 arrived CUS at 17:20 5:20 10 min late, 10 min waiting on 2121.
7/19/2019	2144			DELAY	15	Cascading delay	142	7652	2144 arrived CUS at 18:43 6:43 15 min late, 18 min Deerfield waiting on 2142.
7/19/2019	2131	PEAK	A20	DELAY	12	Following CP freight train	142	7652	2131 arrived Fox Lake at 18:30 6:30 12 min late, following CP (Classic Clownery) 281 from A-20 to Deerfield during rush hour.
7/19/2019	2146		A20	DELAY	7	Waiting on Cp 281 at A20	142	7652	2146 arrived CUS at 18:02 6:02 7 min late, 5 min Libertyville meeting 2125, 6 min approach (281 hanging out at A-20) signals.
7/28/2019	2714		B17	DELAY	20	Yard move closely ahead of Metra scheduled train	125	7818	This afternoon, an on-time Milwaukee West Line train (MW2714) was excessively delayed by a yarding Canadian Pacific train (286-27) at Tower B17 a short while ago. The 6600' freight train was asked to hand line a yard switch and make a 10 minute window to clear the mains at Tower B-17. The B-17 Operator further asked 2714 what their status was and they indicated that they were on-time, and in the vicinity of Itasca. The freight train was lined up, nonetheless. As clarification regarding the 20 minute delay to Metra 2714 at Tower B17, on Sunday July 28, 2019, was moving the yard that closely ahead of2714 a conscious decision tsnp@ft, or were there other extenuating factors?
7/29/2019	2215		Galewood	DELAY	17	Waited for freight train to clear track	95	8446	2215 held at Galewood East 17 mins for EWD freight to clear #2 MT
7/29/2019	2215		Galewood	ALT TRACK		Metra train crossed over to use alternative mainline track, due to other mainline unavailable due to freight pulling out ot Galewood	95	8446	[2215] then crossover and use #2 MT to B12, loading and unloading passengers on crosswalks. #1 MT was 005 for Sayre Ave resurfacing and #3 MT was unavailable due to WWD freight pulling out of Galewood yard on to #3 MT.
7/29/2019	2223		B12	DELAY	20	Held up due to constrained mainline availability because of re-crewing on mainline	95	8446	2223 held 20 minutes at Tower B12 to meet 2242 running East on #1 MT from B17 around a CP 650 re-crewing on #2 MT at Mannheim. Lost time on 2242 on this move also impacted 2231 waiting for #3 MT to clear up. 2231 (a Peak Period Train) was 6 minutes late at Big Timber Road.
7/29/2019	2231			DELAY	6	Cascading delay	95	8446	
7/29/2019	2228		B17	DELAY	13	Waiting for freight train to clear into Bensenville	139	7704	2228 13 minutes at Tower B17 waiting for freight train to clear into Bensenville yard.
7/29/2019	2232		B17	DELAY	8	Waiting for outbound freight coming out of Bensenville	139	7704	2232 8 minutes at Tower B17 waiting for outbound freight coming out of Bensenville yard.

DATE	TRAIN	PEAK	LOCATION	TYPE	MIN	DESCRIPTION	Exhibit A-2 PAGE #	DOC ID	BACKGROUND
7/29/2019	2612		A20	DELAY	49	Dispatching decisions to prioritize CP in context of single tracking due to track work	148	7617	Around 12:35PM, they sent an eastbound train (CP 286-20) on #1 main around the out of service block o. Main #2 between Rondout and Deerfield. Waiting at the other end of the single track to head west, beginnin, at Deerfield towards Tower A20, were three westbound freight trains, CP 581-377, CP 281-21 and CP199-21. Before 199-21 could even clear the Shermer Cut-Offat Tower A20 and onto Main 1, they had MN2607 waiting on them at the signal at Tower A20. Delays compounded and the decision was made to see-saw MN2612 at Rondout while waiting on freight traffic, in an effort to keep MN2607 moving west. Ultimately, this led to the following 4 delays
7/29/2019	2607		A20	DELAY	30	Dispatching decisions to prioritize CP in context of single tracking due to track work	148	7617	
7/29/2019	2611		A20	DELAY	40	Dispatching decisions to prioritize CP in context of single tracking due to track work	148	7617	
7/29/2019	2612		A20	DELAY		Cascading delay	148	7617	
7/29/2019	2616		A20	DELAY	11	Dispatching decisions to prioritize CP in context of single tracking due to track work	148	7617	
7/30/2019	NCS 112		B12	DELAY	10	Metra train to follow CP train to Galewood East	95	8446	Metra NCS 112 held 10 minutes at Tower B12 to follow CP-281 to Galewood East.
7/30/2019	NCS 112		B12	DELAY	10	Held up to follow CP-281 to Galewood East	140	7703	Metra NCS 112 held 10 minutes at Tower B12 to follow CP-281 to Galewood East.
7/30/2019	2217		B17	DELAY	8	Held up waiting for CP-286 to clear going into Bensenville	140	7703	2217 8 minutes at Tower B17 waiting for CP-286 to clear going into Bensenville Yard
7/30/2019	2236		B17	DELAY	8	Held up waiting for CP-286 to clear going into Bensenville	140	7703	2236 initially 8 minutes at Tower B17 waiting for CP-286 to clear.
7/30/2019	2236		B12	DELAY	17	Held at B12 on account of PC-287 taking headroom at Galewood East	140	7703	Than additional 17 minutes at Tower B12 account CP- 287 taking headroom at Galewood East toward #3 MT.
7/30/2019	2236		Galewood East	ALT TRACK		Passengers blocked at station by freight train	140	7703	2236 had to wait for NC-105 to clear B12, then run #2 MT to Galewood loading and unloading passengers on crosswalks. Passengers at Galewood completely blocked by 287.
8/2/2019	2230		B12	DELAY		Metra train running 8 minutes late not given dispatch priority over freight train	131	7782	Metra 2230 was running approximately 8 minutes late due to heavy passenger loading brought about by the Lollapalooza fest in Chicago. 2230 was already lined up at Tower B12 for their normal route from #2 Main Track to #3 Main Track. qAs 2230 was approaching Mannheim, CP-281 had pulled down on 3-lead in preparation for departure and announced to the Elgin Dispatcher that they were ready to go. Elgin Dispatcher then directed the B12 Operator to take the signal away from 2230 and begin running time on the signal. 2230 was then to wait for outbound 2211 to clear B12 and 2230 then
8/2/2019	2230		B12	ALT TRACK		Delayed Metra train forced to use alternative tracks resulting in passengers having to cross tracks	131	7782	Also, bear in mind that passengers waiting for 2230 at Elmwood Park, Mont Clare, and Galewood would be standing on the platform adjacent to #3 Main, and would then either wind up being blocked by 281, or more likely would dash across in front of 281 in order to get to the #1 main platform and not miss their train. The safety implications of this scenario are staggering, not to mention the blatant disregard for Metra's Operation on our own tracks.
8/6/2019	2202		B17	DELAY	17	Freight train yarding blocked by another locomotive	97	8416	Arrived CUS r 06:30."-5reight interference Wood Dale East:21E40p signal 13-17 (686-770) freight train yarding blocked by another locomotive. rear-end was hanging out [CP 686 hanging out on #2 MT at Tower 1317 blocking 2202]; > This was due to a CP-686 that was run from Randall to Bensenville Yard ahead o 1 2202. Upon arrival at Bensenville Yard. 686 was bloc engine on the lead with train hanging out on #2 MT. Delay to 2202 will also affect 2203 as well as Peak Period Train 2226. Delays to 7201 2203 are likely potentially resulting in delays to Peak Period Trains 2220 and 2222.
8/6/2019	2203	PEAK		DELAY	20	Cascading delay	97	8416	> 2203 (-20) Arrived Elgin @ 07:58. 44:11e parted CUS late due to late arrival/turn of 2202. previous deliTIFIS IS A PEAK PERIOD TRAIN.
8/6/2019	2220	PEAK		DELAY	9	Cascading delay	97	8416	> 2220 (-9) Arrived CUS 08:32. Departed Roselle late due to late arrival/turn o f 7201. following tanelyTEL1831S A PEAK PERIOD TRAr

8/6/2019	2232			DELAY	32	Freight interference - wrong lineup into the yard	97	8416	2232 (-32) Arrived CUS rii) 12:15. -3Stop signal 13-12 freight interference (G57) wrong lineup into the yard. back up move
8/7/2019	2230		B17	DELAY	23	Dispatching an 11k foot train closely ahead of scheduled Metra train, not being able to clear main trais and lack of coordination with other freight dispatcher	97	8416	
8/9/2019	2200		B17	DELAY	27	Metra train held because freight train cleared to enter Bensenville but no actual clear route into the yard	101	8413	Metal 2200 This morning. Friday August 9. 2019 was stopped at Tower B17 approximately 25 minutes due to a CP-386 off the North Line started in to Bensenville Yard @ 0400 hrs but actually had no clear route into the yard because of an earlier locomotive derailment in the was known at the time 386 was released but train was released anyway. The delay to 2200 will carry over to 2201 (Peak Period Train) as 2222 (Also Peak Period Train) who both utilize 2200s crew and equipment. 2200 arrived Chicago 27 minutes late:
8/9/2019	2201	PEAK		DELAY		Cascading delay	101	8413	
8/9/2019	2222	PEAK		DELAY		Cascading delay	101	8413	
9/18/2019	2253		B17	DELAY	20	Metra train held waiting for CP-382 from Bryn Mawr pulling into the yard	113	8156	ast night, Metra 2253 was held @ 20 minutes at Tower B17 waiting fora CP-382 from Bryn Mawr pulling in to the yard. Please advise what prompted this delay to occur. Our yardmaster also left a notation to the effect that there may have been a miscalculation as to 382's actual length that may have been a contributing factor. I would appreciate it if you could look into this situation and let us know if there is any truth to this. Thanks for your assistance.

Summary of CP Delay Events 2016 - 2021

DATE	TRAIN	PEAK	LOCATION	TYPE	MIN	DESCRIPTION	Exhibit A-2 PAGE #	DOC ID	BACKGROUND
9/23/2019	Multiple		B17	DELAY		Single tracking around CP trains for 3+ hours	96	8434	#1 MT at Tower B17 while 3 inbound trains on both tracks came off the cut off. Metra single tracking went on for 3 hours or more.
9/24/2019	2217		B17	DELAY	13	Metra waited for locomotive swap on mainline	96	8434	Today, 2-287-24 stopped at B17 @ 1100 hrs with a 581 train pulling up shortly behind them. 2-287 sat while a locomotive swap took place. Getting the fresh power back to the train resulted in a 12 to 13 minute delay to Metra 2217 who was running around both freights on #2 MT but had to wait at Tower B17 due to being blocked by the light power going back on 2-287's train.
9/24/2019	2236		B17	DELAY	13	Cascading delay	96	8434	
9/25/2019	2214	PEAK	B17	DELAY	7	Stopped at B17 because of long train dispatched between two Metra trains during peak periods	110	8328	Mawr behind Metra 2212 and 7201 and ahead of Metra 2214. The window between trains was insufficient to accommodate a train of this length and as a result the following delays were incurred by Metra Peak Period Trains: 2214 stopped at Tower B17 7 minutes arrived Chicago 7:59 AM, 2 minutes late.
9/25/2019	2216	PEAK		DELAY	9	Cascading delay	110	8328	2216 stopped behind 2214, then running on restricting signal due to 2214 ahead, passed Tower B17 9 minutes late, arrived Chicago 8 minutes late (reportable).
9/25/2019	2218	PEAK		DELAY	9	Cascading delay	110	8328	2218 following 2216 passed Tower B17 8 minutes late, arrived Chicago 9 minutes late (reportable). This resulted in a 5 minute late departure from Chicago on 2209 who uses Engineer and equipment from 2218.
9/25/2019	2209	PEAK		DELAY	5	Cascading delay	110	8328	
9/25/2019	North Central 108			DELAY	7	Cascading delay	110	8328	North Central 108 followed Metra 2216 from Tower B12, arrived Chicago 7 minutes late (reportable).
9/30/2019	2208	PEAK		DELAY	7	Following CP train	111	8221	2208 delayed 7 minutes following CP G54. 2208 is contractually a Peak Period train.
9/30/2019	2156		Rondout	DELAY	31	Metra train running late but able to make destination with 5 minute delay delayed 31 minutes due to dispatching freight train ahead of it	111	8221	2156 was running 12 minutes late on turn from 2141, but schedule for this trgitecbaserS, time built into schedule which would have allowed for arrival at Chicago within 5 minute tolerance. Instead CP ran a lengthy 198 directly ahead of2 156 out of Rondout to operate via Tower known 10 MPH restriction around wye at A5, 198 caused an additional 20 minutes delay to 2156 resulting in 31 minute late arrival at Chic 2156. This also delayed Amtrak 342 behind 2156.
10/1/2019	2200		B35	DELAY	18	Metra train 16 minutes at Tower B35 to let CP train go through first	111	8221	Metra 2200 held 16 minutes at Tower B35 to let a CP-474 go through first. 2200 arrived Chicago 18 minutes late resulting in late departure 2201. This will also affect peak period train 2222 who turns from 2201.
10/1/2019	2201			DELAY		Cascading delay	111	8221	
10/1/2019	2222			DELAY		Cascading delay	111	8221	
10/4/2019	2154		A20	DELAY	18	Dispatching handoff between CP and UP caused Metra delay	111	8221	I know you gave me some Omaha contacts at one pointliinitalving trouble locating them. The issue we have tonight is that CP had a 286 e 680-315 which they claim were both presented to Desk P-342 who agreed to handle them. Apparently 286 was stopped at Shermer brie0• up, however as 680 was going by A20. 3 minutes from Shermer. P342 lined up for a UP Southbound and a UP Northbound. Since 680 dic between Shermer and A20. Metra 2154 took an 18 minute delay waiting until CP 680 was finally lined up and pulled up to clear A20. Amti wound up stopping behind 2154 until they could move, and Techny Road crossing was blocked for the duration.
10/12/2019	2603		Morton Grove	DELAY	15	Metra train held at Morton Grove to allow 281 to cross over in front	153	10967	Reference Milwaukee North Line Delay sheet on attached delay report. On Sat Oct 12 CP-281 ran #2 MT A6 to Morton Grove with2603 on #1 MT. 2603 was held at Morton Grove to allow281 to cross over in front resulting in 15 minute delay to 2603. Please advise why this was done as opposed to having 281 fol1ow2603. Also please look into delay to 2607 running around freight between Tower A6 and Mayfair
10/18/2019	2208	PEAK	B12	DELAY	12	Light engines requiring axle block held up Metra train	130	7784	FYI, this morning, Light Engines ran from Tower 1317 to Cicero East to access BRC during height of morning rush. Since light engines required an axle block, Metra 2208 had to be held approximately 12 minutes at Tower B12 until Light power ahead on #3 MT cleared the Control Point at Galewood West. 2208 arrived CUS 8 minutes late.
10/23/2019	2215		Bensenville	DELAY		Two main lines used by CP for crew change and setting out cars, resulting in single tracking for Metra train	124	7827	CP G57 (outbound 287-23) has been occupying Metra #2 MT between Tower B12 and Tower B17 since 0915 this morning. My understanding is that arrangements were made to have this train hold #2 MT while setting out cars in Bensenville Yard. Metra Operations have been single tracking around this train on #1 MT going on 3 hours. To make matters worse, we now have a CP-581 stopped on #1 MT at Mannheim changing crews, essentially taking away both of the Metra owned Main Tracks for yard activities. It was agreed some time ago that the Metra Main tracks were to be used for moving trains. Crew changes were acceptable if relief crews were in place and trains were staged so as not to delay Metra's operations. Yard activities, such as picking up and setting out cars and locomotives were to take place in the yard or on the Cut-off between Tower B17 and Bryn Mawr. With both Metra Mains occupied both Metra 2215 who followed 581 to B17, as well as Metra 2234 who was waiting at Tower B17 for 2215, incurred minor delays. Moving forward, we respectfully request that CP resume the use of Metra's two Main tracks between Tower B12 and Tower B17 for moving traffic as was agreed to.
10/23/2019	2234		Bensenville	DELAY		Two main lines used by CP for crew change and setting out cars, resulting in single tracking for Metra train	124	7827	CP G57 (outbound 287-23) has been occupying Metra #2 MT between Tower B12 and Tower B17 since 0915 this morning. My understanding is that arrangements were made to have this train hold #2 MT while setting out cars in Bensenville Yard. Metra Operations have been single tracking around this train on #1 MT going on 3 hours. To make matters worse, we now have a CP-581 stopped on #1 MT at Mannheim changing crews, essentially taking away both of the Metra owned Main Tracks for yard activities. It was agreed some time ago that the Metra Main tracks were to be used for moving trains. Crew changes were acceptable if relief crews were in place and trains were staged so as not to delay Metra's operations. Yard activities, such as picking up and setting out cars and locomotives were to take place in the yard or on the Cut-off between Tower B17 and Bryn Mawr. With both Metra Mains occupied both Metra 2215 who followed 581 to B17, as well as Metra 2234 who was waiting at Tower B17 for 2215, incurred minor delays. Moving forward, we respectfully request that CP resume the use of Metra's two Main tracks between Tower B12 and Tower B17 for moving traffic as was agreed to.

Summary of CP Delay Events 2016 - 2021

DATE	TRAIN	PEAK	LOCATION	TYPE	MIN	DESCRIPTION	Exhibit A-2 PAGE #	DOC ID	BACKGROUND
11/12/2019	2125		Greyslake Crossing	DELAY		Dispatching coordination issue	120	7846	Last night we experienced delays on both 2125 and 2129 at the Grayslake crossing for cross traffic. Today 2117 also delayed. We have asked CP if they would be agreeable to allowing CN RTCs access to their overview screens which are available on the internet by using Internet Explorer (only) as a browser. CP indicated that they would be willing to do this. Since implementation of CTC on the Fox Lake Sub earlier this year, we now have control points at Liberty (4 miles East of CN Crossing) as well as at Grayslake East and Grayslake West just West of the crossing. If Desk 15 had access to the CP C&M Dispatcher overview they would be able to see the trains on the Fox Lake Sub approaching and should be better able to judge whether cross traffic could clear in time or not.
11/12/2019	2129		Greyslake Crossing	DELAY		Dispatching coordination issue	120	7846	Last night we experienced delays on both 2125 and 2129 at the Grayslake crossing for cross traffic. Today 2117 also delayed. We have asked CP if they would be agreeable to allowing CN RTCs access to their overview screens which are available on the internet by using Internet Explorer (only) as a browser. CP indicated that they would be willing to do this. Since implementation of CTC on the Fox Lake Sub earlier this year, we now have control points at Liberty (4 miles East of CN Crossing) as well as at Grayslake East and Grayslake West just West of the crossing. If Desk 15 had access to the CP C&M Dispatcher overview they would be able to see the trains on the Fox Lake Sub approaching and should be better able to judge whether cross traffic could clear in time or not.
11/12/2019	2200		Roselle West	ALT TRACK		9k CP-472 experience broken knuckle, crew decided to leave on main line, requiring Metra trains to load from opposite platforms in 9 degree weather	147	7634	Metra 2200 and 2202 used #1 MT from Tower B35 to Tower B17 loading passengers on the opposite platform at 8 stations (Bartlett through Bensenville) requiring that passengers stand out in cold (temperature was @ 9 degrees). CP-472 began moving toward Bensenville @ 0530 and Metra 2204 was allowed to run their normal #2 MT to Roselle West, and was then lined up to run #1 MT to Tower B17 in case CP-472 didn't yard right away. This turned out to be the case, and with CP-472 going into the outbound lead, it was not possible to cross 2204 back to #2 MT at Tower B17. That meant that 2204 had to stay on #1 MT to Tower B12 with 2201 holding at Tower B12 for them to clear. This delayed 2201 (peak period train) 17 minutes. 2204 (also peak period train) arrived CUS 6 minutes late.
11/12/2019	2202		Roselle West	ALT TRACK		9k CP-472 experience broken knuckle, crew decided to leave on main line, requiring Metra trains to load from opposite platforms in 9 degree weather	147	7634	
11/12/2019	2201	PEAK	Bensenville	DELAY	17	Fixed CP train allowed to run number #2 MT toward Bensenville holding up Metra trains	147	7634	CP-472 began moving toward Bensenville @ 0530 and Metra 2204 was allowed to run their normal #2 MT to Roselle West, and was then lined up to run #1 MT to Tower B17 in case CP-472 didn't yard right away. This turned out to be the case, and with CP-472 going into the outbound lead, it was not possible to cross 2204 back to #2 MT at Tower B17. That meant that 2204 had to stay on #1 MT to Tower B12 with 2201 holding at Tower B12 for them to clear. This delayed 2201 (peak period train) 17 minutes. 2204 (also peak period train) arrived CUS 6 minutes late.
11/12/2019	2204	PEAK	Bensenville	DELAY	6	Fixed CP train allowed to run number #2 MT toward Bensenville holding up Metra trains	147	7634	CP-472 began moving toward Bensenville @ 0530 and Metra 2204 was allowed to run their normal #2 MT to Roselle West, and was then lined up to run #1 MT to Tower B17 in case CP-472 didn't yard right away. This turned out to be the case, and with CP-472 going into the outbound lead, it was not possible to cross 2204 back to #2 MT at Tower B17. That meant that 2204 had to stay on #1 MT to Tower B12 with 2201 holding at Tower B12 for them to clear. This delayed 2201 (peak period train) 17 minutes. 2204 (also peak period train) arrived CUS 6 minutes late.
11/12/2019	2213		B12	DELAY	25	Two CP trains simultaneously allowed to go to Mannheim for crew change, leaving Metra trains constricted at B12/B17	147	7634	About 1030 hrs, CP-287 on #1 MT and CP-582 on #2 MT were both allowed to simultaneously go to Mannheim for a crew change. Metra 2213 arrived Tower B12 and Metra 2232 arrived Tower B17 with no place to go. CP-582 started to move about that time, so 2232 followed 582 and 2213 crossed over at B12 after 2232 cleared. 2213 was 25 minutes late arriving Big Timber Road. Before CP-287 moved and cleared up #1 MT between B12 and B17, ANOTHER eastbound, CP-380 was brought down to Mannheim for a crew change. The above scene almost repeated itself with 2215 and 2234, however 287 did begin moving toward the C&M just as 2215 got to B12, so 2215 followed 287 and proceeded once 287 cleared B17 going on to the Cut off, and then 2234 crossed over at B17 and proceed East on #1 MT.
11/13/2019	2117		Greyslake Crossing	DELAY		Dispatching coordination issue	120	7846	Last night we experienced delays on both 2125 and 2129 at the Grayslake crossing for cross traffic. Today 2117 also delayed. We have asked CP if they would be agreeable to allowing CN RTCs access to their overview screens which are available on the internet by using Internet Explorer (only) as a browser. CP indicated that they would be willing to do this. Since implementation of CTC on the Fox Lake Sub earlier this year, we now have control points at Liberty (4 miles East of CN Crossing) as well as at Grayslake East and Grayslake West just West of the crossing. If Desk 15 had access to the CP C&M Dispatcher overview they would be able to see the trains on the Fox Lake Sub approaching and should be better able to judge whether cross traffic could clear in time or not.
11/16/2019	2711		B17	DELAY		Metra train held at B17 waiting for CP train to clear going into Bensenville Yard	120	7846	Metra 2711 date delayed 18 minutes at Tower B17 waiting for CP 286-15 to clear going into Bensenville Yard. This will also cause delay 2718 who turns from 2711 at Elgin. There was a window ofapproxinnately I hour 30 minutes behind 2711 . Please advise why this excess was necessary.
11/16/2019	2718			DELAY		Cascading delay	120	7846	
11/23/2019	2710		B17	DELAY	8	CP freight clearing in yard	152	7870	Saturday Nov 23, 2019 Metra 2710 delayed 8 minutes at TowerB17 for CP freight clearing in yard
11/24/2019	2714		B17	DELAY	12	CP freight clearing in yard	152	7870	Sunday Nov 24. 2019 Metra 2714 delayed12 minutes at Tower B17 also for freight yarding. Before releasing trains for yard can we provide advance information to crews regarding switches that will need to be lined, etc.. then receive assurance from crew that they will be able to clear in the allotted time? Your assistance would be greatly appreciated.
11/25/2019	2134		Rondout	DELAY	9	Metra train delayed following freight train from Rondout to Tower A20	115	8145	MON 11-25-19 -- Metre 2134 delayed 9 minutes following freight train from Rondout to Tower A20.
11/26/2019	2228		Roselle West	DELAY	20	Equipment issue on freight train operating closely ahead of 2228 created mainline restriction and backup	115	8145	TUES 11-26-19 — CP 472 was run out of Almora directly ahead of Metre 2228, then had knuckle/drawbar failure just East of Roselle West. Due to operating so closely ahead of 2228, 2209 was already lined West at B17 on #1 MT so 2228 was held 20 minutes at Roselle West to meet #2209 and use #1 MT. Under normal circumstances, preferred move would have been to hold 2209 and run 2228 had there been sufficient warning. 2211 was also held 18 minutes at B17 to meet 2230.
11/26/2019	2211			DELAY	15	Cascading delay	115	8145	2211 was also held 18 minutes at B17 to meet 2230.
11/26/2019	2219		B12	DELAY	15	CP 650 allowed to occupy #2 MT between Tower 617 and B12 to make crew change	115	8145	TUES 11-26-19 -- CP 650 was allowed to occupy #2 MT between Tower 617 and Tower B12 in order to make a crew change at Mannheim during time period where 2219 and 2238 are scheduled to meet between 612 and B17. Crew change could easily have been made at Tower B17 or Galewood, or 650 should have been held to follow 2238. 2219 was delayed 15 minutes.

METRA_D036500_00195472

Summary of CP Delay Events 2016 - 2021

DATE	TRAIN	PEAK	LOCATION	TYPE	MIN	DESCRIPTION	Exhibit A-2 PAGE #	DOC ID	BACKGROUND
11/27/2019	2132		A20	DELAY	9	Waited for CP-199 to clear Tower A20	115	8145	WED 11-27-19 -- 2132 was 9 minutes late — Waited for CP-199 to clear Tower A20 and waited for CP-281 to clear Tower A6.
11/27/2019	2132		A6	DELAY		Waited for CP-281 to clear Tower A6	115	8145	WED 11-27-19 -- 2132 was 9 minutes late — Waited for CP-199 to clear Tower A20 and waited for CP-281 to clear Tower A6.
11/27/2019	2134		A20	DELAY	6	Following freight from Rondout to Tower A20	115	8145	WED 11-27-19 -- 2134 was 6 minutes late due to following freight from Rondout to Tower A20.
11/27/2019	2242		B12	DELAY	11	Freight occupying #3 MT	115	8145	WED 11-27-19 -- 2242 was 11 minutes late due to freight train at Tower B12 occupying #3 MT
11/27/2019	2242		B12	ALT TRACK		Freight occupying #3 MT	115	8145	2242 had to operate on #2 MT from B12 to Galewood East necessitating loading and unloading passengers through one coach on crosswalks.
11/29/2019	2132		A6	DELAY	18	CP 281 lost air as locomotives entered Tower A6 control point	115	8145	FRI 11-29-19 -- CP 281 lost air as locos were entering Tower A6 control point. This resulted in delays to 2132 (18 minutes) 2115 (39 minutes) and 2215 (10 minutes).
11/29/2019	2115		A6	DELAY	39	CP 281 lost air as locomotives entered Tower A6 control point	115	8145	FRI 11-29-19 -- CP 281 lost air as locos were entering Tower A6 control point. This resulted in delays to 2132 (18 minutes) 2115 (39 minutes) and 2215 (10 minutes).
11/29/2019	2215		A6	DELAY	10	CP 281 lost air as locomotives entered Tower A6 control point	115	8145	FRI 11-29-19 -- CP 281 lost air as locos were entering Tower A6 control point. This resulted in delays to 2132 (18 minutes) 2115 (39 minutes) and 2215 (10 minutes).
12/1/2019	2608		Rondout	DELAY	8	CP 286 dispatched ahead of Metra train on its schedule	115	8145	CP 286 was run out of Rondout directly ahead of 2608 — essentially on 2608's schedule. 2608 arrived Chicago 8 minutes late.
12/2/2019	2226		B17	DELAY	12	CP train brought out of B12 toward #2 MT at tail end of morning rush and lost air	115	8145	CP 2/287 was brought out of B12 toward #2 MT at tail end of morning rush. 2/287 lost air in plant causing 2226 to hold at B17 for 2207. 2226 arrived Chicago 12 minutes late.
12/23/2019	2253		B17	DELAY		Crew change on mainline turned into fuel level check, which delayed their pull towards Byrn Mawr	109	8350	MW2253 Followed a recrewed CP581 on main 1 at BI7. Freight Crew took it upon themselves to check the fuel levels of their road power, which delayed their pull towards Bryn Mawr, when it was not requested or required of the crew by anyone. MW2253 was 2mins late by A5, 7mins late by B-12 (no delays A5-B12) and lost the balance of their time waiting for CP 581 to clear Elgin Sub 1 main to the C&M at B-17.
1/31/2020	2242		B17	DELAY	12	C198 11,800 stopped at B17 and started off CP-2 with no chance of clearing ahead of Metra train	176	7979	An 11,800 foot CP-198 was stopped at B17. Train was started off CP-2 for New Arrival Track @ 1548 with no chance of clearing B17 plant ahead of 2242 due B17 1604 and 2223 due B17 1607. 2242 was held 12 minutes, 2223 8 minutes for 198 to clear into yard.
1/31/2020	2223		B17	DELAY	8	C198 11,800 stopped at B17 and started off CP-2 with no chance of clearing ahead of Metra train	176	7979	An 11,800 foot CP-198 was stopped at B17. Train was started off CP-2 for New Arrival Track @ 1548 with no chance of clearing B17 plant ahead of 2242 due B17 1604 and 2223 due B17 1607. 2242 was held 12 minutes, 2223 8 minutes for 198 to clear into yard.
2/1/2020	2706		Bensenville	DELAY	12	Delayed for CP 286 yarding at Bensenville	176	KKR#1598189	
2/1/2020	2717		B17	DELAY	35	Single tracking around CP681 in emergency	176	KKR#1598189	Metra 2717 was stopped at B17 35 minutes to meet 2720 due to CP681 who was dispatched directly ahead of 2717 having locomotive issues at Medinah
2/2/2020	2213			DELAY	18	Departed CUS 7 min late due to mechanical issues 10" CP 581 & CP2-287 stopped on 1 MT between B12 & B17 waiting for train to clear into yard.	176	KKR#1598189	
6/11/2020	2219		B17	SIGNAL VIOLATION	68	Signal violation by CP Frt Crew	184	KKR#1598189	
6/11/2020	2240		B17	SIGNAL VIOLATION	20	Signal violation by CP Frt Crew	185	KKR#1598189

10/29/2020	2223		B17	DELAY	17	A 9500 foot 286 was released to come into the yard directly ahead of Metra train	163	8359	I understand that we just had this conversation yesterday, and procedures take time to be placed in operation. I do need to mention, however, that just now, a 9500 foot 286 was released to come into the yard directly ahead of Metra #2223 (due B17 1606) and Metra 2242 (due B17 1605). Both trains wound up being delayed 17 minutes. I sincerely hope that you will be able to move forward toward putting the procedures we discussed into operation. If I can assist in any way, please let me know. Thanks again for your help.
11/5/2020	2223		B17	DELAY	17	CP Freight train interference	181

2/12/2021	2222		B17	DELAY	9	Blocked at Tower B17 by CP 198 pulling in yard	228		
2/17/2021	2216	PEAK	B17	DELAY	16	Stopped at B17 for CP-288	211		Stopped at B17 for CP-288
3/9/2021	2232		B17			Crew change on mainline	222		
3/15/2021	2225		B17	DELAY	9	CP Freight Train Interference	214	KKR#1598189	Metra Peak Period Train 2225 held at Tower B17 12 minutes for 11,000 foot CP 286 to clear in yard.
4/12/2021	2244	PM	Galewood	DELAY	20	Following CP Freight Train	227	KKR#1598189	
4/12/2021	2252		Galewood	DELAY	16	CP Freight Train Interference	227	KKR#1598189	
4/16/2021	2244	PM	B17	DELAY	11	CP Freight Train Interference	244	KKR#1598189	
4/16/2021	2227	PM	B17	DELAY	13	CP Freight Train Interference	244	KKR#1598189	
4/19/2021	2128		B17	DELAY		Single tracking created conflied between 2128 and 2109	213		Yesterday, MONDAY APRIL 19, 2021 we had first a CP 686 and then a CP 380 making extended (not one crew off one crew on) crew changes at Mannheim using #2 MT between Tower B17 and Franklin Park West. #2 MT was occupied from @ 0845 until 1215. This created a conflict between Metra trains 2128-2109 as well as between Metra trains 2113-2132 who are scheduled to meet in this location.
4/19/2021	2132		B17	DELAY		Single tracking created conflied between 2132-2113	213		
4/20/2021	2132		B17	DELAY		Single tracking created conflied between 2132-2113	213		Today, TUESDAY APRIL 20, 2021 we had first a CP-287 and then a CP 67X both occupying #1 MT. 67X not only blocked #1 MT, but also blocked Franklin Park depot as well as all of the road crossings in Franklin Park for over 30 minutes. Again, conflicts were created between scheduled Metra trains 2132-2113 as well as between 2136-2117.
5/5/2021	2225	PM	Almora	DELAY	26	CP Freight blocking route at Almora	220	KKR#1598189	
5/5/2021	2227	PM	Almora	DELAY	6	CP Freight blocking route at Almora	220	KKR#1598189	
7/2/2021	2236		B17	DELAY		Stopped freight train on maintline forcing single tracking	208		
7/19/2021	2202		B17	DELAY	13	Freight train interference	207	KKR#1598189	
8/1/2021	2627		Rondout	DELAY	17	Delayed at Rondout for CP Freight	210	KKR#1598189	
8/2/2021	2124	PEAK	A20	DELAY	16	Metra train held for freight CP-341 from UP	210		
8/3/2021	2203	AM	A5	DELAY	6	CP Freight Train Interference	205	KKR#1598189	
8/3/2021	2212	AM	Rondout	DELAY	6	Following delayed 2210	205	KKR#1598189	
8/3/2021	2213	PEAK	B17	DELAY	10	CP-286 slow going into yard	210		
8/3/2021	2232	PEAK	B17	DELAY	10	CP-286 slow going into yard	210		
8/6/2021	2222	AM	B17	DELAY	12	CP199 (11500ft)	237	KKR#1598189	
8/9/2021	2213		B17	DELAY	15	Train not ready when brought down main by dispatcher	219		
8/10/2021	2213		B17	DELAY		Train not ready when brought down main by dispatcher	219		
8/20/2021	2213		B17	DELAY	12	Dispatcher put freight on line ahead of Metra trains	221		
8/20/2021	2232		B12	DELAY	14	Dispatcher put freight on line ahead of Metra trains	221		
8/25/2021	2222		B17	DELAY	10	Metra train waited for CP-199 to pull out of yard	224		
9/8/2021	2222	PEAK	B17	DELAY	7	Dispatcher squeezed freight train in	215		Metra #2222 7 minutes. 2222 is a PEAK PERIOD TRAIN which is supposed to run as a non-stop express from Roselle to Western Avenue. On paper, there is a 19 minute gap between #2216 and #2222 and Dispatchers/Yardmasters are constantly trying to squeeze trains out of Bensenville Yard in this narrow window. Doing this inevitably results in a delay to #2222 whose operation as a Peak Period Train should not be interfered with. If instead of trying to squeeze trains in this narrow window, waiting until #2226 clears B17 at 0809 results in a window of almost an hour. Pushing the trains out earlier not only delays 2222, but generally winds up with the freight train waiting for a window at Deval on the UP anyway.

METRA_D036500_00195875

Summary of CP Delay Events 2016 - 2021

DATE	TRAIN	PEAK	LOCATION	TYPE	MIN	DESCRIPTION	Exhibit A-2 PAGE #	DOC ID	BACKGROUND
9/8/2021	2213	PEAK	B17	DELAY	15	Dispatcher squeezed freight train in	215

Summary of CP Delay Events 2016 - 2021

DATE	TRAIN	PEAK	LOCATION	TYPE	MIN	DESCRIPTION	Exhibit A-2 PAGE #	DOC ID	BACKGROUND
12/7/2021	2228		B12	ALT TRACK		MW2228 had to re-route 2MT to 1MT at B12 due to (17V NS9972 29 X 131 10,300') on 3MT.	272	KKR#16 30658	MW2228 had to re-route 2MT to 1MT at B12 due to (17V NS9972 29 X 131 10,300') on 3MT.
12/7/2021	2204		B12	DELAY	11	MW2204 was 11 minutes late by B12 due to 472 going into the yard at B17.	273	KKR#16 30659	MW2204 was 11 minutes late by B12 due to 472 going into the yard at B17.
12/9/2021	2110	AM	Morton Grove	DELAY	24	Dispatcher exacerbated delays by refusing to upgrade signal fault	252	KKR#16 24262	Please be advised that this morning's inbound commuter Peak Period was severely disrupted due to a track circuit that went out on #2 Main Track in the Morton Grove to Mayfair block that appeared behind #2110. In addition to causing red signals between Morton Grove and Forest Glen, the circuit caused crossing gates to stay down at Devon Avenue and Caldwell Avenue. Because call to report gates down came from a private citizen, Dispatcher issued an Item '1'. With crews having to go out and flag 2 busy crossings, the delays were extensive:.... Particularly troublesome was that after the signal maintainer arrived on the scene and confirmed that the problem was in fact gates stuck down (false activation) and not some other random problem, he attempted to get the Item '1' upgraded to an Item '2'. Doing this would have eliminated a need for a crew member to walk ahead and flag 2 crossings, probably saving 10 to 15 minutes per train. The train Dispatcher refused to upgrade to an Item '1' claiming that, "the system would not allow it".
12/9/2021	2116	AM	Morton Grove	DELAY	14	Dispatcher exacerbated delays by refusing to upgrade signal fault	252	KKR#16 24262	(see above)
12/9/2021	2118	AM	Morton Grove	DELAY	12	Dispatcher exacerbated delays by refusing to upgrade signal fault	252	KKR#16 24262	(see above)
12/9/2021	2120	AM	Morton Grove	DELAY	11	Dispatcher exacerbated delays by refusing to upgrade signal fault	252	KKR#16 24262	(see above)
12/9/2021	2124	AM	Morton Grove	DELAY	10	Dispatcher exacerbated delays by refusing to upgrade signal fault	252	KKR#16 24262	(see above)
12/9/2021	2126	AM	Morton Grove	DELAY	12	Dispatcher exacerbated delays by refusing to upgrade signal fault	252	KKR#16 24262	(see above)
12/9/2021	2118	AM	Morton Grove	HOTLINE		Hotline disabled, unable to reach dispatcher	252	KKR#16 24261	In the midst of the signal problems this morning, I attempted to contact C&M in order to get Metra 2118 and 2124 crossed over to #1 MT at Morton Grove East after #2105 cleared in order to take advantage of the clear signals on #1 MT. I let the Hot line ring for at least 20 minutes while I was also on hold on the other line in the queue, and the Hot Line was never answered.
12/9/2021	2124	AM	Morton Grove	HOTLINE		Hotline disabled, unable to reach dispatcher	253	KKR#16 24261	In the midst of the signal problems this morning, I attempted to contact C&M in order to get Metra 2118 and 2124 crossed over to #1 MT at Morton Grove East after #2105 cleared in order to take advantage of the clear signals on #1 MT. I let the Hot line ring for at least 20 minutes while I was also on hold on the other line in the queue, and the Hot Line was never answered.
12/10/2021	2221		B17	DELAY	20	Dispatcher overruled Bensenville superintendent to line up 12k foot 286 freight train, causing delays	256	KKR#16 24192	
12/10/2021	2240		B17	DELAY	20	Dispatcher overruled Bensenville superintendent to line up 12k foot 286 freight train, causing delays	256	KKR#16 24192	
12/12/2021	2704		Galewood	DELAY	5	MW2704 was stopped 5m @ Galewood waiting on freight 17V-11 to clear. The 17V-11 was 28x128, 7594 tons, and a length of 9633 ft.	286	KKR#16 30671	As info, MW2704 was stopped 5m @ Galewood waiting on freight 17V-11 to clear. The 17V-11 was 28x128, 7594 tons, and a length of 9633 ft. It was coming out of 4L @ Galewood for tk 2 heading towards B12.
12/13/2021	2202		B12	ALT TRACK		MW2202 had to re-route 1MT at B12 to Cicero West due to (17V NS9542 18 X 73 5910) on 3MT.	271	KKR#16 30656	MW2202 had to re-route 1MT at B12 to Cicero West due to (17V NS9542 18 X 73 5910) on 3MT.
12/16/2021	2230		B12	ALT TRACK		MW2230 had to re-route 1MT at B12 to Galewood due to (17V NS9690 39X123 10239) on 3MT.	270	KKR#16 30642	MW2230 had to re-route 1MT at B12 to Galewood due to (17V NS9690 39X123 10239) on 3MT.
12/17/2021	2249		B12	DELAY	17	Dispatcher dispatched freight train after asking crew if it could clear in 20 minutes, crew said yes	287	KKR#16 30673	MW2249 delayed 17m at B12 for Freight headend move from CN3 to Track 2 east. CP Dispatcher asked if they can clear in 20m which crew on Freight IM-2, CP 8648 stated Yes. Freight took signal at 746pm and Cleared at 825pm. MW2249 by B12 at 827pm. 17m Late.
12/17/2021	2232		B12	ALT TRACK		MW2232 had to re-route 1MT B12 to B6 due to (281 BN7947 55X163 13973') on 3MT.	269	KKR#16 30641	MW2232 had to re-route 1MT B12 to B6 due to (281 BN7947 55X163 13973') on 3MT.
12/20/2021	2213		Franklin Pk	DELAY	17	Metra train held due to CP G57-287 holding at B17 for slow crew change	318	KKR#16 26477	Metra 2213 MON DEC 20, 2021 held at Franklin Park West 17 minutes to meet inbound Metra 2232 due to CP G57-287 holding #1 MT at Tower B17 for crew change. For the record, G57-287 was brought up to B17 @ 20 minutes ahead of 2213, but outbound crew is not called until 1140! There is no discernable reason that G57-287 could not have been held to follow 2213 out of Galewood to avoid the extensive delay to the scheduled Metra train.

1/7/2022	2204	AM	B12	DELAY	12	Held for CP I65 coming from IHB to Schiller park yard	291	KKR#16 34124	2204 and NCS-100 (both peak period trains) were stopped at Tower B12 waiting for CP freight I65 (8643 feet) coming from the IHB to Schiller Park Yard.
1/8/2022	NCS100	AM	B12	DELAY	4	Following delayed 2204 (see above delay)	291	KKR#16 34124	
1/8/2022	2717		B17	DELAY	15	Metra 2717 stopped 15 minutes at Tower B17 waiting for CP-286 to clear plant going into Bensenville Yard	293		

METRA_PUBLIC_0019578

Summary of CP Delay Events 2016 - 2021

DATE	TRAIN	PEAK	LOCATION	TYPE	MIN	DESCRIPTION	Exhibit A-2 PAGE #	DOC ID	BACKGROUND
1/10/2022	2717		B17	DELAY	15	Held for CP-286 to clear	293	KKR#16 34658	Metra 2717 stopped 15 minutes at Tower B17 waiting for CP-286 to clear plant going into Bensenville Yard.
1/10/2022	2212	AM	B12	DELAY	12	CP G52 Freight Train Interference	293	KKR#16 34574	Metra Peak Period Trains delayed this morning, MON JAN 10, 2022 due to CP G52 (8043) being dispatched out #3 MT ahead of Metra #2212 in the heart of the Metra Peak period. G52 was initially held for release by BRC due to communications misunderstanding and train stopped with the Control Point at Galwood East being blocked.
1/10/2022	NCS108	AM	B12	DELAY	8	Following Delayed 2212 (see above delay)	293	KKR#16 34574	
1/10/2022	2216	AM	B12	DELAY		Following Delayed 2212 (see above delay)	293	KKR#16 34574	
1/10/2022	2217		B17	DELAY	10	CP 287 Crew Change for two hours	293	KKR#16 34658	CP-287 on Metra #1 Main Track at Tower B17 for @ 2 hours plus making crew change and ???? 2217 delayed 10 minutes at Franklin Park West waiting for 2236, then crossed to #2 MT to run around 287.
1/13/2022	2217		B17	ALT TRACK		2217 had to reroute to 2MT due to CP 287 delay (see above delay)	295	KKR#16 34658	
1/13/2022	2210	AM	B17	DELAY	10	Held for CP 686 being pushed off cut-off	323	KKR#16 35911	Metra Peak Period Trains delayed this morning, THU JAN 10, 2022 due to CP 686 being pushed off Cut-off between Bryn Mawr and Tower B17 into Bensenville Yard during the heart of the Metra peak period
1/13/2022	2203	AM	B17	DELAY	7	Cascading delay	323	KKR#16 35911	waiting at Tower B17 for 686 to clear the Control Point
1/13/2022	NCS110	AM	B12	DELAY	4	Cascading delay	323	KKR#16 35911	waiting at Tower B12 to follow the late 2210.
1/13/2022	2232		Galewood East	DELAY	13	Metra 2232 waited at Galewood East. 2232 delayed 13 minutes at Galewood East waiting for 287's light engine to clear #3 MT	304	KKR#16 37372	Metra 2232 waited at Galewood East. 2232 delayed 13 minutes at Galewood East waiting for 287's light engine to clear #3 MT. CP brought 198 with 10,800 feet via Tower A5 and held train on #2 MT between Tower B6 and Galewood East until yard could handle.
1/17/2022	2223	PM	B17	DELAY	11	Metra 2223 held for CP473	306	KKR#16 37373	2223 was actually HELD 5 minutes at Tower B17 to allow CP-473 to pull out of the yard first. 2223 then proceeded to follow 473 all the way to Big Timber Road.
1/18/2022	2117		A20	DELAY		CP 287 was dispatched out of Tower A20 today essentially on 2117's time.	308		The bigger issue is that the practice of running a freight train directly ahead of, and on the schedule of, a scheduled passenger train opens the possibility for passengers waiting for 2117, who typically stay inside the depo buildings (which are on the #2 Main Track Platform) until the last minute, particularly in cold weather, to run across the crosswalk to catch their train. Seeing the headlight approaching, passengers will typically assume that this is their train slowing down to a stop, giving them ample time to get across. Instead it is a freight train traveling at track speed which opens the possibility for a potential tragedy."
1/18/2022	2240		B17	DELAY	10	Delayed by CP583 for crew change.	311	KKR#16 37380	Metra 2240 today, TUES JAN 18, 2022 delayed 10 minutes at Tower B17, held to meet Metra 2221 who was using #2 MT between Franklin Park West and Tower B17 around CP-583 who was holding #1 MT at Tower B17 for crew change.
1/26/2022	2202	AM	B17	DELAY	31	waiting for a 13,799 foot CP-198 to clear	325	KKR#16 40010	2202 stopped at Tower B17 31 minutes waiting for a 13,799 foot CP-198 to clear the Control Point pulling into Bensenville Yard. 2202 arrived CUS 6:43 AM, 30 minutes late.
1/26/2022	2203	AM	Big Timber	DELAY	28	Cascading delay (see above delay)	325	KKR#16 40010	2203 (Peak Period Train) departed CUS 6:49 AM 28 minutes late, late turn off inbound 2202. 2203 arrived Big Timber Road 8:21 AM, 32 minutes late.
1/26/2022	2228	AM	Big Timber	DELAY	14	Cascading delay (see above delay)	325	KKR#16 40010	2228 departed Big Timber Road 8:36 AM, **14 minutes late**, due to late turn off inbound 2203.
1/26/2022	NCS101		B12	DELAY	5	Delayed by CP transfer	325	KKR#16 40010	NC-101 (Peak Period Train) was blocked 5 minutes at Tower B12 waiting for CP IM-1 transfer job to pull out of Schiller Park Yard and clear the Junction 16 Control Point.
1/26/2022	NCS112		B12	DELAY	5	Blocked by CP freight	325	KKR#16 40010	NC-112 was blocked at Tower B12 5 minutes by CP I65-26 pulling into Schiller Park Yard.
1/27/2022	2202		B17	DELAY	12	delayed due to CP Freight activity at Tower B17	326	KKR#16 40364	This morning, THURSDAY JAN 27, 2022 the same trains that received the most significant delay yesterday – 2202 and their flip, 2203 – were again delayed due to CP Freight activity at Tower B17. Today it was following CP-472 from Elgin to Tower B17. CP-472 stopped several times pulling into Bensenville yard to line switches with 2202 waiting behind them. 2202 was 12 minutes late going by B17
1/27/2022	2203		B17	DELAY	7	Cascading delay (see above delay)	326	KKR#16 40364	
1/27/2022	2246	PM	Galewood East	DELAY	13	Delayed by CP freight	328	KKR#16 40631	2246 had to run #1 MT from Tower B12 to Galewood East (instead of normal #3 MT). Had to wait for passengers on wrong side at Elmwood Park, Mont Clare, and Galewood to cross to board train, then waited for #2239 to clear #2 MT at Galewood East in order to cross back.
1/28/2022	2219		B17	DELAY		CP freight stopped blocking passenger boarding and detraining	312	KKR#16 40908	CP 581-12 came off BRC and was brought up to Mannheim for crew change. CP 581-12 cleared Tower B12 at 1345 and stopped with rear of train blocking Franklin Park depot as well as road crossings at Rose Street, Calwagner Street, Ruby Street, and Scott Street, essentially the entire town of Franklin Park. Train is just starting to move at 1453. Franklin Park depot and the 4 road crossings will have been blocked 1 hour 10 minutes by the time the train clears. Metra #2219 ran #2 MT Tower B12 to Tower B17. Passengers waiting for #2219 at Franklin Park were unable to board; Passengers detraining from #2219 at Franklin Park were unable to access the North side of town including the depot. Metra #2240 will be delayed at Tower B17 waiting for #2221 to clear #2 MT operating around 581-312.
1/28/2022	2240		B17	DELAY		Cascading delay (see above delay)	312	KKR#16 40908	
1/28/2022	2221		B17	DELAY		Cascading delay (see above delay)	312	KKR#16 40908	
1/31/2022	2221		B17	DELAY	15	Delayed by CP crew change	313	KKR#16 41489	CP-581 was on #1 MT East of Tower B17 waiting on crew change. 2240 was holding at Tower B17 waiting for 2221 to run around CP-581. 2221 was then blocked at Tower B17 @ 15 minutes waiting for CP 2-288 to pull into yard. When 2-288 finally cleared, 2221 went 2-1, then 2240 left.

METRA_D036500_00195420

Summary of CP Delay Events 2016 - 2021

DATE	TRAIN	PEAK	LOCATION	TYPE	MIN	DESCRIPTION	Exhibit A-2 PAGE #	DOC ID	BACKGROUND
1/31/2022	2240		B17	DELAY	20	Cascading delay (see above delay)	313	KKR#16 41489	
2/2/2022	2232		B12	ALT TRACK		Ran on #1 MT instead of their normal #3 MT from Tower B12 to Galewood East due to freight train NS-17V running Westward on #3 MT.	314	KKR#16 42205	passengers waiting for #2232 at River Grove, Elmwood Park, Mont Clare, and Galewood had to utilize crosswalks to walk across 3 main tracks to get from the normal inbound platform where they were waiting, to the opposite side to board their train, essentially at the same time that the freight was coming West.
2/2/2022	2132		A20	DELAY	6	CP freight block	314	KKR#16 42205	CP-281 was running West on #2 Main Track all the way to Tower A20 alongside Amtrak 333 who was on #1 MT. For the record, Amtrak 333 is due at Tower A20 Westward at 1132 hrs and Metra 2132 is due at Tower A20 Eastward at 1136 hrs. We're not sure why 281 was brought up to Tower A20 to crossover in the 4 minutes between Amtrak 333 and Metra 2132, but 281 could certainly have crossed over behind 333 at either Morton Grove or Mayfair and avoided the problem. Instead, Metra 2132 wound up waiting 6 minutes for Amtrak 333 to clear A20, then was crossed over to #1 MT to run from Tower A20 to Morton Grove. This meant that passengers at North Glenview, Glenview, Golf, and Morton Grove waiting for #2132 in the inclement weather had to utilize crosswalks to get to the other side.
2/3/2022	2242		B17	DELAY	8	Metra 2242 waited at Tower B17 8 minutes for CP-473 to clear the Control Point, arrived Chicago 4:54 PM, 5 minutes late	316		
2/3/2022	2223		B17	DELAY	7	Metra 2223 waited at Tower B17 7 minutes for CP-473 to clear the Control point, then followed directly behind 473 all the way to Almora.	316		
2/22/2022	2228		B17	DELAY	7	Crew change on mainline required Metra train to use alternative mainline	317	KKR#16 49336	Metra 2228 held 7 minutes at Tower B17 waiting for Metra 2209 to clear #2 MT. Metra 2209 had to run #2 MT from Franklin Park West to Tower B17 due
2/22/2022	2228		B17	ALT TRACK		Crew change on mainline required Metra train to use alternative mainline	317	KKR#16 49336	Metra 2228 held 7 minutes at Tower B17 waiting for Metra 2209 to clear #2 MT. Metra 2209 had to run #2 MT from Franklin Park West to Tower B17 due
2/22/2022	2236		B17	DELAY	30	Metra train held because freight crew time expired	317	KKR#16 49336	to CP 681 stopped on #1 MT changing crews.
2/22/2022	2236		B17	ALT TRACK		Dispatcher dispatched Metra train on the "wrong" side of the trains to get around stopped freight train	317	KKR#16 49336	2236 – CP-650 coming off Chicago Sub at Randall Road had a crew that expired on Hours of Service @ 1300. 650 was pushed ahead of 2236 out of Almora about 7 to 10 minutes ahead of 2236's scheduled departure. 650 was unable to make Tower B17 prior to 1300, so train stopped around Itasca to wait for a recrew. 2236 had been lined in behind 650. Operator B17 had to get 2236 stopped and run time at Roselle West. For some reason Operator B17 also took down 2236's signal at Bartlett East and held them there while time ran at Roselle West. 2236 was eventually released at Bartlett East and ran #1 MT from Roselle West to Tower B17. Passengers were then on the wrong side at Roselle, Medinah, Itasca, Wooddale and Bensenville. Metra 2217 was held at Tower B17 until 2236 cleared #1 MT. This resulted in a 30 minute delay to #2236 and a 22 minute delay to 2217. In this situation, it appears that running 650 behind 2236 with a relief crew meeting them enroute, would have been the better plan.
2/22/2022	2217		B17	DELAY		Cascading delay	317	KKR#16 49336	See above
2/22/2022	2229		B17	DELAY	10	Metra 2219 delayed 10 minutes at Tower B17 waiting for the rear end of CP 286 to clear the Control point going into the Yard	317	KKR#16 49336	Metra 2219 delayed 10 minutes at Tower B17 waiting for the rear end of CP 286 to clear the Control point going into the Yard
2/24/2022	2204	PEAK	B12	DELAY	12	Thursday February 24, 2022, Metra Peak Period Train #2204 was delayed 12 minutes at Tower B12, blocked by CP-I65 moving from IHB into Schiller Park across Metra's 3 Main tracks.	329	KKR#16 50133	Thursday February 24, 2022, Metra Peak Period Train #2204 was delayed 12 minutes at Tower B12, blocked by CP-I65 moving from IHB into Schiller Park across Metra's 3 Main tracks.
2/24/2022	2156		A20	DELAY	19	ALSO, THU FEB 24, 2022: Metra 2156 was held @ 4 minutes at Rondout to follow CP 288. 2156 then lost an additional 15 minutes following 288 all the way to Tower A20 and waiting while 288 went up the cut-off to get on the UP	329	KKR#16 50133	ALSO, THU FEB 24, 2022: Metra 2156 was held @ 4 minutes at Rondout to follow CP 288. 2156 then lost an additional 15 minutes following 288 all the way to Tower A20 and waiting while 288 went up the cut-off to get on the UP
2/28/2022	2225		B17	DELAY	24	Metra train held at B17 for freight train (CP 473) holding outside of Bensenville, then followed CP 473 in route all the way to Big Timber Road	330	KKR#16 50990	On Monday, February 28th , 2022, Metra Peak Period Train 2225 was held at Tower B17 19 minutes (by Franklin Park West 16:37:31, Tower B17 17:01:04) waiting for CP 473 who was allowed to double up in Bensenville Yard while occupying both Metra Main Tracks at Tower B17. Metra 2225 then followed CP 473 in route all the way to Big Timber Road. Metra 2225 arrived Big Timber Road 17:55:01, 24 minutes late.

METRA_D365001_00195421

Summary of CP Delay Events 2016 - 2021

DATE	TRAIN	PEAK	LOCATION	TYPE	MIN	DESCRIPTION	Exhibit A-2 PAGE #	DOC ID	BACKGROUND
2/28/2022	2227		B17	DELAY	20	Cascading delay	330	KKR#1650990	While Metra 2225 was stopped at Tower B17 waiting for CP 473, Metra Peak Period Train 2227 caught up to 2225 and was stopped behind him. 2227 followed 2225 to Big Timber Road arriving at 18:13:10, 20 minutes late.
3/6/2022	2707		B17	DELAY	45	MW2707 was delayed about 45mins this morning waiting for a CP 199 train to triple up and depart Bensenville at Tower B17	331	KKR#1653047	MW2707 was delayed about 45mins this morning waiting for a CP 199 train to triple up and depart Bensenville at Tower B17. Train was CP 8768 with 77 cars and 12,442' long. B17 operator says several scenarios for the move were discussed between her and the Elgin Dispatcher to eliminate any delays to Metra service but were eventually over ruled by higher decision makers at CP
3/6/2022	2704		B17	DELAY	14	MW2704 was delayed 14 mins at Tower B-17 for CP 198 with 72 cars and 12,922' long moving CP2 to the New Arrival track into Bensenville Yard	331	KKR#1653047	Earlier, MW2704 was delayed 14 mins at Tower B-17 for CP 198 with 72 cars and 12,922' long moving CP2 to the New Arrival track into Bensenville Yard. Train took longer than usual to yard because of an IM1 job in the way once they got into the yard, which prevented them from clearing the mains.
3/14/2022	2226	PEAK	B12	ALT TRACK		Metra 2226 was routed on #1 MT from Tower B12 to Galewood East due to CP 651 operating on #3 MT between BRC Connection Cicero West and Tower B12. As a result, passengers waiting on the #3 Main Track platforms had to cross at the last minute to opposite side to board. Resulted in passenger complaint.	332	KKR#1655606	Metra 2226 was routed on #1 MT from Tower B12 to Galewood East due to CP 651 operating on #3 MT between BRC Connection Cicero West and Tower B12. As a result, passengers waiting on the #3 Main Track platforms had to cross at the last minute to opposite side to board. Resulted in passenger complaint.

METRA'S DECEMBER 2021 ON-TIME PERFORMANCE REPORT

On-Time Performance

December 2021

Metra

Prepared by the Division of Strategic Planning & Performance

On-Time Performance
December 2021

This report presents an analysis of December 2021 train delays as reported for Metra's eleven rail lines. On-time is defined, for this analysis, as those regularly scheduled trains arriving at their last station stop less than six minutes behind schedule. Trains that are six minutes or more behind schedule, including annulled trains (trains that do not complete their scheduled runs), are regarded as late. "Extra" trains (trains added to handle special events but not shown in the regularly published timetables) are excluded from on-time performance calculations unless shown in special-event schedules that include all intermediate station stop times and are distributed publicly via Metra's website or on paper flyers. Cancelled (not annulled) trains and non-revenue trains are also excluded from on-time performance calculations.

On-Time Performance Tables

Table 1 shows the total number of scheduled and delayed trains for each line by service period for the current month and year-to-date.

Table 2 lists on-time percentages by line for each month and year since 2016.

Table 3 lists each weekday train that was less than 85% on-time for the current month, in order of line, train, and dates delayed. The codes in the *Delay Code* column of Table 3 are defined and shown sorted by cause category and carrier designation in Table 4. Effective January 1, 2020, and November 1, 2021, Metra is using an updated set of delay codes and delay cause categories. Changes to the delay cause categories used for Tables 5 through 7 have been applied retroactively to prior year data; totals by cause category for prior years may not match what was previously reported.

Table 5 shows the number of delays by cause and line for the current month, including a 5-year average. The table highlights the top two delay causes for each line.

Table 6 shows the number of delays by cause and line for year-to-date, including a 5-year average. The table highlights the top two delay causes for each line.

Table 7 shows the number of delays by cause and month for the current year and prior year. The table highlights the top two delay causes for each month.

For Tables 5 through 7, delays by cause are separated into *Metra/PSA* and *Foreign* designations, where applicable. *Metra/PSA* refers to delays that may be directly or indirectly attributed to Metra or Metra Purchase of Service Agreement partners (BNSF and UP) in commuter rail operation. *Foreign* refers to delays that may be directly or indirectly attributed to other carriers, including freight carriers, Amtrak, and NICTD, that affect Metra trains. *Foreign* also includes delays attributable to BNSF and Union Pacific freight operations. See Table 4 for a detailed breakdown of delay codes by cause category and carrier designation.

Table 8 shows the number of delays by duration and service period for each line.

Table 9 shows the annual number of train delays and annual on-time performance by line for the past five years. Table 9 is only included in the December monthly report.

Table 10 shows the annual number of train delays by cause and line for the past five years. Table 10 is only included in the December monthly report.

Reporting Calculations for Temporary Schedules and Special Events

Planned construction projects or special events can adversely affect on-time performance. Metra occasionally publishes full temporary schedules, which supersede the standard published schedules, to inform riders of possible delays or modifications to regular service. Metra also may publish informational notices to accompany temporary schedules. On-time performance is calculated using the temporary schedules and any accompanying notices.

Alternate Service Schedules due to the Coronavirus (COVID-19) Pandemic

On Monday, March 23, 2020, Metra began operating alternate weekday schedules on all lines, except the Heritage Corridor (HC), to adjust for the reduced number of riders due to school closures, work-from-home mandates and other consequences of the coronavirus pandemic. Through the month of April Metra continued to operate regularly scheduled weekday service on the HC Line as well as normal weekend service. On May 4 Metra reduced weekday service on the HC, North Central Service (NCS) and SouthWest Service (SWS) lines, and on May 9 reduced Saturday service to Sunday service levels on all lines except the Metra Electric (ME), thus eliminating all SWS Saturday service. Metra increased weekday service on the ME on May 18 as required for implementation of the Positive Train Control (PTC) safety system on that line. Metra increased weekday service on the RI on June 15 and on the HC, NCS and SWS on June 29. As of July 4, Metra decreased Saturday service on the ME to match Sunday service, thus eliminating Saturday service on the ME Blue Island Branch. Beginning August 3, Metra added two weekday BNSF trains and four weekday RI trains. Metra added four weekday UP-N trains and six weekday UP-NW trains on November 2.

On January 11, 2021, Metra added two weekday MD-N trains and four weekday MD-W trains, and on February 1 added 10 weekday RI trains. Metra added four weekday BNSF and MD-N trains and two NCS trains on April 12. Metra added four weekday ME trains on May 10, four Saturday ME trains on May 15 and four Sunday ME trains on May 16. On May 29 Metra restored Saturday service on the BNSF, MD-N, MD-W, RI, UP-N, UP-NW, and UP-W lines, resulting in an increase of 46 Saturday revenue trains systemwide.

In July, Metra launched pilot schedules on the BNSF, ME and UP-N (July 12), and the RI (July 19) that added off-peak options to meet post-COVID needs for riders. Metra also implemented minor weekday peak-period service increases on all other lines and restored ME Saturday service effective July 12. These changes resulted in an increase of 148 weekday trains and 38 Saturday trains systemwide in July. Schedule adjustments on September 13 resulted two fewer weekday trains on both the UP-N and UP-W. A schedule adjustment on November 15 resulted in eight fewer weekday BNSF trains. There were no schedule adjustments in December.

Under these pilot and alternate schedules Metra operated 558 regularly scheduled revenue trains each weekday in December, which is a 19 percent reduction from Metra's pre-pandemic weekday service of 692 scheduled revenue trains. Metra operated 269 regularly scheduled revenue trains each Saturday in December, which is a one percent reduction from the 273 Saturday trains Metra operated pre-pandemic. Metra operated 185 regularly scheduled revenue trains each Sunday in December, which is a two percent increase from the 181 Sunday revenue trains Metra operated pre-pandemic. As a result of the changes under these alternative and pilot schedules, Metra operated about 16 percent fewer total revenue trains in December 2021 than in December 2019, but about 36 percent more total revenue trains than in December 2020.

Metra has developed a set of service restoration principles to guide schedule design as service is added back. These principles will help Metra meet the needs of riders as travel demand approaches a new normal. Metra will continue to monitor ridership and will add service back incrementally throughout the system to stay ahead of the ridership growth curve and ensure that adequate service is in place to provide social distancing and encourage ridership.

Delays data for most recent month is final (01/14/2022) version from TOPS.

'2016-2020 average' calculated by summing the delays over the five years, summing the trains run over the five years, and calculating their ratio.

Table 3: Weekday Trains less than 85% On-Time
December 2021

Line	Train	Date	Minutes Late	Delay Code	Delay Explanation
HC	916	Fri, Dec 03	7	CD	8M CP CANAL FREIGHT MPRAS UP9045 W/203 CARS 13,062 FT STOPPED COULD NOT REACH AN EMPLOYEE IN CHARGE
	76% OT	Thu, Dec 16	19	DD	CN stopped at Rockwell, 17MIN AT ROCKWELL HELD OUT FOR AMTRAK 301
		Fri, Dec 17	10	RF	6" Stopped at Cermak 22nd St. (CN DS ERROR) 2" Freeport Bulletin #5154 speed restriction. 3" Amtrak Polk St Red signal
		Wed, Dec 22	9	DD	9M STOPPED AT CERMAK AMTRAK 301 GOES FIRST
		Thu, Dec 30	14	D	(GENERAL FREIGHT INTERFERENCE) - 7MIN DELAY FOR FREIGHT TRAIN MCHL30 UP7918 10000FT
MD-W	2202	Wed, Dec 01	10	E	-10" Departed Elgin Courtyard late due to mechanical problems engine #97 (Auxiliary Gen Field Switch)
	81% OT	Thu, Dec 02	12	D	(-12)" Freight train interference B-17 (CP472); -3" X/O 1MT B-17 to B-6, passengers on wrong side
		Mon, Dec 06	10	D	Departed Elgin 2" late due to crew management issues. CP 472 RAN AHEAD OF 2202
		Mon, Dec 20	0	XE	Annulled @ Grand/Cicero due to mechanical problems engine #404. Passengers transferred to 2204 (will replace terminal board) CA TERMINAL BOARD
MD-W	2203	Wed, Dec 01	14	E1	-14" PTC issues @ Racine Ave, re-initialize
	76% OT	Thu, Dec 02	15	D1	(-15)" -10" Departed CUS late due to late arrival/turn of 2202; -5" Stop signal Roselle West, verbal permission by, restricted speed
		Tue, Dec 07	12	R1	-12" Stopped at Elgin West waiting on late 2226
		Tue, Dec 14	9	J	-9" Police activity east of Elgin
		Mon, Dec 20	49	E1	(-49)" -33" Departed CUS late due to late arrival/turn of 2204. Used 2204's crew /equipment to protect 2203 instead of normal 2202); -12" Crew swap @ Grand/Cicero between Assignments #202/203
MD-W	2212	Wed, Dec 08	9	R1	(-9) -7" Following train ahead (2210); -2" Stop signal A-2 new engineer
	76% OT	Thu, Dec 09	7	U1	(-7)" -7" Following train ahead (2210 WHICH HAD 3 ADAs)
		Thu, Dec 16	10	D1	7" Following tardy 2210; -2" Stop signal A-2
		Mon, Dec 20	8	E1	(-8)" X/O 2MT to 1MT Galewood
		Tue, Dec 28	6	U1	-6 min following 2210.
NCS	108	Thu, Dec 09	9	D	(-9)" Stop signal Deval; Stop signal Galewood; Stop signal A-2
	81% OT	Mon, Dec 13	9	D	-9" -5 min stopped at B-12 G52 on 3 main and then had to follow 2216; -5 min stopped at B-6; -4 min approach signal A-5 to A-2.
		Tue, Dec 21	11	N1	11" Signal problems CP Morgan (AT&T outage)
		Wed, Dec 29	18	D	-20 min waiting for I65-28 (12,000 ft. freight train) to clear B-12.
SWS	803	Thu, Dec 02	20	D	4M BELT WAITING FOR SWS803|12M ASHBURN LANDERS TAKING HEADROOM BH45 UP6029 8000FT|9M CHICAGO RIDGE IO15 CSXT3038 71 CARS 12,000FT WAITING FO
	67% OT	Tue, Dec 07	8	D	(GENERAL FREIGHT INTERFERENCE) - 803 DELAYED 8 MINS AT FOREST HILL
		Fri, Dec 10	0	R1	FLIP FROM 802. 802 WAS 75" LATE GETTING IN annulled due to possible signal violation on 802
		Mon, Dec 13	10	ZR1	(PTC HUMAN ERROR, METRA TRANSPO) - 10 MINUTES AT THE BELT WAITING FOR 806 TO CLEAR
		Wed, Dec 15	12	D	(GENERAL FREIGHT INTERFERENCE) - 16M DELAY NS518 FREIGHT 25Z NS9882 49X24 CARS 11918 FT TAKING HEAD ROOM|5M FORST H ILL WAITING FOR SWS808
		Mon, Dec 27	7	D	(GENERAL FREIGHT INTERFERENCE) - 7MIN DELAY AT THE BRC FOR FREIGHT TRAIN G52-27 NS 4006 8000FT GOING ACROSS.
		Thu, Dec 30	8	GF	(GATE XING / SIG / SWITCH FOREIGN) - 6MIN FOR ITEM 1 GRADE CROSSINGS AT LAWNDALE AVE AND 83RD PLACE
SWS	812	Thu, Dec 02	23	D1	(GENERAL FREIGHT INTERFERENCE) - 25M LATE DEPARTING 179TH ACCOUNT LATE TURN FROM SWS803
	81% OT	Fri, Dec 10	88	GF1	(GATE XING / SIG / SWITCH FOREIGN) - 1HR 15M LATE DEPARTING ACCOUNT TURN FROM SWS806 12M AT NS518 WAITING FOR AMTRAK 49 TO CLEAR.
		Mon, Dec 13	26	ZR1	(PTC HUMAN ERROR, METRA TRANSPO) - LEFT 25 MINUTES DOWN DUE TO LATE TURN FROM 803(RELATED TO 806)AND PTC ISSUES
		Thu, Dec 30	6	GF1	(GATE XING / SIG / SWITCH FOREIGN) - LATE TURN FROM SW803
SWS	815	Wed, Dec 01	7	KW	8M OAK LAWN THRU RIDGELAND AV. DUE TO MULTIPLE WHEEL SLIPS ENGAGING PTC. ALSO GRADE CROSSING MALFUNCTION AT RIDGELAND AV.
	81% OT	Mon, Dec 13	11	R	7M CUS, RED SIGNAL. HELD BY TRAIN DIRECTOR. (extra board engineer could have proceeded past signal)
		Wed, Dec 15	6	D	(GENERAL FREIGHT INTERFERENCE) - 7M STOPPED AT BELT JUNCTION DUE TO FREIGHT CROSS TRAFFIC Q367 CSXT3442 120CARS 8K FT. PER BRC FREIGHT CREW
		Tue, Dec 28	10	GX	(METRA/PSA BROKEN GATE CROSSING) - 8M PULASKI AV., BROKEN GATE HAD TO BE REMOVED BY CONDUCTOR, ITEM 1.
UP-W	20	Tue, Dec 07	11	I	-11" Bell stuck at Geneva (4"); slow loading passenger at Glen Ellyn and slow loading ADA lift at Oak Park
	76% OT	Wed, Dec 08	10	I	-10" Heavy passenger loading
		Mon, Dec 13	10	I	-10" Slow passenger loading @ Geneva, Whitfield, Wheaton, Glen Ellyn, Lombard, Elmhurst, and Oak Park (running opposite main)
		Tue, Dec 14	10	U	2 ADA lifts and slow passenger loading @ Geneva, Wheaton
		Wed, Dec 29	10	D	Stopped at Peck waited for UP68008 to clear. No signal at Washington St. waited for iG1LA-29
UP-W	25	Wed, Dec 08	17	D	-27" Freight train interference
	81% OT	Mon, Dec 13	20	D	-20" Delayed waited for ZG2LT-13 to clear @ Kress then followed the ZG2LT-13
		Tue, Dec 14	15	D	-15" Delayed @ University waited for the LG2IT to clear also delayed following the freight
		Wed, Dec 22	6	D	Freight train interference (zg2lt on one & LG2G2 on two)
UP-W	27	Tue, Dec 14	24	D1	-24" Delayed @ Park waited for a late M42 to clear on trk #3
	76% OT	Wed, Dec 15	16	DE	-18" freight train interference; MNSNP 14 went into emergency in front of M27 (KNUCKLE)
		Mon, Dec 20	11	D	-11" Delayed following the MNSNP that had cross traffic @ the CN Washington St. interlocking
		Tue, Dec 28	13	D	Held @ Park waited for M42 to clear on trk 3 due to the ZG2LT on trk 1 and the MCBCH on trk 2 Freight Priority
		Thu, Dec 30	16	D	Following ZG2LT-30 from College Ave to Elmhurst

Table 3 (continued): Weekday Trains less than 85% On-Time
December 2021

Line	Train	Date	Minutes Late	Delay Code	Delay Explanation
UP-W	29	Tue, Dec 14	13	D1	-13" Delayed @ Park waited for a late M44 to clear on trk #3
	76% OT	Wed, Dec 15	29	D1	-29" Held @ Park for M44
		Thu, Dec 16	10	CC	Held at Berckley for M44
		Tue, Dec 21	9	D	HELD @ PARK WAITED FOR M44 TO CLEAR ON TRK 3 DUE TO MCHBO ON TRK 1 AND THE MNPCH ON TRK 2
		Tue, Dec 28	7	D	Held @ Park waited for M44 to clear on trk 3 due to the CNRSH9 crossing over from 2-1 and CWSWT9 on trk 1 Freight Priority
UP-W	36	Thu, Dec 02	37	D1	-37" M32 ahead at Elmhurst then make all stops from Elmhurst account M32 expressed from Elmhurst to Chicago
	81% OT	Fri, Dec 03	14	D	-14" Stopped @ Elmhurst waited for the LG2G2-02 to clear into Proviso on trk 1
		Mon, Dec 13	29	U	-7" ADA lift @ College Ave
		Mon, Dec 20	14	ZT	-14" Delayed due to PTC on the METX 8419 disengaged had to cut out and run in on ATC
UP-W	44	Wed, Dec 08	25	D1	-34" Late arrival of M25 & slow loading
	71% OT	Mon, Dec 13	24	D1	-24" Late turn from M25 also delayed @ River Forest due to passenger medical emergency
		Tue, Dec 14	9	D1	-9" Late turn from M25
		Wed, Dec 15	23	D	-17" Waited on ZG2LT to pass
		Fri, Dec 17	6	U	Slow loading ADA lift also slow passenger loading
		Wed, Dec 22	12	D1	Freight train interference (flip from 25)
UP-W	46	Mon, Dec 06	8	D1	-18" Late turn from M27 also slow passenger loading
	52% OT	Wed, Dec 08	15	D	-25" Freight train interference
		Mon, Dec 13	10	D	-10" Departed Elburn late waited for the ZLTG2 to clear then delayed following the ZLTG2
		Tue, Dec 14	22	D1	-22" Late turn from M27
		Wed, Dec 15	25	DE1	-25" Late arrival of M27. Stopped @ Turner due to high railers on MT #1 & Freight train on MT #2, west bound on MT #3 crossing over
		Fri, Dec 17	7	D	Delayed following MNSPP from Geneva - University
		Mon, Dec 20	9	D1	-9" Late turn from M27
		Tue, Dec 21	15	D	HELD @ TURNER WAITED FOR M29 TO CLEAR THEN RAN TRK 2 TURNER-PARK HAD THE MCHBO AND THE IG1LA ON TRK 1 ALSO HAD SLOW PASSENGER LOADING @ VILLA PARK
		Tue, Dec 28	14	D1	Due to 27's flip
		Thu, Dec 30	13	D1	Late turn from M27
UP-W	57	Wed, Dec 01	9	UF	-09" Delayed @ Oak Park on acct. of trouble with deploying the ADA lift (had to manually operate) - REPLACED BROKEN RIGHT SIDE LIFT ROLL STOP PIN AND ADJUSTED STOW HEIGHT
	81% OT	Mon, Dec 06	20	D1	-20" Wait for M58 to Clear Grace account MNPPR Disabled on track #1
		Tue, Dec 07	13	D1	-13" Delayed following M55; 1 ADA lift; heavy passenger unloading
		Thu, Dec 16	13	E	Late departure from CPT on acct. of swapped equipment at departure time, due to original equipment METX143 had head end power issues and smoke in the engine & XH @ MP10.2 -TURBO GEAR TRAIN DAMAGE

Data is final (01/14/2022) version from TOPS.

Table 4: Delay Codes by Cause Category & Carrier

METRA/PSA	
Delay Code	Category Definition
	Passenger Train Interference
A	Passenger Train/Interline Interference
AA	Rule 9.9 Delayed in Block / Rule 6.30 [obsolete Jan. 2020]
AD	Non-Revenue Passenger Train Interference [obsolete Jan. 2020]
	Accident
M	Right of Way Accident / Misc.
YC	Derailment - Engineering
YE	Derailment - Mechanical
YM	Derailment - Accident
	Passenger Related
I	Passenger Handling, Running Time
IB	Passenger Handling, Bicycle
J	Passenger Problems / Removal
JM	Passenger Medical Emergency
U	Accessibility Related (ADA)
	Obstruction/Debris
K	Obstruction On Tracks
KD	Train Struck Debris
L	Unauthorized People On Tracks / Near Miss
KP	Suspicious Package(s) / Person(s) / Activity
	Signal/Switch Failure
CM	Switch Malfunction (Track Dept.)
G	Metra / PSA Signal / Switch Malfunction (Signal Dept.)
GM	Metra / PSA Gate Crossing Malfunction
GT	Metra / PSA Telecom / CAD failure
GX	Metra / PSA Broken Gate Crossing
VG	Signal / Switch / Gate Crossing Failure, Nothing Found
	Track Work
C	Unscheduled Track Work
CC	Scheduled Track Work
CF	Engineering Equipment Malfunction
CG	Scheduled Signal Work
CH	Contractor Failure
	Catenary Failure
CO	Scheduled Wire Work
O	AC/DC System Failure
	Non-Locomotive Equipment Issue
F	Cab Car / Trailer / MU Malfunction
UF	ADA Lift Failure
VF	Cab Car Problem Reported, Nothing Found
	Locomotive Issue
E	Locomotive Malfunction
VE	Locomotive Problem Reported, Nothing Found

METRA/PSA (continued)	
Delay Code	Category Definition
	Human Error
B	Human Error, Eng. Dept.
H	Human Error, Mechanical Department
Q	Late Issuance of Track Warrant
R	Human Error, Transportation
RD	Metra Dispatcher Error (dispatching Metra trains)
RL	Human Error, Job Action / Employee No Show (CMS Error)
RN	Human Error, Job Action / Employee No Show (Non-CMS)
RO	Human Error, Metra Tower Operator
YB	Derailment - Human Error, Engineering
YH	Derailment - Human Error, Mechanical
YR	Derailment - Human Error, Transportation
	Weather
AW	Pass. Train Interference, Weather [obsolete Jan. 2020]
CW	M of W Work, Weather
EW	Locomotive Malfunction, Weather
FW	Cab Car / TRL / MU Malfunction, Weather
GW	Signal / Switch Malfunction Weather (Signal Dept.)
IW	Passenger Handling, Weather
KW	Obstruction On Tracks, Weather
MW	Right of Way Accident / Misc., Weather [obsolete Jan. 2020]
NW	Utility Failure, Weather
OW	AC/DC System Failure, Weather
RW	Train Crew Issues, Weather
UW	Accessibility, Weather
YW	Derailment Accident, Weather
ZW	PTC Weather
	Other
N	Utility Failure
S	Operational (Efficiency) Testing
T	Property Vandalism
W	Gas Leak (non-loco fuel)
	PTC Related
ZB	PTC Human Error, Engineering Dept.
ZC	PTC Construction / Maintenance
ZE	PTC Malfunction Locomotive Hardware
ZF	PTC Malfunction Coach Hardware
ZG	PTC Wayside
ZH	PTC Human Error, Mechanical
ZP	PTC Dispatcher
ZR	PTC Human Error, Metra Transportation
ZT	PTC Back Office/Software
ZV	Metra / PSA PTC On-Board Software

Foreign Carrier	
Delay Code	Category Definition
	Passenger Train Interference
AM	Amtrak Caused Delay
AS	NICTD Train Interference
	Freight Interference - Peak & Off-Peak
D	General Freight Interference
DD	Freight Dispatcher Error (dispatching freight trains)
DE	Freight Mechanical Malfunction
DR	Freight-Human Error
	Accident
DM	Freight-Accident / Incident
YF	Derailment - Accident, Foreign Line
	Passenger Related
JA	Amtrak Passenger Problems / Removal
	Signal/Switch Failure
GA	Signal / Switch Failure Amtrak (Signal Dept.)
GF	Gate Crossing / Signal / Switch Foreign Line
	Track Work
CA	Amtrak Engineering
CD	Track Work by Freight Carrier
	Non-Locomotive Equipment Issue
FS	NICTD MU Malfunction
	Locomotive Issue
EA	Amtrak Locomotive/Car Malfunction
	Human Error
BA	Amtrak Engineering Human Error
HS	Human Error, NICTD Mechanical Dept. [obsolete Jan. 2020]
RA	Human Error, Amtrak Transportation
RF	Foreign/PSA Dispatcher Error (dispatching Metra trains)
RS	Human Error, NICTD Transportation
	Weather
DW	Freight Train Interference, Weather
	PTC Related
ZA	PTC Amtrak Train (On-Board)
ZD	PTC Foreign Line Transportation
ZN	PTC Foreign Line Engineering
ZS	PTC NICTD MU Train (On-Board)

Effective November 1, 2021

'Metra/PSA' refers to delays that either directly affect or are directly attributable to Metra or its Purchase of Service Agreement partners (BNSF and Union Pacific) on Metra or PSA-controlled rail lines or trains in commuter operation.
'Foreign' refers to delays that may be directly or indirectly attributed to other carriers, including freight carriers, Amtrak, and NICTD, that affect Metra trains. 'Foreign' also includes delays attributable to BNSF and Union Pacific freight operations.

The delay codes listed above are used for primary delayed trains; primary annulled trains (trains that fail to reach their scheduled destination station) use a primary delay code preceded by an "X" (e.g., XE, XGA, etc.);
All secondary trains, including annulled, use primary delay code followed by a "1" (e.g., E1, GA1, etc.); secondary annulled trains do not use a delay code preceded by an "X".

Data for current month is final (01/14/2022) version of TOPS

'Metra/PSA' refers to delays that may be directly or indirectly attributed to Metra or Metra Purchase of Service Agreement partners (BNSF and UP) in commuter rail operation.

'Foreign' refers to delays that may be directly or indirectly attributed to other carriers, including freight carriers, Amtrak, and NICTD, that affect Metra trains. 'Foreign' also includes delays attributable to BNSF and Union Pacific freight operations.

Data for current month is final (01/15/2021) version of TOPS

'Metra/PSA' refers to delays that may be directly or indirectly attributed to Metra or Metra Purchase of Service Agreement partners (BNSF and UP) in commuter rail operation.

'Foreign' refers to delays that may be directly or indirectly attributed to other carriers, including freight carriers, Amtrak, and NICTD, that affect Metra trains. 'Foreign' also includes delays attributable to BNSF and Union Pacific freight operations.

Effective January 2020, Metra has updated the delay cause categories in this table; totals by cause category for prior years may not match what was previously reported.

Table 5.c: Train Delays by Cause and Line

December 2021 Compared to Average December Over Previous Five Years: 2016-2020

Data for current month is final (01/15/2021) version of TOPS

'Metra/PSA' refers to delays that may be directly or indirectly attributed to Metra or Metra Purchase of Service Agreement partners (BNSF and UP) in commuter rail operation.

'Foreign' refers to delays that may be directly or indirectly attributed to other carriers, including freight carriers, Amtrak, and NICTD, that affect Metra trains. 'Foreign' also includes delays attributable to BNSF and Union Pacific freight operations.

Effective January 2020, Metra has updated the delay cause categories in this table; totals by cause category for prior years may not match what was previously reported.

Table 6.c: Train Delays by Cause and Line - YTD

Data for current month is final (01/14/2022) version of TOPS

'Metra/PSA' refers to delays that may be directly or indirectly attributed to Metra or Metra Purchase of Service Agreement partners (BNSF and UP) in commuter rail operation.

'Foreign' refers to delays that may be directly or indirectly attributed to other carriers, including freight carriers, Amtrak, and NICTD, that affect Metra trains. 'Foreign' also includes delays attributable to BNSF and Union Pacific freight operations.

Data for current month is final (01/15/2021) version of TOPS

'Metra/PSA' refers to delays that may be directly or indirectly attributed to Metra or Metra Purchase of Service Agreement partners (BNSF and UP) in commuter rail operation.

'Foreign' refers to delays that may be directly or indirectly attributed to other carriers, including freight carriers, Amtrak, and NICTD, that affect Metra trains. 'Foreign' also includes delays attributable to BNSF and Union Pacific freight operations.

Effective January 2020, Metra has updated the delay cause categories in this table; totals by cause category for prior years may not match what was previously reported.

Data for current month is final (01/14/2022) version of TOPS

'Metra/PSA' refers to delays that may be directly or indirectly attributed to Metra or Metra Purchase of Service Agreement partners (BNSF and UP) in commuter rail operation.

'Foreign' refers to delays that may be directly or indirectly attributed to other carriers, including freight carriers, Amtrak, and NICTD, that affect Metra trains. 'Foreign' also includes delays attributable to BNSF and Union Pacific freight operations.

Effective January 2020, Metra has updated the delay cause categories in this table; totals by cause category for prior years may not match what was previously reported.

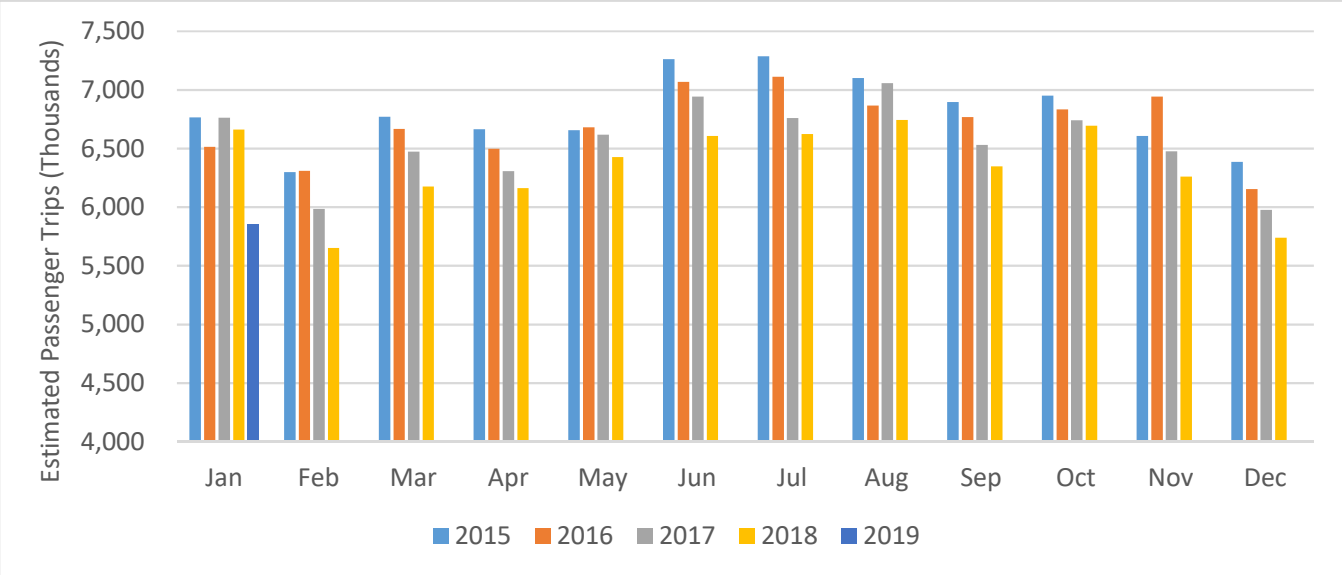
Executive Summary

Estimated passenger trips decreased 12.2 percent in January 2019 compared to January 2018. January 2019 had the same number of Saturdays, Sundays, and holidays compared to January 2019. The following factors influenced ridership in January 2019:

- The Partial Federal Government Shutdown from December 22 to January 25
- The Polar Vortex extreme winter weather event on January 30 and 31, causing total passenger loads for the workweek beginning January 28 to be about 50 percent lower than previous weeks
- The lack of 10-Ride Ticket stockpiling in 2019 compared to 2018, due to there being no fare increase in 2019



Estimated passenger trips have decreased 4.1 percent in the last 12 months compared to the previous 12 months.

Table 1: Estimated Passenger Trips by Month [1]

[1] Values are rounded to the thousand. Change is calculated based on the unrounded values.

Figure 1: Estimated Passenger Trips by Month

For the 2018 budget year, Metra estimated total annual passenger trips to be 75.6 million. To track how well ridership is comparing to this budgeted amount, monthly estimates have been calculated by distributing the budgeted trips throughout the year based on the distribution in previous years. Unanticipated differences in holiday and special event travel are common explanations for variations between the monthly budget distribution and actual ridership. These effects are less pronounced at the quarterly and annual level. Table 2 shows the estimated monthly passenger trips compared to this distribution.

Table 2: Estimated vs. Budget Passenger Trips [1]

Month	Estimated Passenger Trips (Thousands)		Variance
	Budget (2019)	Actual (2019)	
Jan	6,400	5,850	-8.6%
Feb	5,700		
Mar	5,950		
1st Quarter	**18,050**		
Apr	6,450		
May	6,400		
Jun	6,360		
2nd Quarter	**19,210**		
Jul	6,830		
Aug	6,490		
Sep	6,530		
3rd Quarter	**19,850**		
Oct	6,500		
Nov	5,970		
Dec	5,990		
4th Quarter	**18,460**		
Total	**75,570**		

[1] Values are rounded to the thousand. Variance is calculated based on the unrounded values.

Ridership

Estimated ridership figures are based on the number of ticket sales multiplied by a standard ridership factor unique to each ticket type, in addition to the number of RTA Ride Free Permit passenger trips reported by conductors.

Estimated Passenger Trips by Line

Table 3 shows estimated passenger trips by line for the current month, the last three months, and the last 12 months. Estimated passenger trips decreased by 6.6 percent in the last three months compared to the previous year, and decreased 4.1 percent in the last 12 months compared to the previous year.

Estimated Passenger Trips by Fare Zone Pair

Table 4 shows estimated passenger trips by fare zone pair for the current month, the last three months, and the last 12 months.

- The long-term decline in No Zone Pair passenger trips is expected to continue as data collection improvements and the shift to the Ventra App cause fewer trips to be reported without a zone pair.
- In July 2018, year-long testing of the zone consolidation policy began. All tickets for Zones K through M were capped to the price of Zone J tickets. This caused an increase in passenger trips for Zone A-J, and a decrease for passenger trips for Zones A-K and A-M. There are no stations in Zone L.

Table 4: Estimated Passenger Trips by Fare Zone Pair [1]

Zone Pair	January (Thousands)			Last 3 Months (Thousands)			Last 12 Months (Thousands)

Estimated Passenger Trips by Ticket Type

Table 5 shows estimated passenger trips by ticket type for the current month, the last three months, and the last 12 months. Special event tickets and other data irregularities can affect month-to-month comparisons of passenger trips by ticket type:

- Stockpiling of 10-Ride Tickets occurred in advance of the 2018 fare increase. As a result, 10-Ride Ticket passenger trips are overstated in January 2018 compared to January 2019.

Table 5: Estimated Passenger Trips by Ticket Type [1]

Ticket Type	January (Thousands)					Last 3 Months (Thousands)

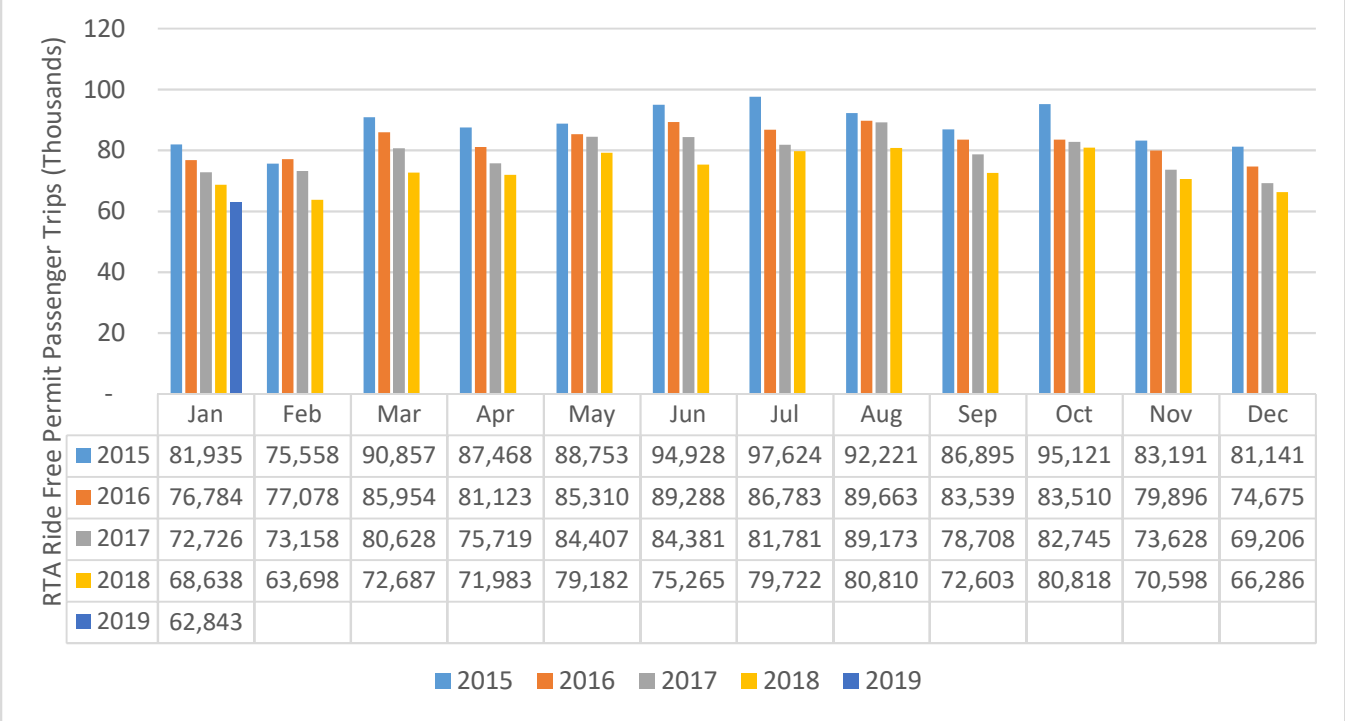
[1] Values are rounded to the thousand. Change and share are calculated based on the unrounded values.
[2] Passenger trip totals differ from those presented in other tables in this report, due to adjustments made for group sales, marketing sales, and refunds.

Passenger Loads

Table 6 shows the average daily passenger loads by service period for the current month, the last three months, and the last 12 months, derived from conductor counts. Average peak-peak direction passenger loads decreased by 10.1 percent in the current month, and average total weekday passenger loads decreased by 10.3 percent in the same period.

Table 6: Average Daily Passenger Loads [1]



Service Period	January (Thousands)			Last 3 Months (Thousands)			Last 12 Months (Thousands)

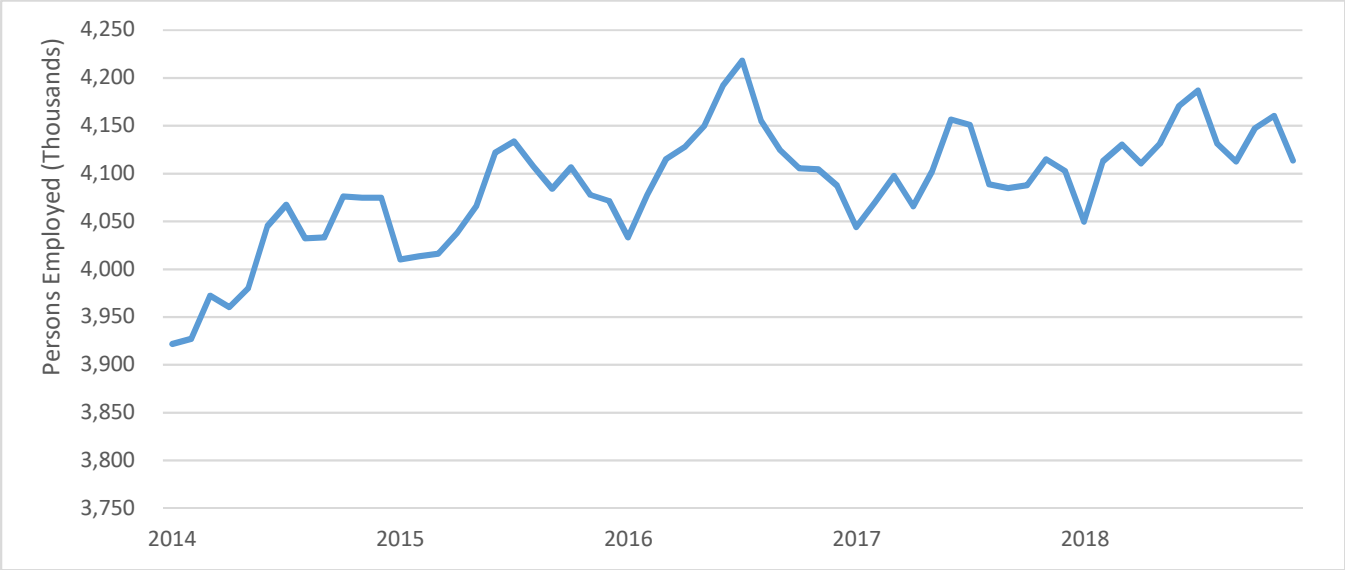
2019	8,420	-	-	-	-	-	-	-	-	-	-	-



Ridership Influences

Many different factors (such as the employment, gas prices, road construction, service changes, and special events) can influence ridership trends.

Employment

Figure 5 shows the number of persons employed in the six-county Chicago Region. The number of persons employed increased 0.3 percent in December 2018 compared to December 2017. Employment data for January 2019 will be released in March 2019.

Figure 5: Persons Employed in the Chicago Region [1]

Change 2018-2019	**-$0.52**												**-$0.52**

Source: Bureau of Labor Statistics

Road Construction

No new roadway construction projects of regional significance began in January. The following projects are either under construction or were recently completed:

- Jane Byrne Interchange Reconfiguration – In 2015, work began on a major reconfiguration of the Jane Byrne Interchange. Work is expected to continue through 2022.

Service Changes

On January 28, a new schedule was implemented on the Rock Island Line. The new schedule includes changes necessary for the new Positive Train Control (PTC) safety system, as well as some service enhancements such as new express trains.

Special Events and Promotions

Metra offered $10 unlimited ride passes valid on New Year's Eve and New Year's Day, Dec 31 and Jan 1.

Family Fares were in effect on January 1.

Weather

The Chicago region experienced a Polar Vortex extreme winter weather event on January 30 and 31. Metra operated on a modified schedule on January 30 and 31 due to the extreme cold. Total passenger loads data shows that ridership was depressed for the entire workweek beginning January 28, about 50 percent lower compared to the weeks of January 7-11 and January 14-18.

Metra Electric Line service was suspended on January 30 and 31 due to the extreme cold and a Canadian National freight train derailment.

Passenger Revenue and Ticket Sales

Changes in fares, ticket policies, and ticket sales channels can affect passenger revenue and ticket sales trends:

- The Ventra App was introduced in November 2015, causing a long-term shift from ticket agent and conductor sales to sales through the app.
- In June 2018, Metra stopped selling Monthly Passes and 10-Ride Tickets from vending machines at 15 non-downtown stations on the Metra Electric Line.
- In June 2018, Metra ended its Ticket-by-Internet program.
- In July 2018, yearlong testing of the zone consolidation policy began. All tickets from Zone A to Zones K through M were capped at the price of Zone J tickets.
- In July 2018, select stations with perceived inconsistencies in distance from downtown were reassigned to closer zones. Ashland, Racine, West Pullman, Stewart Ridge and State Street stations moved from Zone D to C. On the Metra Electric mainline, the 83rd Street and 87th Street stations were moved from Zone C to B. On the Rock Island Beverly Branch, the 123rd Street Station was moved from Zone D to C.
- In December 2018, an update to the Ventra app ended the option for purchasing mobile tickets without creating a Ventra account.

Special event tickets and other data irregularities can affect month-to-month comparisons of passenger revenue and ticket sales figures:

- Stockpiling of 10-Ride Tickets occurred in advance of the 2017 and 2018 fare increases. As a result, 10-Ride Ticket passenger revenue and ticket sales were overstated in January 2018 and understated in subsequent months.

Passenger Revenue

Table 7 shows passenger revenue by line for the current month, the last three months, and the last 12 months.

Subject: Finance Docket No. 35081 – *Canadian Pacific Railway Company, et al. – Control – Dakota Minnesota & Eastern Railroad Corporation, et al.*

Dear Acting Secretary Quinlan:

Enclosed for filing in the above proceeding are an original and ten copies of the Public Version of Metra's Comments in Opposition to Proposed Transaction and Request for Conditions, and ten copies of the Highly Confidential Version of Metra Comments to be filed under seal pursuant to the terms of the Protective Order issued by the Board in this proceeding. Also enclosed is a disc containing an electronic copy of the Public Version of Metra's Comments.

Please acknowledge receipt of the above identified filings by date stamping the extra copies provided and return same to our messenger for our files.

Sincerely yours,

Robert P. vom Eigen

cc. Michael C Noland (w/Highly Confidential and Public Versions of Metra's Comments)
Parties of Record (w/ Public Version of Metra's Comments)
Counsel for Applicants (w/Three Copies of Highly Confidential Version of Metra's Comments)

While Metra owns the North and West Lines, the 1985 Trackage Agreement between CP and the Milwaukee Trustee, as supplemented and amended from time to time ("Metra/CP Trackage Agreement"), grants CP the right to dispatch these lines subject to the requirement to provide priority to Metra's schedules and operations, and to insure that there be no material interference with that service. CP dispatches these lines from the Soo Line building in Minneapolis, MN.

The on-time performance average on the two CP dispatched Metra routes over the period of 2007 has been worse than Metra's system-wide average, and worse than each of the four lines Metra dispatches. The North Line has the third worst on-time performance record over that period of any of Metra's lines. The average number of "delayed" trains, defined as trains 6 or more minutes late, on the North Line are the second highest on the Metra system.

Average On-time Percentage 2002-2007[6]

Metra System-Wide	- 96 5%
Metra Electric – ML	- 97.9%
Metra Electric – BI	- 98.7%
Metra Electric – SC	- 96.4%
CP – North Line	- 94.3%
CP – West Line	- 95.7%

Metra dispatches lines under its control through its Consolidated Control Facility ("CCF") located at 1501 South Canal Street in Chicago. Constructed in the early 1990's, this facility was intended to house personnel from Metra to dispatch lines over which Metra trains operate and for tower operators from those lines. At the CCF, Metra currently dispatches the two lines of the Rock Island District, the three lines of the Electric, and the North end of Metra's Southwest Service (between 21st Street and 74th Street). The CCF also houses the operator of

[6] These data are derived from the Table, attached hereto, as Exhibit B to these Comments, captioned "Annual Train Delays and On-Time Performance."

and North Lines, and that the agreements governing operations over these lines need to be amended to deal with these challenges.

Immediately upon receiving CP's Application Metra sought to negotiate amendments with CP to modify the Metra/CP Trackage Agreement and the ICE Chicago Trackage Rights Agreement to incorporate provisions to protect Metra service over the North Line that were satisfactory to DM&E and CP in 2003 for the West Line. After an initial meeting, CP refused to negotiate such amendments, thereby requiring this request for conditions to protect Metra's rail service. In the days prior to this filing, negotiations have resumed, but no resolution has been reached as of this filing.

Conditions Necessary to Protect Metra Service.

The existing agreements governing operations over the North and West Lines are not capable of addressing the risks to Metra service raised by CP's acquisition of DM&E. Recognizing that the STB cannot negotiate effective arrangements between Metra and CP, Metra requests that the following conditions be imposed on the approval of CP's application to control DM&E/IC&E:

(1) CP shall transfer to Metra the right to control and dispatch train operations over the North and West Lines out of Metra's Consolidated Control Center in Chicago;

(2) CP shall not commence operation of any PRB coal trains over the West or North Lines until Metra has completed construction of necessary capacity improvements as determined in accordance with the provisions equivalent to those contained in the CP/Metra Trackage Rights Agreement and the ICE Chicago Trackage Rights Agreement which are necessary to preserve Metra's service capabilities over the North and West Lines;

(3) The expense of such capacity improvements shall be borne solely by CP, to the extent they are required solely for the movement of such coal trains or other CP/DM&E/IC&E trains.

(4) CP shall pay Metra (i) the Excess Train Charge or Coal Train Charge, as specified in §3.1 and §3.2 of the ICE Chicago Trackage Rights Agreement, adjusted

III. Transfer of Dispatching Control is the Only Way that Metra Can Enforce Provisions to Protect its Service.

Only through dispatching the West and North lines can Metra know what trains are being admitted to the lines on a real time basis. Metra cannot count upon magazine articles to disclose movements that CP fails to disclose The existing agreements have audit provisions to permit verification of periodic data provided by CP. However, that is a post-facto remedy that will not permit a pro-active monitoring of changes in traffic patterns that will permit Metra to anticipate looming challenges to the capacity of these lines and to prevent deterioration of the quality of its commuter rail services on a daily basis.

CANADIAN PACIFIC RAILWAY LIMITED; CANADIAN PACIFIC RAILWAY COMPANY; SOO LINE RAILROAD COMPANY; CENTRAL MAINE & QUEBEC RAILWAY US INC.; DAKOTA, MINNESOTA & EASTERN RAILROAD CORPORATION; AND DELAWARE & HUDSON RAILWAY COMPANY, INC. – CONTROL – KANSAS CITY SOUTHERN, THE KANSAS CITY SOUTHERN RAILWAY COMPANY, GATEWAY EASTERN RAILWAY COMPANY, AND THE TEXAS MEXICAN RAILWAY COMPANY

OBJECTIONS AND RESPONES BY COMMUTER RAIL DIVISION OF THE REGIONAL TRANSPORTATION AUTHORITY D/B/A METRA TO INTERROGATORIES, REQUESTS FOR PRODUCTION OF DOCUMENTS, AND REQUESTS FOR ADMISSION FORM APPLICANTS CANADIAN PACIFIC RAILWAY LIMITED*, ET AL.*

The Commuter Rail Division of the Regional Transportation Authority d/b/a Metra ("Metra"), by and through counsel, hereby responds and objects as follows to the First Set of Interrogatories, Requests for Production of Documents, and Requests for Admission served March 25, 2022 ("Discovery Requests"), submitted by Canadian Pacific Railway Limited, Canadian Pacific Railway Company, Soo Line Railroad Company, Central Maine & Quebec Railway US Inc., Dakota, Minnesota & Eastern Railroad Corporation, and Delaware and Hudson Railway Company, Inc. (collectively, "Canadian Pacific" or "CP") and Kansas City Southern, The Kansas City Southern Railway Company, Gateway Eastern Railway Company, and The Texas Mexican Railway Company (collectively, "KCS"; together with CP, the "Applicants").

RESPONSES TO INTERROGATORIES

Interrogatory No. 1:

Describe Metra's dispatching practices for any line for which it dispatches both commuter and freight trains, including but not limited to (i) whether Metra's dispatchers on such lines are available 24 hours a day to dispatch freight trains overnight, (ii) how many freight trains a day Metra dispatches on such lines, (iii) Metra's dispatchers' interaction process with other Class I railroads that have dispatching authority over adjacent or nearby subdivisions, and (v) which subdivisions Metra's dispatchers monitor and factor into their dispatching decisions.

Response to Interrogatory No. 1:

Metra specifically objects to this request on the basis that it is unduly burdensome and not proportional to the scope of the issues raised in this proceeding, and to the extent that it requests information that is not in Metra's possession or would be unduly burdensome for Metra to produce.

Subject to and without waiving the above General Objections and specific objections raised, Metra responds by stating that its dispatchers currently dispatch both passenger and freight trains on the Metra's Rock Island Line and portions of the Southwest Service Line. In addition, Metra's dispatchers working under the supervision of CP's dispatching control station dispatch freight train traffic operating on Metra's MD-W and MD-N on CN's Waukesha Subdivision where it crosses MD-W. Metra's dispatchers on these lines are available 24 hours a day to dispatch freight trains overnight.

On Metra's Rock Island Line, Metra dispatches approximately four daily freight trains—two CSX trains and two Iowa Interstate trains. Metra's dispatching of this line also requires it to

handle approximately 8-10 daily freight train crossings at the Canadian National Railway's Leighton Subdivision crossing east of Joliet.

On Metra's Southwest Service Line, Metra dispatches one Norfolk Southern train along the entire length of the line, as well as approximately 8 daily Norfolk Southern freight trains on this line between a connection at 59th Street and a connection with the BRC at 74th Street, and between 4 and 8 daily trains on another segment between Chicago Ridge and Landers. Metra's dispatchers are also involved in handling approximately 20 daily trains on 5 crossings along the segment between 59th Street and 74th Street.

On Metra's MD-N Line at Control Tower A5, Metra's dispatchers control dispatching under supervision and authority of CP's dispatching center and dispatch all freight and passenger traffic crossing that tower for both CP's C&M and Elgin Subdivisions. On Metra's MD-W Line at Control Tower B12, Metra's dispatchers control dispatching under supervision and authority of CP's dispatching center and dispatch all freight and passenger traffic crossing that tower for CP's Elgin Subdivision as well as the Galewood East and Cicero West (connection with Belt Railway Company of Chicago ("BRC")) Control Points. Under CP dispatcher authority, they also control movements in and out of the east end of Bensenville Yard through the Control Point Franklin Park West, as well as movements to and from the Indiana Harbor Belt Railway at the Control Point Edgington.

Interrogatory No. 2:

Identify which railroad's freight trains are purportedly obstructing Metra's trains in the social media posts in Figure 4 of Metra's Comments and Request for Conditions filed on March

15, 2022, and the direction of travel and track on which the depicted Metra and freight trains were operating. Produce all Documents in support of that identification.

Response to Interrogatory No. 2:

Metra specifically objects to this request on the basis that it requests information that is not in Metra's possession or would require Metra to conduct unduly burdensome additional research.

Subject to and without waiving the above General Objections and specific objections raised, Metra responds by stating that Metra does not possess this information.

Interrogatory No. 3:

Describe in detail each instance in which Greg Godfrey and his staff allegedly "witnessed CP dispatchers who [were] able to prioritize or avoid delay to Metra being directly told by senior management to move CP trains, regardless of the impact on the network" and that "sometimes Metra train dispatchers are even forced and required by CP to follow these instructions to display signals for freight trains ahead of Metra trains" as asserted on page six of the Verified Statement of Greg Godfrey (Exhibit E to Metra's Comments and Request for Conditions filed on March 15, 2022) and, for each such instance, identify (i) the date and time it occurred and (ii) the Metra employees, the CP dispatchers and the CP senior management personnel who were allegedly involved.

Response to Interrogatory No. 3:

Metra specifically objects to this request on the basis that it is unduly burdensome and not proportional to the scope of the issues raised in this proceeding, and to the extent that it

requests information that Metra has already provided to Applicants, that is not in Metra's possession, or would be unduly burdensome for Metra to produce.

Subject to and without waiving the above General Objections and specific objections raised, Metra responds by stating that it has already produced this information. These instances are discussed in detail in the documents already provided to Applicants attached to Metra's Comments. *See*, *e.g.*, METR-7, Ex. B-2 at 204, 252-53, 256, 291, 331.

Interrogatory No. 4:

Identify the "daily operations decisions" that CP dispatchers make which "clearly favor their freight operations, both in and outside of the peak-periods" as asserted on page 10 of the Verified Statement of Richard P. Oppenheim (Exhibit B to Metra's Comments and Request for Conditions filed on March 15, 2022), including but not limited to specific examples and the dates and times of those actions.

Response to Interrogatory No. 4:

Metra specifically objects to this request on the basis that it is unduly burdensome and not proportional to the scope of the issues raised in this proceeding, and to the extent that it requests information that Metra has already provided to Applicants, that is not in Metra's possession, or would be unduly burdensome for Metra to produce.

Subject to and without waiving the above General Objections and specific objections raised, Metra responds by stating it has already provided this information to Applicants. This is discussed in the documents already provided to Applicants attached to Metra's Comments. *See*, *e.g.*, METR-7, Ex. B at 11-12; *id*. Ex. B-2 at 1-333. Further information regarding specific

examples with dates and times is also provided in the additional documentation produced in response to Applicants' Request for Production No. 4, below.

Interrogatory No. 5.:

Explain in detail how CP "could schedule night service to avoid interference with Metra's trains" as asserted on page 10 of the Verified Statement of Richard P. Oppenheim (Exhibit B to Metra's Comments and Request for Conditions filed on March 15, 2022), including but not limited to how such a practice would work under current operating procedures.

Response to Interrogatory No. 5:

Metra specifically objects to this request on the basis that it is unduly burdensome and not proportional to the scope of the issues raised in this proceeding, and to the extent that it requests information that Metra has already provided to Applicants, that is not in Metra's possession, or would be unduly burdensome for Metra to produce.

Subject to and without waiving the above General Objections and specific objections raised, Metra responds by stating that, as discussed in Metra's Comments, Metra operates dozens of passenger trains on MD-W and MD-N. None of Metra's inbound trains operate scheduled service for over seven hours between 9:45 pm and 4:52 am during the week, and none of its outbound trains operate scheduled service for over six hours between 12:05 am and 6:21 am during the week. *See* https://schedules.metrarail.com/pdf/alternative/MD-W.pdf and https://schedules.metrarail.com/pdf/alternative/MD-N.pdf. These windows, which are similar during the weekend, constitute a significant proportion of time available for freight movements that are not appropriate for passenger service. Typically, the only CP freight train that operates

during this night-time window on the C&M Sub is a 471 (now relabeled 255) train. On the Elgin Subdivision, sporadic movements between Bensenville Yard and the BRC connection at Cicero West could easily be augmented with additional freight traffic. The rest of CP's freight trains regularly operate during the times when Metra trains also operate.

Interrogatory No. 6:

Describe in detail each instance in which CP dispatchers have allegedly "ignored or disabled the hot line, leaving [Mr. Oppenheim] and [his] staff without expeditious recourse when CP dispatching decisions are either the cause of CP-related issues on Metra's lines or CP-related issues could be resolved or mitigated through dispatching" as asserted on page 17 of the Verified Statement of Richard P. Oppenheim (Exhibit B to Metra's Comments and Request for Conditions filed on March 15, 2022) and, for each such instance, identify (i) the date and time it occurred and (ii) the Metra employees and CP employees who were allegedly involved.

Response to Interrogatory No. 6:

Metra specifically objects to this request on the basis that it is unduly burdensome and not proportional to the scope of the issues raised in this proceeding, and to the extent that it requests information that Metra has already provided to Applicants, that is not in Metra's possession, or would be unduly burdensome for Metra to produce.

Subject to and without waiving the above General Objections and specific objections raised, Metra responds by stating that Metra has already provided this information to Applicants. This is discussed in detail in the documents already provided to Applicants attached to Metra's Comments. *See, e.g.*, METR-7, Ex. B-2 at 29, 252-54.

Re: Finance Docket No. 36514, *Canadian National Railway Company, et al.—Control—Kansas City Southern, et al.*

Dear Ms. Brown,

Canadian National Railway Company and its rail operating subsidiaries (collectively, "CN") respectfully submit this letter to inform the Board that the May 21, 2021 Agreement and Plan of Merger between CN and Kansas City Southern ("KCS") has been terminated by KCS. As a result, CN is withdrawing the Notice of Intent to File an Application that it submitted in this docket on April 20, 2021 (CN-1).

CN appreciates the broad array of stakeholders who wrote more than 1,750 letters of support for a CN-KCS combination. Many of those stakeholders supported a CN-KCS combination because of the unprecedented commitments that CN offered in order to provide shippers with improved route choices, concrete open gateway commitments, and enhanced competitive opportunities. CN firmly believes that no Class I merger with KCS should be approved without similar commitments to enhance competition and protect the public interest.

KCS has entered a new merger agreement with Canadian Pacific Railway Company ("CP") at a higher purchase price than the prior CP-KCS

merger agreement, which KCS terminated on May 21, 2021. Yesterday CP and KCS filed a notice of their intent to file an application for approval of this new proposed transaction. CN will participate actively in that proceeding to ensure that all regulatory rules are applied fairly and that any Board proceeding in connection with the CP-KCS combination ensures that it will be pro-competitive and in the public interest.

Respectfully submitted,

/s/ Raymond A. Atkins

CN INVESTOR DECK (APRIL 2021)

Superior Proposal to Combine With Kansas City Southern

INVESTOR PRESENTATION
April 2021

Forward-Looking Statements

Certain statements included in this presentation constitute "forward-looking statements" within the meaning of the United States Private Securities Litigation Reform Act of 1995 and under Canadian securities laws, including statements based on management's assessment and assumptions and publicly available information with respect to KCS, regarding the proposed transaction between CN and KCS, the expected benefits and synergies of the proposed transaction, future opportunities for the combined company and future shareholder returns. By their nature, forward-looking statements involve risks, uncertainties and assumptions. The Company cautions that its assumptions may not materialize and that current economic conditions render such assumptions, although reasonable at the time they were made, subject to greater uncertainty. Forward-looking statements may be identified by the use of terminology such as "believes," "expects," "anticipates," "assumes," "outlook," "plans," "targets," or other similar words.

Forward-looking statements are not guarantees of future performance and involve risks, uncertainties and other factors which may cause actual results, performance or achievements of CN, or the combined company, to be materially different from the outlook or any future results, performance or achievements implied by such statements. Accordingly, readers are advised not to place undue reliance on forward-looking statements. Important risk factors that could affect the forward-looking statements in this presentation include, but are not limited to: the outcome of any possible transaction between CN and KCS, including the possibility that a transaction will not be agreed to or that the terms of any definitive agreement will be materially different from those described; uncertainties as to whether KCS will cooperate with CN regarding the proposed transaction; the parties' ability to consummate the proposed transaction; the conditions to the completion of the proposed transaction; that the regulatory approvals required for the proposed transaction may not be obtained on the terms expected or on the anticipated schedule or at all; CN's indebtedness, including the substantial indebtedness CN expects to incur and assume in connection with the proposed transaction and the need to generate sufficient cash flows to service and repay such debt; CN's ability to meet expectations regarding the timing, completion and accounting and tax treatments of the proposed transaction; the possibility that CN may be unable to achieve expected synergies and operating efficiencies within the expected time-frames or at all and to successfully integrate KCS's operations with those of CN; that such integration may be more difficult, time-consuming or costly than expected; that operating costs, customer loss and business disruption (including, without limitation, difficulties in maintaining relationships with employees, customers or suppliers) may be greater than expected following the proposed transaction or the public announcement of the proposed transaction; the retention of certain key employees of KCS may be difficult; the duration and effects of the COVID-19 pandemic, general economic and business conditions, particularly in the context of the COVID-19 pandemic; industry competition; inflation, currency and interest rate fluctuations; changes in fuel prices; legislative and/or regulatory developments; compliance with environmental laws and regulations; actions by regulators; the adverse impact of any termination or revocation by the Mexican government of Kansas City Southern de México, S.A. de C.V.'s Concession; increases in maintenance and operating costs; security threats; reliance on technology and related cybersecurity risk; trade restrictions or other changes to international trade arrangements; transportation of hazardous materials; various events which could disrupt operations, including illegal blockades of rail networks, and natural events such as severe weather, droughts, fires, floods and earthquakes; climate change; labor negotiations and disruptions; environmental claims; uncertainties of investigations, proceedings or other types of claims and litigation; risks and liabilities arising from derailments; timing and completion of capital programs; and other risks detailed from time to time in reports filed by CN with securities regulators in Canada and the United States. Reference should also be made to Management's Discussion and Analysis in CN's annual and interim reports, Annual Information Form and Form 40-F, filed with Canadian and U.S. securities regulators and available on CN's website, for a description of major risk factors relating to CN.

Forward-looking statements reflect information as of the date on which they are made. The Company assumes no obligation to update or revise forward-looking statements to reflect future events, changes in circumstances, or changes in beliefs, unless required by applicable securities laws. In the event CN does update any forward-looking statement, no inference should be made that CN will make additional updates with respect to that statement, related matters, or any other forward-looking statement.

Additional Information

No Offer or Solicitation

This presentation does not constitute an offer to sell or the solicitation of an offer to buy any securities or a solicitation of any vote or approval, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offer of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

Additional Information and Where to Find It

This presentation relates to a proposal which CN has made for an acquisition of Kansas City Southern. In furtherance of this proposal and subject to future developments, CN (and, if a negotiated transaction is agreed, KCS) may file one or more registration statements, proxy statements, tender offer statements or other documents with the U.S. Securities and Exchange Commission ("SEC") or applicable securities regulators in Canada. This presentation is not a substitute for any proxy statement, registration statement, tender offer statement, prospectus or other document CN and/or KCS may file with the SEC or applicable securities regulators in Canada in connection with the proposed transactions.

INVESTORS AND SECURITY HOLDERS ARE URGED TO READ THE PROXY STATEMENT(S), REGISTRATION STATEMENT(S), TENDER OFFER STATEMENT, PROSPECTUS AND ANY OTHER RELEVANT DOCUMENTS FILED WITH THE SEC OR APPLICABLE SECURITIES REGULATORS IN CANADA CAREFULLY IN THEIR ENTIRETY IF AND WHEN THEY BECOME AVAILABLE BECAUSE THEY WILL CONTAIN IMPORTANT INFORMATION ABOUT CN, KCS AND THE PROPOSED TRANSACTIONS. Any definitive proxy statement(s), registration statement or prospectus(es) and other documents filed by CN and KCS (if and when available) will be mailed to stockholders of CN and/or KCS, as applicable. Investors and security holders will be able to obtain copies of these documents (if and when available) and other documents filed with the SEC and applicable securities regulators in Canada by CN free of charge through at www.sec.gov and www.sedar.com. Copies of the documents filed by CN (if and when available) will also be made available free of charge by accessing CN's website at www.cn.ca.

Participants

This presentation is neither a solicitation of a proxy nor a substitute for any proxy statement or other filings that may be made with the SEC and applicable securities regulators in Canada. Nonetheless, CN and its directors and executive officers and other members of management and employees may be deemed to be participants in the solicitation of proxies in respect of the proposed transactions. Information about CN's executive officers and directors is available in its 2021 Management Information Circular, dated March 9, 2021, as well as its 2020 Annual Report on Form 40-F filed with the SEC on February 1, 2021, in each case available on its website at www.cn.ca/investors/ and at www.sec.gov and www.sedar.com. Additional information regarding the interests of such potential participants will be included in one or more registration statements, proxy statements, tender offer statements or other documents filed with the SEC and applicable securities regulators in Canada if and when they become available. These documents (if and when available) may be obtained free of charge from the SEC's website at www.sec.gov and www.sedar.com, as applicable.

Non-GAAP Measures

CN reports its financial results in accordance with United States generally accepted accounting principles (GAAP). CN also uses non-GAAP measures in this presentation that do not have any standardized meaning prescribed by GAAP, including constant currency, free cash flow, and adjusted debt-to-adjusted EBITDA multiple. These non-GAAP measures may not be comparable to similar measures presented by other companies. For further details of these non-GAAP measures, including a reconciliation to the most directly comparable GAAP financial measures, refer to the Company's website, Fourth Quarter and Full Year Results at www.cn.ca/financial-results. This presentation also includes certain forward looking non GAAP measures (Adjusted Diluted EPS, Adjusted EBITDA and a leverage ratio being Adjusted Debt to Adjusted EBITDA). It is not practicable to reconcile, without unreasonable efforts, these forward looking measures to the most comparable GAAP measures (diluted EPS, Net income, and long term debt to net income ratio, respectively), due to unknown variables and uncertainty related to future results. Please see note on Forward Looking Statements above for further discussion.

All amounts in this presentation are expressed in United States dollars, unless otherwise noted. All references to the "Company" are to CN.

CN's Superior Proposal to Combine With KCS

Higher Premium, More Upfront Cash	✓ Proposal of $325 per share; 21% premium to the CP proposal (1) ✓ $200 in cash and 1.059 CN shares for each KCS share ✓ KCS shareholders will participate in the upside and value creation
Best in Class Combined Network, More Synergies	✓ Combined revenue of $13.6B and Adj. EBITDA of $6.8B (pre-synergies) (2)(3) ✓ Establishes the premier Canada-U.S.-Mexico railway network ✓ Significant synergies mainly driven by ESG-positive conversion of truck to rail ✓ Bringing together two exceptional, talented, high performing teams
Lower Execution Risk	✓ Fully committed financing ✓ Plain vanilla voting trust structure ✓ No CN shareholder approval requirement ✓ Continue operating under the KCS name in the U.S. and Mexico

Better bid. Better partner. Better railway. Best solution.

(1) Based on CN and CP closing NYSE share prices of US$118.13 and US$365.37, as of April 19, 2021
(2) Based on revenue for the years ended December 31, 2020, from KCS public disclosure. CAD figures converted to USD at FX rate of 0.799 as of April 19, 2021.
(3) Please see the heading Non-GAAP Measures in this presentation

CN-KCS is Unique, Highly Strategic, and Value Accretive

CN + Kansas City Southern Lines

- **Premier Canada-U.S.-Mexico railway network**
- **Unparalleled stakeholder benefits: Safer, Faster, Cleaner, Stronger**
- **Accelerate ESG-driven growth and enhanced choice for the customer**
- **EBITDA synergies approaching $1B** – preliminary estimate (1)
- **Strong balance sheet with rapid deleveraging profile**
- **Expected to be highly value accretive to all shareholders** (2)

Creating The North American railway for the 21st century

(1) Management preliminary estimates based on public information

(2) The combination is expected to be accretive to CN's Adjusted Diluted EPS, excluding incremental transaction-related amortization, in the first full year following CN's acquisition of control of KCS, and is expected to generate double-digit accretion upon the full realization of synergies thereafter. Please see the heading Non-GAAP Measures in this presentation.

CN's Foundation of Excellence and Core Strengths

- ✓ **Precision Scheduled Railroading pioneer;** first to champion and integrate PSR across our full network
- ✓ **The first and leading North American railway,** with a deep and rich history of operating in the U.S.
- ✓ **ESG leadership**; the only Class I in Dow Jones Sustainability World Index
- ✓ **Culture of safety, efficiency, integrity, and diversity;** combined with leadership in advanced technology
- ✓ **Strong balance sheet** and disciplined capital allocation
- ✓ **Long-standing acquisition track record**; strategic, accretive, and successful integrations

Longstanding Track Record of Successful Acquisitions & Integrations

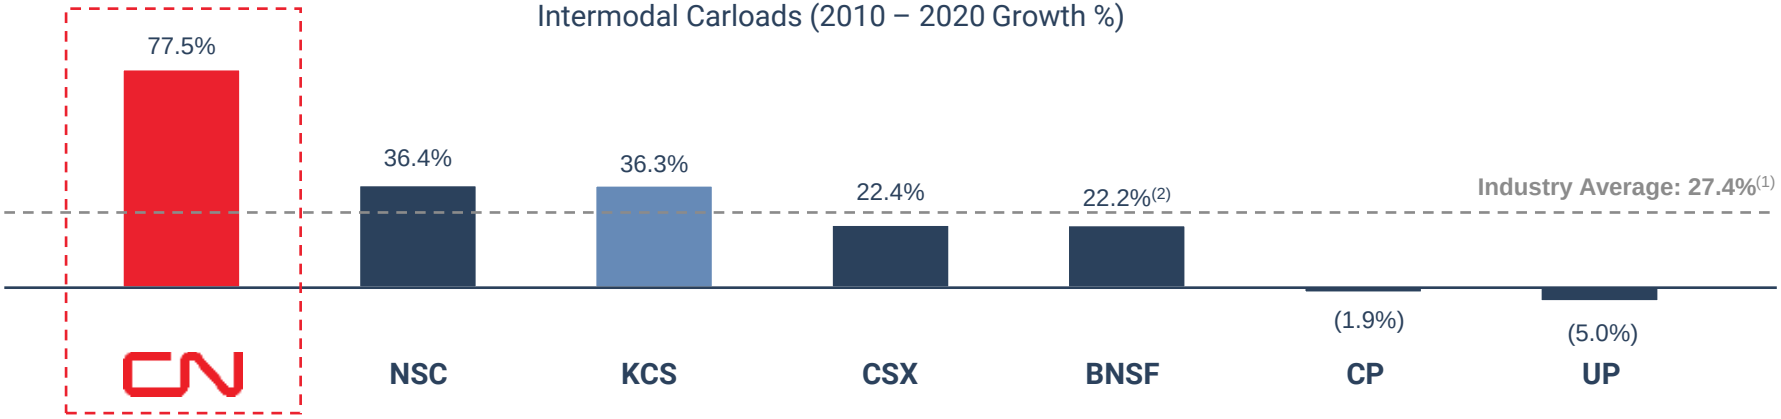
Unmatched North American rail network with a deep and rich history of operating in the U.S.

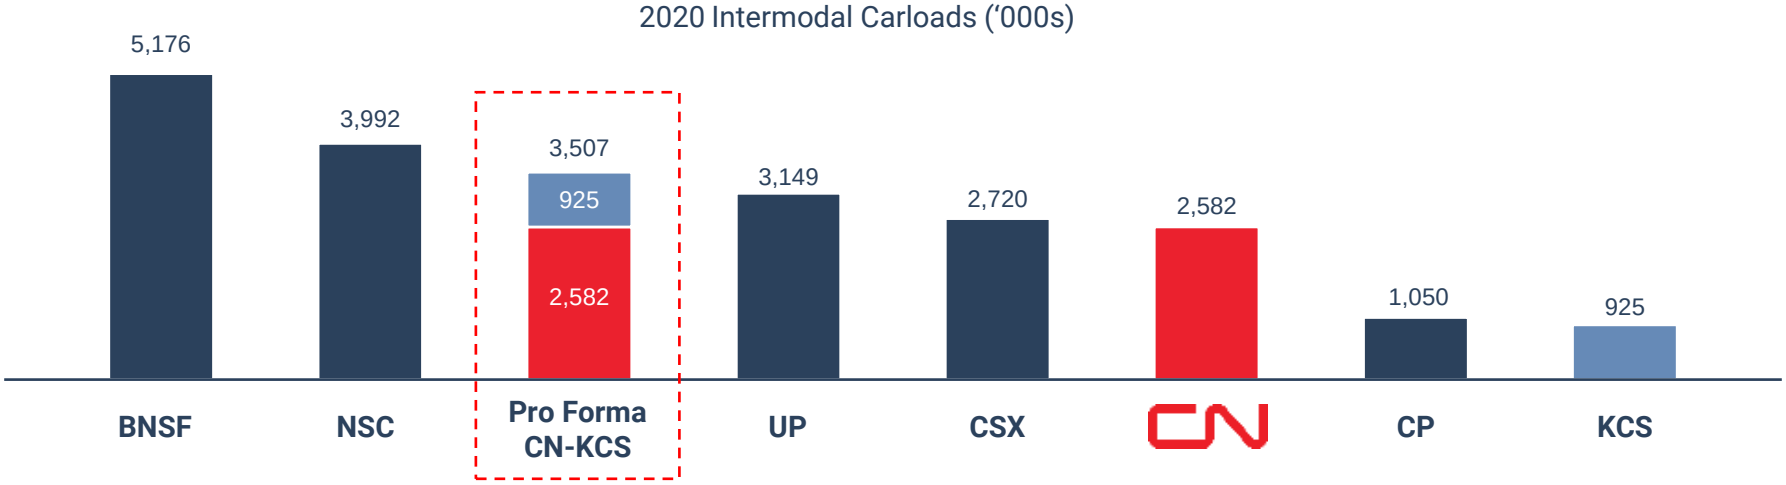
CN-KCS Will Create the End-to-End USMCA Rail Network

Unique Benefits of Combined Network (1)

- ✓ **Secure North American supply chain**
- ✓ **Deliver goods faster at lower cost**
- ✓ **Enhanced choice for customers**
- ✓ **ESG-positive truck to rail conversion**
- ✓ **Single owner-operated rail network**
  - New single line service from Laredo to Michigan & Ontario
  - KC to East Coast with no interchange
  - Leverage Prince Rupert expertise in Mexico's ports



Facilitating trade and powering economic prosperity across North America

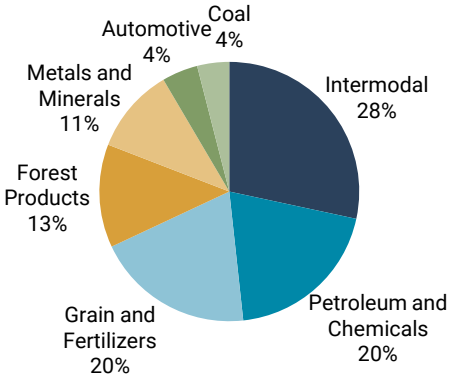


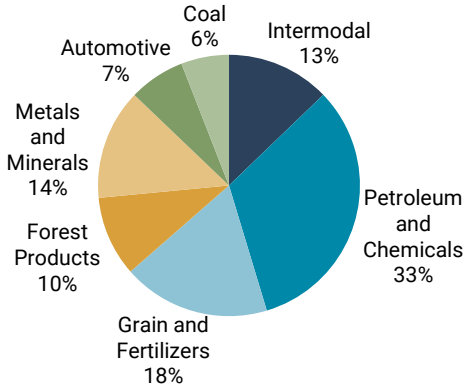
(1) Less than 1% of KCS route miles overlap with CN network

Combination Will Accelerate CN's Powerful Intermodal Growth

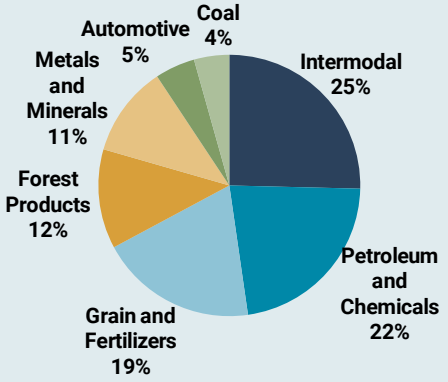
CN is the Fastest Growing Intermodal Network in North America

Combination Will Create One of the Largest Intermodal Networks in North America



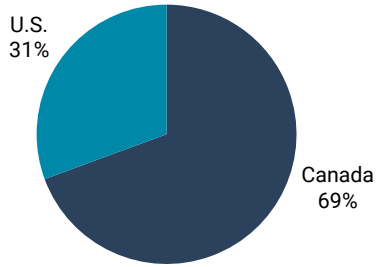


Note: Based on equity research, company websites and public filings
(1) 2010 – 2020 percent growth weighted average using 2020 intermodal carload volumes
(2) BNSF 2010 intermodal carload volume based on equity research

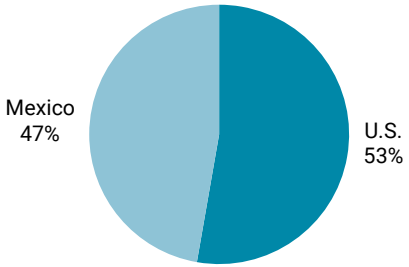


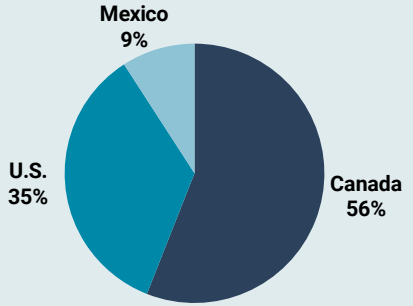
Enhanced Scale and Highly Diversified Customer Base

	CN	Kansas City Southern Lines (2)	Combined (3)
Revenue	$11.0B	+ $2.6B	$13.6B



Business Mix (1)





Geography (1)

Diversified by commodity & geography with minimal reliance on thermal coal and crude

Note: Based on 2020 figures. Figures in CAD converted to USD based on April 19, 2021 exchange rate of 0.799

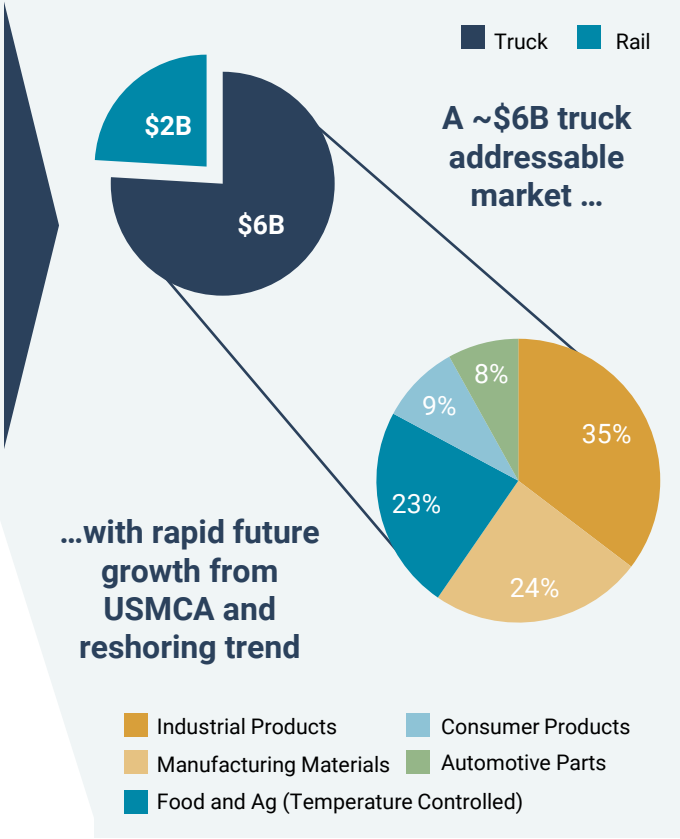
(1) Business mix percentage based on 2020 freight revenue; Geography based on 2020 total revenue

(2) KCS information based on public filings

(3) Pro forma revenue excludes expected synergies

Expected EBITDA Synergies Approaching $1B (1)

Conservative & preliminary estimates



New Revenue Opportunity

- ✓ ~$8B additional addressable market opportunity
- ✓ ~75% of new TAM opportunity from ESG-positive conversion of trucks to more fuel-efficient rail
- ✓ Service enhanced USMCA trade flows
- ✓ Minimal reliance on thermal coal and crude
- ✓ Growth to support job creation
- ✓ Stronger teams with one goal of customer success

Cost Efficiencies

- ✓ Fuel efficiency and lower costs
- ✓ Broader technology deployment
- ✓ Potential for purchasing economies of scale
- ✓ Core of cost savings will not be people-driven

Intermodal Opportunity Breakdown

Expected to achieve ~$1B annualized EBITDA synergies within three years of integration (1)

(1) Management preliminary estimates based on public information

ESG Leader in North American Transportation

CN's Focus Today

Environmental Protection

- Consuming 15% less locomotive fuel per Gross Ton Mile vs. average of its Class I railway peers
- Committing to reduce GHG emission intensity by 29% by 2030 (1)
- First North American railroad to formally support TCFD framework (2)

Active Social Responsibility

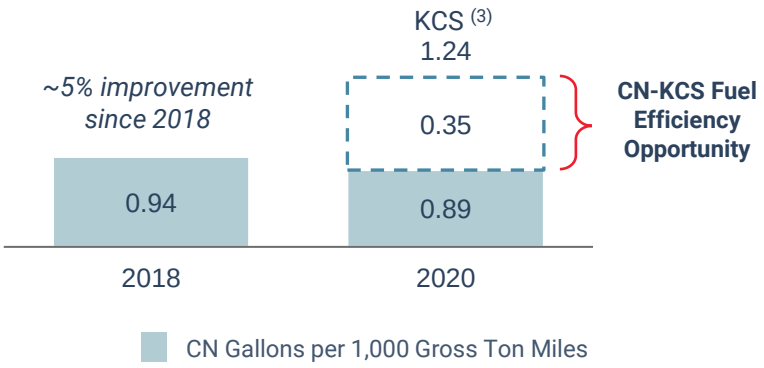
- Life Critical Rules reinforce CN's culture of safety-first
- Very strong community and stakeholder engagement culture
- Signatory to Catalyst Accord 2022 to accelerate gender diversity initiatives

Best-in-Class Governance

- Executive compensation aligned with ESG performance
- Best in class corporate governance and CN Board to achieve gender parity of independent directors at AGM

Recognition

MEMBER OF Dow Jones Sustainability Indices In Collaboration with RobecoSAM



CDP A LIST 2020 CLIMATE

2021 GLOBAL100 *Corporate Knights*

Rail is Significantly More Efficient Than Truck

75%	GHG reduction moving freight by rail vs. truck
4-5x	More fuel efficient than truck
300+ Trucks	Replaced by a single freight train

Best-in-Class Fuel Efficiency Across a Larger Network

(1) tCO_2e/million revenue tonne kilometers, based on 2015 levels
(2) Task Force on Climate-related Financial Disclosure
(3) KCS information based on public filings

CN's Advanced Technology Applied to a Larger Rail Network

Autonomous Track Inspection Program *(FRA approved)* (1)

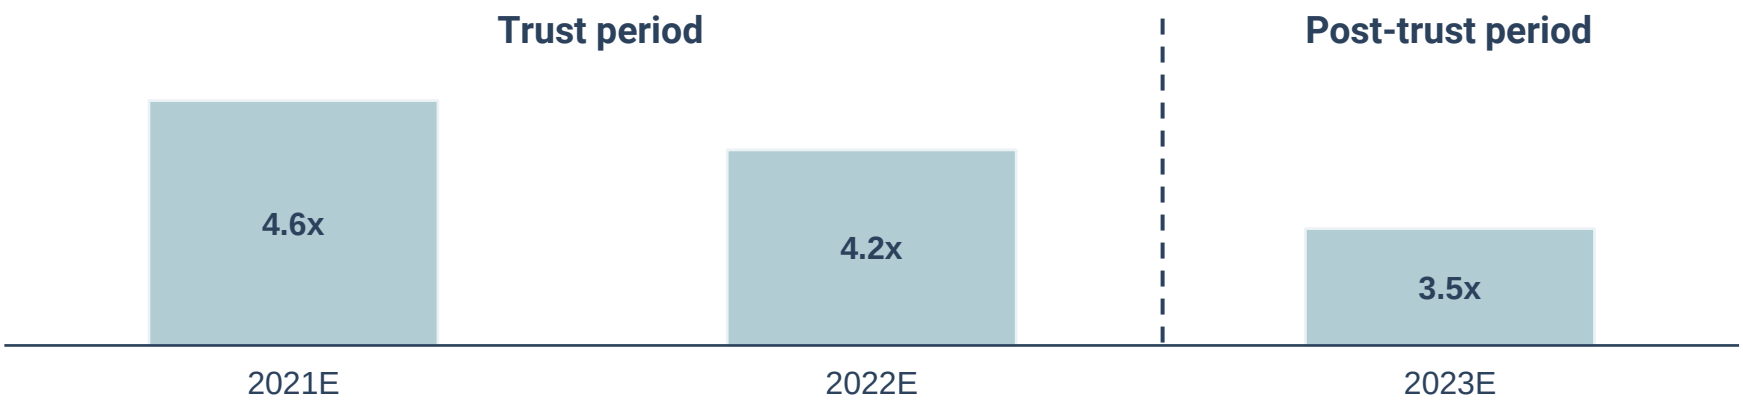
- Equipped with latest sensors and AI technology
- More accurate preventative maintenance
- Up to 20x more inspections, while unlocking capacity

Digitalized and Automated Train Inspection

- More frequent and better quality inspections
- Coupling high-resolution imaging hardware with powerful machine learning software

Connecting the Supply Chain

- APIs for customers to "track and trace" shipments in real-time (2)
- Reducing end-to-end cycle times



CN's technology will improve safety across KCS' ~7,100 route miles

(1) Federal Railroad Administration
(2) Application Programming Interface

Strong Free Cash Flow Supports Rapid Deleveraging

- Committed to maintaining a strong balance sheet and investment grade rating
- Pause share repurchases and re-evaluate as leverage reaches 2.5x - 3.0x (1)
- No change to current dividend policy

Pro Forma Leverage Targets (1)

Committed to a strong balance sheet and expect to maintain investment grade rating

(1) Represents adjusted debt-to-adjusted EBITDA multiple, assuming closing into trust at end of 2021. Please see the heading Non-GAAP Measures in this presentation.

Recap: Combination Will Create the Premier Railway for the 21st Century

Better Bid

Higher premium, more upfront cash, and lower execution risk

Better Partner

More (ESG-driven) synergies

Better Railway

Safer, Faster, Cleaner, Stronger

The Best Solution

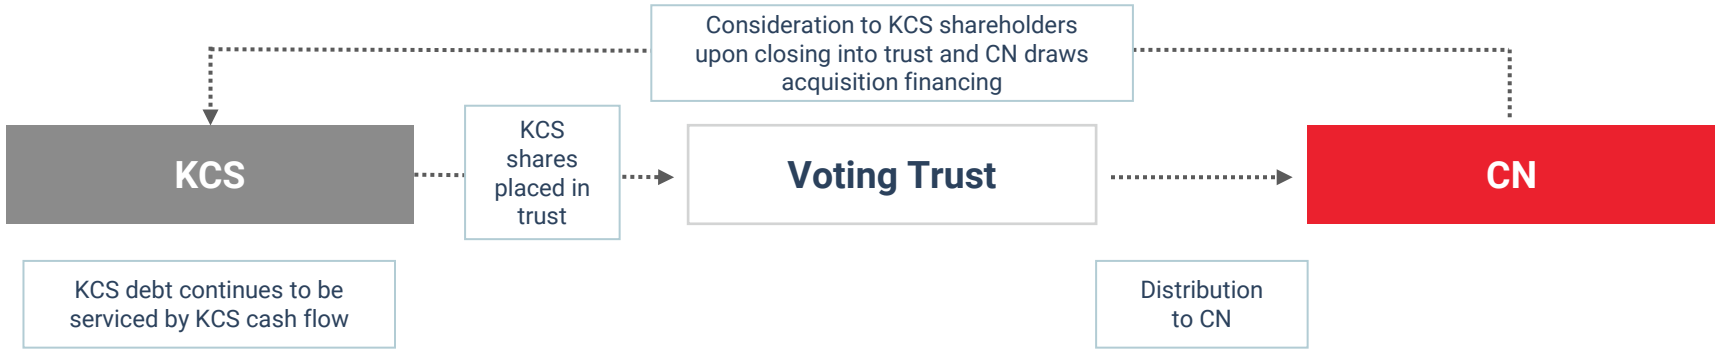
Better together – for the benefit of customers, communities and shareholders

A Superior Combination

Appendix: Voting Trust Structure

Plain vanilla structure identical to the CP proposal

Process Overview



Step 1

- Independent voting trust acquires shares of KCS
- KCS shareholder approval and customary closing conditions required for CN to acquire KCS shares, at which point CN would place shares into voting trust and provide consideration to KCS shareholders
- Structure separates KCS from CN control until STB authorization
- Existing management and Board of Directors steward KCS while in trust
- **Target close in 2H/2021**

Step 2

- Upon receiving control approval from the STB, the two companies would be integrated
- Begin realizing synergies
- **Target date for acquisition of control in 2H/2022**

Trust Structure

Appendix: Key Terms of the Proposed CN Transaction

Offer Price and Consideration	• CN is proposing to combine with KCS at a price of $325 per share • KCS shareholders to receive $200 in cash and 1.059 CN shares for each KCS share • Represents a premium of 21% to the implied value of the CP proposal (1) • Implies a total enterprise value of $33.7B • At closing, KCS common shareholders would own ~12% of the combined company
Financing	• Fully committed financing by J.P. Morgan and RBC Capital Markets of $19.3B • Committed to a strong balance sheet and expect to maintain investment grade rating
Governance and Related Matters	• Continue operating in the U.S. and Mexico under the Kansas City Southern name and brand • Kansas City will be headquarters of combined CN-KCS U.S. operations • Four KCS directors will join CN's board • CN's U.S. operating and maintenance facilities to remain
Approvals & Expected Closing	• CN is seeking to enter into merger agreement with KCS as soon as possible • Targeting closing into voting trust in 2H/2021, subject to receipt of approvals by KCS shareholders, U.S. Surface Transportation Board (STB) approval of the contemplated voting trust structure and Mexican regulatory approvals • STB control approval and acquisition of control targeted in 2H/2022 • No CN shareholder approval required

(1) Based on CN and CP closing NYSE share prices of US$118.13 and US$365.37, as of April 19, 2021

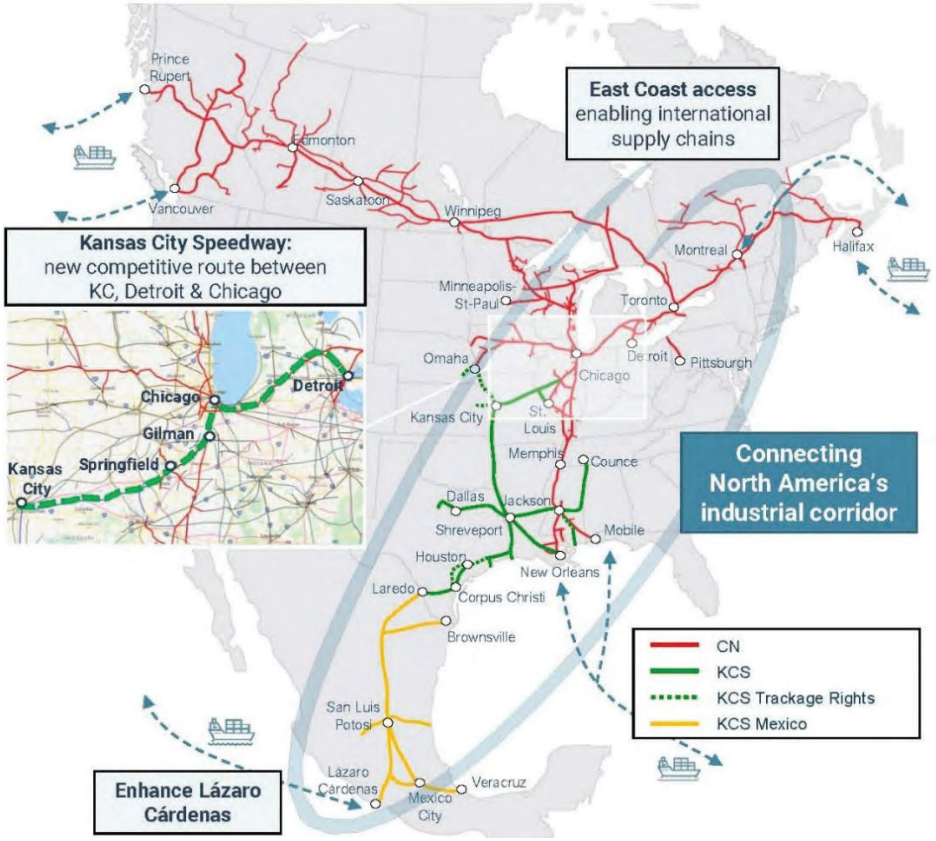
CANADIAN NATIONAL RAILWAY COMPANY, GRAND TRUNK CORPORATION, AND CN'S RAIL OPERATING SUBSIDIARIES
—CONTROL—
KANSAS CITY SOUTHERN, THE KANSAS CITY SOUTHERN RAILWAY COMPANY, GATEWAY EASTERN RAILWAY COMPANY, AND THE TEXAS MEXICAN RAILWAY COMPANY

VERIFIED STATEMENT OF JEAN-JACQUES RUEST

My name is Jean-Jacques Ruest. I am the President and Chief Executive Officer of Canadian National Railway Company ("CN"). I became President and CEO of CN in 2018. Previously, I was Executive Vice-President and Chief Marketing Officer. I joined CN in 1996 at the time it was privatized. Prior to this, I worked for 16 years at a major international chemical company. I earned a Masters in Business Administration in Marketing from Université de Montréal and a Bachelor of Science degree in applied chemistry from Université de Sherbrooke. I also completed the executive program of the University of Michigan Business School, and CN's Railroad MBA program.

The purpose of this Verified Statement is to explain some of the public interest benefits that we expect to see from a combination of CN and Kansas City Southern ("KCS"), which will benefit rail customers, port operators, employees, stakeholders, and the communities along our rail lines. These benefits are within reach now that KCS has agreed to combine with CN. We are excited about the possibilities of this transformative opportunity to create the North American railway for the 21st century—a single-line north-south rail network in the United States, Canada, and Mexico. This transaction will have

substantial benefits for our customers, who will be able to better compete in new markets thanks to longer single-line service, faster transit times, more effective equipment utilization, and fluid commercial interchanges. It will have substantial environmental benefits, since a key purpose of the transaction is to create more effective rail competition for north-south traffic flows, thus taking trucks off of congested highways and reducing greenhouse gas emissions. And CN will bring its commitment to capital investment to the KCS network, benefiting all customers who rely on that network.



Moreover, CN is committed to assuring the Surface Transportation Board ("STB") that our combined network is a pure "end-to-end" vertical combination. Some have noted that there is a small area—reflecting less than 1% of our combined network—where CN and KCS are the only two railroads to serve a small number of rail customers. With KCS agreeing to partner with us, CN has concluded that the cleanest and most pro-competitive solution is to divest the KCS line between New Orleans and Baton Rouge, the only area where the CN-KCS combination would reduce a small number of customers from two railroads to a single rail option. CN-KCS will retain local and overhead trackage rights to provide single-line service to customers on the KCS line. We will work to secure a suitable independent carrier to acquire the line, and seek STB approval for that divestiture in our Application.

With this commitment, CN-KCS will be a true "end-to-end" combination with zero competitive overlap and tremendous public benefits. But these public benefits can only be realized if the STB approves CN's proposed voting trust. We do not ask for approval lightly, and we appreciate that the STB will a permit voting trust where the public benefits outweigh the potential public harms. In the case of CN's voting trust, they clearly do. Furthermore, the use of the voting trust here is crucial to place the CN-KCS transaction on a level playing field for KCS shareholders in this unusual setting, particularly given the

Board's prior decision to approve the use of a voting trust by the other railroad that has sought to combine with KCS. Once the Board has assured itself that there is no public harm associated with the use of the voting trust in this circumstance and of the enormous potential public benefit from a CN-KCS combination, I would urge the STB to approve our plain vanilla voting trust arrangement.

I. CN-KCS Will Be a True "End-To-End" Combination, Given CN's Commitment to Divest the KCS Line Between Baton Rouge and New Orleans.

From the outset, our proposed combination with KCS offers the promise of tremendous public benefits by connecting the continent, promoting growth, and competing more aggressively with the trucking industry for long-haul movements. Rail customers will benefit from more seamless single-line service, but so will local communities, employees, and the environment from converting truck traffic from busy interstates and highways to rail. A combined CN-KCS route would also be shorter, faster, and more direct than rail or truck competitors, resulting in improved efficiency, enhanced competition and greater options for customers. The map on the next page illustrates the vertical, "end-to-end" nature of the combined networks.

Nevertheless, some seek to overplay the competitive significance of the short New Orleans-Baton Rouge segment where CN and KCS have overlapping parallel lines. We have been very transparent from when CN first announced our bid to acquire KCS that CN would propose solutions for the very limited number of customers that are served only by CN and KCS (so-called 2-to-1 customers) between Baton Rouge and New Orleans, where the overlap in parallel lines amounts to less than 1% of the total combined network. In particular, CN previously committed to the STB that if KCS chooses to partner with CN, CN would propose effective, pro-competitive solutions to ensure that no customer will become sole served as a result of the transaction.

With the authorization of the CN Board of Directors, and with their shared commitment, I want to personally commit to the STB that, in connection with any approval for the combination, CN will divest the KCS line between Baton Rouge and New Orleans.

With KCS having now chosen to partner with CN, we have determined that divestiture is the most pro-competitive and clean solution. We will work to secure an independent third-party to acquire the overlapping KCS rail line, and to step into the shoes of KCS for any related haulage agreement. CN-KCS will retain local and overhead trackage rights to provide single-line service to customers on the KCS line. Once an agreement for the divestiture is in place, approval will be sought from the STB as part of our Application.

With this commitment, CN-KCS will be a true "end-to-end" combination. There will be zero overlapping lines, just gateways like St. Louis where the two railroads connect. This will prevent any potential 2-to-1 customer from losing rail competition, and will also address 3-to-2 customers on the New Orleans-to-Baton-Rouge line. I appreciate that the STB will remain vigilant and closely scrutinize this "end-to-end" combination to protect open gateways and require bottleneck commitments. These are steps CN has already committed to take. Now, given our commitment to remedy the small area of overlapping lines in the CN and KCS networks by divesting KCS's line between Baton Rouge and New Orleans, we hope the conversation can refocus on the tremendous value from a true "end-to-end" North American railway, which will offer more choice for rail customers, port operators, employees, shareholders, stakeholders, and communities.

II. CN-KCS Single-Line Rail Service Will Create New Opportunities for Rail Customers.

The expanded reach of the CN-KCS rail network translates into new single-line routes for rail customers that are more competitive with truck, barge, and other rail routes. The combination will allow CN customers to have single-line reach to markets served by KCS, including Kansas City and Dallas. Conversely, customers on KCS will gain single-line reach to U.S. markets served by CN, including Chicago, Detroit, and Memphis. The increased connectivity between the U.S., Canada, and Mexico would result in increased

economic growth, trade and jobs for all three countries, reinforcing the benefits of the renegotiated North American trade agreement.

Single-line service provides real benefits to CN and KCS customers. On average, eliminating interchanges between rail carriers can reduce an estimated 24 to 48 hours per interchange. Reducing transit times has a direct benefit to rail customers of more reliable and timely service, with shorter equipment cycle times. In turn, those shorter cycle times mean that a smaller railcar fleet is needed to move the same amount of product, whether the cars are railroad-owned or private.

The Attachment to my Verified Statement illustrates some examples of the particular benefits that we see for rail customers from a combined CN-KCS network. These benefits have been developed based on our best current estimate of transit times, traffic flows, and market dynamics, informed by public information and our due diligence with KCS. The Attachment illustrates supply chain benefits for six major market segments: (1) grain and grain by-products; (2) intermodal; (3) imports, exporters, and ocean carriers who rely on ports; (4) autos and auto parts; (5) lumber and panel customers; and (6) plastic resins, liquefied petroleum gases, and refined petroleum products.

A. Grain and Grain By-products

The CN-KCS combination will create new options for grain producers and processors. Generally, CN's network has more grain origins, such as in Illinois, Iowa, and Wisconsin. KCS's network has more grain destinations, including in the southern United States and Mexico. This creates multiple opportunities. For example, customers on KCS's lines will have new single-line service to barge loading locations along the upper Mississippi River system.[1] Customers on CN's lines will have new single-line service to

[1] *See* Attachment at Slide 1.

ship grain to feedmill markets on KCS's lines in the United States and Mexico.[2] Grain exporters will benefit from diversified rail and barge options to sell grain to overseas markets, in containers or in bulk.[3] The same is true for customers moving feed mill ingredients. A CN-KCS combination will improve customers' market reach by increasing the number of origin facilities and destination facilities for corn, soybean meal, and distillers dried grains.[4] Moreover, customers sourcing ethanol, distillers dried grains, and corn oil will have improved options. Customers served by CN in Iowa, Illinois, and Wisconsin will be able to ship ethanol in single-line rail service to new domestic markets in the United States, Gulf Coast export in Texas, and markets in Mexico.[5]

B. Intermodal

The CN-KCS combination will continue CN's efforts over the last ten years to grow its own intermodal network. From 2010 to 2020, CN developed the fastest growing intermodal network in North America. CN is committed to continued development of its intermodal network, and we see significant opportunities for a CN-KCS combination to increase north-south intermodal traffic and intermodal port activities. For example, currently trucks are the primary transportation option for temperature-protected food products (such as produce, fruits, processed foods, beef, pork, and poultry) moving from the U.S. Midwest to and from Mexico.[6] CN is a leader in the industry in its temperature-controlled domestic and overseas intermodal service, and a CN-KCS combination would provide single-line rail service to compete with trucks.

---

[2] *See id.*

[3] *See id.* at Slide 2.

[4] *See id.* at Slide 3.

[5] *See id.* at Slide 4.

[6] *See id.* at Slide 5.

Slides 6 and 7 illustrate more ways that the CN-KCS combination would take more trucks off the road by offering a new single-line rail service to connect major markets in Texas and Mexico with the US Midwest and Canada's largest consumer markets.

C. Exporters, Importers, and Ocean Carriers

Through the proposed CN-KCS combination, rail customers will gain seamless reach to multiple new international container terminals, driving growth in international trade.

Slide 8 shows how the CN-KCS combination will create new options and improve transit times by connecting importers and exporters to the CN-served and KCS-served ports on the Pacific Ocean, Atlantic Ocean, and Gulf of Mexico. Adding more port gateways and destinations that can be reached in single-line rail service can help attract larger and more frequent ocean vessel service in North American trade lanes. Ports with available capacity provide opportunities for importers to avoid congestion that may arise in larger ports.

Slide 9 illustrates how retail customers in Kansas City and St. Louis seeking to import goods will gain single-line rail service from port terminals served by CN or by KCS, which connect with vessel services from ports around the world. This network of ports also facilitates export opportunities from Kansas City and St. Louis. Slide 10 shows how the CN-KCS combination would also connect retail importers to ports in Mexico that have capacity, are not congested, and have lower rail dwell time. Slide 11 shows how this improved ability to reach additional markets benefits terminals and their customers.

D. Automotive Supply Chain

Slide 12 illustrates the substantial benefits to the automotive supply chain from a new CN-KCS single-line rail option to connect Ontario and Michigan with Texas and Mexico. This is beneficial for all participants of the automotive supply chain, including for raw materials (like steel and aluminum), inbound parts, vehicles, and after market parts.

Slide 13 shows how electric car manufacturers in the central United States and Mexico will have better access to sustainably sourced aluminum through single-line rail service. Slide 14 illustrates the benefits of the CN-KCS combination for the automotive manufactured parts supply chain. The new single-line service would connect automotive original equipment manufacturers (OEMs) and their suppliers in Texas and Kansas City and Mexico with markets in Michigan and Southern Ontario served by CN. Reduced transit time would improve speed to market and enable customers to reduce inventory carrying costs and the total costs of the automotive supply chains.

E. Lumber and Panels

Slide 15 shows how the CN-KCS combination will connect lumber origins in Canada to destination housing, building, and home repair and renovation markets in Texas with single-line rail service. Improving the cycle time of railcars will increase fleet utilization without requiring additional investment in cars. Moving loaded cars in larger origin to destination car blocks and unit trains will create additional rail capacity to support the housing supply chain.

F. Plastics, Liquefied Petroleum Gases, and Refined Petroleum Products

Plastic resin customers currently served by CN or KCS similarly will benefit from single-line rail service to North American end markets in Mexico, Canada, and the US upper Midwest. As Slide 16 illustrates, these customers will gain access to numerous storage in transit sites, including in Chicago and Memphis, that are located on CN's network in close proximity to the end-markets for consumers of such goods. This enables faster and more flexible order fulfillment. Customers served by KCS will also have access to CN's resin overseas container packaging options adjacent to the Ports of Mobile and Prince Rupert to reach global markets.

Slide 17 shows how customers shipping liquefied petroleum gases (*e.g.*, propane and butane) will also benefit from the CN-KCS combination. Customers, farmers, and residents in the U.S. Midwest that use propane for home heating and crop drying will have CN-KCS as another option to source propane. Producers in Sarnia, Ontario and in Western Canada will be able to ship single-line moves in unit trains to supply the growing markets in Mexico. A reduction in transit time will result in fleet savings for customers, which will need fewer private cars to ship the same amount of product.

Slide 18 shows how customers shipping refined petroleum products (*e.g.*, gasoline and diesel) will benefit from the CN-KCS combination. Customers in Western Canada and the United States Midwest and Gulf Coast will be able to reach the growing markets in Mexico in single-line rail service. Customers can realize economies of scale by shipping in larger destination car block sizes or unit trains. Improved transit times can reduce car cycle times and result in savings for customers.

In short, we expect that the benefits of a CN-KCS combination would be widely shared among rail customers, who would benefit from expanded market reach and more competitive single-line rail service, as well as other participants in the supply chain, including end users and consumers.

III. CN-KCS Will Grow by Competing to Take Trucks Off the Highways, Leading to Environmental Benefits for Communities.

The environmental benefits of a CN-KCS combination would also be significant and widely shared. One of our visions for the CN-KCS combination is to convert to intermodal rail service truck loads that are currently moving over highways between Mexico/Texas and Michigan/Southern Ontario. Our routing for this traffic growth would take trucks off the highways and utilize double-stack containers on trains that would travel north to Matteson, Illinois (which is south of Chicago) and turn east toward Indiana. If successful, the CN-

KCS combined network will drive reduction in the carbon footprint of the thousands of trucks that head up and down I-35, I-55, and I-94 between Mexico, Texas, and the Midwest. Each CN-KCS daily double stack intermodal train from San Luis Potosi to Detroit would take over 300 long-haul trucks off of the road, avoiding approximately 260K tons of carbon dioxide emissions per year.

Because CN is able to remove more than 300 trucks from the road with every additional freight train, transportation by rail is four to five times more fuel efficient than transportation by long-haul trucking. This means greenhouse gases are reduced by 75% by moving goods by rail versus truck. For example, if the combined CN-KCS are able to move four trains worth of cargo per day between Mexico City and Detroit by rail instead of that cargo moving by truck, this would translate into 1,200 fewer trucks on the highway per day. This will mean fewer trucks on highways and roads and cleaner air.

IV. CN Is Committed to Investing in the KCS Network.

CN has a strong record of investing in its network to provide safe service and is dedicated to apply that same approach to the combined CN-KCS network. CN made its highest capital investments on record in 2018–2020. These investments were focused on adding capacity to accommodate growth and resiliency, deploying technology to improve safety and productivity, and investing in railcars and locomotives to serve our customers. CN invested $2.9 CAD billion (about 20% of revenue) in capital investments in 2020. Over the last three years, CN will have made a $10.3 CAD billion capital investment (about 20% of revenue per year). CN does not intend to reduce its capital expenditure plans during the pendency of the voting trust, nor would we reduce CN's capital expenditure plans even if we were required to divest KCS out of trust.

If a CN-KCS combination were approved, CN would apply its capital investment philosophy to the KCS network. We would anticipate making infrastructure investments in key areas across the new network, including Illinois, Missouri, Michigan, Louisiana, and Texas. This includes investments in the route between Kansas City, Missouri and Springfield, Illinois. This will help create a new direct single-line competitive route between Kansas City and both Detroit, Michigan and the Port of Montréal, as well as create a more direct route to the barge loading market in St. Louis. These investments mean a better, more reliable rail network for automotive, grain, and port-related container business customers.

Moreover, the CN-KCS combination will also bring significant service and efficiency improvements by leveraging the networks, resources, best practices, and technology of the combined companies. Together CN and KCS will:

- Enhance fuel efficiency by leveraging CN's best practices, new technologies (*e.g.*, Horse Power Tonnage Analyzer), efficient routings that reduce mileage and grade, and idling time policies.
- Create better overall locomotive and car fleet utilization and cycle times by applying best practices to managing the combined fleets, reduced transit times by utilizing CN's Chicago by-pass and leveraging newer, highly reliable locomotives with lower maintenance costs.
- Reduce customer logistics costs and carbon emissions costs by diverting truck traffic onto new CN-KCS premium intermodal services in key traffic lanes enabled by the combination.
- Leveraging CN's Automated Track Inspection Program ("ATIP") that promotes safe operating conditions and lowers long-term maintenance costs.

V. A Voting Trust Is Necessary to Realize These Significant Public Benefits From the Proposed CN-KCS Combination.

In closing, I reiterate that CN did not make its request to use a voting trust lightly, but rather out of necessity given the unique circumstances established by KCS's initial merger agreement with Canadian Pacific Railway ("CP"). The KCS-CP merger agreement required use of a voting trust as a structural feature of the combination. A voting trust gives certainty to KCS and its shareholders that the transaction will be able to close in 2021, without the delay of completing the full STB regulatory process, which will extend through 2022.

In order for KCS to be able to terminate its agreement with CP and accept CN's superior proposal, CN was required to provide KCS shareholders the same amount of certainty of closing into a voting trust and assurance of a closing in 2021. This is especially true since the KCS-CP voting trust had been approved by the STB. Like that approved

voting trust, the CN-KCS voting trust gives certainty of closing to KCS shareholders and ensures that KCS is independently managed by its management and the trustee, while the STB fully reviews and considers the CN-KCS combination.

Approval of the CN-KCS voting trust proposal under these unique circumstances is appropriate to maintain a level playing field for KCS and its shareholders. If the CN-KCS voting trust proposal is not approved by the STB, KCS would be deprived of its choice of CN as the winning bidder. Our merger agreement—like that previously proposed by CP—is conditioned on the use of this plain vanilla voting trust process. If the STB denies our request, having approved the voting trust of the inferior bidder, our merger agreement will terminate. KCS could be forced to accept the less valuable competing bid and deprive its shareholders and customers of the benefits that would flow from a CN-KCS transaction. With the utmost respect, it should be the decision of KCS—its management, Board of Directors, and, ultimately, its shareholders—to select which railroad is a better partner for the future, and to then have that transaction subject to the ultimate approval of the STB in accordance with the current rules. I am confident we will address any concerns and obtain that ultimate approval for our pro-competitive CN-KCS combination.

Conclusion

The CN-KCS combination will enable the creation of the North American railway for the 21st Century, with benefits of more choice for rail customers, port operators, employees, stakeholders, and the communities. These benefits can only be realized if the STB approves the CN-KCS voting trust to give KCS and its shareholders the certainty of closing in 2021.

VERIFICATION

I, Jean-Jacques Ruest, declare under penalty of perjury under the laws of the United States that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on this 25th day of May, 2021.

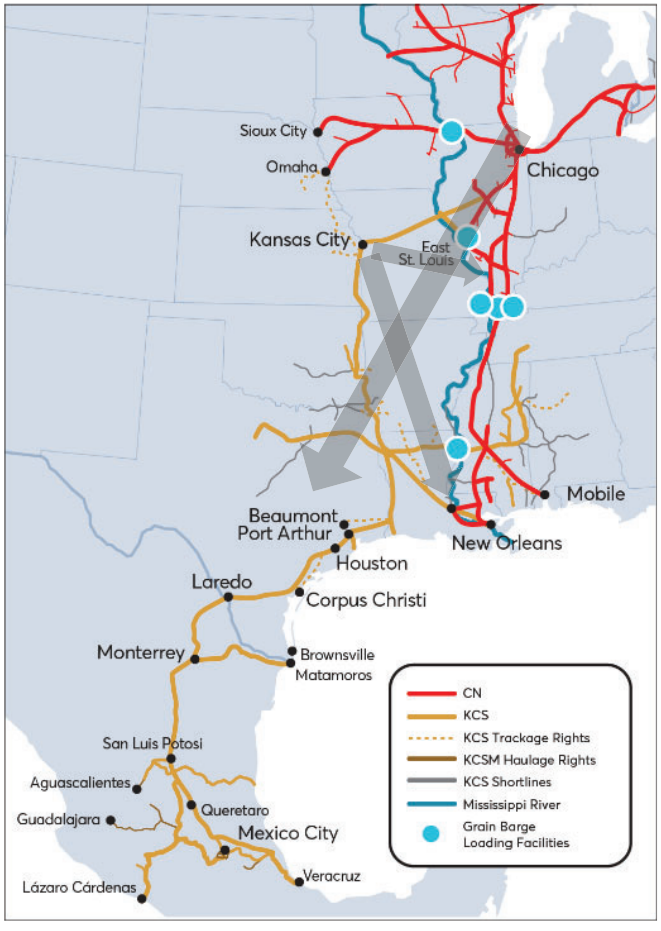
STB Finance Docket No. 36514

Connected Continent

New Destination Markets for Grain

- KCS-served customers will **gain direct access to barge loading locations** along the river system along with grain export terminals in the Center Gulf.
- CN-served customers will have a more competitive single-owner, single-operator network to ship grain to the Mexico markets (anticipated **cost savings** of improved fleet utilization from the combination) and reach export facilities in the Texas Gulf.
- The number of feed mills, ethanol plants, and soybean processing plants that customers will be able to reach directly will increase considerably – **more markets** to market grain and/or feed ingredients to.
- **Increased optionality** and arbitrage opportunity for customers allows their commercial risk to be spread across a larger combined network.
- **Increased market liquidity** and a more dynamic rail freight market with more players in the market as part of a combined CN-KCS.

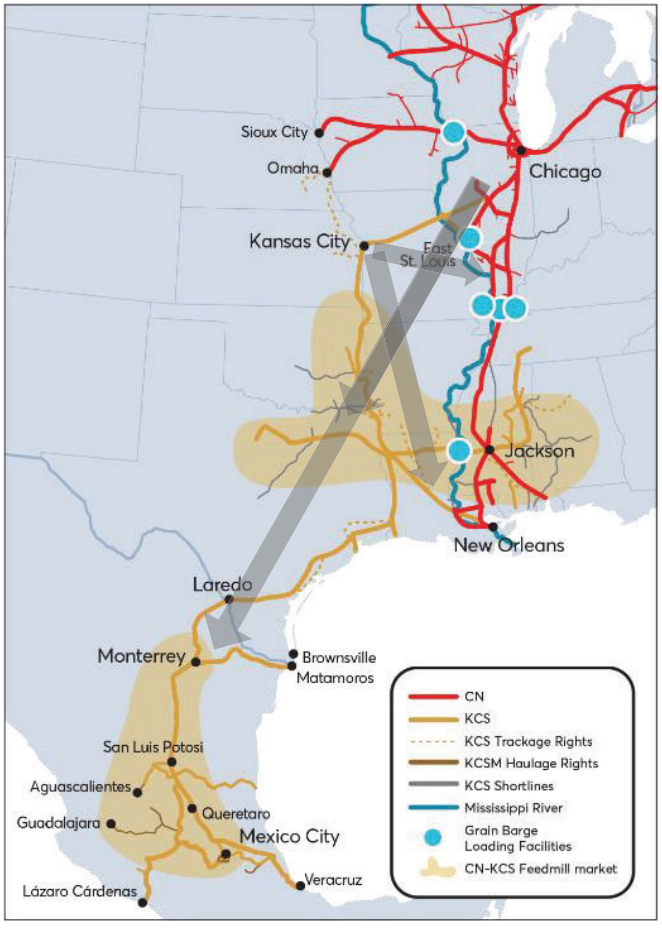


Optionality and arbitrage opportunity creates customer value, bigger network reduces commercial risk.

Connected Continent

Increased Barge/Rail Optionality for Grain Exporters

- The combination of CN-KCS will **diversify grain origination options** over a larger geography for customers selling grain into overseas markets
- **New direct access** for customers in MO, KS **to grain export terminals** in the New Orleans/Mobile area, plus multiple additional barge loading points
- **New direct access to Texas Gulf export destinations** for customers in IA, IL, WI along with reach to the Mexico market
- **Multiple efficient routing options** to the St. Louis and other barge loading locations will encourage CN-KCS direct origination as well as origination from offline origins, making the origination map bigger

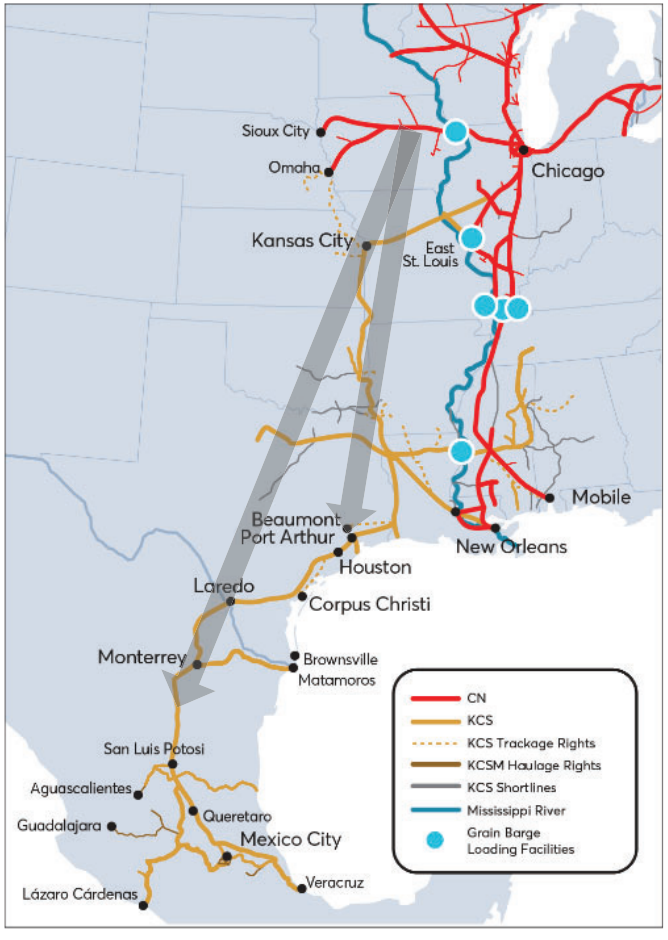


Significantly enhanced optionality to move grain to export position by barge and rail.

Connected Continent

Grain Feed Mill Market Reach

- **Increased direct single carrier product origination network** for corn, soybean meal and distillers dried grains (DDGS).
- Feed mills will be able to **spread out their product origination risk** across a much broader geography
- Direct single operator network will deliver more competitive origination options **improving supply chain costs.**
- **Increasing direct origination options** means more sellers offering product for purchase and more destinations for customers to sell to.
- Combined CN-KCS will eliminate interchange delays, **improving estimated transit time by >10% for moves over Jackson** and improving equipment utilization

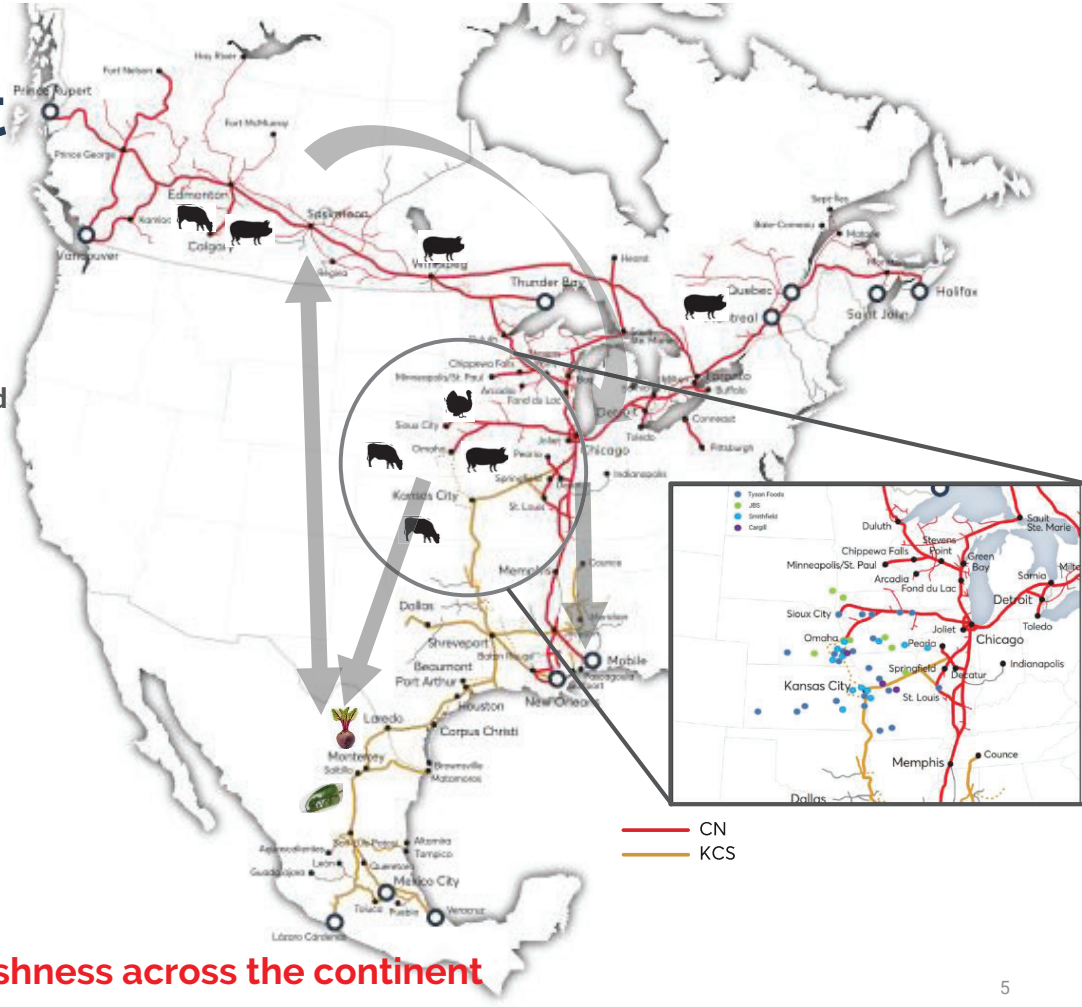


Combined CN-KCS network increases options for feed mill ingredient origination.

Connected Continent

Midwest Ethanol Plant Reach

- **Increased market optionality** for ethanol, distillers dried grains and corn oil
- Customers in IA, IL, WI will be able to **reach Gulf Coast export** infrastructure and additional domestic destination markets for ethanol along with the emerging Mexico ethanol market
- Customers will be able to **tap into a wider array of feed markets** in Mexico and the US
- Replace multi-carrier routings with single operator network, improving market competitiveness, **improving cycle times**
- Combined CN-KCS creates opportunities to **enhance destination markets** for distillers' corn oil, whether domestic consumption or overseas export



Improved market optionality for Midwest ethanol plants.

Connected Continent

Temperature Protected Supply Chain

- **Directly connecting** by rail major markets in **Mexico**, **Texas**, the **US Midwest** and **Canada** using **single-owner, single-operator** rail service **improves speed** to store shelf
- Rail **industry leading, innovative, temperature controlled** domestic and overseas intermodal service with **integrated food safety** compliant processes and **state of the art equipment** – **2,115 CN owned** temperature controlled domestic container fleet, **105 genset/powerpacks** (power up to 17 containers) and **148 nosemount gensets**
- **Facilitating** Intermodal movement of **produce, fruits, processed foods, proteins (beef, pork and poultry)** into and out of **Mexico** – (**Currently** all **trucked** to **US Midwest** & **Canada** at **10-20% higher costs** to consumers, and **on average 75% more GHG emissions**)

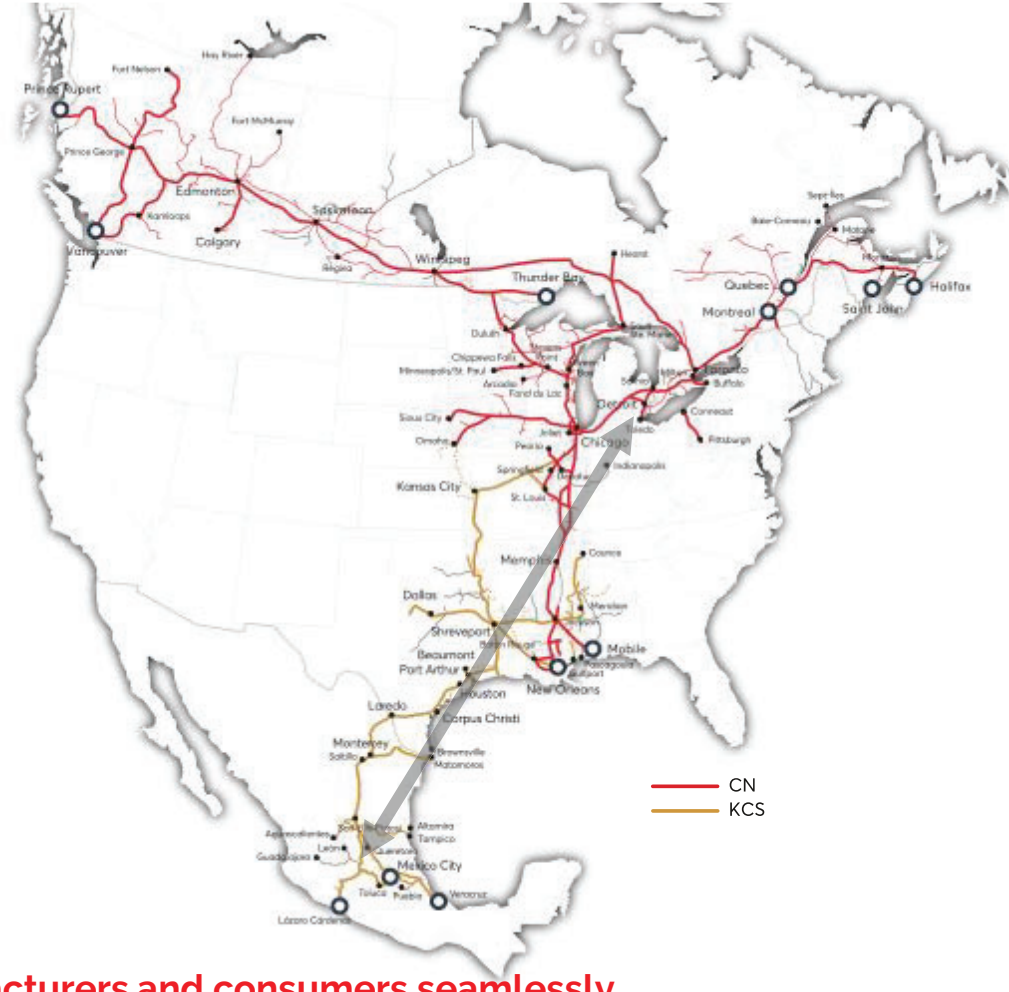
Feeding freshness across the continent

Connected Continent

Benefitting IMCs, 3PL & 4PL Logistics Providers that move the Consumer Economy

Directly connecting major markets in **Mexico** and **Texas** with the **US Midwest** and **Canada's** largest consumer markets using **single-owner, single-operator** rail service.

- **Direct service** between major markets avoiding street connections in Chicago increases customer owned **equipment utilization,** which provides **more capacity** to meet consumer demand **efficiently.**
- Each CN-KCS **daily Intermodal train** takes **300+ long-haul trucks off of the road avoiding an estimated 260K tons of GHG emissions** per year.
- Significant **reduction in trucking connection** between railroads in the **Chicago** market can remove greater than **100K+ annual truck movements** from the Chicago streets **freeing up** greatly needed **chassis.**



Lower cost, improved speed, more capacity

Connected Continent

Home Appliances & Electronics

Mexico is a **world leading manufacturer** of **Home Appliances**, including leading brands. **CN-KCS connects** these **manufactures with suppliers** and sister manufacturers in the **Midwest** and **Canada**, as well as end consumers in the **United States, Mexico** and **Canada.**

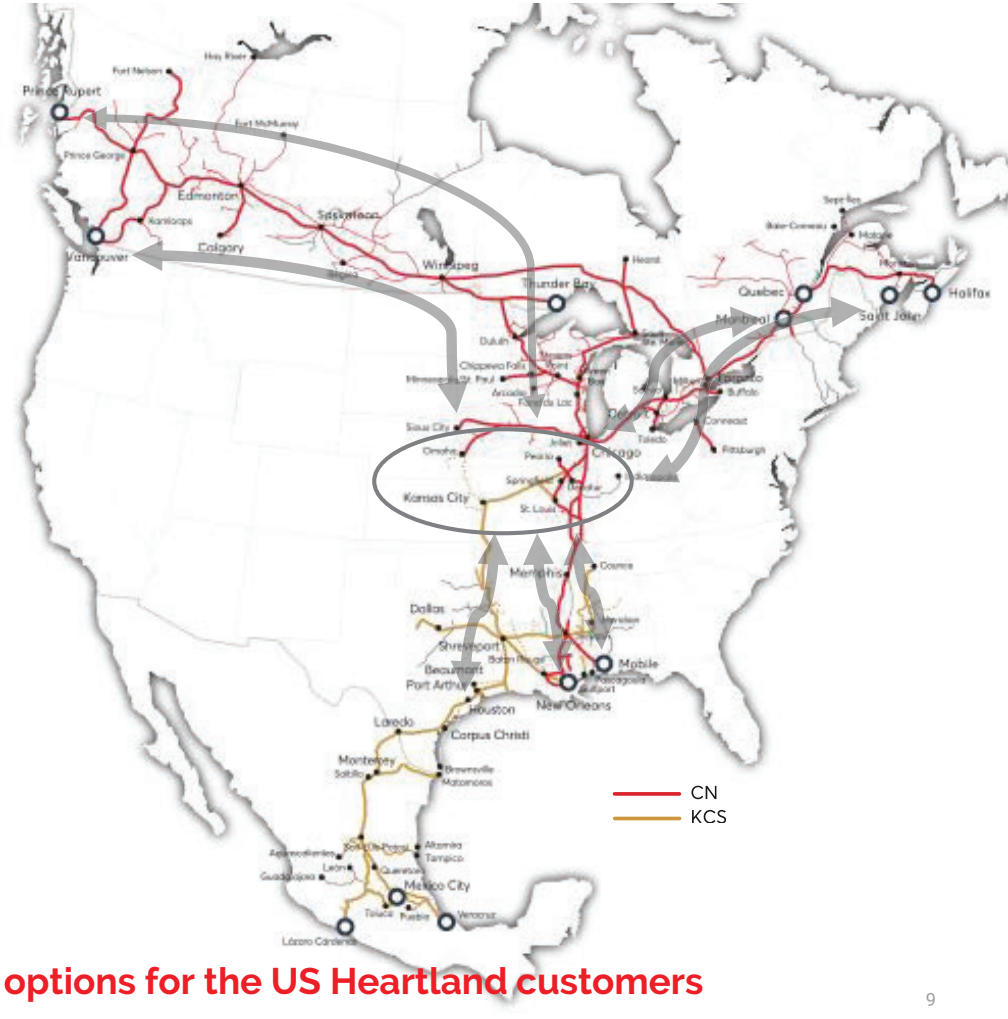
- **Direct service** between key suppliers and **Ohio Valley plants** increases **speed to market**, **reduces inventory carrying costs** and **minimizes potential plant shortages.**
- **Shorter route** than alternative routings into Midwest and Canada, **improves speed to market** and **reduces costs.**
- Each CN-KCS **daily Mexico Intermodal train** takes 300+ longhaul trucks off of the road **avoiding an estimated 260K tons of GHG emissions** per year.
- **Seamless single-line service** ensures service **reliability.**

Directly connecting manufacturers and consumers seamlessly

Connected Continent

Single-Line Service to 3 coasts for Importers and Exporters and Ocean carriers

- The CN-KCS Combination will create a **safer, faster single-line, single-owner service link** for Gateways on all 3 Coasts.
- The East Coast Ports of **Halifax, Saint John, Montréal, and Quebec** and the West Coast **Ports of Vancouver** and **Prince Rupert** will be able to **connect** to **new origin/destinations options**. The same is true for **Gulf Coast Ports** of **New Orleans, Gulfport, and Mobile**, as well as ports in **Mexico**.
- Adding **connected single-line destinations** assist Ports in **attracting larger Ocean Carrier vessels** who continue to upsize vessels on the North American Trade lanes. Spreading cargo to **uncongested Ports** allows **all importers** to have **options** when dealing with congestion that may arise at larger ports.
- The ability to handle **big ships connected** to the **unit trains** creates the **lowest total transportation cost**. As **CN** is a true **supply chain collaborator**, we look forward to working with our **Port partners** to compete for **Imports** and **Exports** against other **Port/Rail supply chain combinations** to the **KCS** and **CN Midwest markets**

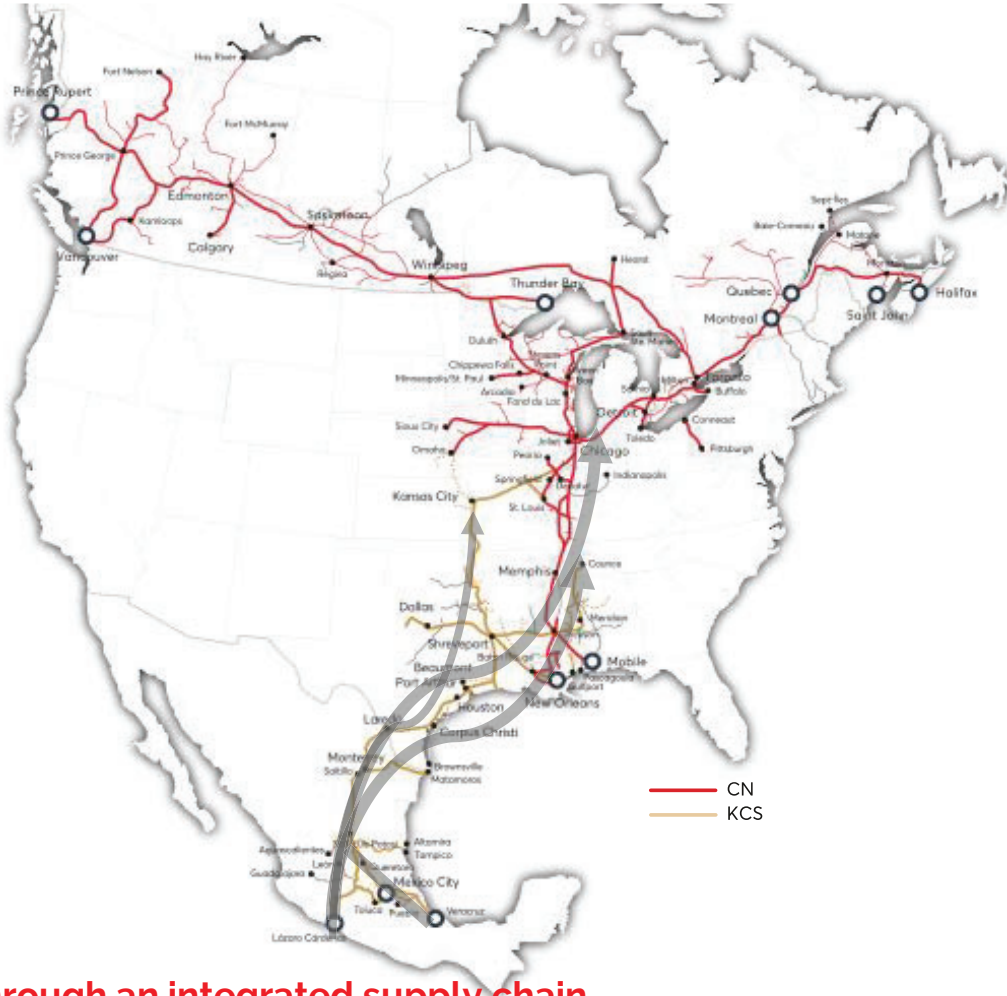


15 Port Terminals – 10 US Midwest Inland Terminals – 3 Countries – 1 Railroad

Connected Continent

Kansas City and St. Louis gain access to new gateways

- The **Kansas City** and **St. Louis** markets totaled approximately **250K+ containers** of imports with a large portion attributed to **machinery, auto parts** and **aeronautics**
- **CN-KCS** will now **directly** and **efficiently connect** the markets of **Kansas City and St. Louis** to the **15 port terminals** on its **3 coast network** which handle **54 vessel services to ports around the world**
- These **newly accessed terminals** will create **new, efficient, lower cost gateways** for **the importers and exporters avoiding** the costly **congestion** of the **U.S. West Coast Ports**
- CN-KCS's network provides **optionality** and proven **market expansion opportunities**
- The **export opportunities** from these markets include **Agri, DDG's, Beef, Pork and Poultry -** All of these products are highly sought after **export goods** shipped through the **CN-KCS served gateways**

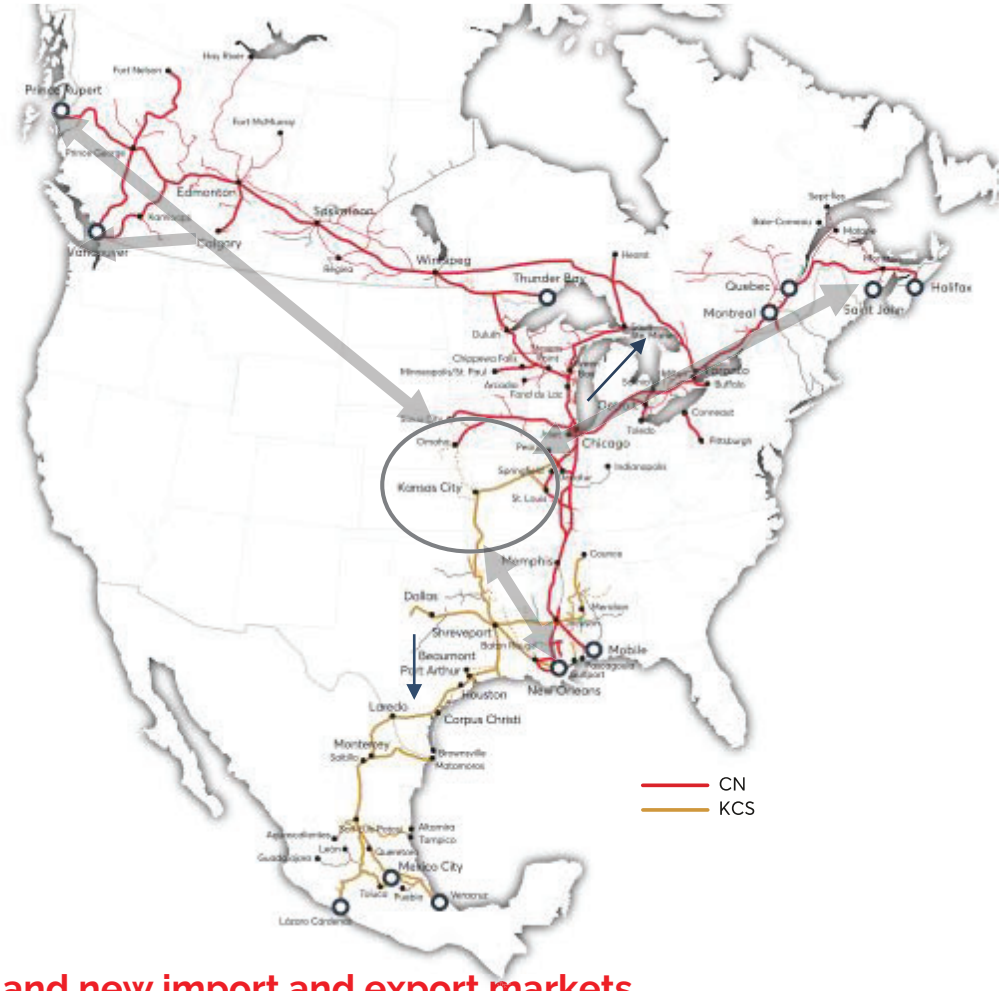


New single line service gateway options for the US Heartland customers

Connected Continent

Utilizing existing Mexico Port Capacity

- **Connecting retail importers** to key **US Midwest** markets through the underutilized **Ports of Lázaro Cárdenas and Veracruz (operating at 40%-60% capacity, low rail dwell time and congestion free)**
- Providing direct, single line **competitive options** into the US Midwest (KC, Memphis, Chicago) by applying proven, round trip economics for Ocean Carriers and their import export customers
- **US Retail importers** add optionality, with **single line rail and a proven, supply chain minded operator, skilled at providing customers with access** to profitable markets (CN has grown its Intermodal business **77%** since 2010)



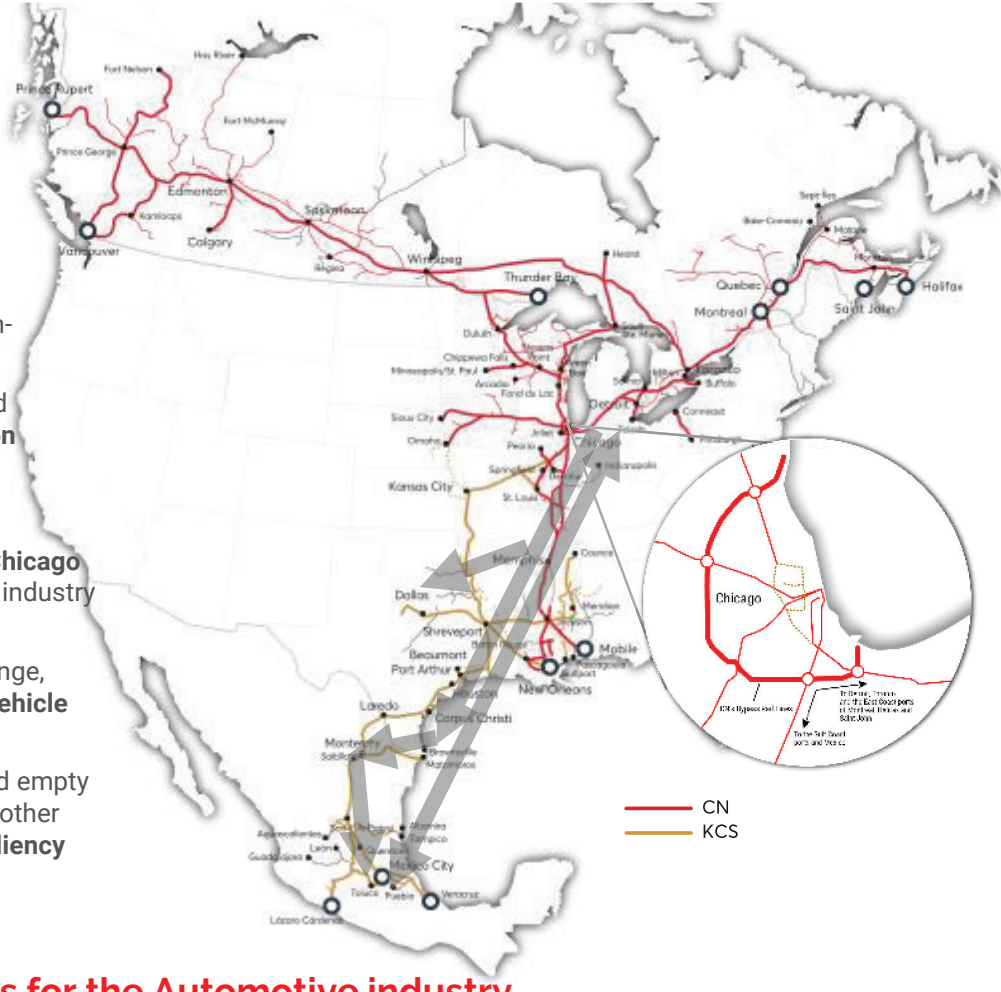
Extending market reach through an integrated supply chain

Connected Continent

Improved Gateway and Market Access for Large Beneficial Cargo Owners in KCS Geography

- CN provides **NEW optionality** and **multi-port connectivity f**or business. Whether importing or exporting **to Northern Asia, Southeast Asia, Europe or South America,** CN's **tri-coast reach** creates new alternatives for **Kansas City and St. Louis shippers**
- CN has a history of **logistics enablement**, we have developed terminals in **Arcadia and Chippewa Falls, WI, Joliet, IL** and **Indianapolis, IN** – all with our customers and their customers in mind.
- All creating more **reliable, lower cost, sustainable options** and **directly linking** some of the **nation's largest retailers** with the **world**

More access to fluid gateways and new import and export markets



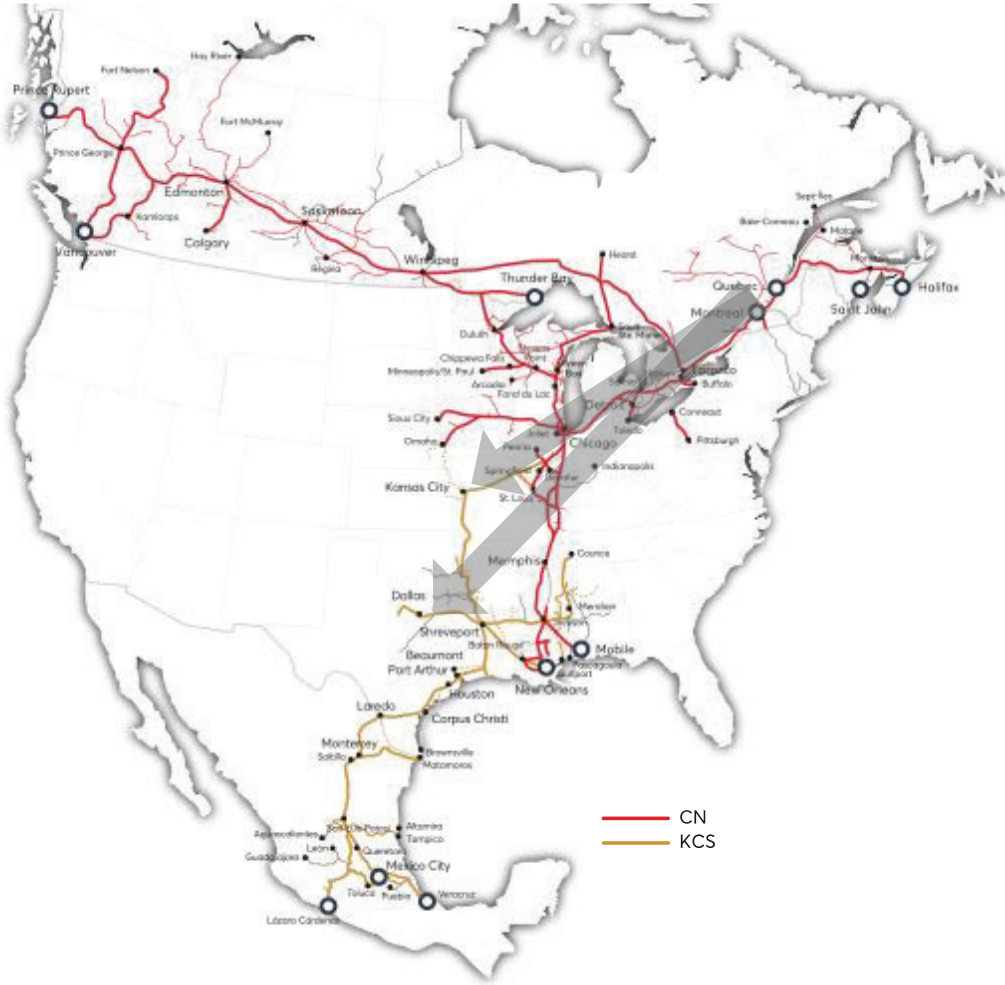
Connected Continent

CN-KCS Automotive Alley

Raw Materials — **Inbound Parts** — **Vehicles** — **After Market Parts**

Only single-line, single-owner direct service linking Ontario-Michigan-Texas-Mexico

- **Single-owner, single-operator** rail service for complete end to end **finished vehicle supply chain (semi-finished materials, production parts,** to **finished vehicles** for final delivery)
- Automotive Alley will provide **non-stop direct service**
- **Estimated 25K-30K annual finished vehicle railcars will bypass Chicago interchange, saving a**n estimate average **24-36 hours**, **improving** industry **multilevel fleet cycles** and **increasing capacity**
- **Automotive customers** will benefit from Chicago bypass interchange, including **reduced dwell in yards, faster transit times, improved vehicle quality** and **reduction in potential theft**
- **80% of Mexico vehicle** production is exported to US & Canada and empty railcar supply can be a challenge at times. CN-KCS will provide another railcar **supply option** to position empty railcars into Mexico **= resiliency**



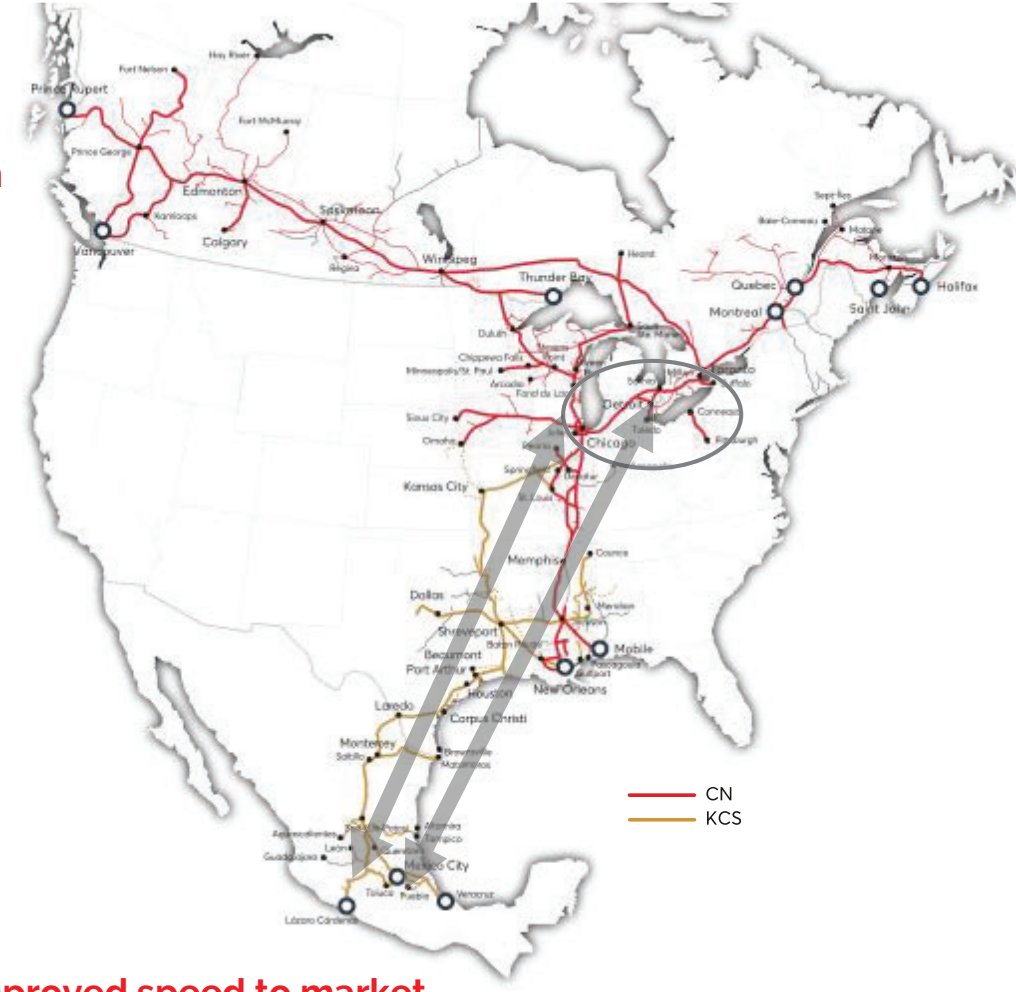
Improved economics for the Automotive industry

Connected Continent

Growing Markets with our Aluminum Customers

- CN-KCS combination provides electric car manufacturers in the Central US and Mexico with access to sustainably sourced aluminum through a single line-haul.
- In a market that is expected to grow by 20% over the next 8 years, improving cycles up to an estimated 15% will **increase their fleet utilization** supporting carload growth without additional investment.
- The CN-KCS combination will **save customers money** with better network efficiencies while expanding their market reach.
- New capacity through faster transit times
- New markets through single line-haul

Safer. Faster. More Resilient. More choices.



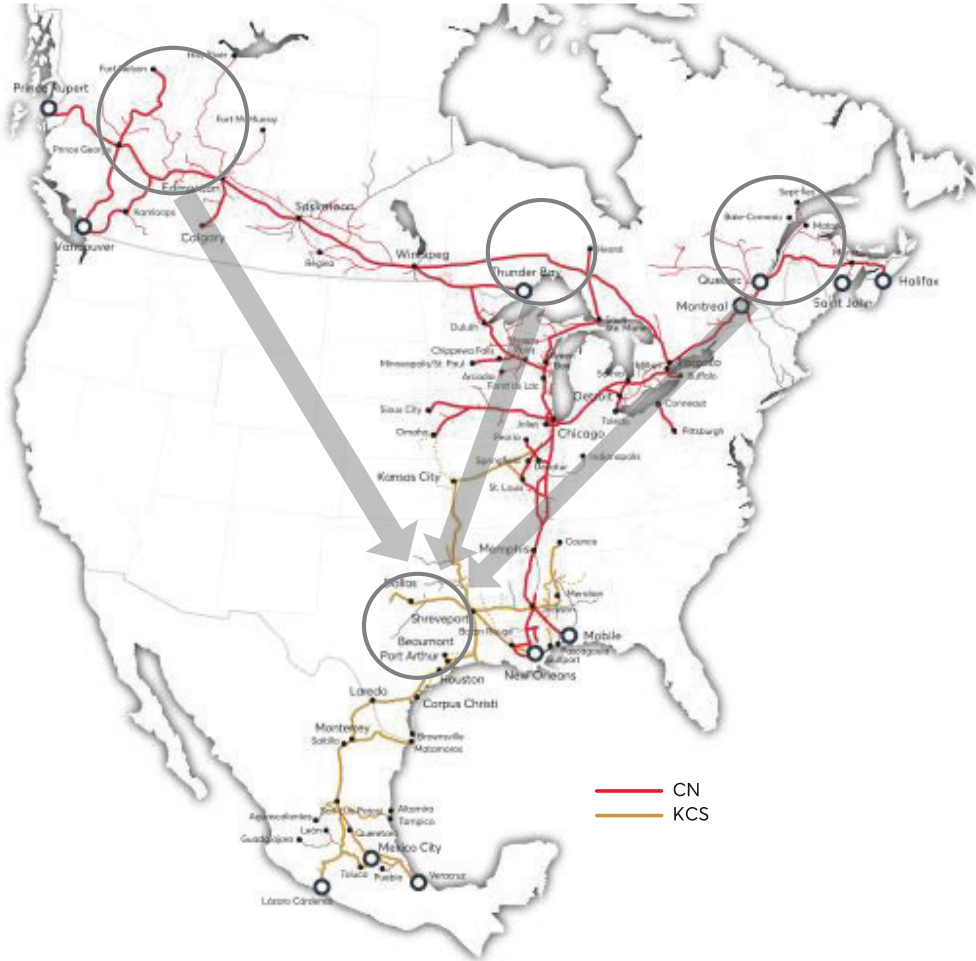
Connected Continent

Automotive Manufacturer Parts Supply Chain

Connecting Automotive OEMs and their suppliers in **Mexico, Texas and Kansas City** with the **US Midwest** and **Canada** using **single-owner, single-operator** rail service.

- **Direct, destination scheduled rail service** between major markets while avoiding interchanges in Chicago **increases speed** to market and **reduces inventory carrying costs, part shortages, and total costs of automotive supply chains.**

- Each CN-KCS **daily Mexico Intermodal train will** take **300+ long-haul trucks off of the road avoiding an estimated 260K tons of GHG emissions** per year.
- Significant **reduction in truck drayage** between railroads in the **Chicago market** will **remove** greater than **100K+ annual truck movements** from the Chicago streets.

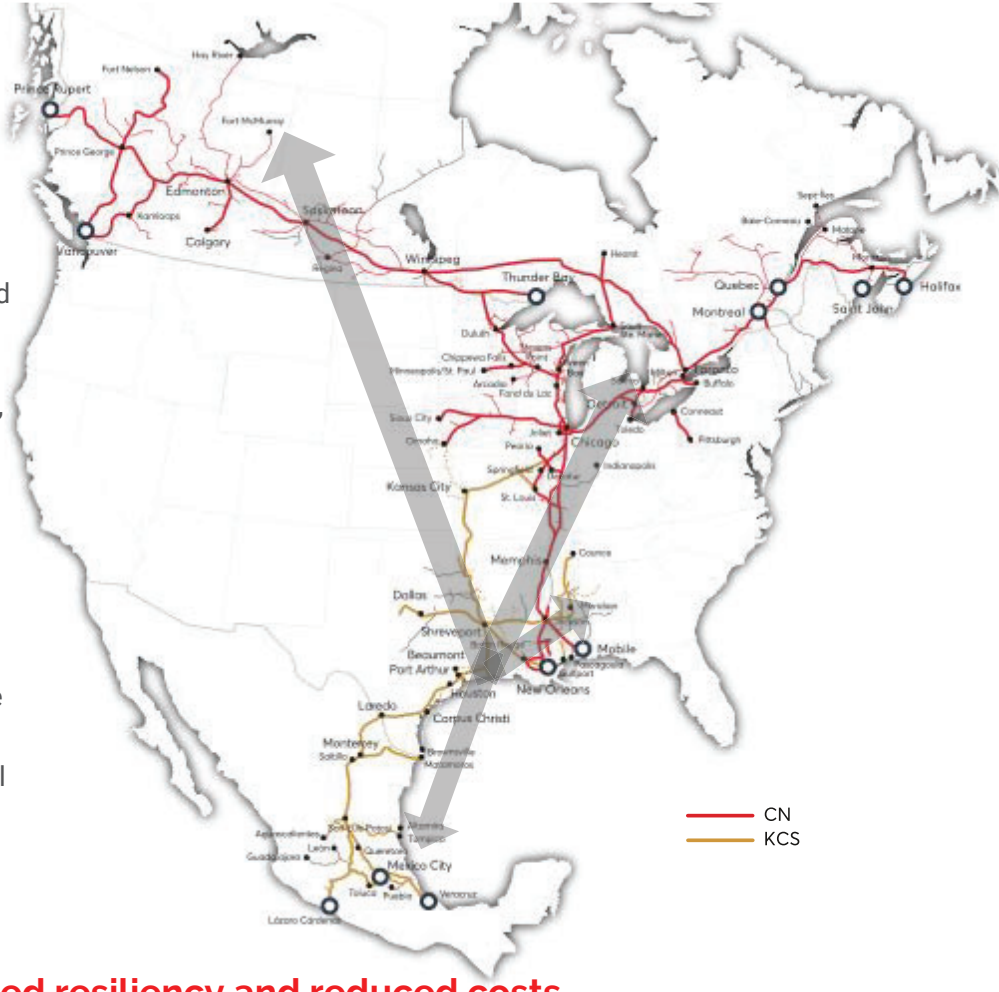


Lower cost, improved speed to market

Connected Continent

Lumber & Panels / Housing

- The CN-KCS combination creates a robust network that optimizes single line access, **maximizes car utilization and competitive pricing** or customers by introducing **new single-line access into Texas while maintaining all current route options.**
- An estimated up to 6 day roundtrip cycle improvement will increase fleet utilization supporting carload growth without additional investment. From both Western and Eastern Canada, **cycles could be reduced in a range between 10%-15%, creating cheaper options** into this growing housing market that currently requires over 1 billion board feet of Canadian lumber annually.
- The ability to directionally **handle loads into large car blocks and unit trains will create capacity**, enhance connectivity, provide incremental efficiencies and **generate cost savings** that will support the Home Building and Repair & Renovation industries for years to come.

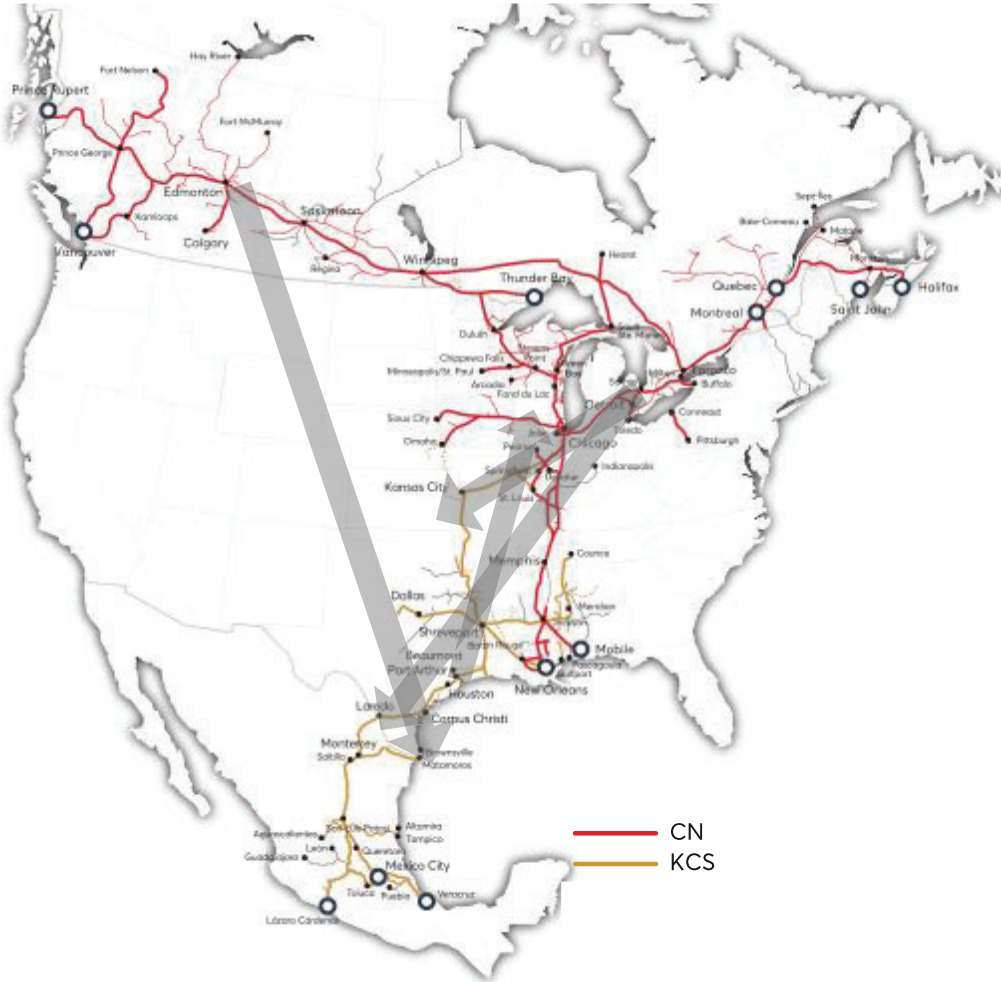


Better access into the growing Texas market.

Connected Continent

Plastic Resins

- **Single-Line Routing Efficiency** - New direct options for **Texas and Louisiana plastics** customers to reach North American end markets in Mexico, Canada and the US upper Midwest.
- Customers will experience **improved gateway optionality** and access to numerous **storage in transit sites** (Chicago, Toronto, Montreal, Memphis, others) strategically located along the CN network in **close proximity to end consuming markets** ultimately providing **faster and more flexible order fulfillment.**
- Customers can expect estimated savings of up to **6 to 8 days** on round trip transit and estimated savings of up to **$120 to $160 USD** on per trip fleet costs.
- Additional Arbitrage/Liquidity opportunities - **Single-line** access to CN's unique **resin packaging** options adjacent to the ports of **Prince Rupert, BC and Mobile, AL.**
- Providing **supply chain optionality and capacity** to reach global markets.

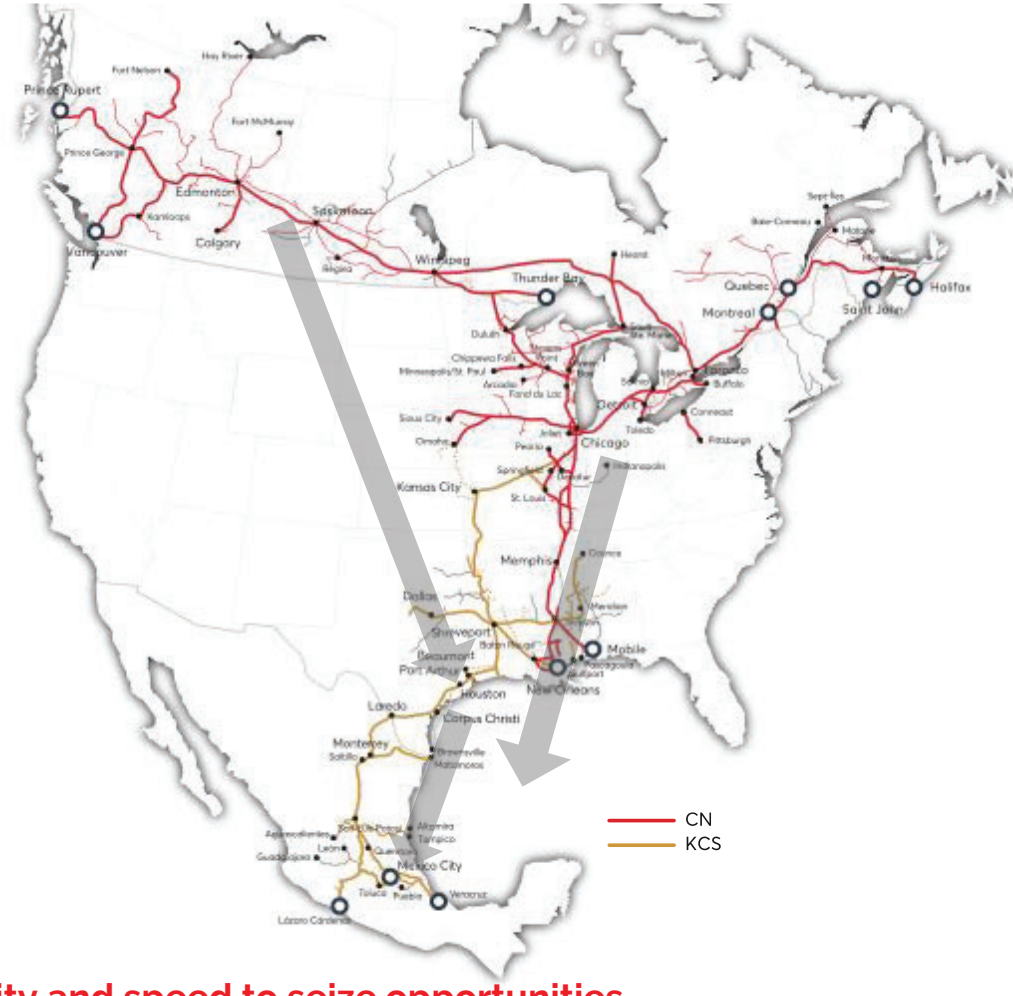


Quicker to market, increased resiliency and reduced costs.

Connected Continent

Liquefied Petroleum Gases (LPG: Propane, Butane)

- The CN-KCS Network will provide LPG Customers in the US Midwest, Mexico, and Canada **reduced complexity** and **lower cost** supply chain options, **reduced transit times**, and **increased reliability** of supply.
- A new direct unit train service will allow customers to **save** and **react to arbitrage pricing** between Conway, KS, Mont Belvieu, TX and low cost Sarnia, ON and Western Canada production to service the expanding 2 billion gallon Mexican market.
- Reducing complexity to a **single carrier** a CN-KCS service improvement can save customers up to **4 days** in transit providing **fleet savings** in the range of **$120 per trip**.
- The US Midwest is **reliant on propane** for **home heating and crop drying.** Increased CN-KCS routing options and single carrier service will **increase security of supply and reliability** for customers, farmers, and residents.



More Service, More Options, More Resilient, Lower Cost

Connected Continent

Refined Petroleum Products (Gasoline & Diesel)

- **Liquidity and arbitrage opportunities** - New direct options **allowing customers in the US Gulf Coast, US Midwest and Western Canada** to access the **1.9M BPD Mexican markets** with best possible capacity and arbitrage opportunity.
- **Unique Access and Optionality** – single line access from **all major North American production areas (US Gulf Coast, US Midwest and Western Canada**) means customers can quickly **pivot between supply origins** and realize supply chain efficiencies.
- **Economies of scale and supply chain savings** Unit train, large car block sizes allowing customers to achieve economies of scale enhanced by **optionality of routing options** resulting in estimated **savings of up to 10 days on round trip cycles and $300 USD per round trip.**

Increased optionality, liquidity and speed to seize opportunities.

RUEST VERIFIED STATEMENT, CN AND KCS'S REPLY TO COMMENTS ON PROPOSED VOTING TRUST AGREEMENT, FINANCE DOCKET NO. 36514 (CN-26 KCS-9)

(EXCERPTS)

PUBLIC VERSION

BEFORE THE
SURFACE TRANSPORTATION BOARD

Finance Docket No. 36514

CANADIAN NATIONAL RAILWAY COMPANY, GRAND TRUNK CORPORATION, AND CN'S RAIL OPERATING SUBSIDIARIES
—CONTROL—
KANSAS CITY SOUTHERN, THE KANSAS CITY SOUTHERN RAILWAY COMPANY, GATEWAY EASTERN RAILWAY COMPANY, AND THE TEXAS MEXICAN RAILWAY COMPANY

VERIFIED STATEMENT OF JEAN-JACQUES RUEST

My name is Jean-Jacques Ruest. I am the President and Chief Executive Officer ("CEO") of Canadian National Railway Company (CN). I have described my background with CN in my prior verified statement on May 26, where I set forth the unique public benefits that can only be realized if the STB approves the use of a voting trust for the CN-KCS combination.

CN appreciates the importance of the public comment exercise to help the STB vet our position that use of a voting trust should be approved. And we are committed to addressing the legitimate concerns of every stakeholder in the application process. I have reviewed the comments submitted by the various interested parties, particularly the heated claims by Canadian Pacific. Many of their concerns are addressed by others. Our CFO Ghislain Houle together with Professor Mark Zmijewski of the University of Chicago Booth School of Business should dispel any concerns about our financial soundness or ability to divest the KCS network if required by the STB. Mr. William Rennicke—a widely regarded industry expert—dismisses the wild accusation by CP that our merger is anticompetitive. Indeed, Mr. Rennicke has never seen a merger of Class I railroads result in so few competitive issues. James Cairns should assure our customers that CN is wholly committed

to the STB's current merger rules and will "enhance competition" with new single line service, new competition against trucks and our larger Class I brethren, expanded choices and a firm promise to keep gateways open on commercially reasonable terms, and enhanced pricing transparency with Rule 11 rates.

I would like to personally clarify some confusing, misleading or irrelevant themes that have surfaced, and offer **four new commitments** to assure the STB that approval of this voting trust is clearly in the public interest.

1. The STB should reject CP's desire to transform a privilege into a weapon – to use an STB-approved voting trust to create an asymmetric structural and competitive bidding advantage, when they could not compete on the merits with a weaker balance sheet and lower value creation. CP's 500+ page submission is a transparent attempt to reserve the use of a voting trust for itself in an effort to force KCS to consider CP's inferior bid that KCS has already terminated.

2. CP's allegation that CN is pursuing this unique opportunity for the purpose of thwarting CP is preposterous. The sole reason CN is pursuing a combination with KCS is to enable the creation of the true North American Railway for the 21st Century, and its superior offer reflects the value that it expects to realize from this powerful idea. We are excited about the opportunity to create the North American Railway for the 21st Century—and offer our customers single-line service over the combined CN-KCS network in the United States, Canada, and Mexico. We believe that by doing so we will help to realize the potential of the US-Mexico-Canada Trade Agreement (USMCA). The outpouring of support from over 1700 stakeholders is the highest testament to the tremendous opportunity presented by our proposal. They can imagine the value and potential, even if CP can only view the world as revolving only around CP.

3. A union committee that represents KCS employees as well as some CP union stakeholders have asked about our future plans for the KCS line between Kansas City and Shreveport.[1] That line is one of the crown jewels of KCS, and serves important markets CN cannot serve today. KCS explains the critical strategic importance of that line between Kansas City and Shreveport. See KCS' Reply Verified Statement of Michael J. Naatz. I wholeheartedly agree. The KCSR line between Kansas City and Shreveport presents many opportunities to compete with the north-south routes of other Class I railroads serving the same markets as well as truck traffic along Interstates 35 and 55. This is a unique growth opportunity for CN-KCS. Today, CN does not have single-line service to Kansas City. In addition to new options for direct moves on the CN-KCS network, KCSR's line between Kansas City and Shreveport is important to interchange cars with other carriers. Moreover, we want to expand the Kansas City gateway, not contract it. For example, CN wants to invest in the route between Kansas City, Missouri and Springfield, Illinois to create a new high-quality line that will create faster, safer and more economical rail option. This will create a new competitive option for customers between Kansas City and both Detroit, Michigan and the Port of Montréal who currently rely on trucks. This "Kansas City Speedway" will be the connection between the KCS and CN networks to offer a new competitive alternative to compete with trucks for traffic moving from Mexico, through the U.S. heartland to Canada. Indeed, CN has committed that it will maintain the U.S. headquarters of the combined network in Kansas City, Missouri. But to assure KCS employees on that line, and the customers it serves, **I can commit that CN has no plans**

[1] Letter from General Chairperson, S.A. Habjan, SMART-TD General Committee GCA-457, at 1–2 (filed June 28, 2021) (indicating there would be "no need" for the KCS line running south from Kansas City); Letter from General Chairman – Leader, SMART-TD GO-256, at 2 (filed June 28, 2021) (representing yardmasters on CP).

to downgrade or divest that line and will continue to invest at a similar level or higher as KCS in the mainline between Kansas City and Shreveport in the years after the CN-KCS combination is consummated.

4. The American Chemistry Council and the Fertilizer Institute question whether, in the event our application is denied, that CN might attempt to sell KCS' network in pieces or sell KCS to an unsuitable owner. This would be inappropriate. KCS is worth more than the sum of its parts, and the STB has made clear it would maintain oversight over any divestiture. Value for a potential divestiture of KCS would be maximized by selling KCS as integrated franchise or holding an initial public offering for KCS as a whole. I have explained that it would be unlikely that CN would be required to divest KCS out of the voting trust because CN is committed to finding workable solutions to legitimate concerns regarding the CN-KCS combination, as demonstrated by our commitment to sell the KCS line between Baton Rouge and New Orleans. I am confident CN will address any such concerns and obtain ultimate approval for our pro-competitive CN-KCS combination. Nevertheless, if CN is required to divest KCS out of trust, **CN commits that it would divest KCS in a way that maintains KCS as an intact entity, and to obtain the best potential value for KCS.**

5. CP also raises an odd claim that CN will for some reason stop competing with KCS for traffic between Baton Rouge and New Orleans during the voting trust period. I find this idea baffling. The entire point of the voting trust is to preserve the competitive status quo because KCS continues to operate independently. Voting trusts have been used in prior mergers with far more extensive competitive overlaps with no evidence of any such misconduct. Many customers with facilities on the CN line from Baton Rouge to New Orleans have long-term contracts. CP's claim also ignores the highly competitive markets we help those customers reach. And CN and KCS have committed to divest the KCS line to

enhance those customers' competitive options. This means that if approved, those customers will be served by both the combined CN-KCS and a new competing railroad. There is simply no factual basis to assume CN would deliberately drive customers away during the voting trust process. But it is important to me that all 2-to-1 customers in Louisiana have confidence that they will suffer no harm after the merger, or during the period of the voting trust. To assure those customers, {{

}}

6. Finally, Amtrak urges the STB to deny this voting trust because it has concerns about its ability to restore intercity passenger rail service between Baton Rouge and New Orleans. CN appreciates the interest from Amtrak and some other stakeholders regarding potential for future passenger service on the KCS line between Baton Rouge and New Orleans that CN has committed to divest. CN looks forward to continuing to engage with these stakeholders. Our primary objective must be to protect the competitive options and service for freight customers on that line, and to preserve sufficient capacity to meet their current and future needs. But we welcome discussions with Amtrak regarding its desire to use as yet unobtained funding to restore intercity passenger rail service, while other stakeholders may propose different concerns. While the precise circumstances regarding the sale of the KCS line between Baton Rouge and New Orleans are premature

at this stage, the future use of that line will be addressed in detail in the ultimate merger proceeding. To assure Amtrak that its concerns will be considered, **I can commit that potential purchasers of the divested line will be asked to explain their willingness to work with potential future passenger and commuter service operators**.

In sum, CN did not propose to use a voting trust lightly. We know it is a privilege, not a right, and to be carefully permitted. However, use of the voting trust in this instance is necessary to place a CN-KCS transaction on a level playing field given the particular circumstances in this case: specifically, the unusual setting of a competitive bidding process with a merger agreement that required CN to utilize a voting trust and the Board's prior decision to approve the CP-KCS voting trust demanded that our offer—which was ultimately accepted by KCS—use an identical voting trust.

Approval of the proposed CN-KCS voting trust will not prejudge the merits of the Application. It will simply move this proceeding to the next stage, where the STB will fully vet the public benefits that will flow from this exciting merger. CN will demonstrate the overwhelming benefits of the CN-KCS combination to enable the creation of the North American Railway for the 21st Century. But those benefits can only be realized if the STB approves the voting trust for the CN-KCS combination. The "plain vanilla" voting trust prevents premature control of KCS and maintains KCS's independence while it is in trust during the STB's review of the combination under the STB's current rules that require enhanced competition. CN therefore respectfully requests the STB's approval for the CN-KCS voting trust.

VERIFICATION

Norfolk Southern CEO Jim Squires
Norfolk Southern

ATLANTA — Expect to see big changes on Norfolk Southern as the railroad launches its new Precision Scheduled Railroading operating plan, TOP21, over the summer.

The most visible differences will include longer trains with distributed power, the increased use of general purpose trains that combine different types of traffic, and locals that operate daily. Harder to see, but no less important, will be blocking changes that allow cars to bypass intermediate terminals.

"The goal of TOP21 is to make the entire network more efficient," CEO Jim Squires said during the railroad's investor day presentations on Monday.

Increased reliability also is a goal.

"Our new mantra is don't promise anything you can't deliver and then deliver what you promise," Squires says.

Service will become more reliable, NS says, because the new operating plan is simpler to execute, day in and day out. It also will enable NS to bounce back more quickly from disruptions, such as the extreme cold and snowstorms that gripped its Northern Region last month, Chief Operating Officer Mike Wheeler says.

NS will blend different traffic types into general purpose trains. So that 60-mph intermodal traffic isn't slowed when traffic is combined, NS has raised merchandise speeds to match on much of the railroad, up from 50 mph.

"We used to talk about as many as four separate networks. An intermodal network, an automotive network, carload, and unit train," says John Friedmann, vice president of network planning and optimization. "And while it made certain intuitive sense to think of this this way, broken down along commodity lines, it really ignored the shared nature of our locomotive and our crew resources, as well as the limited nature of our line capacity."

NS has begun combining traffic on some trains already.

Train 23G, an international intermodal train linking Louisville, Ky., and Norfolk, Va., pauses in Knoxville, Tenn., to pick up 15 or so loads of export coal also bound for the port.

Handling coal on an intermodal train means three things: The coal doesn't sit in Knoxville until enough volume builds to run a unit train. The coal, and hoppers, move faster, reducing cycle time. And NS can drop train starts by shifting the bulk traffic into intermodal trains, which saves locomotives, fuel, and crews while opening up capacity on the main line.

In Winston-Salem, N.C., northbound carload traffic is taking a faster, shorter route by hitching a ride on an automotive train. Carload traffic gathered at Winston-Salem used to first run south to the hump yard at Linwood, N.C., where it would be classified and put on a northbound merchandise train.

The new arrangement saves about 100 miles, reduces car handling, and frees up capacity at Linwood.

"This is the kind of different thinking that we are infusing into our operating plan," Friedmann says.

NS also will run the same number of trains in each direction every day to keep crews and power in balance.

The new plan also reduces NS's dependence on major terminals by pre-blocking cars at local terminals and then relying on block-swapping en route.

NS is increasing local service frequency to daily across much of the system.

"What this does is it helps keep the system in motion at all times," Friedmann says.

NS will measure the effectiveness of its operating changes using five key metrics.

Goals for 2021 built around the metrics include increasing train and engine crew productivity 34 percent measured by gross ton-miles per worker; increasing average train weight by 12 percent; boosting locomotive productivity 30 percent on a ton-mile basis; and reducing the number of cars online by 12 percent.

NS also created a service delivery index, which compares the railroad's performance to 2018. The goal of the opaque metric, which measures compliance with customer commitments, is a 40-percent improvement by 2021.

FINANCE DOCKET NO. 34822

KANSAS CITY SOUTHERN, THE KANSAS CITY SOUTHERN RAILWAY COMPANY, AND MERIDIAN SPEEDWAY, LLC -- EXEMPTION FOR TRANSACTIONS WITHIN A CORPORATE FAMILY

VERIFIED NOTICE OF EXEMPTION
PURSUANT TO 49 C.F.R. §1180.2(d)(3)

Kansas City Southern ("KCS"), The Kansas City Southern Railway Company ("KCSR"), and the newly-formed Meridian Speedway, LLC ("MSLLC") (collectively, "Parties") hereby submit this notice, pursuant to 49 C.F.R. §1180.2(d)(3), for an exemption from the prior approval and authorization requirements of the Surface Transportation Board ("STB" or "Board") of a transaction within a corporate family. The transaction involved in this Notice of Exemption is MSLLC's acquisition of KCSR's rail line between Meridian, MS and Shreveport, LA ("the Line"), KCS's continuance in control of MSLLC when it becomes a carrier (upon acquiring the Line), and the subsequent grant back of operating rights by MSLLC to KCSR to allow KCSR to operate as MSLLC's contract operator in fulfilling MSLLC's contractual and common carrier obligations. In support of this Notice of Exemption and in compliance with 49 C.F.R. §1180.4(g), the Parties state the following:

49 C.F.R. §1180.6(a)(1)(i)--Description of Transaction and Parties Thereto:

a. Description of Transaction.

Kansas City Southern is a publicly traded, non-carrier holding company, with both rail and non-rail assets. KCS currently controls three common carriers subject to the jurisdiction of the STB: The Kansas City Southern Railway Company, Texas Mexican Railway Company, and

Gateway Eastern Railway Company.[1] KCSR is a Class I common carrier railroad that owns and operates approximately 3,100 miles of rail line in ten states. GWER is a Class III common carrier railroad that owns and operates approximately 17 miles of rail lines between East Alton, Illinois and East St. Louis, Illinois, and owns the rail and related materials on many of KCSR's branch lines. Tex Mex is a Class II common carrier railroad that owns and operates over 157 miles of rail line between Laredo and Corpus Christi, TX. Tex Mex also operates via trackage rights over approximately 379 miles of rail lines owned by Union Pacific Railroad Company ("UP") and Houston Belt & Terminal Railway Company between Robstown, TX and Beaumont, TX, via Houston.

MSLLC is a newly-created, wholly-owned subsidiary of KCS. MSLLC will become a common carrier railroad subject to the Board's jurisdiction upon consummation of the transaction.

One of the rail lines currently owned and operated by KCSR is known as the Meridian Speedway. The Speedway is an east/west rail line located between Meridian, MS, and Dallas, TX, which passes through Shreveport, LA. The lines of other railroads that connect with the Speedway include the UP at Shreveport, LA; the BNSF Railway Company ("BNSF") near Dallas, TX; the Canadian National Railway Company ("CN") at Jackson, MS; and the Norfolk Southern Railway Company ("NSR") and the Meridian & Bigbee Railroad Company at Meridian, MS.

The primary commodities transported over the Speedway by KCSR in both overhead and local service include consumer goods, forest products, automobiles, and chemicals. The Speedway

[1] KCS's control of KCSR and its then existing rail carrier subsidiaries was found not to require ICC approval in Kansas City Southern Industries, Inc.—Control—Kansas City Southern Railway Company, 317 I.C.C. 1 (1962). KCS received authority to commonly control KCSR and GWER in Kansas City Southern Industries, Inc., KCS Transportation Company, and The Kansas City Southern Railway Company—Control—Gateway Western Railway Company and Gateway Eastern Railway Company, Finance Docket No. 33311 (STB served May 1, 1997). KCS received authority to commonly control KCSR, GWER, and Tex Mex in Kansas City Southern—Control—The Kansas City Southern Railway Company, Gateway Eastern Railway Company, and The Texas Mexican Railway Company, Finance Docket No. 34342 (STB served Nov. 29, 2004).

also serves as a mid-continent link for shuttling intermodal containers between West Coast ports and points in the Southeast.

Transcontinental intermodal service is currently provided across the Speedway pursuant to a haulage agreement between NSR and KCSR, which the parties entered in 2000 (the "Existing NSR Haulage Agreement"). Containers in the account of NSR are moved by KCSR between Meridian, MS and Dallas, TX. These containers are transported between Dallas and the West Coast by BNSF, and between Meridian, MS and points east by NSR. For such east/west intermodal traffic, the Speedway acts as an alternative route to those more commonly used by other railroads via other gateways, including Memphis, New Orleans and Birmingham. KCSR does not provide haulage service for intermodal traffic over the Speedway to any other railroad and NS is the sole provider of such transcontinental container traffic over the Line.[2]

As with other haulage arrangements, containers handled by KCSR for NSR remain in NSR's account between Dallas and Meridian and never enter KCSR's account. KCSR's sole role is that of a haulage carrier, providing the track, crews, dispatching, and other operating facilities required to transport the containers over the Speedway. NSR is solely responsible for, and exercises control over, the pricing and marketing of that traffic.

Notwithstanding significant capital enhancements over the past five years, the Line has become capacity constrained as traffic between the Southwest and the Southeast has grown. This capacity crunch and other constraints currently limit the ability of KCSR and NSR to attract more traffic to their services using the Speedway.

---

[2] KCSR participates today as a line-haul carrier in a small volume of intermodal trailer traffic that originates on BNSF in California. These trailers, which total approximately 2,600 units per year, or 50 units per week, are transferred over the road to KCSR at Dallas, are rebilled, and then subsequently moved in KCSR's account between Dallas and Meridian in different trains than those in which NSR haulage traffic moves. At Meridian, they are delivered to NSR for subsequent

Last year, NSR approached KCSR about extending the Existing NSR Haulage Agreement. During those discussions, it became clear that substantial capital investments would be required to provide the train speeds and line capacity the parties believed was needed to handle future traffic growth on the Line. However, KCSR does not have sufficient resources to support the sustained capital spending program necessary to accommodate both NSR's and KCSR's projected traffic needs. Moreover, while NSR was willing to participate in the necessary investment, it did not want to do so unless it could be assured that other carriers would not use the capacity NS's investment would help to create. The parties reached a series of agreements that addressed these concerns.

On December 2, 2005, KCS and NSR announced agreement on a series of transactions. The first step involved the creation of a new, wholly-owned KCS subsidiary, MSLLC. Upon regulatory approval, KCSR will contribute to MSLLC the Line (consisting of 320-miles between Meridian, MS, M.P. 0.0., and Shreveport, LA, M.P. V-169.85).[3] Concurrent with MSLLC's acquisition of the Line, NSR will acquire a 30% equity interest and certain minority voting and ownership rights in MSLLC; however, KCS will remain in control of MSLLC. In exchange for its equity interest and voting and ownership rights, NSR will contribute $300 million in cash, at least $260 million of which will be used to fund capital improvements over the next four years to

---

movement by NSR to destination. This trailer traffic will continue to move in the same manner following consummation of the proposed transaction.

[3] KCSR currently operates via trackage rights over approximately four-tenths of a mile section of track in Jackson, Mississippi that is controlled by Canadian National Railway (as successor to Illinois Central Gulf Railroad Company ("IC")) pursuant to a trackage rights agreement dated March 26, 1986, between Midsouth Rail Corporation and IC ("Jackson Trackage Rights Agreement"). KCSR also currently operates over a railroad bridge over the Mississippi River at Vicksburg, MS pursuant to a lease agreement between the Vicksburg Bridge and Terminal Company and The Yazoo and Mississippi Valley Railroad Company dated February 11, 1928, as amended and/or replaced from time to time ("Vicksburg Bridge Lease"). The transaction contemplates having both the Jackson Trackage Rights Agreement and the Vicksburg Bridge Lease being assigned to MSLLC.

increase the capacity of the Line.[4] NSR will be the sole provider of service for transcontinental intermodal traffic over the Line. Specifically, NSR will be the sole provider, via haulage and trackage rights over the Line, of service for transcontinental intermodal container traffic moving on the Line that does not originate or terminate on KCS's current system and that both (a) originates or terminates in the United States at or east of Meridian and enters or exits the Line at Meridian, and (b) originates or terminates in the United States west of Fort Worth, Texas, and enters or exits the Line at Shreveport.

Through its acquisition of the Line, MSLLC will become a common carrier subject to the Board's jurisdiction. However, MSLLC will not operate the Line. Instead, MSLLC will contract with KCSR for KCSR to be the operator of the Line. Under this agreement, KCSR will provide all necessary operating and administrative functions on MSLLC's behalf, including fulfilling any obligations MSLLC may have under its contracts. MSLLC will also grant certain local and overhead trackage rights to KCSR for KCSR to continue to operate over the Line much as it does today.[5] MSLLC will also grant certain trackage and haulage rights to NSR.[6] As the contract operator for MSLLC, KCSR will perform the haulage services contemplated by MSLLC's agreement with NSR, while simultaneously operating over the Line for its own account pursuant to local and overhead trackage rights granted by MSLLC to KCSR.

Pursuant to 49 C.F.R. §1180.2(d)(3), KCS, KCSR, and MSLLC invoke the Board's class exemption from the prior approval requirements of 49 U.S.C. § 11323 for transactions within a

[4] These capital improvements will include signal systems, extended sidings, stretches of double track, upgrading track speeds, and other capacity enhancements.

[5] MSLLC's grant of local and overhead trackage rights to KCSR is the subject of a concurrently filed Notice of Exemption filed pursuant to 49 CFR 1180.2(d)(7) in Finance Docket No. 34823.

[6] MSLLC's grant of certain haulage and trackage rights to NSR is the subject of a concurrent Notice of Exemption filed by NSR pursuant to 49 CFR 1180.2(d)(7) in Finance Docket No. 34821.

corporate family for the transfer of the Line to MSLLC, the assignment of the Jackson Trackage Rights Agreement and the Vicksburg Bridge Lease to MSLLC, KCS's continuance in control of MSLLC when it becomes a carrier, and the grant back of operating rights to KCSR to enable KCSR to act as MSLLC's contract operator and to provide certain rail services for its own account.

49 C.F.R. §1180.6 (a) (1) (ii) --Consummation Schedule.

The Parties propose to transfer the Line to MSLLC, and to commence operations under the agreements discussed above, immediately upon the later of (1) completion of the seven day period following the filing of this Notice of Exemption and the concurrently filed Notices of Exemptions filed in F.D. Nos. 34821 and 34823, or (2) completion of the environmental or historical documentation process as required under 49 C.F.R. § 1105.

49 C.F.R. §1180.6 (a) (1) (iii) -- Purpose of the Transaction.

The purpose of this transaction is innovatively to expand capacity on the Line for the benefit of customers and the national transportation network. The Line is an important east-west route that is in need of considerable investment in roadbed, signal systems, yards and sidings in order to provide sufficient capacity for KCSR's and NSR's existing and future traffic needs.

Although KCSR has completed certain infrastructure improvements, it has been unable to expand the capacity of the Line at a pace commensurate with the growing demand for rail transportation between the Southwest, including the West Coast ports, and the Southeast. The proposed transaction, and the trackage rights contemplated by the Notices of Exemption filed by KCSR and NSR in Finance Docket Nos. 34823 and 34821, address that investment need by injecting at least $260 million, or an average of almost $800,000 per route mile, into the Line over about four years. The capacity improvements made possible by the transaction will benefit all traffic on the Line. KCSR's local and overhead traffic should benefit from the added capacity that will give more customers the opportunity to move more freight. With this investment, the Line should be more competitive for intermodal traffic with other rail routes, including routes via the New Orleans, Memphis, and Birmingham gateways, and other modes of transportation. Additionally, the investment in Centralized Traffic Control on more than 260 miles of the Line will add an extra element of safety to rail operations over the Line.

Once implemented, this transaction will perpetuate the haulage arrangements that NSR and KCSR have had over the Line while significantly expanding capacity for all traffic. It will make permanent another routing option for NSR's customers for certain intermodal traffic and will preserve jobs while enhancing job opportunities.

49 C.F.R. §1180.6 (a) (5) -- List of States in Which the Parties' Property is Located.

The states in which KCSR's rail lines are located are Illinois, Kansas, Missouri, Oklahoma, Arkansas, Texas, Louisiana, Mississippi, Tennessee, and Alabama. KCSR also conducts rail business, through haulage rights, in the states of Nebraska and Iowa. The Line to be transferred to MSLLC and to be operated by KCSR on behalf of MSLLC is located in Mississippi and Louisiana.

49 C.F.R. §1180.6 (a) (6) -- Map Exhibit.

A map showing the location of the Line being transferred to MSLLC, its relationship to KCSR and other Class I carriers and short line connections, and the principal geographic points in the region traversed is attached as Exhibit 1.

49 C.F.R. §1180.6 (a) (7) (ii) -- Agreement Exhibit.

Not every agreement that the parties have entered into in connection with the transaction is relevant to the matters involved in this Notice of Exemption. Nonetheless, the Parties attach, as Exhibit 2, copies of the various agreements governing the transaction among KCS, KCSR, MSLLC, and NSR. Those agreements consist of a Transaction Agreement, minus non-relevant exhibits, but inclusive of the relevant rail operating agreements. The relevant rail operating agreements attached, which themselves are considered exhibits to the Transaction Agreement, consist of the Meridian Speedway LLC Agreement, KCSR – MSLLC Joint Use Agreement, NSR – MSLLC Joint Use Agreement, MSLCC – KCSR Operating Agreement, Western Haulage Agreement, Master Interchange Agreement, Unified Assignment and Assumption Agreement, Omnibus Bill of Sale, Vicksburg Assignment and Assumption Agreement, Jackson Assignment and Assumption Agreement, Unified Liability Agreement, Dallas Terminal Marketing Agreement, and Jackson Haulage Agreement. Certain confidential business terms have been redacted from the copies of the agreements submitted with the public version of this Notice.

Concurrent with the submission of those agreements, KCS is also filing a Motion for Protective Order whereby it requests that the Board adopt certain well-established procedures and processes governing the submission and exchange of confidential documents and information in this proceeding. KCS is also submitting, under seal, and subject to the Protective Order, unredacted Highly Confidential versions of the agreements that were submitted in the public version of this Notice.

49 C.F.R. §1180.4 (g) (1) (i) -- Level of Labor Protection.

Because KCSR will operate the Line on behalf of MSLLC (including providing haulage services to NSR for certain intermodal traffic), and will continue to operate over the Line for its own account pursuant to the local and overhead trackage rights granted to KCSR by MSLLC in Finance Docket No. 34823, the transaction contemplated by this Notice will not result in any adverse impacts on labor. Indeed, as the capacity of the Line increases and traffic levels correspondingly increase, the Parties anticipate that the transaction will generate additional opportunities for rail employment. Nonetheless, 49 U.S.C. §11326 requires imposition of labor protection for transactions approved or exempted pursuant to 49 U.S.C. § 11323. Under the statute and case precedent, the appropriate labor protection for this transaction is contained in New York Dock Ry.--Control--Brooklyn Eastern Dist., 360 I.C.C. 60 (1979).

49 C.F.R. §1105.6 through 1105.8--Environmental Report.

Because the transaction contemplated by this Notice does not contemplate any formal consolidation of the railroads' operations, and does not include any line abandonments or curtailment of service to customers, it should strengthen the transportation marketplace and have de minimis impacts on the environment and the communities which the Line transits. Nonetheless, recognizing that the investments contemplated by the transaction will create enhanced capacity

which in turn should lead to additional volumes of rail traffic on the Line, NSR and KCSR have consulted with the Board's Section of Environmental Analysis ("SEA") regarding retention of a third party contractor to discharge the Board's duties under the National Environmental Policy Act and the Board's implementing regulations under this Notice and the corresponding Notices filed in F.D. Nos. 34821 and 34823. As a result, no environmental or historic report need be filed with this Notice. See 49 CFR § 1105.10(d).

Respectfully submitted this 17th day of January, 2006.

TRANSACTION AGREEMENT

THIS TRANSACTION AGREEMENT (this "Agreement") is made and entered into as of December 1, 2005, by and among KANSAS CITY SOUTHERN, a Delaware corporation ("KCS"), THE KANSAS CITY SOUTHERN RAILWAY COMPANY, a Missouri corporation and Subsidiary of KCS ("KCSR"), NORFOLK SOUTHERN CORPORATION, a Virginia corporation ("NS"), and THE ALABAMA GREAT SOUTHERN RAILROAD COMPANY, an Alabama corporation and Subsidiary of NS ("AGS"), with reference to the following facts:

A. KCS, through KCSR, currently owns or operates certain properties, trackage rights, signals, equipment, and other rights, Permits, claims, contracts and assets related thereto, in each case, as set forth on Annex A hereto (collectively, the "Assets"), constituting the rail line between Meridian, Mississippi and Shreveport, Louisiana identified on Annex B (the "Line").

B. KCS and NS have determined that it is advisable to form a joint venture which will own such Assets, and, at the Closing, KCS and NS, through AGS, will form a limited liability company (the "Company") for the purpose of effecting the joint venture contemplated hereby and enter into a Limited Liability Company Agreement substantially in the form attached hereto as Exhibit A (the "Company Agreement") setting forth their rights and obligations as members of the Company.

C. On the terms and subject to the conditions contained herein, KCS desires to, and desires to cause KCSR to, contribute the Assets to the Company in exchange for a 70% membership interest in the Company, (as contemplated by the Company Agreement), and NS desires to cause AGS to contribute the amounts contemplated by Schedule 2.1(a) to the Company in exchange for a 30% membership interest in the Company.

D. In connection with the transactions contemplated by this Agreement and the Company Agreement, at the Closing, the parties will enter into, or will cause the Company or their respective Affiliates to enter into, as applicable: (i) an Operating Agreement substantially in the form attached hereto as Exhibit B (the "Operating Agreement"), (ii) an NSR Joint Use Agreement substantially in the form attached hereto as Exhibit C (the "NSR Joint Use Agreement"), (iii) a KCSR Joint Use Agreement substantially in the form attached hereto as Exhibit D (the "KCSR Joint Use Agreement"), (iv) a Western Haulage Agreement substantially in the form attached hereto as Exhibit E, (v) a KCSR Master Interchange Agreement substantially in the form attached hereto as Exhibit F, (vi) a Unified Assignment and Assumption

Agreement substantially in the form attached hereto as Exhibit G, (vii) the Vicksburg Assignment Agreement (as defined in Section 3.1(b)), (viii) the Jackson Assignment Agreement (as defined in Section 3.1(c)), (ix) one or more Notes (as defined in Section 4), (x) the Omnibus Bill of Sale attached hereto as Exhibit H, (xi) the Unified Liability Agreement attached hereto as Exhibit I, (xii) the Dallas Terminal Marketing Agreement attached hereto as Exhibit J, (xiii) the NSR – KCSR Haulage Agreement (as defined in Section 3.1(c)) and (xiv) the Access Agreement (as defined in Section 10.2(c)) (collectively, the "Ancillary Agreements").

NOW, THEREFORE, with reference to the foregoing facts and in consideration of the mutual agreements and understandings set forth herein, the parties hereto, intending to be legally bound, hereby agree as follows:

1. Definitions.

1.1 Certain Definitions. All terms defined in this Agreement shall have the defined meanings when used in this Agreement or in any agreement, note, certificate, report or other document made or delivered pursuant to this Agreement, unless otherwise defined or the context otherwise requires. The following terms shall have the following meanings:

"AAA" shall have the meaning given to that term in Section 14.13.

"Access Agreement" shall have the meaning given to that term in Section 10.2(c).

"Action" means any litigation, action, suit, proceeding, investigation, arbitration, claim or other dispute by or before any court or other Governmental Authority, or any other alternative dispute resolution proceedings, such as arbitration or mediation.

"Affiliate" shall mean, with respect to any specified Person, (i) any other Person who, directly or indirectly, controls, is under common control with, or is controlled by, such specified Person, (ii) any other Person who is a director, officer, manager, member, partner or trustee of the specified Person or a Person described in clause (i) of this definition or any spouse of the specified Person or any such other Person or (iii) any Person of which the specified Person and/or any one or more of the Persons specified in clause (i) or (ii) of this definition, individually or in the aggregate, beneficially own 10% or more of any class of voting securities.

"Aggregate NS Consideration" shall have the meaning given to that term in Schedule 2.1(a).

"Agreement" shall have the meaning given to that term in the Recitals.

"AGS" shall have the meaning given to that term in the Recitals.

"Alternative Proposal" shall have the meaning given to that term in Section 10.3.

"Ancillary Agreements" shall have the meaning given to that term in the Recitals.

"Anniversary Date" shall have the meaning given to that term in Section 2.1(b).

"Appraiser" shall have the meaning given to that term in Section 10.10(d).

"Appraisal Report" shall have the meaning given to that term in Section 10.10(e).

"Assets" shall have the meaning given to that term in the Recitals.

"Assumed Liabilities" shall have the meaning given to that term in Section 3.2(a).

"Business Combination" shall have the meaning given to that term in Section 10.8.

"Business Day" shall mean any day other than a Saturday or Sunday or any day banks in the State of New York are authorized or required to be closed.

"Canadian National" shall mean the Canadian National Railway Company.

"Capital Contribution Amount" shall mean, on any given date, the total of the KCSR Borrowing Capacity and the Company Capital Amount.

"Capital Proceeds" shall have the meaning given to that term in Section 2.2.

"Charter Documents" shall mean the certificate of incorporation or articles of incorporation and the by-laws, with respect to a corporation; the partnership agreement, with respect to a general partnership; or the certificate of formation and operating or company agreement, with respect to a limited liability company.

"Cleanup" shall mean all actions, including investigations, required by Law to: (1) cleanup, remove, treat or remediate Hazardous Materials in the environment; (2) prevent the Release of Hazardous Materials so that they do not migrate, endanger or threaten to endanger public health or welfare or the environment; (3) perform pre-remedial studies and investigations and post-remedial monitoring and care; or (4) respond to any government requests for information or documents in any way relating to cleanup, removal, treatment or remediation or potential cleanup, removal, treatment or remediation of Hazardous Materials in the environment.

"**Closing**" shall mean the closing of the purchase and sale of the NS Interest on the Closing Date as contemplated by Section 2.1(a) and the contribution of the Assets in exchange for the KCS Interest.

"**Closing Date**" shall have the meaning given to that term in Section 6.1.

"**Company**" shall have the meaning given to that term in the Recitals.

"**Company Agreement**" shall have the meaning given to that term in the Recitals.

"**Company Capital Amount**" shall mean, as of any determination date, the total amount that the Company will be able to expend for capital improvements on the Line within one-hundred eighty (180) days of such date in accordance with Section 4.06(iii) of the Indentures which improvements were not the subject of any prior calculation of the Company Capital Amount.

"**Company Indemnified Parties**" shall have the meaning given to that term in Section 12.2(a).

"**Company Line Assets**" shall have the meaning given to that term in Section 10.10(a)(ii).

"**Confidentiality Agreement**" shall have the meaning given to that term in Section 10.2(a).

"**Contract**" shall mean any note, bond, debenture, mortgage, license, agreement, commitment, contract, obligation, promise or understanding.

"**Conveying Party**" shall have the meaning given to that them in Section 3.1(c).

"**Damages**" shall have the meaning given to that term in Section 12.2(a).

"**Delaware Courts**" shall have the meaning given to that term in Section 14.5(b).

"**Dispute**" shall have the meaning given to that term in Section 14.13.

"**Dispute Notice**" shall have the meaning given to that term in Section 14.13.

"**Disclosure Schedule**" shall have the meaning given to that term in Article 8.

"**Environmental Claim**" means any fine, claim, action, lien, cause of action, investigation or notice by any Person alleging potential liability (including potential liability for Cleanup costs, governmental response costs, natural resources

damages, property damages, personal injuries, or penalties) arising out of, based on or resulting from (a) the presence, Release or threatened Release of any Hazardous Materials, or (b) circumstances forming the basis of any violation of any Environmental Law.

"Environmental Laws" means all Laws relating to pollution or protection of human health or the environment, including all Laws relating to Releases or threatened Releases of Hazardous Materials or otherwise relating to the manufacture, processing, distribution, use, treatment, storage, Release, disposal, transport or handling of Hazardous Materials, all Laws relating to record keeping, notification, disclosure and reporting requirements respecting Hazardous Materials and all Laws relating to endangered or threatened species of fish, wildlife and plants and natural resources.

"Environmental Reports" shall have the meaning given to that term in Section 8.7(d).

"Excess Capital" shall have the meaning given to that term in Section 2.2.

"Excess Proceeds" shall have the meaning given to that term in Section 2.2.

"Excluded Assets" shall have the meaning given to that term in Section 8.3.

"Governmental Authority" shall mean any nation or government, any state or other political subdivision thereof, and any entity exercising executive, legislative, judicial, regulatory or administrative functions of or pertaining to government or any mediation body or arbitral tribunal, including the STB.

"Hazardous Materials" shall mean all substances defined as Hazardous Substances, Oils, Pollutants or Contaminants in the National Oil and Hazardous Substances Pollution Contingency Plan, 40 C.F.R. § 300.5, or defined as such by, or regulated as such under, any Environmental Law.

"Indebtedness" means, with respect to any Person, (i) any liability, contingent or otherwise, (a) for borrowed money, capitalized lease obligations, purchase money obligations or other obligations relating to the deferred purchase price of assets or property or (b) evidenced by a note, bond, debenture, letter of credit or similar instrument given in connection with the acquisition, other than in the ordinary course of business consistent with past practice, of any property, assets, securities or otherwise, including indebtedness created or arising under conditional sale or other title retention agreements (even though the rights and remedies of the seller or lender under the agreements in the event of default are limited to repossession or sale of the property), (ii) any liability of others described in the preceding clause (i) which such Person has guaranteed or which otherwise is its legal liability, (iii) all indebtedness referred to above secured by (or for which the holder of the indebtedness has an existing right, contingent or otherwise, to be secured by), any Lien upon the property of such Person, whether or not the obligations secured thereby have been assumed, and (iv) any amendment, renewal, extension or

refunding of any liability referred to in clauses (i), (ii) and (iii) above; provided, however, that Indebtedness does not include any trade payables of any Person incurred in the ordinary course of business consistent with past practice. The amount of Indebtedness of any Person at any date shall be the outstanding balance at the date of all unconditional obligations as described above and the maximum amount of any contingent obligations at the date.

"Indemnified Party" shall have the meaning given to that term in Section 12.4.

"Indemnifying Party" shall have the meaning given to that term in Section 12.4.

"Indentures" shall mean, collectively, the Indenture, dated as of September 27, 2000, among KCSR, KCS, certain Subsidiaries of KCS and The Bank of New York, as trustee, governing the terms of KCS' 9½% Senior Notes due 2008 and the Indenture, dated as of June 12, 2002, among KCSR, KCS, certain Subsidiaries of KCS and U.S. Bank National Association, as trustee, governing the terms of KCS' 7½% Senior Notes due 2009, as they may be amended from time to time.

"Issuance Date" shall have the meaning given to that term in Schedule 2.1(a).

"Jackson Assignment Agreement" shall have the meaning given to that term in Section 3.1(c).

"Jackson Flyover" shall mean a bridge to carry the Company's tracks over the real property and tracks of Canadian National Railway Company (or its Subsidiaries) located at Jackson, Mississippi which establishes a continuous line of rail between Meridian, Mississippi and Shreveport, Louisiana.

"KCS" shall have the meaning given to that term in the Recitals.

"KCSR Borrowing Capacity" shall mean, as of any determination date, the total amount of previously unborrowed funds that KCSR (or any other Subsidiary of KCS which is on such date a party to the Company Agreement) is permitted to borrow from the Company pursuant to a Note on such date without violating in any respect the KCS Credit Agreement, the Indentures or any other Contract evidencing more than $100,000 of Indebtedness to which it is a party on such date; it being understood that, in no event shall the KCSR Borrowing Capacity, together with all funds previously borrowed pursuant to any Note (including any Note evidencing the borrowing of the Excess Proceeds contemplated by Section 4), exceed $300,000,000.

"KCS Credit Agreement" shall mean the Credit Agreement dated as of March 30, 2004 among KCSR, KCS, certain subsidiaries of KCS and Lenders (as defined therein), as amended through the date hereof.

"KCS Credit Agreement Amendment No. 2" shall mean Amendment No. 2 to the Credit Agreement, dated as of September 30, 2005, among KCSR, KCS, the subsidiary guarantors listed on the signature page thereto, the Lender Parties (as defined therein) thereto and The Bank of Nova Scotia.

"KCS Interest" shall have the meaning given to that term in Section 3.1.

"KCSR Joint Use Agreement" shall have the meaning given to that term in the Recitals.

"KCS Line Assets" shall have the meaning given to that term in Section 10.10(a).

"KCS Membership Interests" shall have the meaning given to that term in Section 10.10(a)(i).

"KCSR" shall have the meaning given to that term in the Recitals.

"Knowledge" with respect to KCS shall mean the actual knowledge, after due inquiry into the matter in question, of any of the Persons listed on Schedule 1.1(a) hereto.

"Law" shall mean any U.S. federal, state or local or foreign statute, law, rule, regulation, ordinance, order, code, policy or rule of common law, now or hereafter in effect and, in each case, as amended, any binding judicial or administrative interpretation thereof by a Governmental Authority or otherwise, including any judicial or administrative order, consent, decree or judgment; provided that, each reference to "Law" in Sections 8 and 9 of this Agreement shall mean only a Law in effect as of the date of this Agreement.

"Lease" shall have the meaning given to that term in Section 8.4(b)(viii).

"Leased Personal Property" shall mean all personal property leased by KCS and its Affiliates which is included in the Assets.

"Leased Property" shall have the meaning given to that term in Section 8.14(b).

"Lien" shall mean any mortgage, deed of trust, pledge, security interest, hypothecation, assignment, deposit arrangement, encumbrance, lien (statutory or other), or preference, purchase option, right of first offer, right of first refusal, priority or other security agreement (including any conditional sale or other title retention agreement, any financing lease having substantially the same economic effect as any of the foregoing, and the filing of any financing statement under the Uniform Commercial Code or comparable Law of any jurisdiction to evidence any of the foregoing).

"Line" shall have the meaning given to that term in the Recitals.

"Line Assets" shall have the meaning given to that term in Section 10.10(a).

"Line FMV" shall have the meaning given to that term in Section 10.10(d)(i).

"Line Option" shall have the meaning given to that term in Section 10.10(a).

"Line Option Exercise Notice" shall have the meaning given to that term in Section 10.10(g).

"Line Option Notice" shall have the meaning given to that term in Section 10.10(a).

"Line Option Valuation Notice" shall have the meaning given to that term in Section 10.10(d).

"Material Adverse Effect" shall mean, with respect to any party, any change, circumstance, event or effect which, individually or when considered in conjunction with other changes, circumstances or effects, has had or would reasonably be likely to have a material adverse effect on (a) with respect to a Material Adverse Effect on KCS and KCSR, the Assets, taken as a whole, or the financial condition or results of operations of the business of the Company to be conducted with the Assets after the Closing, taken as a whole, or (b) any party, the ability of such party to consummate the transactions contemplated by this Agreement, the Ancillary Agreements or the Company Agreement or to perform its obligations hereunder or thereunder; provided, that none of the following shall be deemed to constitute, and none of the following shall be taken into account in determining whether there has been, a Material Adverse Effect: (x) any adverse change, event, development, or effect arising from or relating to (1) general business or economic conditions, including conditions related to the prospective business of the party and including changes in energy prices or availability, except to the extent that such conditions disproportionately affect such party's business relative to the effect of such factors on other Persons operating in such party's industry, (2) national or international political or social conditions, including the engagement by the United States in hostilities, whether or not pursuant to the declaration of a national emergency or war, or the occurrence of any military or terrorist attack upon the United States, or any of its territories, possessions, or diplomatic or consular offices or upon any military installation, equipment or personnel of the United States, except to the extent that such conditions disproportionately affect such party's business relative to the effect of such factors on other Persons operating in such party's industry, (3) financial, banking, or securities markets (including any disruption thereof and any decline in the price of any security or any market index), (4) changes in United States generally accepted accounting principles, (5) changes in Law or (6) the taking of any action contemplated by this Agreement and the other agreements contemplated hereby, (y) any of the events, occurrences, or circumstances set forth in Schedule 1.1(b) and (z) any change, occurrence, event or effect, which shall have been cured without a Material Adverse Effect (excluding this clause (z)),

on the Assets, before the earlier of the Closing Date or the date on which this Agreement is terminated pursuant to Section 13.

"Material Contracts" shall have the meaning given to that term in Section 8.4(b).

"Membership Interest FMV" shall have the meaning given to that term in Section 10.10(d)(ii).

"MSR Jackson Trackage Rights" shall mean that certain trackage rights agreement, as supplemented and amended from time to time, dated March 26, 1986, between Midsouth Rail Corporation and Illinois Central Gulf Railroad Corporation, and the underlying right of movement, pursuant to which KCSR (as successor to Midsouth Rail Corporation) operates over an approximately four-tenths (0.4) of a mile section of track in Jackson, Mississippi that is controlled by Canadian National (as successor to Illinois Central Gulf Railroad Corporation).

"Notes" shall have the meaning given to that term in Section 4.

"Notices" shall have the meaning given to that term in Section 14.1.

"NS" shall have the meaning given to that term in the Recitals.

"NS Closing Cash Purchase Price" shall mean the NS Consideration payable by NS on the Closing Date as determined in accordance with Schedule 2.1(a).

"NS Consideration" shall have the meaning given to that term in Schedule 2.1(a).

"NS Indemnified Parties" shall have the meaning given to that term in Section 12.2(a).

"NS Interest" shall have the meaning given to that term in Section 2.1(a).

"NSR" shall mean Norfolk Southern Railway Company, a Virginia corporation and Subsidiary of NS.

"NSR Joint Use Agreement" shall have the meaning given to that term in the Recitals.

"Officer's Certificate" shall have the meaning given to that term in Section 2.1(b).

"Operating Agreement" shall have the meaning given to that term in the Recitals.

"Owned Property" shall have the meaning given to that term in Section 8.14(a).

"Partner Financing" shall have the meaning given to that term in Article 4.

"Permitted Liens" shall mean collectively, (i) Liens for Taxes not yet due and payable or which are being contested in good faith by appropriate proceedings and for which adequate reserves have been made; (ii) such imperfections of title, easements and other similar encumbrances, if any, as do not, individually or in the aggregate, interfere in any material respect with the use of any Owned Property as such Owned Property is used on the date of this Agreement; (iii) mechanics', materialmen's, workmen's, repairmen's, warehousemen's, carrier's and other similar Liens arising in the ordinary course of business consistent with past practice, all of which shall be released at or prior to the Closing; (iv) Liens arising under the Indentures; or (v) those Liens set forth on Schedule 1.1(c) hereto.

"Permits" shall have the meaning given to that term in Section 8.8(b).

"Person" shall mean an individual or a partnership, corporation, trust, association, limited liability company, Governmental Authority or other entity.

"Preferred Return" shall have the meaning given to that term in the Company Agreement.

"Preferred Return Amount" shall have the meaning given to that term in the Company Agreement.

"Property" shall have the meaning given to that term in Section 8.14(c).

"Release" means any release, spill, emission, discharge, leaking, pumping, injection, deposit, disposal, or leaching into the environment (including ambient air, surface water, groundwater and surface or subsurface strata) or into or out of any property, including the movement of Hazardous Materials through or in the air, soil, surface water, groundwater or property.

"Required Governmental Consents" shall have the meaning given to that term in Section 10.5.

"Restricted Subsidiary" shall have the meaning given to that term in the Indentures.

"Retained Interests" shall have the meaning given to that term in Section 3.1(d).

"Rules" shall have the meaning given to that term in Section 14.13.

"Standstill Period" shall have the meaning given to that term in Section 10.8.

"**STB**" shall mean the Surface Transportation Board or any successor entity thereto.

"**Subsidiary**" of any Person shall mean any entity of which such Person owns, directly or indirectly, securities or other ownership interests having the power to elect a majority of the board of directors or other persons performing similar functions, or otherwise having the power to direct, manage or control the conduct of business of such entity.

"**Tax Return**" shall mean any report, return, document, declaration or other information or filing (including any amendment thereto) with respect to Taxes required by Law to be supplied to any Governmental Authority (foreign or domestic) or to be collected or maintained, including information returns, any documents accompanying payments of estimated Taxes, or requests for the extension of time in which to file any such report, return, document, declaration or other information or filing.

"**Taxes**" shall mean all federal, state, local, foreign and other taxes, customs, duties, fees, levies, assessments or charges of any kind whatsoever, including all net income, gross income, gross receipts, sales, use, ad valorem, transfer, franchise, profits, license, withholding, payroll, employment, excise, estimated, severance, stamp, occupation, real or personal property, business, documentary, registration, filing, recordation, unemployment, worker's compensation, commercial rent, premium, windfall profits, deemed profits, lease, capital, production, corporation, value added, bulk sale or other taxes, customs, duties, fees, levies, assessments or charges of any kind whatsoever, together with any interest and any penalties, additions to tax or additional amounts imposed by any Governmental Authority (domestic or foreign) regardless of whether disputed or whether related to the filing of a Tax Return (or the failure to file a Tax Return).

"**Terminal**" shall have the meaning given to that term in Section 8.14(a).

"**Third Party Claim**" shall have the meaning given to that term in Section 12.5(a).

"**Third Party Leases**" shall have the meaning given to that term in Section 8.4(b)(ix).

"**Title Company**" shall have the meaning given to that term in Section 10.6(b).

"**Transfer**" shall mean sell, assign, transfer, pledge, grant a security interest in, or otherwise dispose of, with or without consideration, and "Transferred" shall have a correlative meaning.

"**Vicksburg Assignment Agreement**" shall have the meaning given to that term in Section 3.1(b).

"Vicksburg Bridge Lease" shall mean that certain lease, as supplemented, amended and/or replaced from time to time, dated February 11, 1928 between Vicksburg Bridge and Terminal Company and The Yazoo and Mississippi Valley Railroad Company, pursuant to which KCSR leases that certain railroad bridge over the Mississippi River at Vicksburg, MS.

1.2 Construction of Certain Terms and Phrases. Unless the context otherwise requires, (a) words of any gender include each other gender; (b) words using the singular or plural number also include the plural or singular number, respectively; (c) the terms "hereof," "herein," "hereby" and derivative or similar words refer to this entire Agreement; (d) the terms "Article" or "Section" refers to the specified Article or Section of this Agreement; (e) the terms "and" and "or" include the term "and/or" when the context is appropriate; (f) the terms "include" or "including" also include the words "without limitation" when the context is appropriate; and (g) the phrases "ordinary course of business" and "ordinary course of business consistent with past practice" refer to the business and practice of the Person specified or, in the case of the operation of the Line, the business and practice of KCS, KCSR and their respective Subsidiaries with respect to the Assets. Whenever this Agreement refers to a number of days, such number shall refer to calendar days unless Business Days are specified. All accounting terms used herein and not expressly defined herein shall have the meanings given to them under generally accepted accounting principles, as in effect in the United States of America. Whenever this Agreement refers to an Exhibit or Schedule attached hereto, the Exhibit or Schedule shall be deemed to be incorporated by reference.

2. Purchase and Sale of Membership Interest.

2.1 Purchase and Sale of Membership Interest.

(a) KCS shall prepare and deliver to NS at least ten (10) Business Days prior to the Closing Date a certificate duly executed by the chief financial officer of KCS certifying as of such date the Capital Contribution Amount (each such certificate, an "Officer's Certificate"). Subject to the terms and conditions of this Agreement, at the Closing, KCS and NS shall cause the Company to issue and sell to AGS, and NS shall cause AGS to purchase from the Company, up to a 30% membership interest in the Company (as adjusted pursuant to Section 2.1(b), the "NS Interest") in exchange for cash consideration, in each case, as determined in accordance with Schedule 2.1(a).

(b) Within ten (10) Business Days prior to each six-month anniversary of the Closing Date (each, an "Anniversary Date") until the NS Interest represents a 30% membership interest in the Company, KCS shall prepare and deliver to NS an Officer's Certificate. Subject to the terms and conditions of this Agreement, on each Anniversary Date, KCS and NS shall cause the Company to issue and sell to AGS, and NS shall cause AGS to purchase from the Company, in exchange for cash consideration determined in accordance with Schedule 2.1(a), an additional membership interest in the Company such that, upon the issuance thereof, AGS and KCS will hold the

respective percentage membership interests in the Company, in each case, determined in accordance with Schedule 2.1(a).

2.2 Use of Proceeds. KCS and NS shall cause the Company to use $260,000,000 of the proceeds from the sale of the NS Interest plus any interest earned thereon from time to time (the "Capital Proceeds") for the capital expenditures anticipated to be made in accordance with the Company Agreement and the Budgets (including any Rollover Budgets) and Business Plans (as each such term is defined in the Company Agreement) for the Company contemplated thereby. KCS and NS shall cause at Closing up to $40,000,000 of the proceeds from the sale of the NS Interest to be paid to reimburse KCS for capital expenditures made by KCS on the Line within the two-year period ending on the Closing Date (none of which shall have been made in anticipation of this Agreement) as presented on a schedule delivered to NS prior to the Closing Date, which schedule shall be final and binding on NS if it accurately sets forth expenditures made in accordance with the principles expressed in this sentence (the difference between $40,000,000 and such reimbursement shall be the "Excess Proceeds"), and (b) the Excess Proceeds and any portion of the Capital Proceeds not allocated at such time for capital expenditures in accordance with the then current Budget or any Rollover Budget, as the case may be, and Business Plan (in the aggregate, the "Excess Capital") to be made available by the Company to provide the Partner Financing pursuant to Article 4 below. KCS and NS shall cause the Company to pay KCS a Preferred Return Amount on and, at KCS' election, a Preferred Return of, the Excess Proceeds, as contemplated in the Company Agreement.

3. Contribution of Assets and Assumption of Liabilities.

3.1 Contribution of Assets.

(a) Subject to the terms and conditions of this Agreement, at the Closing, KCS and KCSR shall, and shall cause their respective Subsidiaries, as applicable, to, transfer, convey, assign and deliver to the Company, all of their respective right, title and interest in the Assets, free and clear of all Liens other than Permitted Liens, and in exchange for the Assets, KCS and NS shall cause the Company to issue to KCS a 71.4286% membership interest in the Company (as adjusted pursuant to Section 2.1(b) and together with the Preferred Return, the "KCS Interest"). The parties acknowledge that KCS' initial capital account in the Company will be as set forth in Exhibit 2.2 to the Company Agreement and that the Company shall be a Restricted Subsidiary prior to the transfer of the Assets to the Company and shall remain a Restricted Subsidiary so long as the Indentures remain in effect.

(b) Prior to the Closing, KCSR shall use its commercially reasonable efforts to obtain the consent of the Warren County Bridge Commission to an assignment of the Vicksburg Bridge Lease to the Company. Should KCSR obtain said consent prior to the Closing, at the Closing, KCSR shall assign the Vicksburg Bridge Lease to the Company pursuant to an assignment agreement substantially in the form attached hereto as Exhibit K (the "Vicksburg Assignment Agreement"). Should KCSR fail to obtain said consent prior to the Closing, at the Closing, KCSR shall sublease, at the

same rate as paid by KCSR , the Vicksburg Bridge Lease to the Company pursuant to a customary sublease agreement, and thereafter shall continue to use its commercially reasonable efforts to obtain the consent of the Warren County Bridge Commission to an assignment of the Vicksburg Bridge Lease to the Company and, upon receipt of such consent, shall assign the Vicksburg Bridge Lease to the Company pursuant to an assignment agreement substantially in the form of the Vicksburg Assignment Agreement. Notwithstanding anything herein to the contrary, for purposes of this Agreement, the Vicksburg Assignment Agreement shall only be considered an Ancillary Agreement if the consent of the Warren County Bridge Commission to an assignment of the Vicksburg Bridge Lease to the Company is obtained by KCSR prior to Closing. Any material amendment, and any termination or renewal, of the Vicksburg Bridge Lease prior to any assignment pursuant to the Vicksburg Assignment Agreement shall be made only with the written consent of NS, provided that the consent of NS shall not be required for KCS to resolve the current dispute with the Warren County Bridge Commission regarding the Vicksburg Bridge Lease described in Section 8.4(a)(i) of the Disclosure Schedule if such resolution does not prevent or materially impair the assignment to the Company of such lease as contemplated by this Section 3.1(b) or materially, adversely affect the access to or enjoyment of the Vicksburg Bridge as contemplated by the NSR Joint Use Agreement.

(c) Prior to the Closing, KCSR shall use its commercially reasonable efforts to obtain the consent of Canadian National to an assignment of the MSR Jackson Trackage Rights to the Company. KCS and NS shall seek an order of the STB permitting said assignment, should such consent be obtained, or overriding any provision of said MSR Jackson Trackage Rights preventing such assignment without the consent of Canadian National, should such consent not be obtained. Any assignment by KCSR of the MSR Jackson Trackage Rights to the Company shall be pursuant to an assignment agreement substantially in the form attached hereto as Exhibit L (the "Jackson Assignment Agreement"). Following the Closing Date and until the earlier of assignment to the Company of the MSR Jackson Trackage Rights or commencement of railroad operations over the Jackson Flyover, as provided in Section 5.13 of the Company Agreement, KCSR shall provide the Company and NSR with haulage rights over the portion of the Line subject to the MSR Jackson Trackage Rights pursuant to an NSR – KCSR Haulage Agreement substantially in the form attached as Exhibit M hereto (the "NSR – KCSR Haulage Agreement").

(d) Schedule 3.1(d) sets forth certain interests of KCS and its Subsidiaries (the "Retained Interests") in the Assets to be conveyed to the Company pursuant to Section 3.1(a) which interests shall be retained following the Closing by the party conveying the relevant Assets to the Company (the "Conveying Party"). The Retained Interests may be exercised only at the sole risk and expense of the Conveying Party, in a manner that shall not unreasonably interfere with the operation of the Assets as contemplated by the Operating Agreement, the NSR Joint Use Agreement and the KCSR Joint Use Agreement, and shall be subject to execution of a reasonable access agreement between the relevant Conveying Party and the Company. KCS shall cause any Conveying Party seeking to exercise Retained Interests to provide reasonable advance notice to the Company before said party may enter any relevant Assets consisting of Property for purposes of exercising a Retained Interest, and said party's actions on such

Property shall at all times be subject to the reasonable direction and control of the operating officer in charge of the Property and to applicable provisions of the Company's safety and operating rules.

(e) The parties hereto acknowledge that some of the Owned Properties include adjoining land, buildings, structures and other improvements that are not included in the Assets and that, accordingly, must be subdivided into separate lots. Accordingly, as to each such Owned Property, KCS shall promptly, and at KCS' sole expense, take all steps necessary (including, without limitation, recording all required deeds, performing all required surveys and obtaining all necessary planning and zoning approvals) to subdivide and obtain a separate tax lot/parcel for the portion of each such Owned Property that is included in the Assets, distinct from any adjoining land, buildings, structures or other improvements that are not included in the Assets.

3.2 Transfer of Liabilities.

(a) Subject to the terms and conditions of this Agreement, at the Closing, KCS and NS shall cause the Company to assume the liabilities and obligations of KCS, KCSR and their respective Affiliates relating to the operation of the Assets set forth on Schedule 3.2 hereto (the "Assumed Liabilities"). Except as and to the extent otherwise expressly provided in this Agreement, the Company has not agreed to pay, shall not be required to assume and shall not have any obligation in respect of, any liability or obligation, direct or indirect, absolute or contingent, of KCS, KCSR, NS or any other Person, the assumption of which by the Company is not expressly provided for in this Agreement.

(b) Notwithstanding anything in Section 3.2(a) to the contrary, any assignment agreement or sublease entered into pursuant to Section 3.1(b) shall provide that all liabilities and obligations under the Vicksburg Bridge Lease relating to or arising from events or omissions occurring prior to the Closing shall be the liabilities and obligations of KCSR, and any liabilities and obligations under the Vicksburg Bridge Lease relating to or arising from events or omissions occurring after the Closing shall be the liabilities and obligations of the Company, except to the extent that any such liabilities or obligations arise from the exercise by the Conveying Parties of the Retained Interests.

4. Partner Financing. Promptly following the Closing, KCS and NS shall cause the Company to loan to KCS an amount not to exceed the Excess Proceeds and thereafter to KCS and NS from time to time upon such party's request up to an amount equal to the Excess Capital less the aggregate amount of any outstanding loans made pursuant to this Section 4 (such loans, the "Partner Financing") to be evidenced by one or more notes substantially in the form attached hereto as Exhibit N (collectively, the "Notes"). All such Partner Financing shall first be made available to KCS and, if KCS elects not to borrow such amounts, subsequently to NS and shall in each case be structured so as to not violate, in the reasonable opinion of counsel to KCS, any provision of the Indentures.

5. Intentionally Omitted

6. The Closing.

6.1 The Closing. The Closing shall take place at the offices of Sonnenschein Nath & Rosenthal LLP, 1221 Avenue of the Americas, 25th Floor, New York, New York 10020 at 10:00 A.M., local time on a date to be agreed to by NS and KCS, which date shall be no later than three Business Days following the date on which all of the conditions set forth in Article 11 shall have been satisfied or waived (other than those conditions that by their nature are to be satisfied at the Closing, but subject to the fulfillment or waiver of those conditions), or at such other time and place as KCS and NS mutually agree upon in writing. The date of the Closing is referred to in this Agreement as the "Closing Date."

7. Deliveries at the Closing.

7.1 Deliveries at the Closing. At the Closing:

(a) NS shall, or shall cause AGS and its other Subsidiaries to, deliver (i) the NS Closing Cash Purchase Price by wire transfer of immediately available funds to the account(s) designated by KCS and NS on behalf of the Company in writing at least one Business Day prior to the Closing Date; (ii) duly executed counterpart originals of each Ancillary Agreement to which NS, AGS or any of their respective Subsidiaries is a party to KCS or the Company, as applicable; (iii) a duly executed counterpart original of the Company Agreement to KCS; (iv) the certificate required to be delivered to KCS pursuant to Section 11.3(c) of this Agreement; (v) the opinions required pursuant to Section 11.3(e) of the Agreement to KCS; and (vi) such documents and instruments as KCS may reasonably request to evidence the satisfaction of all conditions precedent set forth in Article 11 of this Agreement or which are required to be delivered by NS at or prior to the Closing Date pursuant to this Agreement.

(b) KCS and KCSR shall, or shall cause their respective Subsidiaries to, deliver: (i) a duly executed counterpart original of the Company Agreement to NS; (ii) duly executed counterpart originals of each Ancillary Agreement to which KCS, KCSR or their respective Subsidiaries is a party to NS or the Company, as applicable; (iii) the certificate required to be delivered to NS pursuant to Section 11.2(c) of this Agreement; (iv) the consents required, if any, pursuant to Section 11.2(d) of this Agreement to NS; (v) quitclaim deeds with respect to each of the Owned Properties to the Company; (vi) the consent to assignment or sublease, as the case may be, provided for in Section 3.1(b) of this Agreement to the Company; (vii) all such other deeds, endorsements, assignments and other instruments as are necessary to transfer to the Company KCS' and its Subsidiaries' interest in the Assets in accordance with the terms hereof; (viii) the opinions required pursuant to Section 11.2(f) of the Agreement to NS; and (ix) such documents and instruments to NS as NS may reasonably request to evidence the satisfaction of all conditions precedent set forth in Article 11 of this Agreement or which are required to be delivered by KCS at or prior to the Closing Date pursuant to this Agreement.

(c) KCS and NS shall cause the Company to deliver (i) duly executed counterpart originals of each Ancillary Agreement to which the Company is a party to NS or KCS, as applicable and (ii) certificates representing the NS Initial Interest and the KCS Interest to AGS and KCS, respectively.

7.2 Further Assurances. At and following the Closing, each party to this Agreement shall deliver or cause to be delivered, as appropriate, such further certificates, consents and other documents as may be necessary to carry out the terms of this Agreement.

8. Representations and Warranties of KCS and KCSR. Except as set forth in the disclosure schedule (the "Disclosure Schedule") prepared by KCS and delivered to NS concurrently with the execution of this Agreement (in each case making reference to the particular subsection of this Agreement to which the relevant disclosure or exception is being made), KCS and KCSR jointly represent and warrant to NS as of the date hereof and, to the extent provided in Section 11.2(a), as of the Closing, as follows:

8.1 Organization, Standing and Power. Each of KCS and KCSR is a corporation duly organized, validly existing and in good standing under the Laws of the jurisdiction of its incorporation and has all requisite power and authority to own, lease and operate its properties and assets and to carry on its business as now being conducted. Each of KCS and KCSR is duly qualified or licensed as a foreign entity and is in good standing in each jurisdiction where the nature of its properties owned or held under lease or the nature of the business conducted by it make such qualification necessary, except for any failure to be so qualified, licensed and in good standing as would not, individually or in the aggregate, have a Material Adverse Effect on KCS or KCSR.

8.2 Authority; Enforceability; Noncontravention.

(a) Each of KCS, KCSR and their respective Subsidiaries, as the case may be, has full power and authority to enter into, execute and deliver this Agreement, each of the Ancillary Agreements and the Company Agreement to which it is a party and perform its obligations hereunder and thereunder. This Agreement has been, and each of the Ancillary Agreements and the Company Agreement will be, duly authorized by all necessary action of each of KCS, KCSR and their respective Subsidiaries, as the case may be. This Agreement has been, and each of the Ancillary Agreements and the Company Agreement will be, duly executed and delivered by each of KCS, KCSR and their respective Subsidiaries, as the case may be, and, assuming their due execution and delivery by the other party or parties hereto or thereto, constitutes or will constitute a valid and legally binding obligation of each of KCS, KCSR and their respective Subsidiaries, as the case may be, respectively, enforceable against them in accordance with its terms, subject to the effect of bankruptcy, insolvency, reorganization, moratorium, fraudulent conveyance and other similar Laws relating to or affecting creditors' rights generally, and to the availability of equitable remedies.

(b) The execution and delivery of this Agreement, each of the Ancillary Agreements and the Company Agreement by each of KCS, KCSR and their respective Subsidiaries, as the case may be, does not and will not, and compliance by KCS and KCSR, as applicable, with the provisions of this Agreement, each of the Ancillary Agreements and the Company Agreement will not, (i) conflict with or result in a breach or default under the Charter Documents of KCS, KCSR or their respective Subsidiaries; (ii) constitute or result in a material breach or violation of, or a material default under, or the acceleration of (with or without the giving of notice, the lapse of time or both) any obligation pursuant to, any provision of any Material Contract to which KCS, KCSR or their respective Subsidiaries is a party or otherwise bound, or to which any property or asset of KCS, KCSR or their respective Subsidiaries is subject; (iii) subject to the filings with Governmental Authorities and other matters referred to in Section 8.2(c) below, violate any Law applicable to KCS, KCSR or their respective Subsidiaries; (iv) result in the creation or imposition of any material Lien on the Assets; or (v) constitute or result in any material change in the rights or obligations of any party under any of the Material Contracts.

(c) Except (i) for the applicable requirements of the STB and (ii) as set forth on Section 8.2(c) of the Disclosure Schedule, there are no approvals, authorizations, consents, orders or other actions of, or filings with, any Person, including any Governmental Authority, that are required to be obtained or made by KCS, KCSR, or their respective Subsidiaries or the Company in connection with the execution of, and the consummation of the transactions contemplated under, this Agreement, the Ancillary Agreements or the Company Agreement, except in each case as will not, individually or in the aggregate, impair in any material respect the performance by KCS, KCSR or their respective Subsidiaries of their respective obligations hereunder.

8.3 Assets. The Assets constitute all properties, assets and rights (real, personal and mixed, tangible and intangible) currently utilized in the operation of the Line, other than operating equipment such as locomotives, rail cars and maintenance vehicles, and other than maintenance of way machinery and tools (the "Excluded Assets") and, except for the Excluded Assets, the Assets are sufficient to operate the Line (i) in substantially the same manner as operated by KCS and its Affiliates prior to the Closing and (ii) as contemplated by the NSR Joint Use Agreement, the KCSR Joint Use Agreement, and the Operating Agreement. KCS or one of its wholly owned Subsidiaries has, and upon consummation of the transactions contemplated hereby the Company will acquire, good and marketable title to all of the non-real estate owned Assets free and clear of all Liens except for Permitted Liens.

8.4 Material Contracts.

(a) (i) True and correct copies of each Material Contract, including all amendments and modifications thereof and waivers thereunder, have been made available to NS and its counsel; (ii) except as set forth in Section 8.4(a)(ii) of the Disclosure Schedule, each Material Contract is in full force and effect, and is the valid and binding obligation of KCS, KCSR or their respective Subsidiaries and, to the Knowledge of KCS, each other party to the Material Contract, and upon consummation

of the transactions contemplated hereby each Material Contract will remain in full force and effect, and will be the valid and binding obligation of the Company and, to the Knowledge of KCS, each other party to the Material Contract; (iii) except as set forth in Section 8.4(a)(iii) of the Disclosure Schedule, KCS, KCSR or their respective Subsidiaries has performed all of its respective material obligations required to be performed by it to date under each Material Contract, and is not in material breach of or material default under any Material Contract, and no event has occurred or circumstance exists which, with notice or lapse of time or both, would constitute a material breach of or material default by KCS, KCSR or their respective Subsidiaries under any Material Contract; (iv) except as set forth in Section 8.4(a)(iv) of the Disclosure Schedule, to the Knowledge of KCS, each party to each Material Contract other than KCS, KCSR or their respective Subsidiaries has performed all of the material obligations required to be performed by it to date under the Material Contract, and is not in material breach of or in material default under the Material Contract, and no event has occurred or circumstance exists which, with notice or lapse of time or both, would constitute a material breach of or material default by such other party under any Material Contract; and (v) no Material Contract will be affected adversely in any material way by the execution, delivery or performance of this Agreement, the Ancillary Agreements or the Company Agreement, each in accordance with its terms, and no Material Contract contains any change in control provision, restriction on assignment or other terms that will become applicable or inapplicable as a result of the consummation of the transactions contemplated by this Agreement, the Ancillary Agreements or the Company Agreement.

(b) For purposes of this Agreement, "Material Contracts" shall mean the following Contracts of KCS, KCSR or their respective Subsidiaries, each of which contracts is listed in Section 8.4(b) of the Disclosure Schedule, (X) relating to or affecting in any material way the Assets or the Assumed Liabilities or (Y) to be assigned to the Company pursuant to the terms hereof which are in effect on the date hereof:

(i) Each Contract which is to be performed in whole or in part at or after the date of this Agreement and which (1) cannot be canceled upon 60 days' notice without payment or penalty and involves aggregate annual payments of more than $100,000; (2) involves material nonmonetary obligations to be performed later than one year from the date hereof; (3) otherwise materially affects the Assets or the operation of the Line; or (4) was not entered into in the ordinary course of business consistent with past practice;

(ii) Each Contract providing for the indemnification of any third party;

(iii) Each Contract providing for any future payments that are conditioned, in whole or in part, on any Transfer or assignment of any of the Assets;

(iv) Each Contract for the Transfer of any of the Assets or for the grant of any preferential right to purchase any of the Assets or which requires the consent of any third party to the Transfer of any of the Assets;

(v) Each Contract evidencing more than $100,000 of Indebtedness of KCS or its Subsidiaries (including the Indentures);

(vi) Each Contract involving aggregate consideration in excess of $100,000 (1) under which the benefits cannot be retained or there will be a default as a result of the consummation of the transactions contemplated by this Agreement without the written consent or approval of other parties or (2) which would require the making of any material payment, other than payments as contemplated by this Agreement, to any employee of KCS or to any other Person as a result of the consummation of the transactions contemplated herein;

(vii) Each Contract pursuant to which any material Leased Personal Property is used or leased in the operation of the Line;

(viii) Each lease, sublease or other occupancy agreement pursuant to which KCS or any of its Subsidiaries leases, subleases or otherwise occupies any real property included or related to the Line (such leases, subleases and other occupancy agreements, together with any amendments, modifications and other supplements thereto, each a "Lease" and collectively, the "Leases");

(ix) Each lease, sublease or other occupancy agreement pursuant to which KCS or any of its Subsidiaries leases or subleases any Property to a third party or one of its Affiliates (each such lease, sublease and other occupancy agreement, together with any amendments, modifications and other supplements thereto, a "Third Party Lease" and collectively, the "Third Party Leases");

(x) Each Contract involving a guarantee of any Indebtedness or imposing a Lien on any of the Assets which serve as collateral for Indebtedness; and

(xi) Each Contract granting haulage, trackage or other access or operating rights with respect to the Line.

8.5 Absence of Certain Changes and Events. Except as set forth in Section 8.5 of the Disclosure Schedule, since December 31, 2004 and prior to the date hereof, except for this Agreement and changes contemplated by this Agreement, (i) neither KCS nor any of its Subsidiaries has taken any action which would be in violation of Section 10.1 had such action been taken after the date hereof and (ii) there has not been any change or development or combination of changes or developments which, individually or in the aggregate, has resulted in, or is reasonably likely to result in, a Material Adverse Effect on KCS or KCSR.

8.6 Litigation and Proceedings. Except as set forth in Section 8.6 of the Disclosure Schedule, there is no pending or, to the Knowledge of KCS, threatened Action to which KCS, KCSR or any of their respective Subsidiaries is a party involving the Assets or the operation of the Line in any material way, and neither KCS nor any of its Subsidiaries is subject to any material judgment, order, writ, injunction, decree or regulatory directive or agreement with respect to the Assets or the operation of the Line.

None of the Assets is subject to any judgment, order or decree entered in any Action which would be reasonably likely to have a Material Adverse Effect on KCS or KCSR.

8.7 Environmental Matters.

(a) KCS, KCSR and their respective Subsidiaries, with respect to the Properties and the operation of the Line, are in compliance in all material respects with all applicable Environmental Laws (which compliance includes, but is not limited to, the possession by KCS, KCSR and their respective Subsidiaries of all material permits and other governmental authorizations required under applicable Environmental Laws, and compliance with the terms and conditions thereof). None of KCS, KCSR or any of their respective Subsidiaries has received in writing any notice, action, inquiry, investigation or claim alleging that KCS, KCSR or any of their respective Subsidiaries, with respect to the Properties or the operation of the Line, are not in such compliance.

(b) There is no Environmental Claim relating to the Properties or the operation of the Line pending or, to the Knowledge of KCS, threatened against KCS, KCSR or any of their respective Subsidiaries or, to the Knowledge of KCS, against any Person whose liability for any such Environmental Claim KCS, KCSR or any of their respective Subsidiaries has retained or assumed either contractually or by operation of Law which would, individually or in the aggregate, be material.

(c) To the Knowledge of KCS, no event has occurred and no condition exists including, without limitation, the Release, threatened Release or presence of any Hazardous Material, which could reasonably be expected to form the basis of any Environmental Claim relating to the Properties or the operation of the Line which would, individually or in the aggregate, be material.

(d) KCS has delivered or otherwise made available for inspection to NS true and correct copies and results of any reports, studies, analyses, tests or other monitoring reports or related substantive correspondence with any Governmental Authority possessed or initiated by or on behalf of KCS, KCSR or any of their respective Subsidiaries pertaining to Hazardous Materials in, on, beneath or adjacent to the Properties, or regarding KCS' and its Subsidiaries' compliance with applicable Environmental Laws with respect to the Properties and the operation of the Line (any of the foregoing, "Environmental Reports").

8.8 Compliance With Laws and Other Matters. KCS, KCSR and each of their respective Subsidiaries:

(a) is, and since January 1, 2003 has been, in compliance in all material respects, in the operation of the Line, with all applicable Laws (it being understood that, solely for purposes of this Section 8.8, the term "Laws" shall not include any Environmental Laws) and the regulations, ordinances, rules, judgments, orders or decrees of any Governmental Authority applicable thereto or to the employees involved in the operation of the Line;

(b) has, and upon the consummation of the transactions contemplated hereby the Company will have, all material permits, licenses, franchises, certificates of authority, orders, and approvals of, and has made all material filings, applications, and registrations with, Governmental Authorities that are required in order to permit it to operate the Line (the "Permits"); and since January 1, 2003 has been, in compliance in all material respects with the terms of the Permits; and all the Permits are, and will be, in full force and effect and a complete and accurate list of the Permits is set forth in Section 8.8(b) of the Disclosure Schedule;

(c) has, since January 1, 2003, received no notification or communication from any Governmental Authority (i) asserting that it is not in compliance with any Laws (or indicating, in the absence of any such assertion, a possible investigation or inquiry with respect to any of the foregoing) with respect to the operation of the Line or (ii) threatening to suspend, materially modify or revoke any Permit; and

(d) is not a party to or subject to any material order, decree, agreement, memorandum of understanding or similar arrangement with, or a commitment letter, supervisory letter or similar submission to, any Governmental Authority with respect to the Assets or the operation of the Line, and none of KCS, KCSR or any of their respective Subsidiaries has been advised by any such Governmental Authority that such Governmental Authority is contemplating issuing or requesting (or is considering the appropriateness of issuing or requesting) any such material order, decree, agreement, memorandum of understanding, commitment letter, supervisory letter or similar submission.

8.9 Labor Relations. Except as set forth in Section 8.9 of the Disclosure Schedule:

(a) There is no strike, lockout, slowdown or stoppage pending or, to the Knowledge of KCS, threatened against or directly affecting the operation of the Line.

(b) Neither KCS nor any of its Subsidiaries is delinquent in payments in any material respect: (i) to any of its employees involved in the operation of the Line for any wages, salaries, commissions, bonuses or other direct compensation for any services performed by them, (ii) to any of its employees involved in the operation of the Line for amounts required to be reimbursed to such employees or (iii) to any benefit plans with respect to amounts owed on behalf of any of its employees involved in the operation of the Line.

(c) There is no unfair labor practice, charge or complaint against KCS, KCSR or their respective Subsidiaries with respect to the operation of the Line, pending or, to the knowledge of KCS, threatened, before any Governmental Authority; and there is no grievance that would be reasonably likely to have a Material Adverse Effect on KCS or KCSR nor any arbitration proceeding arising out of or under any collective bargaining agreement pending against KCS, KCSR or their respective Subsidiaries with respect to the operation of the Line.

(d) Each of KCS and any of its Subsidiaries who are or have been (i) required to comply with Executive Order 11246 or any other requirements applicable to a "contractor" or "subcontractor" (as defined by Executive Order 11246) or (ii) required to maintain an affirmative action plan have complied with such requirements in all material respects.

8.10 Taxes. (a) All Tax Returns required to be filed by KCS, KCSR or any of their respective Subsidiaries with respect to the Assets and the operation of the Line have been filed on a timely basis and all such returns are true, complete, and correct in all material respects, (b) all Taxes (whether or not shown on any Tax Return) that are due or claimed to be due from KCS, KCSR or any of their respective Subsidiaries with respect to the Assets and the operation of the Line have been paid, (c) no notice has been received of any deficiencies for Taxes claimed, proposed or assessed by any Government Authority with respect to the Assets or the operation of the Line for which KCS, KCSR or any of their respective Subsidiaries may be liable, (d) there are no pending, current or proposed audits, examinations, suits, proceedings, investigations, claims or administrative proceedings for or relating to any liability in respect of any Taxes with respect to the Assets or the operation of the Line for which KCS, KCSR or any of their respective Subsidiaries may be liable, (e) each of KCS, KCSR and their respective Subsidiaries has withheld and paid to the relevant Governmental Authority all Taxes required to have been withheld and paid in accordance with applicable Law with respect to the Assets and the operation of the Line, including in connection with any amounts paid or owing to any employee, independent contractor, creditor, equity holder or other Person, (f) there is, to the Knowledge of KCS, no outstanding material claim by any Governmental Authority in a jurisdiction where KCS, KCSR or any of their respective Subsidiaries does not file Tax Returns that KCS, KCSR or any of such Subsidiaries may be subject to Tax in such jurisdiction with respect to the Assets or and the operation of the Line, (g) there are no Liens on any of the Assets that arose in connection with any failure (or alleged failure) to pay any Tax, and (h) none of KCS, KCSR or any of their respective Subsidiaries with respect to the Assets or the operation of the Line will be required to include any item of income in, or exclude any item of deduction from, income for any Tax period (or portion thereof) ending after the Closing Date as a result of any (1) change in method of accounting for a Tax period ending on or prior to the Closing Date, (2) agreement with a Governmental Authority executed on or prior to the Closing Date, (3) deferred gains, (4) installment sale or open transaction disposition made on or prior to the Closing Date, or (5) prepaid amount received on or prior to the Closing Date, in each case under this Section 8.10(h), to the extent that the Tax liability of the Company or any Member (as defined in the Company Agreement) could be materially affected.

8.11 Insurance. The Assets are insured with reputable insurers and Section 8.11 of the Disclosure Schedule contains a true and correct list of such insurance policies maintained by KCS, copies of which have been made available to NS. With respect to all insurance policies that are individually or in the aggregate material to the Assets and the operation of the Line: (i) such policies are in full force and effect on the date hereof and KCS, KCSR and their respective Subsidiaries shall use their commercially reasonable efforts to continue such policies in full force and effect through the Closing Date, (ii) all premiums currently payable or previously due and payable with

respect to all periods up to and including the Closing Date have been paid to the extent such premiums are due and payable on or prior to the date hereof and, with respect to premiums not due or payable at or prior to the date hereof, all premiums due and payable prior to the Closing Date, will have been paid prior to the Closing Date and (iii) no notice of cancellation or termination has been received with respect to any such policy.

8.12 Books and Records. The books and records of KCS, KCSR and their respective Subsidiaries relating to the Assets and the operation of the Line have been fully, properly and accurately maintained in all material respects.

8.13 Transactions with Affiliates. With respect to the Assets and the operation of the Line, there are no outstanding amounts payable to or receivable from, or advances by KCS, KCSR or any of their respective Subsidiaries to, and none of KCS, KCSR or any of their respective Subsidiaries is otherwise a creditor or debtor to, any member or stockholder, director, employee or Affiliate of KCS, KCSR or any of their respective Subsidiaries. With respect to the Assets and the operation of the Line, neither KCS, KCSR nor any Subsidiary of KCS nor KCSR is a party to any transaction or agreement with any Affiliate, member or stockholder, director or executive officer of KCS, KCSR or any of their respective Subsidiaries or any material transaction or agreement with any employee other than executive officers.

8.14 Real Property.

(a) Section 8.14(a) of the Disclosure Schedule sets forth a true, correct and complete list of each parcel of real property owned by KCS, KCSR or their respective Subsidiaries included in the Assets (each such parcel and, for solely the purposes of this Section 8.14, the Dallas Intermodal Terminal described on Annex C hereto (the "Terminal"), individually, an "Owned Property" and collectively, the "Owned Properties") showing the common address, or other means of identification, and record title holder thereof and, to the Knowledge of KCS, all Liens thereon. Each of KCS, KCSR and their respective Subsidiaries, as applicable, owns, and upon the consummation of the transactions contemplated hereby will transfer to the Company all of their respective rights, titles and interests in and to the Owned Properties and to all buildings, structures and other improvements thereon, free and clear of all Liens, except for Permitted Liens, and subject to the Retained Interests, sufficient for the operation of the Line in the ordinary course of business (i) in substantially the same manner as operated by KCS and its Affiliates prior to the Closing and (ii) as contemplated by the NSR Joint Use Agreement, the KCSR Joint Use Agreement, and the Operating Agreement.

(b) Section 8.14(b) of the Disclosure Schedule sets forth the common address of each parcel of real property leased or subleased by KCS, KCSR or their applicable Subsidiary pursuant to each Lease (each a "Leased Property" and collectively, the "Leased Properties"). True, correct and complete copies of all work letters, side agreements, consents, subordination agreements, guarantees and other similar arrangements or agreements with respect to each Lease and to which KCS or any of its Subsidiaries is a party (or that are otherwise in the possession of KCS, KCSR or their respective Subsidiaries) has heretofore been made available to NS and its counsel. KCS

(either directly or through KCSR or another Subsidiary) holds, and after the consummation of the transactions contemplated hereby the Company will hold, a valid and existing leasehold or subleasehold interest, as applicable, in each Leased Property pursuant to the applicable Lease, free and clear of all Liens, other than Permitted Liens, and subject to the Retained Interests. There are no oral agreements in effect as to any Lease to which KCS or any of its Subsidiaries is a party. The terms of the Leases have not been modified in any respect, except to the extent that such modifications are set forth in the documents previously delivered or made available to NS and its counsel, and none of KCS, KCSR or any of their respective Subsidiaries is in negotiations with any landlord to cancel or terminate any Lease prior to the stated maturity date of such Lease. Except for Permitted Liens, none of KCS, KCSR or their applicable Subsidiaries has assigned, transferred, conveyed, mortgaged, deeded in trust or encumbered its leasehold interest in any Lease. Neither KCS nor any Subsidiary has received a notice of default or termination with respect to any Lease. No material damage or destruction (i.e., damage or destruction that would permit either party to the applicable Lease to terminate such Lease or cause the abatement of rent thereunder) has occurred with respect to any of the Leased Properties which has not been repaired prior to the date hereof.

(c) The Owned Properties and the Leased Properties (each a "Property" and collectively, the "Properties") constitute all of the real estate, other than rail yards and similar facilities, within which KCS and its Subsidiaries operate the Line. The Properties are in compliance with all requirements of applicable Law in all material respects, and none of KCS, KCSR or any of their respective Subsidiaries has received notice of, and KCS has no Knowledge of, any condemnation, eminent domain, zoning, land use proceedings or other claims, causes of action, lawsuits or legal proceedings pending, threatened or contemplated regarding the ownership, use or possession of the Properties or any part thereof or of any sale or other disposition of the Owned Properties or any part thereof in lieu of condemnation, except for those matters that are set forth in Section 8.14(c) of the Disclosure Schedule.

(d) Section 8.14(d) of the Disclosure Schedule sets forth the common address of, or other means of identifying, each parcel of real property leased or subleased by KCS, KCSR or their applicable Subsidiary pursuant to each Third Party Lease and the property (or portion thereof) subject to such Third Party Lease. True, correct and complete copies of all work letters, side agreements, consents, subordination agreements, guarantees and other similar arrangements or agreements with respect to the Third Party Leases and to which KCS, KCSR or any of their respective Subsidiaries is a party (or that are otherwise in the possession of KCS, KCSR or any of their respective Subsidiaries) has heretofore been made available to NS. There are no oral agreements in effect as to any Third Party Lease to which KCS or any Subsidiary of KCS is a party. The terms of the Third Party Leases have not been modified in any respect, except to the extent that such modifications are set forth in the documents previously delivered or made available to NS and its counsel, and neither KCS, KCSR or any of their respective Subsidiaries is in negotiations with any tenant or subtenant to cancel or terminate any Third Party Lease prior to the stated maturity date of such Third Party Lease.

8.15 Brokers. Neither KCS nor any of its Affiliates has retained or otherwise engaged or employed, or paid or agreed to pay any fee or commission, to any agent, broker, finder or other Person, for or on account of acting as a finder or broker in connection with this Agreement, the Ancillary Agreements or the Company Agreement or the transactions contemplated hereby and thereby.

9. Representations and Warranties of NS. NS hereby represents and warrants as of the date hereof and, to the extent provided in Section 11.3(a), as of the Closing, as follows:

9.1 Organization, Standing and Power. NS is a corporation duly organized, validly existing and in good standing under the Laws of the jurisdiction of its incorporation and has all requisite power and authority to own, lease and operate its properties and assets and to carry on its business as now being conducted.

9.2 Authority; Enforceability; Noncontravention.

(a) Each of NS, AGS and their respective Subsidiaries, as the case may be, has full power and authority to enter into, execute and deliver this Agreement, each of the Ancillary Agreements and the Company Agreement to which it is a party and perform its obligations hereunder and thereunder. This Agreement has been, and each of the Ancillary Agreements and the Company Agreement will be, duly authorized by all necessary action of each of NS, AGS and their respective Subsidiaries, as the case may be. This Agreement has been and each of the Ancillary Agreements and the Company Agreement will be, duly executed and delivered by each of NS, NSR and AGS, as the case may be, and, assuming it is duly executed and delivered by KCS and the Company, as applicable, constitutes or will constitute a valid and legally binding obligation of each of NS, AGS and their respective Subsidiaries, as the case may be, enforceable against them in accordance with its terms, subject to the effect of bankruptcy, insolvency, reorganization, moratorium, fraudulent conveyance and other similar Laws relating to or affecting creditors' rights generally, and to the availability of equitable remedies.

(b) The execution and delivery by each of NS, NSR and AGS, as the case may be, of this Agreement, each of the Ancillary Agreements and the Company Agreement do not and will not, and compliance by each of NS, NSR or AGS, as the case may be, with the provisions of this Agreement, each of the Ancillary Agreements and the Company Agreement will not, (i) conflict with or result in a breach or default under the Charter Documents of NS, NSR or AGS or any of the terms, conditions or provisions of any Contract to which NS is a party or otherwise bound, or to which any property or asset of NS, NSR or AGS is subject; (ii) subject to the filings with Governmental Authorities and other matters referred to in Section 9.2(c) below, violate any Law applicable to NS, NSR or AGS; or (iii) result in the creation or imposition of any Lien on any asset of NS, NSR or AGS, except in each case as will not, individually or in the aggregate, impair in any material respect NS' performance of its obligations hereunder.

(c) Except (i) for the applicable requirements of the STB and (ii) as set forth on Schedule 9.2(c), there are no approvals, authorizations, consents, orders or other actions of, or filings with, any Person that are required to be obtained or made by NS, NSR, AGS or the Company in connection with the execution of, and the consummation of the transactions contemplated under, this Agreement, the Ancillary Agreements or the Company Agreement, except for any matters as will not, individually or in the aggregate, impair in any material respect NS' performance of its obligations hereunder.

9.3 Brokers. Neither NS nor any of its Affiliates has retained or otherwise engaged or employed, or paid or agreed to pay any fee or commission, to any agent, broker, finder or other Person, for or on account of acting as a finder or broker in connection with this Agreement, the Ancillary Agreements or the Company Agreement or the transactions contemplated hereby and thereby.

9.4 Sufficient Funds. NS has, and will have as of the Closing, sufficient funds available to pay the NS Closing Cash Purchase Price.

10. Covenants.

10.1 Operation of the Line by KCS and KCSR. Between the date of this Agreement and the earlier of the Closing or termination pursuant to Section 13, except (a) as contemplated by this Agreement, (b) as may be required by applicable Law, (c) as set forth in Schedule 10.1 or (d) with the prior written consent of NS, KCS and KCSR will, and will cause their respective Subsidiaries to (X) operate the Line according to the ordinary course of business consistent with past practice, (Y) use all commercially reasonable efforts to preserve intact the Assets and maintain the rights, franchises and existing relations with suppliers and employees relating thereto and (Z) without limiting the generality of the clauses (X) and (Y) above:

(i) not transfer any of the Assets or any interest of KCS, KCSR or any of their respective Subsidiaries therein other than in the ordinary course of business consistent with past practice or to KCS or any Restricted Subsidiary;

(ii) not change the general nature of operation of the Assets or conduct any new line of business with the rail operating Assets not consistent with past practice;

(iii) not mortgage, encumber or pledge any of the Assets or permit or allow any of the Assets to be subjected to any Lien other than Permitted Liens;

(iv) not terminate prior to the scheduled expiration of, make any material modifications to, transfer or materially amend any Material Contract;

(v) not dispose of any books, records and accounts relating to the Assets, and to maintain such books records or accounts in the usual, regular and ordinary manner, on a basis consistent with prior periods;

(vi) not enter into any lease for real property with respect to any portion of the Assets;

(vii) not enter into any Contract of any kind or nature with any Affiliate (other than KCS or any Restricted Subsidiary), or make any payment or other asset Transfer to or for the benefit of any Affiliate (other than KCS or any Restricted Subsidiary), in each case, relating to the Assets or the operation of the Line;

(viii) not permit any waste of any of the Assets;

(ix) not pay, discharge or satisfy any material claim, liability or obligation (absolute, accrued, contingent or otherwise) related to the Assets other than in the ordinary course of business consistent with past practice;

(x) not cancel or compromise any material debt or material claim or waive or release any material rights relating to the Assets or the operation of the Line;

(xi) not grant any haulage, trackage or other access or operating rights with respect to the Line, except as required by Law;

(xii) not take any action that would cause a breach of any representation or warranty set forth in Article 8 hereof; or

(xiii) not authorize or enter into any agreement to otherwise take any of the foregoing actions.

10.2 Inspection of Records; Environmental Audits.

(a) Between the date of this Agreement and the Closing, KCS and KCSR shall, and shall cause their respective Subsidiaries to, allow, to the extent not prohibited by applicable Law, the officers, attorneys, accountants and other duly authorized representatives of NS reasonable access during regular business hours to the records and files, correspondence, audits, properties and personnel, as well as to all information, in each case, relating to the Assets. Any information regarding the Assets so obtained, and any information obtained by either party pursuant to the provisions of this Agreement, the Company Agreement and the Ancillary Agreements, shall be subject to the Agreement Regarding Confidentiality and Related Matters between KCS and NS, dated as of April 11, 2005, as extended to date (the "Confidentiality Agreement"), and such information shall be held by the recipient in accordance with the terms of the Confidentiality Agreement; it being understood that, for purposes of this provision, the term of the Confidentiality Agreement shall be deemed to have been extended for a period of one (1) year immediately following the Closing Date. No investigation by NS or its representatives shall affect the representations and warranties of KCS and KCSR set forth herein or preclude reliance thereon.

(b) Between the date of this Agreement and the Closing, KCS shall continue to make available for inspection by NS true, correct and complete copies

of the Environmental Reports, and shall promptly deliver to NS true, correct and complete copies of any Environmental Reports that are prepared after the date hereof or that have not been previously disclosed to NS.

(c) If reasonably necessary (as determined solely by NS), NS and/or its appointed agents shall be entitled to perform at the expense of NS Phase I and Phase II environmental audits of the Properties in a manner which shall not unreasonably interfere with the operation of the Line in the ordinary course of business consistent with past practice. With respect to any Property for which NS determines a Phase I and/or Phase II audit is warranted, KCS, KCSR and their respective Subsidiaries shall provide NS and its appointed agents reasonable access to any such Property to conduct the Phase I and/or Phase II audit. Additionally, KCS, KCSR and their respective Subsidiaries shall fully cooperate with all reasonable requests made by NS and its appointed agents in connection with the Phase I and Phase II audits in accordance with the terms of the access agreement set forth in Exhibit O (the "Access Agreement") and shall cooperate in good faith with reasonable requests made by NS and its appointed agents in connection with the Phase I and Phase II audits.

10.3 Alternative Proposals. During the period from the date of this Agreement and extending through the earlier of the termination of this Agreement in accordance with its terms or the Closing, KCS agrees that (a) it shall not, and shall use its commercially reasonable efforts to direct and cause its officers, directors, employees, agents and representatives (including any investment banker, attorney or accountant), as applicable, not to, directly or indirectly, (i) initiate, solicit or encourage, directly or indirectly, or accept the submission of any proposal or offer by any third party with respect to any joint venture, merger, acquisition, sale, consolidation or similar transaction involving the Line or any haulage, trackage or marketing arrangement involving the Line, in each case, other than the transactions contemplated by this Agreement (any such proposal or offer being hereinafter referred to as an "Alternative Proposal") or initiate or participate in any negotiations or discussions concerning an Alternative Proposal, (ii) enter into any agreement, agreement in principle, letter of intent or similar arrangement (whether or not legally binding) with any third party relating to an Alternative Proposal or (iii) provide any confidential information or data to any third party relating to an Alternative Proposal, and (b) it shall notify NS promptly if any Alternative Proposal is received by it or any negotiations or discussions relating to a potential Alternative Proposal are sought to be initiated or continued with KCS, including the material terms of such Alternative Proposal and the identity of the Person making such Alternative Proposal or seeking such negotiations or discussions; provided, that nothing in this Section 10.3 shall prevent KCS from taking any action with respect to any proposal or offer not initiated, solicited or encouraged in violation of this Section 10.3 or participating in negotiations or discussions with respect to such a proposal or offer if it is advised by outside legal counsel that it is required to take such action to satisfy the fiduciary duties of the Board of Directors of KCS under Delaware law; provided, however, that KCS shall not be permitted to terminate this Agreement other than as provided in Article 13 hereof.

10.4 Confer with NS. Prior to the Closing, to the extent practicable and not prohibited by applicable Law, KCS shall confer with NS on all operational matters that might reasonably be expected to materially affect the Assets or, after the Closing Date, the operation of the Line, including, but not limited to material transactions and material expenditures.

10.5 Commercially Reasonable Efforts. Between the date of this Agreement and the Closing, each of the parties to this Agreement will use its commercially reasonable efforts to cause the conditions to the obligations of the other parties set forth in Article 11 of this Agreement, as the case may be, to be satisfied; provided, that, except as agreed in writing by the parties hereto, in no event shall any of the parties hereto be obligated to accept, or cause the Company to accept, in connection with obtaining any Required Governmental Consents required by Section 11.1(c) or any consent, approval or agreement required by Section 11.2(d), any condition or requirement that is not acceptable to such party in its reasonable judgment. In addition, the parties hereto shall (i) cooperate and use their commercially reasonable efforts to obtain all consents, approvals, authorizations and agreements (or exemptions therefrom) of all Governmental Authorities necessary to authorize, approve or permit the consummation of the transactions contemplated by this Agreement, the Company Agreement and the Ancillary Agreements (the "Required Governmental Consents") at the earliest possible time hereafter, (ii) as promptly as practicable hereafter, file or submit, or cause to be filed or submitted, to all Governmental Authorities all notices, applications, documents and other materials necessary in connection with obtaining the Required Governmental Consents and (iii) use their respective commercially reasonable efforts to respond as promptly as practicable to all inquiries received from all Governmental Authorities for additional information or documentation in connection with obtaining such Required Governmental Consents. Each of the parties hereto shall promptly advise each other party hereto upon receiving any communication (written or oral) from any Governmental Authority whose consent, approval or authorization is required, or to whom notice must be submitted, for consummation of the transactions contemplated by this Agreement, the Company Agreement and the Ancillary Agreements which constitutes a reasonable likelihood that any requisite regulatory consent, approval or authorization will not be obtained or that receipt of any such consent, approval or authorization will be materially delayed. Each of the parties hereto shall furnish to the other party hereto such necessary information and reasonable assistance as the other may reasonably request in connection with its preparation of any filings or submissions to any Governmental Authority necessary to obtain any of the Required Governmental Consents. Each of the parties hereto shall provide the other party hereto with draft copies and as-filed copies of all filings and submissions with Governmental Authorities in respect of the Required Governmental Consents and shall provide the other with a reasonable opportunity to comment upon all such draft copies. Each of the parties hereto and its respective representatives shall promptly inform the other party hereto regarding the substance of all communications and contacts received from any Governmental Authority with respect to this Agreement, the Company Agreement, the Ancillary Agreements or the transactions contemplated hereby and thereby, and neither of the parties hereto shall initiate any contact or communications with any Governmental Authority regarding this Agreement, the Ancillary Agreements or the transactions contemplated hereby and thereby without

giving reasonable prior notice to the other party hereto and offering the other party hereto the opportunity to have a representative of such party participate in the contact or communication. For the avoidance of doubt, either party hereto shall be free to discuss regulatory matters with any Governmental Authority without the participation of the other party hereto to the extent such discussions do not directly relate to the transaction contemplated by this Agreement, the Company Agreement and the Ancillary Agreements.

10.6 Real Estate Matters.

(a) KCS and KCSR shall use their commercially reasonable efforts to obtain an estoppel certificate from each landlord under the Leases certifying that each lease is in full force and effect and that there are no defaults thereunder or any conditions that with the passage of time would constitute a default thereunder, or an estoppel certificate in the form so provided for under any such Lease or Third Party Lease. In the event that KCS is unable to deliver an estoppel certificate for any of the Leases or Third Party Leases to NS at the Closing, KCS shall indemnify NS against any loss, cost, liability or expense which NS may incur as a result of the failure of KCS to deliver such estoppel certificate.

(b) KCS and KCSR shall cause (i) title to the Owned Properties, at Closing, to be free and clear of all Liens and without exceptions, disclaimers of liability or objections except for Permitted Liens and any matters which the Title Company has committed to insure over or omit, and (ii) the First American Title Insurance Company of New York or another reputable title insurance company selected by NS (the "Title Company") to insure the Owned Properties under the terms described above.

(c) Between the date of this Agreement and the Closing, KCS shall disclose to NS any newly identified Liens on the Owned Properties that have not been previously disclosed to NS.

10.7 Publicity. The initial public disclosure relating hereto, if any, will be a joint press release and thereafter, except as otherwise required by Law, the applicable rules of the stock exchanges on which KCS' and NS' shares are listed or any other self-regulatory organization, the parties shall coordinate with each other, including the provision of drafts and the opportunity to comment thereon, prior to issuing any press releases or otherwise making public statements with respect to the transactions contemplated hereby.

10.8 Standstill. For a ten (10) year period commencing on the date hereof (such period, the "Standstill Period"), neither KCS nor NS shall, jointly with any third Person, directly or indirectly, (i) purchase or offer or agree to purchase any material assets or any voting securities of the other party (other than purchases of up to 1% of the other party's common stock) other than in the ordinary course of business consistent with past practice or (ii) propose any merger or other business combination involving the other party (any such purchase, offer to purchase or proposal, a "Business Combination"), except, in each case, if specifically invited in writing to do so by the other party. In

addition, during the Standstill Period, neither KCS nor NS nor any of their respective Subsidiaries shall, jointly with any third Person, without the prior written consent of the other party: (i) make, or in any way participate, directly or indirectly, in any solicitation of proxies to vote or seek to advise or influence any Person with respect to the voting of any voting securities of the other party; (ii) form, join, or in any way participate in a "group" within the meaning of Section 13(d)(3) of the Securities Exchange Act of 1934 with respect to any voting securities of the other party; or (iii) otherwise act, alone or in concert with others, to seek to control the management, Board of Directors, or policies of the other party. Notwithstanding the foregoing, the provisions of this Section 10.8 shall not apply to either party if during such Standstill Period (i) the other party publicly proposes to enter into a Business Combination with another Person, (ii) either NS or KCS (or their respective Affiliates) ceases to be a member of the Company or (iii) this Agreement is terminated pursuant to Article 13 hereof.

10.9 Encumbrance and Transfer of Assets; Indentures.

(a) From and after the date hereof, KCS shall not, and shall cause its Subsidiaries not to, without the prior written consent of NS: (i) enter into, amend or extend any Contract (including the Indentures or the notes governed thereby) in any manner which would encumber any of the assets or properties of the Company or prohibit, limit or defer in any way any of NS' management rights set forth in the Company Agreement (including any rights in respect of Major Decisions (as such term is defined in the Company Agreement) that become or may become with the passage of time effective and/or that are modified after the Closing Date); or (ii) with respect to any assets transferred from the Company to KCS or its Restricted Subsidiaries as permitted by the Company Agreement, except as contemplated by Section 10.10, enter into any Contract with respect to or consummate any (x) acquisition, divestiture, spin-off, merger, consolidation, business combination or similar transaction in which such assets would cease to be held by KCS or a Restricted Subsidiary or their respective successors, (y) sale, transfer, lease, sublease, license or other disposition of such assets (except by a Restricted Subsidiary to another Restricted Subsidiary or KCS) or (z) formation of or other participation in, any joint venture or partnership with respect to such assets.

(b) From and after the date hereof, KCS shall, and from and after the Closing Date NS shall, cause the Company to comply with the provisions of the Indentures and shall not, and shall cause the Company not to, incur any additional Indebtedness other than as and to the extent permitted by the Company Agreement and the Indentures and, in any event, subject to Section 10.9(a).

10.10 Option to Acquire the Line.

(a) In the event of a Permitted Asset Transfer (as such term is defined in the Company Agreement) to which NS has not previously consented in writing, KCS shall, at least twenty (20) Business Days before such transfer, provide Notice thereof (each such Notice, a "Line Option Notice") to NS in accordance with the provisions of Section 14.1 and NS shall have the option (the "Line Option") to acquire, or cause one or more of its Subsidiaries to acquire, in accordance with the procedures set

forth in this Section 10.10, (1) from the relevant transferee or transferees, all right, title and interest in the Line, as it then exists, but subject to Permitted Liens, that is owned by such transferee(s) together with, at the option of NS in its sole discretion, all right, title and interest of such transferee(s) or KCS and its Subsidiaries (other than the Company) in and to the rail yards at or near Monroe, Louisiana, Bossier City, Louisiana and Pearson, Mississippi (the Line and such rail yards collectively, the "Line Assets") that are owned by such transferee or KCS or any of its Subsidiaries (other than the Company) at the time of such Permitted Asset Transfer (the "KCS Line Assets") and (2) either:

(i) from KCS and its Subsidiaries, the Membership Interests of the KCS Member (as such terms are defined in the Company Agreement) (the "KCS Membership Interests"); or

(ii) from the Company, the remaining Line Assets (if any) owned by the Company following such Permitted Asset Transfer (the "Company Line Assets").

(b) Notwithstanding anything to the contrary herein, in the case of a Permitted Asset Transfer involving one or more assets of the Company that are not material, individually or in the aggregate, to the operation of the Line, the Line Option will not be available to NS if, within twenty (20) days after such transfer, the asset(s) subject to such Permitted Asset Transfer are transferred back to the Company on terms which have the same effect as if such Permitted Asset Transfer had not occurred.

(c) From and after the date of a Line Option Notice, KCS shall allow, to the extent not prohibited by applicable Law, the officers, attorneys, accountants and other duly authorized representatives of NS access during regular business hours to any books, records, files, correspondence, audits, properties, personnel and other information of KCS or its Subsidiaries relating to the Line Assets owned by KCS or its Subsidiaries (other than the Company) that is reasonably requested by NS or its representatives.

(d) At any time during the thirty (30) day period commencing on receipt of a Line Option Notice, NS may give Notice to KCS in accordance with the provisions of Section 14.1 (each such Notice, a "Line Option Valuation Notice") of its desire to commence the valuation of the Line Assets and the KCS Membership Interests in accordance with the procedures set forth in this Section 10.10(d). Upon the delivery of a Line Option Valuation Notice, NS and KCS shall each select and engage a reputable, independent M.A.I. designated appraiser with at least ten (10) years of experience in valuing real property and rail improvements for rail line and yard property or, at their respective option, an independent investment banking firm of national reputation and such appraisers or investment banking firms shall be instructed to meet within thirty (30) days following their selection and at such meeting to mutually agree upon the selection of an appraiser, appropriately qualified in their judgment (the "Appraiser") to determine:

(i) the fair market value of the Line Assets on a stand-alone rail operation basis (the "Line FMV"), as well as the portion of the Line FMV

attributable to the KCS Line Assets, in the aggregate, and the Company Line Assets, in the aggregate; and

(ii) the fair market value of the KCS Membership Interests (with the Line FMV determined as provided in Section 10.10(d)(i)) (the "Membership Interest FMV").

For purposes of this Section 10.10(d), "fair market value" shall mean, with respect to any asset or property, the price that could be negotiated in an arm's-length, free market transaction, for cash, between a willing seller and a willing and able buyer, neither of whom is under undue pressure or compulsion to complete the transaction.

(e) Within ninety (90) days of the date of its appointment, the Appraiser shall provide to both NS and KCS a report (the "Appraisal Report"), which report shall include the Appraiser's determination of the Line FMV, as well as the portion of the Line FMV attributable to the KCS Line Assets, in the aggregate, and the Company Line Assets, in the aggregate, and the Appraiser's determination of the Membership Interest FMV.

(f) Each of NS and KCS shall, and shall cause the Company and their respective Subsidiaries to, cooperate with the Appraiser and promptly provide all documents and other information and access during regular business hours to the Line Assets reasonably requested by the Appraiser in connection with its appraisal. The determination of the Line FMV and the Membership Interest FMV set forth in the Appraisal Report shall be final and binding on NS and KCS for purposes of this Section 10.10. KCS and NS shall bear equally all expenses of the Appraiser.

(g) Within sixty (60) days after the determination of the Line FMV and the Membership Interest FMV, either by mutual agreement of the parties (without any obligation to negotiate toward or reach such agreement) or by the issuance of the Appraisal Report, NS shall give Notice to KCS of whether it wishes to exercise the Line Option (the "Line Option Exercise Notice") at the Line FMV or the portion thereof attributable to the KCS Line Assets and Membership Interest FMV, as the case may be, as finally determined pursuant to subsections (e) and (f) above, which Notice shall indicate whether NS wishes to acquire the KCS Membership Interests pursuant to Section 10.10(a)(i) or the Company Line Assets pursuant to Section 10.10(a)(ii). In the event that NS has elected to acquire the KCS Membership Interests pursuant to the Line Option, the transfer of such interests shall be governed by the procedure set forth in Article 10 of the Company Agreement. If NS delivers a Line Option Exercise Notice to KCS, NS (or its designated Subsidiar(ies)), KCS and its Subsidiaries shall effect the transfer of the KCS Line Assets, and (in the case that NS has elected to acquire the Company Line Assets pursuant to the Line Option) cause the Company to effect the transfer of the Company Line Assets, to NS (or its designated Subsidiar(ies)) pursuant to customary documentation reasonably acceptable to the parties, including any agreements, documents and other instruments necessary or reasonably requested by NS (or its designated Subsidiar(ies)) to effect such transfer. Such documentation shall call for KCS and its Subsidiaries and, if NS elects to acquire the Company Line Assets pursuant to

Section 10.10(a)(ii), the Company to provide representations, warranties, covenants and indemnities with respect to the KCS Line Assets and Company Line Assets, respectively, with terms at least as favorable to NS and its Subsidiaries as are set forth in this Agreement with respect to the Line and the Assets. Notwithstanding anything to the contrary contained herein, the completion of the sale of the KCS Line Assets and/or Company Line Assets, as the case may be, pursuant to the Line Option and in accordance with the terms of such documentation shall each occur, and the NS Member shall pay the portion of the Line FMV attributable to the assets so acquired to the transferring party, on a date to be mutually agreed by KCS and NS, but in no event later than the later of (i) ninety (90) days after the delivery date of the Line Option Exercise Notice and (ii) five Business Days after the date on which the last of any required regulatory approvals in connection with such transaction is received. The KCS Line Assets and, if applicable, Company Line Assets, shall be conveyed to NS (or its designated Subsidiar(ies)) subject only to Permitted Liens and KCS shall be responsible for the payment of all transfer, filing and recording taxes in connection with the exercise of the Line Option with respect to such assets and the conveyance of the KCS Line Assets and, if applicable, Company Line Assets. All payments of the Line FMV attributable to the assets acquired shall be made by wire transfer of immediately available funds to an account or accounts specified by the intended recipients.

(h) In the event that NS elects not to exercise the Line Option, it shall be entitled to exercise the contingent trackage rights described in Section 3 of the NSR Joint Use Agreement. For the avoidance of doubt, nothing in this Section 10.10 nor any decision of NS not to exercise the Line Option shall in any way limit the rights of NS and its Affiliates under the NSR Joint Use Agreement, the Western Haulage Agreement, the Contingent Haulage Agreement or any other Ancillary Agreement.

(i) Notwithstanding anything in this Section 10.10 to the contrary, the Line Option shall be exercised, and title to the Line Assets shall vest, if at all, on or prior to the date on which the last of the living descendents of Joseph P. Kennedy shall die, plus twenty one (21) years.

(j) In the event that no Appraiser is appointed pursuant to and in compliance with Section 10.10(d) an Appraiser will be appointed by arbitration in accordance with Section 14.13.

10.11 Determination and Payment of Real Property Taxes. KCSR is contributing the Assets to the Company through one deed that excludes certain property. Because the Assets will be included in KCSR's Form R1 that is filed annually with the STB, Mississippi, Louisiana, and their local governments will assess property tax against KCSR (not the Company) that includes the Assets. Therefore, in connection with each annual property tax assessment, KCSR and NS will determine jointly and in good faith a reasonable and fair allocation of KCSR's property tax liability that is attributable to the Assets and that should be paid by the Company, and KCSR and NS will certify in writing that the determined amount is reasonable and fair. Thereafter, KCSR will bill the Company for, and the Company shall promptly pay to KCSR, the jointly determined share of the property tax.

10.12 NS Automotive Traffic. From and after the date hereof, NS and KCS shall negotiate in good faith the terms of an agreement with respect to NS' rights to move automotive traffic over the Line or to interchange such traffic.

10.13 Vicksburg Bridge Lease Dispute. KCS shall use its commercially reasonable efforts to resolve the Vicksburg Bridge Lease dispute referred to in, and in the manner contemplated by, Section 3.1(b).

11. Conditions to the Closing.

11.1 Mutual Conditions. The respective obligations of the parties to complete the purchase/sale of the NS Interest on the Closing Date as contemplated by Section 2.1(a), the contribution of the Assets in exchange for the KCS Interest and to take the other actions required to be taken by each of the parties at the Closing is subject to the satisfaction, at or prior to the Closing, of each of the following conditions (any of which may be waived jointly by NS and KCS in writing, in whole or in part):

(a) Company Agreement. KCS and NS or their respective Affiliates shall have entered into the Company Agreement.

(b) Ancillary Agreements. KCS, KCSR, NS, the Company and their respective Affiliates, as applicable, shall have entered into each of Ancillary Agreements.

(c) Regulatory Approvals. All Required Governmental Consents (including from the STB) shall have been obtained and shall be in full force and effect, and not subject to conditions that any party deems unacceptable in its reasonable judgment, and shall not be subject to a pending petition for review before a U.S. Court of Appeals.

(d) No Order or Action. No Law shall have been enacted, entered, promulgated or enforced by any Governmental Authority which prohibits, restricts or makes illegal the consummation of the Closing or any of the material transactions contemplated thereby, or by the Company Agreement or any of the Ancillary Agreements, and no Action shall be pending or threatened that questions the validity of this Agreement, the Company Agreement or any of the Ancillary Agreements or declares or proposes to declare the same unlawful or seeks to enjoin the consummation of any of the material transactions contemplated hereby or thereby.

11.2 Additional Conditions of NS. The obligation of NS to complete the purchase of the NS Interest on the Closing Date as contemplated by Section 2.1(a), and to take the other actions required to be taken by NS at the Closing is subject to the satisfaction, at or prior to the Closing, of each of the following additional conditions (any of which may be waived by NS in writing, in whole or in part):

(a) Representations and Warranties. The representations and warranties contained in Article 8 hereof and in all certificates delivered by KCS and KCSR to NS pursuant hereto or in connection with the transactions contemplated hereby

shall be true and accurate in all respects (in the case of representations and warranties qualified by "materiality," "in all material respects," "Material Adverse Effect" or similar terms or phrases, and in the case of the representations and warranties set forth in Sections 8.1 and 8.2) or in all material respects (in the case of all other representations and warranties) as of the date of this Agreement and as of the Closing as though made at and as of the Closing (except for changes contemplated by this Agreement and except for representations and warranties that by their terms speak specifically as of the date of this Agreement or some other date, in which case as of such date).

(b) Performance. KCS and KCSR shall have performed all obligations and complied with in all material respects all covenants required by this Agreement to be performed or complied with by KCS or KCSR on or prior to the Closing Date.

(c) Certificate. KCS shall have delivered to NS a certificate, dated the Closing Date, signed on behalf of KCS by an officer of KCS, certifying that the conditions specified in Sections 11.2(a) and (b) of this Agreement have been satisfied.

(d) Consents. At the Closing, KCS shall have delivered to NS all consents, approvals and agreements of any third Persons required by the terms of any Material Contract in order that the rights of KCS or any of its Subsidiaries or the prospective rights of the Company under such Material Contract, in each case, as they relate to the Assets or the Assumed Liabilities, will not be impaired by the consummation of the transactions contemplated by this Agreement, the Company Agreement and the Ancillary Agreements, and such consents, approvals and agreements shall be in full force and effect.

(e) No Material Adverse Effect. There shall have been no Material Adverse Effect on KCS or KCSR.

(f) Opinions of Counsel. NS shall have received an opinion of Sonnenschein Nath & Rosenthal LLP, dated as of the Closing Date, substantially in the form attached as Exhibit P hereto, and an opinion of the Senior Vice President and General Counsel of KCS, dated as of the Closing Date, substantially in the form attached as Exhibit Q hereto.

(g) Bank Approval of Transaction Agreements. KCS shall have delivered to NS written confirmation by the Required Lenders (as such term is defined in KCS Credit Agreement Amendment No. 2) that the form and substance of this Agreement and the Ancillary Agreements are satisfactory to the Required Lenders as contemplated by Section 1(a)(xiv) of KCS Credit Agreement Amendment No. 2.

11.3 Additional Conditions of KCS. The obligation of KCS and KCSR to complete the contribution of the Assets in exchange for the KCS Interest, and to take the other actions required to be taken by KCS and KCSR at the Closing is subject to the satisfaction, at or prior to the Closing, of each of the following additional conditions (any of which may be waived by KCS in writing, in whole or in part):

(a) Representations and Warranties. The representations and warranties contained in Article 9 hereof and in all certificates delivered by NS to KCS pursuant hereto or in connection with the transactions contemplated hereby shall be true and accurate in all respects (in the case of representations and warranties qualified by "materiality," "in all material respects," "material adverse effect" or similar terms or phrases, and in the case of the representations and warranties set forth in Sections 9.1 and 9.2) or in all material respects (in the case of all other representations and warranties) as of the date of this Agreement and as of the Closing as though made at and as of the Closing (except for changes contemplated by this Agreement and except for representations and warranties that by their terms speak specifically as of the date of this Agreement or some other date, in which case as of such date).

(b) Performance. NS shall have performed all obligations and complied with in all material respects all covenants required by this Agreement to be performed or complied with by NS on or prior to the Closing Date.

(c) Certificate. NS shall have delivered to KCS a certificate, dated the Closing Date, signed on behalf of KCS by an officer of NS, certifying that the conditions specified in Sections 11.3(a) and (b) of this Agreement have been satisfied.

(d) No Material Adverse Effect. There shall have been no Material Adverse Effect on NS or AGS.

(e) Opinions of Counsel. KCS shall have received an opinion of Skadden, Arps, Slate, Meagher & Flom LLP, dated as of the Closing Date, substantially in the form attached as Exhibit R hereto an opinion of the Vice President and Corporate Counsel of NS, dated as of the Closing Date, substantially in the form of Exhibit S hereto and an opinion of Cabannis, Johnston, Gardner, Dumas & O'Neal LLP, dated as of the Closing Date, substantially in the form of Exhibit T hereto.

12. Survival of Representations and Warranties; Indemnity.

12.1 Survival of Representations and Warranties. All representations and warranties made in this Agreement or made in any document delivered pursuant to this Agreement by or on behalf of any party shall survive the execution and delivery of this Agreement and the Closing, regardless of notice of or any investigation or right of investigation made after the date of this Agreement by or on behalf of any party, and shall terminate and expire one (1) year following the Closing Date, except that the representations and warranties made in Section 8.2(b)(ii) as they relate to the Indentures shall terminate and expire on the earlier of the date that is four (4) years following the Closing Date and the Maturity Date (as such term is defined in the Company Agreement) and the representations and warranties made in Sections 8.7, 8.10 and 8.14 shall terminate and expire sixty (60) days after the termination of the applicable statute of limitations, in each case, after which date they shall be of no further force or effect (except for bona fide claims of which a party has provided written notice in good faith to the other parties prior to the relevant expiration date).

12.2 Indemnification by KCS.

(a) KCS and KCSR shall indemnify, save and hold harmless (i) NS and its Affiliates, and each of their respective officers, directors, employees and agents, and each of their respective successors and assigns (collectively, the "NS Indemnified Parties"), from and against any and all costs, losses, claims, liabilities, damages, fines, penalties, expenses and Cleanup costs (including any interest which may be imposed in connection therewith and court costs and reasonable fees and disbursements of counsel) ("Damages," which shall not include any claim of diminution of value of a Member's interest in the Company unless the Company shall have incurred actual loss) incurred in connection with, arising out of, resulting from or incident to: (A) any breach of the representations or warranties of KCS and KCSR in this Agreement, except for Section 8.7, (in each case, solely for the purpose of calculating the amount of Damages, without regard to any qualification or limitation with respect to "materiality," whether by reference to "material," "in all material respects" or "Material Adverse Effect"), or (B) any breach or default in any covenants or agreements made by KCS in this Agreement; and (ii) the Company and its Affiliates, and each of their respective officers, directors, employees and agents (other than KCS or its Subsidiaries) and each of their respective successors and assigns (collectively, the "Company Indemnified Parties") and any NS Indemnified Parties from and against any and all Damages incurred in connection with, arising out of, resulting from or incident to any obligation or liability, other than the Assumed Liabilities, incurred in connection with, arising out of, resulting from or incident to any act or omission by KCS or KCSR, any of its Affiliates prior to the Closing relating to the Assets, whether fixed or contingent, recorded or unrecorded, known or unknown.

(b) KCS and KCSR shall defend, indemnify and hold harmless any NS Indemnified Parties and any Company Indemnified Parties for, from, and against all Damages asserted against, resulting to, imposed on, or incurred by NS or the Company in connection with: (i) any misrepresentation or breach of any environmental representation or warranty set forth in Section 8.7 of this Agreement; (ii) (A) the Release or threatened Release of any Hazardous Materials prior to the Closing Date on, from or under the Properties or in connection with the operation of the Assets or (B) the Release of any Hazardous Materials on, from or under any other property where, prior to the Closing Date, Hazardous Materials are or were Released, discharged or disposed of which, on or prior to the Closing date, have impacted the Property or the Assets or (C) the Release or threatened Release of any Hazardous Materials on, from or under any other property where, prior to the Closing Date, Hazardous Materials are or were Released, threatened to be Released, discharged or disposed of in connection with disposal activities related to the Properties or the Assets, whether or not, in any case covered by this clause (ii), such Release, threatened Release, discharge or disposal was in compliance with Environmental Law; (iii) the violation prior to the Closing of any Environmental Law in effect prior to the Closing by KCS or KCSR, any of their Subsidiaries or any other Person in connection with the Properties or the Assets; and (iv) any Environmental Claim relating to the Properties or the Assets against any Person whose liability for such Environmental Claim KCS, KCSR or any of their respective Subsidiaries has retained or assumed either contractually or by operation of Law.

(c) KCS and KCSR shall have no obligation to indemnify the NS Indemnified Parties under Section 12.2(a)(i)(A) until the NS Indemnified Parties have suffered Damages in excess of $2,000,000 in the aggregate, and then KCS and KCSR will be obligated to indemnify the NS Indemnified Parties for Damages only in excess of such amount, but KCS and KCSR shall not be liable for indemnification under Section 12.2(a)(i)(A) for Damages in excess of $300,000,000 in the aggregate; provided, that such $2,000,000 threshold shall not apply to any Damages arising from any breach of any representation or warranty in Section 8.10. If KCS and KCSR are obligated to indemnify the NS Indemnified Parties, then KCS and KCSR may, at their election, (i) pay such indemnification directly to the NS Indemnified Parties or the Company Indemnified Parties, as the case may be, (ii) pay any Damages arising from any liability or any Third Party Claim directly to the applicable third party (to the extent that such Damages are owed to such third party), or (iii) contribute amounts to the Company and cause the Company to pay any Damages arising from any liability or any Third Party Claim directly to the applicable third party (to the extent that such Damages are owed to such third party); provided, that the foregoing shall not limit in any way the obligation of KCS and KCSR to satisfy all such indemnification obligations.

(d) Except for fraud, injunctive and provisional relief and remedies that cannot be waived as a matter of Law, if the Closing occurs, this Section 12.2 shall be the exclusive remedy for any breach of any of KCS' or KCSR's representations and warranties or any breach of KCS' or KCSR's covenants contained in this Agreement.

12.3 Indemnification by NS.

(a) NS shall indemnify, save and hold harmless KCS and its Affiliates, and each of their respective officers, directors, employees and agents and each of their respective successors and assigns, from and against any and all Damages incurred in connection with, arising out of, resulting from or incident to: (i) any breach of or any inaccuracy in any of, the representations or warranties of NS in this Agreement (in each case, solely for the purpose of calculating the amount of Damages, without regard to any qualification or limitation with respect to "materiality," whether by reference to "material," "in all material respects" or "Material Adverse Effect"); or (ii) any breach or default in covenants or agreements made by NS in this Agreement.

(b) Except for fraud, injunctive and provisional relief and remedies that cannot be waived as a matter of Law, if the Closing occurs, this Section 12.3 shall be the exclusive remedy for any breach of any of NS' representations and warranties or any breach of NS' covenants contained in this Agreement.

12.4 Notification of Claims. A party entitled to indemnification under Sections 12.2 or 12.3 (an "Indemnified Party") shall notify the other party (the "Indemnifying Party") within a reasonable period of time after becoming aware of any Damages which the Indemnified Party shall have determined has given or could give rise to a claim for indemnification under Sections 12.2 or 12.3 hereof. Such notice shall include an estimate of the Damages that the Indemnified Party has determined may be

incurred to the extent then known or reasonably determinable. The failure to so notify the Indemnifying Party will not relieve the Indemnifying Party of any liability that it may have to any Indemnified Party, except to the extent of any prejudice to the Indemnifying Party resulting from such delay. As soon as practicable after the date of such notice, the Indemnified Party shall provide to the Indemnifying Party all information and documentation necessary to support and verify the Damages so claimed and the Indemnifying Party and its agents shall be given access to all books and records in the possession or control of the Indemnified Party which the Indemnifying Party reasonably determines to be related to such claim.

12.5 Matters Involving Third Parties.

(a) If any third party shall commence an Action against any Indemnified Party with respect to any matter (a "Third Party Claim") which may give rise to a claim for indemnification under Sections 12.2 or 12.3, or if an Indemnified Party otherwise becomes aware that a Third Party Claim may be asserted against the Indemnified Party, the Indemnified Party shall notify the Indemnifying Party in writing as soon as practicable. The failure to so notify the Indemnifying Party will not relieve the Indemnifying Party of any liability that it may have to any Indemnified Party, except to the extent of any prejudice to the Indemnifying Party resulting from such delay. If the Indemnifying Party notifies the Indemnified Party that it does not dispute the claim, or fails to notify the Indemnified Party within 30 days after delivery of such notice by the Indemnified Party whether the Indemnifying Party disputes the claim, all Damages incurred in connection with, arising out of, resulting from or incident to such Third Party Claim will be conclusively deemed a liability of the Indemnifying Party and the Indemnifying Party shall pay the amount of such Damages to the Indemnified Party promptly upon the final determination thereof.

(b) If the Indemnifying Party does not respond to the notice or elects not to assume the defense of such claim or demand, in each case within the period allowed after delivery of the notice, the Indemnified Party shall have the right to defend such claim or demand by appropriate proceedings or to settle or pay any such claim or demand for such an amount as the Indemnified Party shall deem appropriate, in either case at the sole cost and expense of the Indemnifying Party, provided that the Indemnified Party shall not settle any such claim without the prior written consent of the Indemnifying Party, which consent will not be unreasonably withheld, conditioned or delayed. In the event that the Indemnifying Party does not assume the defense of such claim or demand, the Indemnifying Party shall have the right to participate in such defense (including with counsel of its choice), at its own expense, and the Indemnified Party shall reasonably cooperate with the Indemnifying Party in connection with such participation.

(c) If the Indemnifying Party notifies the Indemnified Party that it desires to defend against such claim or demand, then the Indemnifying Party shall be entitled to participate in or, at the Indemnifying Party's option, assume at its own cost and expense the defense of any such claim or demand with counsel of its own choosing (which shall be reasonably acceptable to the Indemnified Party), provided, that, if the

Indemnifying Party assumes the defense of such claim or demand it shall reimburse the Indemnified Party for out of pocket expenses incurred by the Indemnified Party (such as travel costs, but not internal time charges) and the Indemnified Party (i) shall reasonably cooperate with the Indemnifying Party; and (ii) may elect to participate in any such defense at its sole cost and expense, but the control of such defense and its settlement or resolution shall rest with the Indemnifying Party. In the event there is a significant conflict of interest between the Indemnified Party and the Indemnifying Party in the conduct of the defense of such claim or demand, the reasonable fees and disbursements of one counsel of the Indemnified Party shall be at the expense of the Indemnifying Party. The Indemnifying Party shall not compromise or settle any such claim or demand without the prior written consent of the Indemnified Party (which consent shall not be unreasonably withheld, conditioned or delayed), unless such settlement or compromise does not subject the Indemnified Party to any monetary liability, will not impose on the Indemnified Party any obligation, admission, restriction or further Damages and includes a complete, unconditional release of the Indemnified Party from all liability with respect to such claim or demand.

(d) In all cases the Indemnified Party and the Indemnifying Party shall keep each other reasonably informed as to all matters concerning any Third Party Claim and shall promptly notify the other party in writing of any and all significant developments relating thereto.

12.6 Taxes. If any indemnity payment pursuant to this Article 12 is determined to be taxable to any Indemnified Party by any Governmental Authority, the indemnity payment shall be increased by such amount as is necessary so that, after taking into account the Tax liability imposed upon such Indemnified Party upon receipt of such indemnity payment, the Indemnified Party receives an amount equal to the amount it would have received had such indemnity payment not been subject to Tax (after taking into account, in accordance with Section 12.7(a), any Tax benefits and/or insurance coverage that may be available to the Indemnified Party).

12.7 Other Limits on Indemnification.

(a) The amount of any Damages sustained by a Indemnified Party shall be reduced (i) by any amount received by such Indemnified Party with respect thereto under any insurance coverage relating thereto (other than insurance coverage provided by an Affiliate (other than Company) of such indemnitee) or from any other party alleged to be responsible therefor and (ii) by the amount of any Tax benefit actually realized with respect to the Damages. An Indemnified Party shall use its commercially reasonable efforts to collect any amounts available under such insurance coverage and from such other party alleged to have responsibility and to realize any Tax benefit with respect to the Damages. If an Indemnified Party realizes a Tax benefit or receives an amount under insurance coverage or from such other party with respect to Damages sustained at any time subsequent to any indemnification provided pursuant to this Article 12, then such Indemnified Party shall promptly reimburse the applicable Indemnifying Party for any payment made by such Indemnifying Party in connection with providing such indemnification up to such amount realized or received by the Indemnified Party.

Nothing in this Section 12.7(a) shall limit in any way the ability of KCS, NS or the Company to (i) take (or refrain from taking, as the case may be) any reasonable position for Tax purposes that KCS, NS or the Company determines to take (or refrain from taking) in its sole discretion or (ii) refrain from pursuing any third party insurance recovery that KCS, NS or the Company, as the case may be, determines would be commercially inadvisable to pursue.

(b) Each Indemnified Party shall use its commercially reasonable efforts to mitigate any claim or liability that an Indemnified Party asserts or may assert under this Article 12. In the event that an Indemnified Party shall fail to make such commercially reasonable efforts to mitigate any such claim or liability, then notwithstanding anything contained in this Agreement to the contrary, the Indemnifying Party shall not be required to indemnify any Indemnified Party for that portion of any Damages that would reasonably be expected to have been avoided if the Indemnified Party had made such efforts.

13. Termination.

13.1 Termination by Mutual Consent. This Agreement may be terminated at any time prior to the Closing by the mutual agreement, in writing, of each of KCS and NS.

13.2 Termination by Final Order. This Agreement may be terminated by KCS or NS upon written notice to the other party that any final, non-appealable Law shall have been enacted, entered, promulgated or enforced by any Governmental Authority of competent jurisdiction which prohibits, restricts or makes illegal the consummation of the Closing or any of the material transactions contemplated thereby, or by the Company Agreement or any of the Ancillary Agreements; provided, that the right to terminate this Agreement under this Section 13.2 shall not be available to any party whose breach of any provision or whose failure to perform any obligation under this Agreement (or the breach or failure of any Affiliate thereof) has been the cause of such Law.

13.3 Termination by NS. NS may (but shall not be obligated to) terminate this Agreement prior to the Closing by giving written notice to KCS if:

(a) there has been a material violation or breach by KCS or KCSR of any of their agreements or covenants contained in this Agreement or there has been a material violation or breach by KCS or KCSR of any of their representations or warranties contained in this Agreement such that it is reasonably likely that either of the conditions set forth in Section 11.2(a) or 11.2(b) cannot be satisfied, and such violation or breach shall not have been cured or corrected within twenty days after receipt of notice thereof;

(b) the Closing does not occur on or prior to September 1, 2006, or such later date as may be agreed to in writing by the parties; provided, that, notwithstanding the satisfaction of the other conditions set forth in Sections 11.1 and 11.2

(other than any conditions which, by their terms, may only be satisfied on the Closing Date) if any of the Required Governmental Consents required by Section 11.1(c) have not been obtained by such date, such date shall be extended in additional one-month increments without any further action by the parties through February 1, 2007; and, provided, further, that the non-occurrence of the Closing is not due to a breach by NS of any condition or covenant hereunder;

(c) there has been imposed by a Governmental Authority a condition to any Required Governmental Consent, which condition is not acceptable to NS in NS' reasonable judgment; or

(d) there has been a Material Adverse Effect on KCS or KCSR which shall not have been cured or corrected within twenty days after receipt of notice thereof; provided that such Material Adverse Effect is not due to a breach by NS of any condition or covenant hereunder.

13.4 Termination by KCS. KCS may (but shall not be obligated to) terminate this Agreement prior to the Closing by giving written notice to NS if:

(a) there has been a material violation or breach by NS of any of its respective agreements or covenants contained in this Agreement or there has been a material violation or breach by NS of any of its representations or warranties contained in this Agreement such that it is reasonably likely that either of the conditions set forth in Section 11.3(a) and (b) cannot be satisfied, and such violation or breach shall not have been cured or corrected within twenty days after receipt of notice thereof;

(b) the Closing does not occur on or prior to September 1, 2006, or such later date as may be agreed to in writing by the parties; provided, that, notwithstanding the satisfaction of the other conditions set forth in Sections 11.1 and 11.3 (other than any conditions which, by their terms, may only be satisfied on the Closing Date) if any of the Required Governmental Consents required by Section 11.1(c) have not been obtained by such date, such date shall be extended in additional one-month increments without any further action by the parties through February 1, 2007; and, provided, further, that the non-occurrence of the Closing is not due to a breach by KCS or KCSR of any condition or covenant hereunder;

(c) there has been imposed by a Governmental Authority a condition to any Required Governmental Consent, which condition is not acceptable to KCS in KCS' reasonable judgment; or

(d) there has been a Material Adverse Effect on NS or AGS which shall not have been cured or corrected within twenty days after receipt of notice thereof; provided that such Material Adverse Effect is not due to a breach by KCS or KCSR of any condition or covenant hereunder.

13.5 Effect of Termination. In the event of the termination of this Agreement as permitted by this Article 13, no party shall have any obligation under, or liability to any other in respect to, this Agreement, except with respect to, any willful breach of this Agreement that gives rise to such termination and except for the provisions of the Confidentiality Agreement and the confidentiality obligations contained in Section 10.2(a), this Section 13.5 and Article 14 hereof, which shall survive the termination of this Agreement.

14. Miscellaneous.

14.1 Notices. All notices, requests, demands and other communications (collectively, "Notices") given pursuant to this Agreement shall be in writing, and shall be delivered by personal service, courier, overnight delivery service, facsimile transmission (which must be confirmed) or by United States registered or certified mail, postage prepaid, return receipt requested, to the following addresses:

(i) if to NS, to:

Norfolk Southern Corporation
Three Commercial Place
Norfolk, Virginia 23510
Facsimile No.: (757) 533-4872
Attn: James A. Squires, Esq.

with a copy to:

Skadden, Arps, Slate, Meagher & Flom LLP
4 Times Square
New York, New York 10036-6522
Facsimile No.: (212) 735-2000
Attn: Eric J. Friedman, Esq.

(ii) if to KCS or KCSR, to:

Kansas City Southern
427 West 12th Street
Kansas City, Missouri 64105
Facsimile No.: (816) 983-1227
Attn: Robert B. Terry, Esq.

with a copy to:

Sonnenschein Nath & Rosenthal LLP
4520 Main Street, Suite 1100
Kansas City, MO 64111

Facsimile No.: (816) 531-7545
Attn: John F. Marvin, Esq.

Any Notice, other than a Notice sent by registered or certified mail, shall be effective when received; a Notice sent by registered or certified mail, postage prepaid return receipt requested, shall be effective on the earlier of when received or the third day following deposit in the United States mails. Any party may from time to time change its address for further Notices hereunder by giving notice to the other parties in the manner prescribed in this Section.

14.2 Entire Agreement. This Agreement, the Company Agreement, the Ancillary Agreements and the Confidentiality Agreement, in each case including any attached exhibits and schedules, contain the sole and entire agreement and understanding of the parties with respect to the entire subject matter of this Agreement, and any and all prior discussions, negotiations, commitments and understandings, whether oral or otherwise, related to the subject matter of this Agreement are hereby merged herein. Nothing in this Agreement, express or implied, is intended to confer upon any Person other than the parties hereto any rights or remedies under or by way of this Agreement.

14.3 Assignment. No party may assign its rights or obligations under this Agreement, and any attempted or purported assignment or any delegation of any party's duties or obligations arising under this Agreement to any third party or entity shall be deemed to be null and void, and shall constitute a material breach by such party of its duties and obligations under this Agreement; provided that NS may assign its rights to any wholly-owned Subsidiary of NS.

14.4 Extension, Waiver and Amendment. At any time prior to the Closing, the parties hereto may (a) extend the time for the performance of any of the obligations or other acts of any other party hereto, (b) waive any inaccuracies in the representations and warranties of any other party hereto contained herein or in any document delivered pursuant hereto, and (c) waive compliance by any other party hereto with any of the agreements or conditions contained herein. Any agreement on the part of a party hereto to any such extension or waiver shall be valid if set forth in writing in an instrument signed by or on behalf of such party. The waiver by any party hereto of a breach of this Agreement shall not operate or be construed as a waiver of any subsequent breach. This Agreement may be amended only by a written agreement executed by all of the parties to this Agreement.

14.5 Governing Law; Submission to Jurisdiction.

(a) THE LAWS OF THE STATE OF DELAWARE SHALL GOVERN THE VALIDITY OF THIS AGREEMENT, THE CONSTRUCTION OF ITS TERMS AND THE INTERPRETATION OF THE RIGHTS AND DUTIES ARISING HEREUNDER.

(b) Subject to Section 14.13, each of the parties hereto (i) consents to submit itself to the exclusive jurisdiction of any Federal or state court located in the State of Delaware (the "Delaware Courts") in any action to enforce or in aid of the agreement to arbitrate in Section 14.13 herein or for provisional relief to maintain the status quo or prevent irreparable harm pending the appointment of the arbitrators, and to the non-exclusive jurisdiction of the Delaware Courts for enforcement of any award issued hereunder (ii) will not attempt to deny or defeat such personal jurisdiction by motion or other request for leave from any such court, and (iii) waives any objection based on forum non conveniens or any other objection to venue thereof.

14.6 Specific Performance; Injunctive Relief. Each of the parties hereto acknowledges, understands and agrees that any breach or threatened breach by such party or such party's Affiliates of the covenants contained herein will cause irreparable injury to the other party and that money damages will not provide an adequate remedy therefor. Accordingly, in the event of any such breach or threatened breach, a non-breaching party shall have the right and remedy (in addition to any other rights or remedies available at Law or in equity, including, money damages), subject to the provisions of Section 14.13, to have the provisions of this Agreement specifically enforced by, and to seek injunctive relief and other equitable remedies in, any court having competent jurisdiction. Each party further agrees to waive any requirement for the securing or posting of any bond or other security in connection with seeking such remedies.

14.7 Severability. Whenever possible each provision of this Agreement shall be interpreted in such manner as to be effective and valid under applicable Law, but if any provision of this Agreement shall be or become prohibited or invalid under applicable Law, such provision shall be ineffective to the extent of such prohibition or invalidity without invalidating the remainder of such provision or the remaining provisions of this Agreement.

14.8 Captions. The various captions of this Agreement are for reference only and shall not be considered or referred to in resolving questions of interpretation of this Agreement.

14.9 Counterparts. This Agreement may be executed in any number of counterparts, each of which shall be deemed to be an original, but all of which together shall constitute one and the same instrument.

14.10 Costs and Attorneys' Fees. Whether or not the transactions contemplated hereby are consummated, each of the parties shall bear and pay all costs and expenses incurred by it or on its behalf in connection with the transactions contemplated hereunder, including fees and expenses of its own financial or other consultants, investment bankers, accountants and counsel.

14.11 Judicial Interpretation. Should any provision of this Agreement require judicial interpretation, it is agreed that a court or other tribunal, as described in Section 14.13, interpreting or construing the same shall not apply a presumption that the terms hereof shall be more strictly construed against any Person by reason of the rule of

construction that a document is to be construed more strictly against the Person who itself or through its agent prepared the same, it being agreed that all parties have participated in the preparation of this Agreement.

14.12 No Third Party Beneficiaries. Except as expressly provided in this Agreement, this Agreement shall not benefit or create any right or cause of action in or on behalf of any Person other than the parties hereto; provided, however, that this Agreement will be binding upon, inure to the benefit of, and be enforceable by, the parties and their respective successors and permitted assigns.

14.13 Dispute Resolution. Each of the parties hereto stipulates and agrees that any dispute controversy or claim, arising out of or relating to this Agreement or the breach, termination or validity thereof ("Dispute") that is not resolved by negotiations between senior officers of the parties within twenty (20) days after receipt by a party of written notice ("Dispute Notice") of such Dispute, will be submitted to mediation in accordance with the Commercial Mediation Procedures of the American Arbitration Association ("AAA"). If such dispute is not resolved within twenty (20) days after appointment of a mediator, or within sixty (60) days of receipt of Dispute Notice (whichever comes sooner), each of the parties hereto agrees that, at the demand of any party, such Dispute will be submitted to mandatory and binding arbitration before the AAA, in New York, New York by three arbitrators, under the Commercial Arbitration Rules and the Large Complex Case Procedures of the AAA then in effect (the "Rules"), under the following terms and conditions:

(a) Selection of Arbitrators. A panel of three independent arbitrators shall be appointed by the AAA using the listing, ranking and striking procedure in the Rules. Any arbitrator appointed by the AAA shall be a retired judge or a practicing attorney with no less than fifteen years of experience with large commercial cases and an experienced arbitrator.

(b) Conduct of Arbitration. The arbitration shall be held and the award shall be issued in New York, New York. In addition to Damages, the arbitral tribunal may award any remedy provided for under applicable Law and the terms of this Agreement, including, without limitation, specific performance or other forms of injunctive relief. The arbitrators shall apply the Law of the State of Delaware to the substance of the Dispute and will have no power or authority, under the rules of the AAA or otherwise, to amend or disregard any provision of this Agreement.

(c) Replacement of Arbitrator(s). Should any of the arbitrator(s) refuse or be unable to proceed with arbitration proceedings, replacement arbitrator(s) will be selected using the same method of selection as the original arbitrator(s).

(d) Findings and Conclusions. The arbitrators will, after reaching judgment and award, prepare and distribute to the parties a written award including the findings of fact and conclusions of Law relevant to such award and containing an opinion setting forth the reasons for the giving or denial of any award.

(e) Time is of the Essence. The arbitrators are hereby instructed that time is of the essence in the arbitration proceeding, and that the arbitrators will have the right and authority to issue monetary sanctions against any party if, upon a showing that such party is unreasonably delaying the proceeding.

(f) Temporary Equitable Relief. By agreeing to arbitration, the parties do not intend to deprive any Delaware Court of its jurisdiction to issue a pre-arbitral injunction, pre-arbitral attachment, or other order in aid of arbitration proceedings and the enforcement of any award. Without prejudice to such provisional remedies as may be available under the jurisdiction of a Delaware Court, the arbitral tribunal shall have full authority to grant provisional remedies and to direct the parties to request that any court modify or vacate any temporary or preliminary relief issued by such court, and to award Damages for the failure of any party to respect the arbitral tribunal's orders to that effect.

(g) Consolidation. The parties hereto are committed to the prompt and efficient resolution of disputes. Accordingly, if one or more disputes arises under this Agreement, the Company Agreement or any of the Ancillary Agreements such disputes may be brought in a single arbitration. If more than one arbitration is brought with respect to disputes under this Agreement, the Company Agreement or any of the Ancillary Agreements, then any party hereto may request that any arbitration or any new dispute arising under this Agreement, the Company Agreement or any of the Ancillary Agreements be consolidated into any prior arbitration. The new dispute or arbitration shall be so consolidated, provided that the arbitral tribunal for the prior (or first filed) arbitration determines that (i) the new dispute or arbitration presents significant issues of Law or fact common with those in the pending arbitration; (ii) no party would be unduly prejudiced and (iii) consolidation under such circumstances would not result in undue delay for the prior arbitration. Any order of consolidation issued by such arbitral tribunal shall be final and binding upon the parties. Unless the parties otherwise agree, the arbitral tribunal appointed first in time shall serve as the arbitral tribunal for the consolidated arbitration. The parties waive any right they have to appeal or to seek interpretation, revision or annulment of such order of consolidation under the Rules or in any court. The parties hereto agree that upon such an order of consolidation, they will promptly dismiss any arbitration brought under this Agreement, the subject of which has been consolidated into another arbitral proceeding.

(h) Discovery. Recognizing the express desire of the parties for an expeditious means of dispute resolution, the arbitrators will allow for limited discovery as may be reasonable under the circumstances.

(i) Costs and Attorneys' Fees. Notwithstanding any rule of the AAA to the contrary, the arbitrators rendering judgment under this Section 14.13 will have the power to award the costs of the arbitration, including reasonable attorneys' fees and expenses to the prevailing party or parties in the arbitration. In any action to enforce this agreement to arbitrate or any arbitral award rendered hereunder, the court may award costs and attorneys' fees against the party resisting enforcement.

Schedule 2.1(a)

1. Calculation of NS Interest. On the Closing Date and each Anniversary Date (each, an "Issuance Date"), KCS and NS shall cause the Company to issue and sell to AGS, and NS shall cause AGS to purchase from the Company, in exchange for cash consideration in an amount equal to the Capital Contribution Amount calculated in respect of such Issuance Date (in each case, the "NS Consideration" and, together with any NS Consideration previously paid to the Company in accordance with Sections 2.1(a) and 2.1(b), the "Aggregate NS Consideration") set forth in the applicable Officer's Certificate, a membership interest in the Company such that, upon the issuance thereof, the NS Interest will be a percentage equal to the quotient, rounded to four decimal places, of (a) the Aggregate NS Consideration, divided by (b) $1,000,000,000; it being understood that the Aggregate NS Consideration shall in no event exceed $300,000,000.

2. Calculation of KCS Interest. On each Issuance Date, KCS' percentage interest in the Company will be adjusted to be equal to (1) 100% less (2) the NS Interest.

3. Adjustment of Capital Accounts. The Capital Accounts (as such term is defined in the Company Agreement) of the NS Member (as such term is defined in the Company Agreement) will be established (in the case of the Closing Date) or adjusted on a dollar-for-dollar basis in accordance with Section 2.2 of the Company Agreement to reflect each payment of NS Consideration pursuant to Section 1 of this Schedule 2.1(a).

AMENDMENT NO. 1 TO TRANSACTION AGREEMENT

THIS AMENDMENT NO. 1 TO TRANSACTION AGREEMENT (this "Amendment"), is made and entered into as of January 17, 2006, by and among KANSAS CITY SOUTHERN, a Delaware corporation ("KCS"), THE KANSAS CITY SOUTHERN RAILWAY COMPANY, a Missouri corporation ("KCSR"), NORFOLK SOUTHERN CORPORATION, a Virginia corporation ("NS"), and THE ALABAMA GREAT SOUTHERN RAILROAD COMPANY, an Alabama corporation and Subsidiary of NS ("AGS"), with reference to the following facts:

A. KCS, KCSR, NS and AGS are parties to that certain Transaction Agreement entered into as of December 1, 2005 (the "Transaction Agreement"), pursuant to the terms of which the parties thereto have agreed to form a joint venture for purposes of owning and operating certain Assets.

B. The Transaction Agreement and the related Company Agreement to be entered into at Closing contemplated that KCS will make certain capital improvements to the Line after the Closing and NS has agreed to contribute certain amounts to the Company, among other things, to pay for such improvements.

C. KCS has determined those capital improvements to the Line set forth on Exhibit D of the Company Agreement will be undertaken in advance of the Closing as part of its 2006 infrastructure program and irrespective of the transaction among the parties to the Transaction Agreement. The parties have determined that it is in the best interest of all parties for KCS to begin making such capital improvements to the Line prior to the Closing. Further, the parties have determined that, should all Required Governmental Consents be obtained, including the approval of the United States Surface Transportation Board, these capital projects should be eligible to be reimbursed from the proceeds of the transactions contemplated by the Transaction Agreement. In order to do so, the Transaction Agreement and the form of Company Agreement attached as Exhibit A hereto must each be amended such that KCS will be reimbursed by the Company following Closing for making such capital improvements to the Line prior to Closing.

NOW, THEREFORE, with reference to the foregoing facts and in consideration of the mutual agreements and understanding set forth herein, the parties hereto, intending to be legally bound, hereby agree as follows:

1. Defined Terms.

Capitalized terms used herein but not otherwise defined herein shall have the meaning assigned to such terms in the Transaction Agreement.

2. Amendments.

2.1 Section 1 of the Transaction Agreement is hereby amended by inserting the following new definitions therein in the appropriate alphabetical order:

"**Budget**" shall have the meaning given to that term in the Company Agreement.

"**Business Plan**" shall have the meaning given to that term in the Company Agreement.

"**Fiscal Year**" shall have the meaning given to that term in the Company Agreement.

"**Pre-Closing Capital Expenditures**" shall have the meaning given to that term in the Company Agreement.

2.2 Section 2.2 of the Transaction Agreement is hereby amended by deleting the first and second sentences thereof and inserting in lieu thereof the following two new sentences:

"KCS and NS shall cause the Company to use $260,000,000 (less any Pre-Closing Capital Expenditures for which the Company reimburses KCS pursuant to clause (b) of the following sentence) of the proceeds from the sale of the NS Interest plus any interest earned thereon from time to time (the "Capital Proceeds") for the capital expenditures anticipated to be made in accordance with the Company Agreement and the Budgets (including any Rollover Budgets) and Business Plans (as each such term is defined in the Company Agreement) for the Company contemplated thereby. KCS and NS shall cause at Closing (a) up to $40,000,000 of the proceeds from the sale of the NS Interest to be paid to reimburse KCS for capital expenditures other than Pre-Closing Capital Expenditures made by KCS on the Line within the two-year period ending on the Closing Date (none of which shall have been made in anticipation of this Agreement) as presented on a schedule delivered to NS prior to the Closing Date, which schedule shall be final and binding on NS if it accurately sets forth expenditures made in accordance with the principles expressed in this sentence (the different between $40,000,000 and such reimbursement shall be the "Excess Proceeds"), (b) up to $20,000,000 of the proceeds from the sale of the NS Interest equal to the Pre-Closing Capital Expenditures to be paid to reimburse KCS for Pre-Closing Capital Expenditures made by KCS prior to the Closing Date in respect of the Proposed Capital Projects listed in Exhibit D to the Company Agreement as set forth in the Company Agreement, the Budget for the first Fiscal Year and the Business Plan for the first Fiscal Year, which amount shall be presented on a schedule delivered to NS prior to the Closing Date, which schedule shall be final and binding on NS if it accurately sets forth expenditures made in accordance with the principles set forth in this sentence, and (c) the Excess Proceeds and any portion of the Capital Proceeds not allocated at such time for capital expenditures in accordance with the then current Budget or any Rollover Budget, as the case may be, and Business Plan (in the aggregate, the "Excess Capital") to be made available by the Company to provide the Partner Financing pursuant to Article 4 below.

2.3 Section 3.1(a) of the Transaction Agreement is hereby amended by deleting the first sentence thereof and inserting in lieu thereof the following new first sentence:

"Subject to the terms and conditions of this Agreement, at the Closing, KCS and KCSR shall , and shall cause their respective Subsidiaries, as applicable, to, transfer, convey, assign and delivery to the Company, all of their respective right, title and interest in the

Assets, free and clear of all Liens other than Permitted Liens, and in exchange for the Assets, KCS and NS shall cause the Company to issue to KCS a membership interest in the Company determined in accordance with Section 2.1(a) (as adjusted pursuant to Section 2.1(b) and together with the Preferred Return, the "KCS Interest").

2.4 Exhibit A to the Transaction Agreement is hereby amended by amending and restating such Exhibit in its entirety to read as set forth on Exhibit A attached hereto.

2.5 Section 8.1 of the Transaction Agreement is hereby amended by inserting the following new third sentence:

"Since the date of its formation, the Company has been a wholly-owned subsidiary of KCS and has not (i) engaged in any business, (ii) conducted any operations, (iii) incurred any liabilities or (iv) entered into any agreements or arrangements, other than, in each case, in connection with the letter agreement by and between KCS and NS dated January 17, 2006, this Agreement and the transactions contemplated by this Agreement."

3. Limitation of Amendments.

The amendments set forth in Section 2 above are effective for the purposes set forth herein and will be limited precisely as written and will not be deemed to (a) be a consent to any amendment, waiver or modification of any other term or condition of the Transaction Agreement, (b) otherwise prejudice any right or remedy that any party to the Transaction Agreement may now have or may have in the future under or on in connection with the Transaction Agreement, or (c) be a consent to any future amendment, waiver or modification of any other term or condition of the Transaction Agreement.

4. Entire Agreement.

This Amendment, together with the Transaction Agreement, the Company Agreement, the Ancillary Agreements and the Confidentiality Agreement, in each case including any attached exhibits and schedules, contain the sole and entire agreement and understanding of the parties with respect to the entire subject matter contained herein and therein, and any and all prior discussions, negotiations, commitments and understandings, whether oral or otherwise, related to the subject matter contained herein and therein are hereby merged herein and therein. Nothing in this amendment, express or implied, is intended to confer upon any Person other than the parties hereto any rights or remedies under or by way of this Amendment.

5. Assignment.

No party may assign its rights or obligations under this Amendment, and any attempted or purported assignment or any delegation of any party's duties or obligations arising under this Amendment to any third party or entity shall be deemed to be null and void, and shall constitute a material breach by such party of its duties and obligations under this Amendment; provided that NS may assign its rights to any wholly-owned Subsidiary of NS.

6. Governing Law.

THE LAWS OF THE STATE OF DELAWARE SHALL GOVERN THE VALIDITY OF THIS AMENDMENT, THE CONSTRUCTION OF ITS TERMS AND THE INTERPRETATION OF THE RIGHTS AND DUTIES ARISING HEREUNDER.

7. Severability.

Whenever possible each provision of this Amendment shall be interpreted in such manner as to be effective and valid under applicable Law, but if any provision of this Amendment shall be or become prohibited or invalid under applicable Law, such provision shall be ineffective to the extent of such prohibition or invalidity without invalidating the remainder of such provision or the remaining provisions of this Amendment.

8. Captions.

The various captions of this Amendment are for reference only and shall not be considered or referred to in resolving questions of interpretation of this Amendment.

9. Counterparts.

This Amendment may be executed in any number of counterparts, each of which shall be deemed to be an original, but all of which together shall constitute one and the same instrument.

10. Judicial Interpretation.

Should any provision of this Amendment require judicial interpretation, it is agreed that a court or other tribunal, as described in Section 14.13 of the Transaction Agreement, interpreting or construing the same shall not apply a presumption that the terms hereof shall be more strictly construed against any Person by reason of the rule of construction that a document is to be construed more strictly against the Person who itself or through its agent prepared the same, it being agreed that all parties have participated in the preparation of this Amendment.

11. Dispute Resolution.

Each of the parties hereto stipulates and agrees that the dispute resolution procedures set forth in Section 14.13 of the Transaction Agreement shall apply to any dispute, controversy or claim arising out of or relating to this Amendment or the breach, termination or validity thereof.

LIMITED LIABILITY COMPANY AGREEMENT
OF
MERIDIAN SPEEDWAY, LLC

This Limited Liability Company Agreement (this "Agreement") of Meridian Speedway, LLC, a Delaware limited liability company (the "Company"), is entered into pursuant to and in accordance with the Delaware Limited Liability Company Act (the "Act") and shall be effective as of [ ], 2006, by and between The Alabama Great Southern Railroad Company, an Alabama corporation and a wholly-owned subsidiary of NSR (as defined herein) (such corporation or any Permitted Transferee thereof, the "NS Member"), and Kansas City Southern, a Delaware corporation ("KCS" and, together with any Permitted Transferee thereof, the "KCS Member"), as the Members pursuant to the provisions of the Act.

WHEREAS, KCS, The Kansas City Southern Railway Company, a Missouri corporation and a wholly-owned subsidiary of KCS ("KCSR"), the NS Member and Norfolk Southern Corporation, a Virginia corporation and the ultimate parent of the NS Member (the "NS Parent") have entered into a Transaction Agreement (the "Transaction Agreement"), dated as of December 1, 2005, which provides, among other things for the KCS Member to contribute the railroad line between Meridian, Mississippi and Shreveport, Louisiana (the "Line") and certain other related assets (together with the Line, the "Assets"), in each case described in Schedule 1.1 to the Transaction Agreement, to the Company and for the NS Parent to cause the NS Member to make capital contributions to the Company as determined in accordance with Schedule 2.1(a) to the Transaction Agreement, in each case, in accordance with the provisions thereof;

WHEREAS, by executing this Agreement and the related Certificate of Formation and filing the Certificate of Formation with the Secretary of State of the State of Delaware, the parties hereto are hereby and thereby forming the Company; and

WHEREAS, the parties hereto desire to enter into this Agreement to set forth their rights and obligations as members of the Company.

NOW, THEREFORE, in consideration of the foregoing facts and the mutual covenants and agreements herein contained, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, and intending to be legally bound hereby, the parties hereto hereby agree as follows:

DEFINITIONS

Capitalized words and phrases used in this Agreement have the following meanings:

"AAA" means the American Arbitration Association.

"Acceptance Agreement" shall have the meaning set forth in Section 10.2(d).

"Acceptance Period" shall have the meaning set forth in Section 10.2(c).

REDACTED

"Accumulated Preference" means, with respect to a Member with a Preferred Return, such Member's Preferred Return Amount accrued in the aggregate.

"Act" shall have the meaning set forth in the preamble.

"Adjusted Capital Account Deficit" means, with respect to any Member, the deficit balance, if any, in such Member's Capital Account as of the end of the relevant Fiscal Year, after giving effect to the following adjustments:

(a) Credit to such Capital Account any amounts which such Member is deemed to be obligated to restore pursuant to the penultimate sentences in Sections 1.704-2(g)(1) and 1.704-2(i)(5) of the Regulations; and

(b) Debit to such Capital Account the items described in Sections 1.704-1(b)(2)(ii)(d)(4), 1.704-1(b)(2)(ii)(d)(5) and 1.704-1(b)(2)(ii)(d)(6) of the Regulations.

The foregoing definition of Adjusted Capital Account Deficit is intended to comply with the provisions of Section 1.704-1(b)(2)(ii)(d) of the Regulations and shall be interpreted consistently therewith.

"Affiliate" means, with respect to any specified Person, (i) any other Person who, directly or indirectly, controls, is under common control with, or is controlled by, such specified Person, (ii) any other Person who is a director, officer, manager, member, partner or trustee of the specified Person or a Person described in clause (i) of this definition or any spouse of the specified Person or any such other Person, (iii) any relative of the specified Person or any other Person described in clause (ii) of this definition, or (iv) any Person of which the specified Person and/or any one or more of the Persons specified in clause (i), (ii) or (iii) of this definition, individually or in the aggregate, beneficially own 10% or more of any class of Voting Securities.

"Agreement" shall have the meaning set forth in the Preamble. Words such as "herein," "hereinafter," "hereof," "hereto" and "hereunder" refer to this Agreement as a whole, unless the context otherwise requires.

"Assets" shall have the meaning set forth in the Preamble.

"Auditors" means the independent registered public accounting firm from time to time engaged by the Company to audit its financial statements and results of operations. The Auditors shall initially be KPMG, until changed either (i) by mutual agreement of the parties or (ii) upon receipt by the Company of a written request of the NS Member for the replacement of the initial Auditors. Successor Auditors shall be appointed by the Management Committee in accordance with Section 5.6.

"Bankruptcy" means, with respect to any Person, a Voluntary Bankruptcy or an Involuntary Bankruptcy (as each such term is defined herein).

"Budget" shall have the meaning set forth in Section 5.7(a).

REDACTED

"Business" means the business conducted by the Company, including owning, managing and maintaining the Assets, and making certain capital improvements to the same, and performing certain haulage and other freight railroad transportation services, generally as a private carrier.

"business condition" of any Person means the financial condition, results of operations, business or properties of such Person.

"Business Day" means a day of the year on which banks are not required or authorized to close in New York City.

"Business Plan" shall have the meaning set forth in Section 5.7(a).

"Capacity Improvement Project" means a construction project effectuated as described in Section 5.12.

"Capital Account" means, with respect to any Member, the Capital Account maintained for such Member in accordance with the following provisions:

(a) To each Member's Capital Account there shall be credited (1) such Member's Capital Contributions, (2) such Member's distributive share of Profits and any items in the nature of income or gain which are specially allocated pursuant to Section 3.3 and (3) the amount of any Company liabilities assumed by such Member or which are secured by any Property distributed to such Member. The principal amount of a promissory note which is not readily traded on an established securities market and which is contributed to the Company by the maker of the note (or a Member related to the maker of the note within the meaning of Regulations Section 1.704-1(b)(2)(ii)(c)) shall not be included in the Capital Account of any Member until the Company makes a taxable disposition of the note or until (and to the extent) principal payments are made on the note, all in accordance with Regulations Section 1.704-1(b)(2)(iv)(d)(2).

(b) To each Member's Capital Account there shall be debited (1) the amount of money and the Gross Asset Value of any Property distributed to such Member pursuant to any provision of this Agreement, (2) such Member's distributive share of Losses and any items in the nature of expenses, deductions or losses which are specially allocated pursuant to Section 3.3 and (3) the amount of any liabilities of such Member assumed by the Company or which are secured by any Property contributed by such Member to the Company.

(c) In the event a Membership Interest is Transferred in accordance with the terms of this Agreement, the transferee shall succeed to the Capital Account of the transferor to the extent it relates to the Transferred Membership Interest.

(d) In determining the amount of any liability for purposes of subparagraphs (a) and (b) above, there shall be taken into account Code Section 752(c) and any other applicable provisions of the Code and Regulations.

The foregoing provisions and the other provisions of this Agreement relating to the maintenance of Capital Accounts are intended to comply with Regulations Section 1.704-

REDACTED

1(b), and shall be interpreted and applied in a manner consistent with such Regulations. In the event the Management Committee shall determine that it is prudent to modify the manner in which the Capital Accounts or any debits or credits thereto (including, without limitation, debits or credits relating to liabilities which are secured by contributed or distributed property or which are assumed by the Company or any Members), are computed in order to comply with such Regulations, the Management Committee may make such modification, provided that it is not likely to have a material effect on the amounts distributed to any Person pursuant to Section 11 upon the dissolution of the Company. The Management Committee also shall (i) make any adjustments that are necessary or appropriate to maintain equality between the Capital Accounts of the Members and the amount of capital reflected on the Company's balance sheet, as computed for book purposes, in accordance with Regulations Section 1.704-1(b)(2)(iv)(q) and (ii) make any appropriate modifications in the event unanticipated events might otherwise cause this Agreement not to comply with Regulations Section 1.704-1(b).

"Capital Contribution" means, with respect to any Member, the amount of money and the initial Gross Asset Value of any Property (other than money) contributed to the Company with respect to the Membership Interest in the Company held or purchased by such Member.

"Capital Improvement Agreement" means any agreement entered into between the Company and the KCS Member whereby the KCS Member or its subsidiaries will effect the Capital Projects on behalf of the Company.

"Capital Project Process" shall have the meaning set forth in Section 5.3(b).

"Capital Project" means those capital expenditures relating to the Line as set forth in the Budgets (including any Rollover Budgets) approved in accordance with this Agreement or Business Plan.

"Capital Recovery Book Items" means (i) Depreciation attributable to the Assets and attributable to the first $260,000,000 of Capital Projects to the extent such $260,000,000 is not allowed as a deductible expense for federal income-tax purposes, and (ii) expenses attributable to the first $260,000,000 of Capital Projects allowed as a deductible expense for federal income-tax purposes. Notwithstanding the foregoing, the $260,000,000 amount shall be adjusted downward for any Pre-Closing Capital Expenditures for which the KCS Member is reimbursed by the Company pursuant to Section 2.4(b) and for which the KCS Member, not the Company, is allowed to claim a deduction on its federal income tax return(s).

"Capital Recovery Tax Deductions" means expenses, depreciation, amortization, and other cost recovery deductions attributable solely to Capital Projects and Assets that are allowed as a deduction for federal income-tax purposes.

"Certificate of Formation" means the Certificate of Formation filed with the Secretary of State of the State of Delaware pursuant to the Act to form the Company, as originally executed and amended, modified, supplemented or restated from time to time, as the context requires.

"Claims" shall have the meaning set forth in Section 5.9(a).

REDACTED

"**Closing Date**" shall be the date the initial Capital Contributions are made under Section 2.1(a).

"**CN Jackson Trackage Rights**" means the trackage rights granted with respect to the approximately four-tenths of a mile section of track in Jackson, Mississippi pursuant to the trackage rights agreement between Midsouth Rail Corporation and Illinois Central Gulf Railroad Company, dated March 26, 1986, as supplemented and amended through the date of the Transaction Agreement.

"**Code**" means the United States Internal Revenue Code of 1986, as amended from time to time.

"**Committee Representative**" at any time means each of the individuals then appointed by the Members to and serving as a member of the Management Committee, or their alternates, as provided in Section 5.

"**Company**" means the limited liability company formed pursuant to this Agreement and the Certificate of Formation and the limited liability company continuing the business of this Company in the event of dissolution of the Company as herein provided.

"**Company Minimum Gain**" has the same meaning as the term. "partnership minimum gain," in Regulations Section 1.704-2(b)(2) and 1.704-2(d).

"**Dallas Intermodal Terminal Traffic**" means all domestic intermodal containers or trailers with an origin and destination in the United States. with a lift or drop at the KCS Member's Dallas intermodal Terminal. that moves over the Line and over KCSR's tracks between Shreveport and the KCS Member's Dallas Intermodal Terminal. and that originates or terminates at or east of Meridian, and that originates or terminates at or west of the Dallas / Ft. Worth, TX. Standard Metropolitan Statistical Area (SMSA) as published by the Office of Management and Budget (OMB).

"**Dallas Terminal Marketing Agreement**" means the Marketing Agreement, dated the date hereof, by and among KCSR and NSR.

"**Damages**" shall have the meaning set forth in Section 10.2(b).

"**Default Sale Notice**" shall have the meaning set forth in Section 10.2(c).

"**Delaware Courts**" shall have the meaning set forth in Section 12.13.

"**Deemed Distribution Amount**" shall have the meaning set forth in Section 4.7.

"**Depreciation**" means, for each Fiscal Year. an amount equal to the depreciation, amortization or other cost recovery deduction allowable with respect to an asset for such Fiscal Year. except that if the Gross Asset Value of an asset differs from its adjusted basis for federal income tax purposes at the beginning of such Fiscal Year. Depreciation shall be an amount which bears the same ratio to such beginning Gross Asset Value as the federal income tax deprecation, amortization or other cost recovery deduction for such Fiscal Year bears to such

REDACTED

beginning adjusted tax basis; provided, however, that if the adjusted basis for federal income tax purposes of an asset at the beginning of such Fiscal Year is zero, Depreciation shall be determined with reference to such beginning Gross Asset Value using any reasonable method selected by the Management Committee.

"Dispute" shall have the meaning set forth in Section 12.14.

"Dissolution Event" shall have the meaning set forth in Section 11.1.

"Exchange Act" means the Securities Exchange Act of 1934.

"Excess Proceeds" shall have the meaning given to that term in the Transaction Agreement.

"Fair Value" means the fair market value as determined by unanimous mutual agreement reached by the Members, or in the event the Members are unable to agree, as determined by an independent investment banking firm or firms or, in the case of any asset or other item not customarily valued by an investment banking firm, a qualified independent appraiser of the type customarily engaged in the valuation thereof (a "Qualified Appraiser"), in accordance with the following procedure. In the case of any event which gives rise to a requirement to determine "Fair Value" hereunder, the Management Committee shall be responsible for initiating the process by which Fair Value shall be determined as promptly as practicable, but in any event within twenty (20) days following such event and if the procedures contemplated herein in connection with determining Fair Value have not been complied with fully, then any such determination of Fair Value for any purpose hereunder shall be deemed to be preliminary and subject to adjustment pending full compliance with such procedures. Upon the occurrence of an event requiring the determination of Fair Value, the Management Committee shall give each Member notice of such event, and the Members shall engage in direct good faith discussions to arrive at a mutually agreeable determination of Fair Value. In the event the Members are unable to arrive at a mutually agreeable determination within thirty (30) days of the notice, an independent investment banking firm of national standing or Qualified Appraiser of national standing, as the case may be, selected by unanimous agreement of the Members shall make such determination and render such opinion. The determination so made shall be conclusive and binding on the Members. The fees and expenses of the investment banking firm or Qualified Appraiser retained for such purpose shall be paid by the Company.

"Fiscal Quarter" means any of the following:

(a) the period commencing on the date hereof and ending on the earliest to follow the Closing Date of March 31, June 30 and September 30 of the year in which the Closing Date occurs,

(b) any subsequent three (3) month period commencing on each of January 1, April 1, July 1 and October 1 and ending on the last date before the next such date, and

(c) the period commencing on the immediately preceding January 1, April 1, July 1, or October 1, as the case may be, and ending on the date on which all Property is distributed to the Members pursuant to Section 11.

REDACTED

"Fiscal Year" means any of the following:

(a) the period commencing on the date hereof and ending on December 31 of the year in which the Closing Date occurs,

(b) any subsequent twelve (12) month period commencing on January 1, and

(c) the period commencing on the immediately preceding January 1, and ending on the date on which all Property is distributed to the Members pursuant to Section 11.

"Freight Rail Common Carrier" shall mean KCSR, NSR, or such other freight rail common carrier that the Company, in accordance with the Agreement, admits to the entirety or any portion of the Line by way of haulage or trackage rights.

"GAAP" means generally accepted accounting principles as in effect in the United States of America, consistently applied.

"Gross Asset Value" means with respect to any asset, the asset's adjusted basis for federal income tax purposes, except as follows:

(a) The initial Gross Asset Value of any asset contributed by a Member to the Company shall be the gross fair market value (taking Code Section 7701(g) into account) of such asset on the date of contribution as determined by the Management Committee.

(b) The Gross Asset Values of all Company assets shall be adjusted to equal their respective gross fair market values (taking Code Section 7701(g) into account), as determined by the Management Committee as of the following times: (A) the acquisition of an additional interest in the Company by any new or existing Member in exchange for more than a de minimis Capital Contribution; (B) the distribution by the Company to a Member of more than a de minimis amount of Company property as consideration for an interest in the Company; and (C) the liquidation of the Company within the meaning of Regulations Section 1.704-1(b)(2)(ii)(g), provided that an adjustment described in clauses (A) and (B) of this paragraph shall be made only if the Management Committee reasonably determines that such adjustment is necessary to reflect the relative economic interests of the Members in the Company.

(c) The Gross Asset Value of any Company asset distributed to any Member shall be adjusted to equal the gross fair market value (taking Code Section 7701(g) into account) of such asset on the date of distribution as determined by the Management Committee.

(d) The Gross Asset Values of Company assets shall be increased (or decreased) to reflect any adjustments to the adjusted tax basis of such assets pursuant to Code Section 734(b) or Code Section 743(b), but only to the extent that such adjustments are taken into account in determining Capital Accounts pursuant to Regulations Section 1.704-1(b)-(2)(iv)(m) and subparagraph (f) of the definition of "Profits" and "Losses"; provided, however, that Gross Asset Values shall not be adjusted pursuant to this subparagraph (d) to the extent that an adjustment pursuant to subparagraph (c) is required in connection with a transaction that would otherwise result in an adjustment pursuant to this subparagraph (d).

REDACTED

If the Gross Asset Value of an asset has been determined or adjusted pursuant to subparagraph (a), (b) or (c), such Gross Asset Value shall thereafter be adjusted by the Depreciation taken into account with respect to such asset, for purposes of computing Profits and Losses.

"Indemnified Parties" shall have the meaning set forth in Section 10.2(f).

"Indemnified Persons" shall have the meaning set forth in Section 5.9.

"Indentures" means, collectively, the Indenture, dated as of September 27, 2000, among KCSR, KCS, certain subsidiaries of KCS and The Bank of New York, as trustee, governing the terms of KCS' 9½% Senior Notes due 2008 and the Indenture, dated as of June 12, 2002, among KCSR, KCS, certain subsidiaries of KCS and U.S. Bank National Association, as trustee, governing the terms of KCS' 7½% Senior Notes due 2009, as they may be amended from time to time.

"Investment Policies" shall have the meaning set forth in Section 5.7(b).

"Involuntary Bankruptcy" means, with respect to any Person, without the consent or acquiescence of such Person, the entering of an order for relief or approving a petition for relief or reorganization or any other petition seeking any reorganization, arrangement, composition, readjustment, liquidation, dissolution or other similar relief under any present or future bankruptcy, insolvency or similar statute, law or regulation, or the filing of any such petition against such Person which petition shall not be dismissed within ninety (90) days, or without the consent or acquiescence of such Person, the entering of any order appointing a trustee, custodian, receiver or liquidator of such Person or of all or any substantial part of the Property of such Person which order shall not be dismissed within ninety (90) days.

"Issuance Items" shall have the meaning set forth in Section 3.3(j).

"Items" shall have the meaning set forth in Section 3.4.

"Jackson Assignment Agreement" means the Jackson Assignment Agreement, dated the date hereof, by and between KCSR and the Company.

"Jackson Flyover" shall have the meaning set forth in the Transaction Agreement.

"JV Transaction Agreements" means, collectively, (i) the Transaction Agreement, (ii) the Operating Agreement, (iii) the NSR Joint Use Agreement, (iv) the Western Haulage Agreement (v) the KCSR Joint Use Agreement, (vi) the KCSR Master Interchange Agreement, (vii) the Unified Assignment and Assumption Agreement, (viii) the Omnibus Bill of Sale, (ix) the Unified Liability Agreement, (x) the Dallas Terminal Marketing Agreement, (xi) one or more Notes, (xii) the Jackson Assignment Agreement, (xiii) the Vicksburg Assignment Agreement, (xiv) the Access Agreement and (xv) the NSR-KCSR Haulage Agreement.

"KCS" shall have the meaning set forth in the Preamble.

REDACTED

"KCS Member" shall have the meaning set forth in the Preamble.

"KCSR" shall have the meaning set forth in the Preamble.

"KCSR Joint Use Agreement" shall mean the The Kansas City Southern Railway Company -- Meridian Speedway, LLC Joint Use Agreement, dated as of the date hereof, by and among NSR, KCSR and the Company.

"KCSR Master Interchange Agreement" means the Master Interchange Agreement, dated the date hereof, by and between KCSR and the Company.

"Line" shall have the meaning set forth in the Preamble.

"Line Option Call Agreement" shall have the meaning set forth in Section 9.8(b).

"Line Option Call Closing" shall have the meaning set forth in Section 9.8(b).

"Line Option Call Closing Date" shall have the meaning set forth in Section 9.8(b).

"Line Option Call Right" shall have the meaning set forth in Section 9.8.

"Liquidation Period" shall have the meaning set forth in Section 11.7.

"Liquidator" shall have the meaning set forth in Section 11.9(a).

"Local Train Starts" shall have the meaning set forth in Section 5.12(a).

"Losses" shall have the meaning set forth in the definition of "Profits."

"Major Decisions" means taking any of the following actions, notwithstanding any other provisions of the Transaction Agreement or this Agreement:

(i) Repealing, modifying or amending this Agreement or any of the JV Transaction Agreements to which the Company is a party, or waiving compliance with any provision of this Agreement or any of the JV Transaction Agreements to which the Company is a party;

(ii) Repealing, modifying or amending the Investment Policies;

(iii) Entering into any agreement with respect to or consummating any (A) acquisition, divestiture, spin-off, merger, consolidation, business combination or similar transaction involving equity interests or assets of the Company, (B) sale, transfer, lease, sublease, license or other disposition of any property or asset to a third party other than in the ordinary course of business, or (C) formation of, investment of the funds or assets of the Company in or other participation in any joint venture or partnership; provided, that, prior to the Maturity Date, the foregoing shall not apply to any Permitted Asset Transfer;

REDACTED

(iv) Entering into any transactions with any Member or any Affiliate of any Member (including any Capital Improvement Agreements), other than the distributions contemplated in Section 2.4(b) or Section 4 or pursuant to the JV Transaction Agreements; provided, that, prior to the Maturity Date, the foregoing shall not apply to any Permitted Asset Transfer or any Permitted Indebtedness;

(v) Approving the Budget or the Business Plan or any changes in, amendments to or deviations from, the Budget (including any Rollover Budget) or the Business Plan; provided, however, that no Committee Representative designated by the NS Member shall unreasonably withhold such Committee Representative's approval of any changes in, amendments to or deviations from, the Budget (including any Rollover Budget) or the Business Plan proposed by the KCS Member in respect of any agreed Capital Project in light of then-current business conditions and traffic patterns relating to the Line and in the event the Management Committee cannot agree on (A) a Capital Project, the Management Committee shall accept the recommendation of the Capital Project Committee, made in accordance with the Capital Project Process, with respect to such Capital Project or (B) the Budget, the prior year's budget shall roll forward as provided in Section 5.7(a);

(vi) Appointing, setting the rate of compensation of, approving bonuses for, or terminating any employees or Officers of the Company, if any;

(vii) Approving any change in the number of members of the Management Committee;

(viii) After the Maturity Date, declaring, making or paying any dividend or any other distribution (whether in cash, securities or other property) on any equity interests of the Company, other than the distributions contemplated in Section 4;

(ix) Incurring any indebtedness, guarantee or lien or making any loans (including any Notes), advances or capital contributions to, or investments in, any Person, except (A) as provided in the Budget or Rollover Budget and (B) purchase money financing of assets used in the conduct of the business of the Company; provided, that, prior to the Maturity Date, the foregoing shall not apply to any Permitted Indebtedness;

(x) Creating any employee equity option, structured equity, employee stock option plan or other similar plan, making any grants under any such plan or materially modifying any employee benefit plan;

(xi) Requiring any Capital Contribution beyond those contributions specified in this Agreement, the JV Transaction Agreements and any Budget (including any Rollover Budget) adopted pursuant to the terms of this Agreement;

(xii) Initiating or consenting to the filing of any petition to place the Company in insolvency, bankruptcy or similar proceedings;

REDACTED

(xiii) Admitting new Members to the Company (other than to effect a Permitted Transfer);

(xiv) Approving any changes in the Percentage Interests of the Members other than to effect a Permitted Transfer, to approve the redemption of the Preferred Return or as contemplated by Section 2.3(a);

(xv) Commencing, settling or disposing of any litigation against the Company or any of its assets or properties, except any settlement or disposition not exceeding [ ];

(xvi) Entering into any agreement, license, program or arrangement pursuant to which the Company is obligated to make or receive payments or forgive debt, or amending, terminating or failing to renew any such contract other than those specified in the Budget (including any Rollover Budget);

(xvii) Approving the formation and composition of any committees of the Management Committee and the formation and composition of the boards or equivalent governing bodies of any subsidiary of the Company;

(xviii) Making any material change in the Company's accounting practices or policies (other than as required by GAAP) or any change in the Auditors;

(xix) Taking any of the actions set forth in clauses (i) through (xviii) above with respect to any entity of which the Company owns, directly or indirectly, securities or other ownership interests having the power to elect a majority of the board of directors or other persons performing similar functions, or otherwise having the power to direct, manage or control the conduct of business of such entity or otherwise owning at least ten percent (10%) of the outstanding ownership interests of such entity;

(xx) Making operating expenses or capital expenditures beyond those contained in the Budget (including any Rollover Budget);

(xxi) Entering into an agreement, program or other arrangement pursuant to which the Company grants or provides to any Person any operating, haulage, trackage or any other rights (A) to move NS Traffic or Dallas Intermodal Terminal Traffic or (B) that allow a third party access over the Line, other than rights pursuant to agreements that meet the standards set forth in Exhibit A attached hereto;

(xxii) Accepting an active common carrier obligation or moving rail traffic in its own name and on its own behalf; or

(xxiii) Permitting any Freight Rail Common Carrier to perform haulage for any rail carrier, whether such Freight Rail Common Carrier is operating over the Line in haulage or on trackage rights.

REDACTED

"Management Committee" shall have the meaning set forth in Section 5.2(a).

"Maturity Date" means the earlier to occur of (i) the retirement of the KCS Member's 9½% Senior Notes due 2009 and (ii) the date on which Section 4.05 (or any equivalent provision of the Indentures) of both of the Indentures is no longer applicable to the Company.

"Members" means the Persons (i) who are referred to as such in the opening paragraph of this Agreement or who have become a new or substituted Member by acquisition of a Membership Interest pursuant to the terms of this Agreement and (ii) who have not ceased to be a Member.

"Member Nonrecourse Debt" has the same meaning as the term "partner nonrecourse debt" in Section 1.704-2(b)(4) of the Regulations.

"Member Nonrecourse Debt Minimum Gain" means an amount, with respect to each Member Nonrecourse Debt, equal to the Company Minimum Gain that would result if such Member Nonrecourse Debt were treated as a Nonrecourse Liability, determined in accordance with Section 1.704-2(i)(3) of the Regulations.

"Member Nonrecourse Deductions" has the same meaning as the term "partner nonrecourse deductions" in Sections 1.704-2(i)(1) and 1.704-2(i)(2) of the Regulations.

"Membership Interest" means an ownership interest in the Company or any portion of or interest in such interest, including any and all benefits to which the holder of such interest may be entitled as provided in this Agreement, together with all obligations of such Person to comply with the terms and provisions of this Agreement.

"Net Cash Flow" means for any period the gross cash proceeds of the Company for such period (excluding Capital Contributions) less the portion thereof used to pay or establish reserves for all Company expenses, debt payments, capital improvements, replacements, and contingencies, all as determined by the Management Committee. "Net Cash Flow" shall not be reduced by depreciation, amortization, cost recovery deductions, or similar allowances, but shall be increased by any reductions of reserves previously established pursuant to the first sentence of this definition.

"New Overhead Train Starts" shall have the meaning set forth in Section 5.12(a).

"Nonrecourse Deductions" shall have the meaning set forth in Section 1.704-2(b)(1) of the Regulations.

"Nonrecourse Liability" shall have the meaning set forth in Section 1.704-2(b)(3) of the Regulations.

"Non-Sponsoring Member" shall have the meaning set forth in Section 5.12(d).

REDACTED

"Note" means any note evidencing indebtedness of the KCS Member or the NS Member to the Company entered into in accordance with Section 4 of the Transaction Agreement.

"Notice" shall have the meaning set forth in Section 12.14.

"NS Member" shall have the meaning set forth in the Preamble.

"NS Parent" shall have the meaning set forth in the Preamble.

"NS Traffic" means all intermodal traffic moving on the Line that (a) originates or terminates in the United States at or east of Meridian, Mississippi and enters or exits the Line at Meridian, Mississippi, (b) originates or terminates in the United States west of Fort Worth, Texas (including intermodal traffic originating by steamship line at a port along the west coast of the United States) and enters or exits the Line at Shreveport, Louisiana and (c) does not consist of traffic originating or terminating at any station on the KCSR system (including any station where KCSR or the Texas Mexican Railway Company have trackage rights or access via reciprocal switch), as it exists on the date of the Transaction Agreement.

"NSR" means Norfolk Southern Railway Company, a Virginia corporation and an operating subsidiary of the NS Parent.

"NSR Joint Use Agreement" shall mean the Norfolk Southern Railway Company – Meridian Speedway, LLC Joint Use Agreement, dated as of the date hereof, by and between NSR, KCSR and the Company.

"NSR-KCSR Haulage Agreement" shall mean the Haulage Agreement, dated as of the date hereof, by and between NSR and KCSR.

"Officers" means Persons designated as officers of the Company by the Management Committee for so long as any such Person remains an Officer in accordance with the terms of this Agreement.

"Operating Agreement" shall mean the Operating Agreement, dated as of the date hereof, by and between KCSR and the Company.

"Omnibus Bill of Sale" means the Bill of Sale, dated the date hereof, by KCS and KCSR.

"Percentage Interest" means, with respect to any Member as of any date, the Percentage Interest opposite the name of each Member set forth on Exhibit C to this Agreement, which shall be maintained by the Company and updated from time to time as appropriate after the date hereof, including on the contribution by the NS Member of the amount described in Section 2.1(b) of the Transaction Agreement.

"Permitted Asset Transfer" means any non-cash transfer of the property or assets of the Company to the KCS Member or any Restricted Subsidiary (as such term is defined in the Indentures) thereof.

REDACTED

"Permitted Indebtedness" means any loans or advances by the Company to the KCS Member or any Restricted Subsidiary (as such term is defined in the Indentures) thereof.

"Permitted Transfer" shall have the meaning set forth in Section 9.2.

"Permitted Transferees" means a transferee pursuant to a Permitted Transfer.

"Person" means an individual or a partnership, corporation, trust, association, limited liability company or other entity.

"Pre-Closing Capital Expenditures" means those expenditures for Proposed Capital Projects listed in Exhibit D and made by the KCS Member prior to the Closing Date in accordance with Section 2.4(b).

"Preferred Return" means, with respect to the initial Capital Contribution made by the KCS Member, a preferential interest in the Company granted to such Member commencing on the date of this Agreement, having an initial agreed value equal to the amount of Excess Proceeds and entitling such member to certain rights as provided under the Agreement. The initial agreed value and commencement date of any other Preferred Return granted to a Member shall be as unanimously agreed by the Members at or prior to the time such Member shall make a Capital Contribution in exchange for such Preferred Return. A Member's Preferred Return shall be considered outstanding so long as such Member's Preferred Return Amount is greater than zero.

"Preferred Return Amount" means, with respect to the Preferred Return in connection with the Initial Capital Contribution made by the KCS Member, an amount computed at an interest rate equal to the sum of the 10-year U.S. Treasury Bond rate plus 50 basis points, compounded annually, and determined as of the date of the initial Capital Contribution made by the KCS Member (in all other cases determined as of the date the Company grants a Preferred Return to a Member) multiplied by the Preferred Return.

"Profits" and **"Losses"** means, for each Fiscal Year, an amount equal to the Company's taxable income or loss for such Fiscal Year, determined in accordance with Code Section 703(a) (for this purpose, all items of income, gain, loss, deduction or credit required to be stated separately pursuant to Code Section 703(a)(1) shall be included in taxable income or loss), with the following adjustments (without duplication):

(a) Any income of the Company that is exempt from federal income tax and not otherwise taken into account in computing Profits or Losses pursuant to this definition of "Profits" and "Losses" shall be added to such taxable income or loss;

(b) Any expenditures of the Company described in Code Section 705(a)(2)(B) or treated as Code Section 705(a)(2)(B) expenditures pursuant to Regulations Section 1.704-1(b)(2)(iv)(i), and not otherwise taken into account in computing Profits or Losses pursuant to this definition of "Profits" and "Losses" shall be subtracted from such taxable income or loss;

(c) In the event the Gross Asset Value of any Company asset is adjusted pursuant to subparagraphs (b) or (c) of the definition of Gross Asset Value, the amount of such

REDACTED

adjustment shall be treated as an item of gain (if the adjustment increases the Gross Asset Value of the asset) or loss (if the adjustment decreases the Gross Asset Value of the asset) from the disposition of such asset and shall be taken into account for purposes of computing Profits or Losses;

(d) Gain or loss resulting from any disposition of Property with respect to which gain or loss is recognized for federal income tax purposes shall be computed by reference to the Gross Asset Value of the Property disposed of, notwithstanding that the adjusted tax basis of such Property differs from its Gross Asset Value;

(e) In lieu of the depreciation, amortization, and other cost recovery deductions taken into account in computing such taxable income or loss, there shall be taken into account Depreciation for such Fiscal Year, computed in accordance with the definition of Depreciation;

(f) To the extent an adjustment to the adjusted tax basis of any Company asset pursuant to Code Section 734(b) is required, pursuant to Regulations Section 1.704-(b)(2)(iv)(m)(4), to be taken into account in determining Capital Accounts as a result of a distribution other than in liquidation of a Member's interest in the Company, the amount of such adjustments shall be treated as an item of gain (if the adjustment increases the basis of the asset) or loss (if the adjustment decreases such basis) from the disposition of such asset and shall be taken into account for purposes of computing Profits and Losses; and

(g) Notwithstanding any other provision of this definition, any items which are specially allocated pursuant to Section 3.3 shall not be taken into account in computing Profits or Losses.

The amounts of the items of Company income, gain, loss, deduction or credit available to be specially allocated pursuant to Section 3.3 shall be determined by applying the rules analogous to those set forth in subparagraphs (a) through (g) above.

"Property" means all real and personal property acquired by the Company, including cash, and any improvements thereto, and shall include both tangible and intangible property.

"Proposed Capital Projects" means those capital expenditures anticipated to be constructed over the four (4) year period commencing on the date hereof, as identified more specifically in Exhibit B.

"Regulations" means the Treasury Regulations, including temporary and proposed Regulations, promulgated under the Code, as such regulations are amended from time to time.

"Review Information" shall have the meaning set forth in Section 7.2(c)(i).

"Review Period" shall have the meaning set forth in Section 7.2(c)(i).

"Rollover Budget" shall have the meaning set forth in Section 5.7(a).

REDACTED

"Rules" shall have the meaning set forth in Section 12.14.

"Securities Act" means the Securities Act of 1933.

"Sponsoring Member" shall have the meaning set forth in Section 5.12(a).

"Tax Matters Partner" shall have the meaning set forth in Section 7.3(d).

"Transaction Agreement" shall have the meaning set forth in the preamble.

"Transfer" means, as a noun, any voluntary or involuntary transfer, distribution, sale, pledge, assignment or hypothecation or other disposition and, as a verb, voluntarily or involuntarily to transfer, sell, pledge, assign or hypothecate or otherwise dispose of.

"Unified Assignment and Assumption Agreement" means the Assignment and Assumption Agreement, dated the date hereof, by and between KCS, KCSR and the Company.

"Unified Liability Agreement" means the Unified Liability Agreement, dated the date hereof, by and among NSR, KCSR and the Company.

"Vicksburg Assignment Agreement" means the Vicksburg Assignment Agreement, dated the date hereof, by and between KCSR and the Company.

"Voluntary Bankruptcy" means, with respect to any Person, any of the following:

(a) the inability of such Person generally to pay its debts as such debts become due, or an admission in writing by such Person of its inability to pay its debts generally or a general assignment by such Person for the benefit of creditors.

(b) the filing of any petition or answer by such Person seeking to adjudicate itself as bankruptcy or insolvent, or seeking for itself any liquidation, winding up, reorganization, arrangement, adjustment, protection, relief, or composition of such Person or its debts under any law relating to bankruptcy, insolvency or reorganization or relief of debtors, or seeking, consenting to, or acquiescing in the entry of an order for relief or the appointment of a receiver, trustee, custodian or other similar official for such Person or for any substantial part of its Property, or

(c) corporate action taken by such Person to authorize any of the actions set forth above.

"Voting Securities" shall mean any securities of any Person which vote generally in the election of directors.

"Western Haulage Agreement" means the Western Haulage Agreement, dated as of the date hereof, by and between NSR and KCSR.

"Wholly-Owned Affiliate" of any Person means an Affiliate of such Person:

REDACTED

(a) one hundred percent (100%) of the voting stock or beneficial ownership of which is owned by such Person, or by any Person who, directly or indirectly, owns one hundred percent (100%) of the voting stock or beneficial ownership of such Person,

(b) an Affiliate of such Person who, directly or indirectly, owns one hundred percent (100%) of the voting stock or beneficial ownership of such Person, and

(c) any Wholly-Owned Affiliate of any Affiliate described in clause (a) or clause (b).

SECTION 1
THE COMPANY

1.1 Formation and Continuation. The Members hereby agree to organize the Company as a limited liability company under and pursuant to the provisions of the Act and upon the terms and conditions set forth in this Agreement. The rights and liabilities of the Members shall be as provided under the Act, the Certificate of Formation and this Agreement.

1.2 Name. The name of the Company shall be Meridian Speedway, LLC and all business of the Company shall be conducted in such name or, in the discretion of the Management Committee, under any other name.

1.3 Purpose; Powers.

(a) Generally.

(i) The purpose of the Company is to engage in the Business and in any other lawful activity for which a limited liability company may be organized under the Act.

(ii) The Company has the power to do any and all acts necessary, appropriate, proper, advisable, incidental or convenient to or in furtherance of the purposes of the Company set forth in Section 1.3(a) and has, without limitation, any and all powers that may be exercised on behalf of the Company by the Management Committee pursuant to Section 5.

(b) Carrier Status.

(i) Notwithstanding the generality of Section 1.3(a), the Members intend that the Company shall be a rail carrier as that term is defined in 49 U.S.C. § 1010(5) that performs transportation services over the Line as agent for and for the account of a Freight Rail Common Carrier.

(ii) Any rail transportation services shall at all times remain in the waybill, car hire and revenue accounts of a Freight Rail Common Carrier.

(iii) The Company shall not participate or appear in any rates, routes or divisions relating to any freight traffic whatsoever to, from and over the Line,

REDACTED

and shall not be entitled to or responsible for any freight charges relating to such freight traffic. The Company shall not quote or establish any rate or service terms applicable to freight transportation services to, from or over the Line, enter into any transportation contracts with any persons, provide for freight transportation services to, from or over the Line, or undertake to perform any for-hire transportation services directly, in its own name or for its own account, for any person other than as provided for in the KCSR Joint Use Agreement and the NSR Joint Use Agreement.

1.4 Principal Place of Business, Chief Executive Office and Registered Office. The principal place of business and chief executive office of the Company shall be located at 427 West 12th Street, Kansas City, Missouri 64105 or in such other place as the Management Committee may determine from time to time. The registered office of the Company in the State of Delaware initially is located at c/o The Corporation Trust Company, 1209 Orange Street, Wilmington, New Castle County, Delaware 19801.

1.5 Term. The term of the Company commenced on the date the Certificate of Formation was filed in the office of the Secretary of State of the State of Delaware in accordance with the Act and shall continue until the winding up and liquidation of the Company and its business is completed following a Dissolution Event, as provided in Section 11.

1.6 Filings; Agent for Service of Process.

(a) The Members shall promptly after the execution of this Agreement cause the Certificate of Formation to be filed in the Office of the Secretary of State of the State of Delaware in accordance with the provisions of the Act. The Management Committee shall take, or cause to be taken, any and all actions reasonably necessary to perfect and maintain the status of the Company as a limited liability company under the laws of the State of Delaware, including the preparation and filing of such amendments to the Certificate of Formation and such other assumed name certificates, documents, instruments and publications as may be required by law, including, without limitation, action to reflect:

(i) A change in the Company name,

(ii) A correction of false or erroneous statements in the Certificate of Formation or the desire of the Members to make a change in any statement therein in order that it shall accurately represent the agreement among the Members, or

(iii) A change in the time for dissolution of the Company if approved by the Members as evidenced by an amendment to this Agreement (approved as provided herein).

(b) The Members and the Management Committee shall execute and cause to be filed original or amended certificates and shall take any and all other actions as may be reasonably necessary to perfect and maintain the status of the Company as a limited liability company or similar type of entity under the laws of any other jurisdictions in which the Company engages in business.

REDACTED

(c) The registered agent for service of process on the Company in the State of Delaware shall be The Corporation Trust Company or any successor as appointed by the Members in accordance with the Act.

(d) Upon the dissolution and completion of the winding up and liquidation of the Company in accordance with Section 11, the Management Committee (and, if necessary and requested by the Management Committee, the Members) shall promptly execute and cause to be filed certificates of cancellation, statements of intent to dissolve and articles of dissolution in accordance with the Act and the laws of any other jurisdictions in which the Management Committee deems such filing necessary or advisable.

1.7 Title to Property. All Property owned by the Company shall be owned by the Company as an entity and no Member shall have any ownership interest in such Property in its individual name, and each Member's Membership Interests in the Company shall be personal property for all purposes. At all times after the date hereof, the Company shall hold title to all of its Property in the name of the Company and not in the name of any Member.

1.8 Payments of Individual Obligations. The Company's credit and assets shall be used solely for the benefit of the Company and no asset of the Company shall be Transferred or encumbered for, or in payment of, any individual obligation of any Member.

SECTION 2
MEMBERS' CAPITAL CONTRIBUTIONS

2.1 Initial Capital Contributions.

(a) Pursuant to the Transaction Agreement and simultaneously with the execution of this Agreement, (a) the NS Member has made the initial Capital Contribution described in Section 2.1(a) of the Transaction Agreement and (b) the KCS Member has made an initial Capital Contribution of the Assets as described in Section 3.1(a) of the Transaction Agreement.

(b) Pursuant to the Transaction Agreement and simultaneously with the execution of this Agreement, the KCS Member has also contributed or caused to be contributed to the Company, and the Company has assumed, the Assumed Liabilities (as such term is defined in the Transaction Agreement).

2.2 Initial Capital Accounts. The Company shall establish an individual Capital Account for each Member. The Company shall determine and maintain each Capital Account in accordance with Regulations Section 1.704-1(b)(2)(iv). The Capital Accounts of the Members as of the date hereof are as reflected in Exhibit 2.2.

2.3 Additional NS Member Contributions. The NS Member shall make the additional capital contributions to the Company described in Section 2.1 of the Transaction Agreement.

REDACTED

2.4 Withdrawal and Return of Capital. (a) Except as otherwise provided in this Section 2.4, Section 4 or Section 11, no Member shall withdraw any of its capital without the consent of the other Members, except upon the dissolution or liquidation of the Company to the extent provided in this Agreement. Under circumstances requiring or permitting a return of any Capital Contribution, no Member shall have the right to receive property other than cash except as may be specifically provided herein.

(b) On the Closing Date, the Company shall reimburse the KCS Member for (i) capital expenditures other than Pre-Closing Capital Expenditures, in an amount up to $40,000,000 in the aggregate, that the KCS Member made to the Assets within the two-year period ending on the Closing Date in accordance with Section 2.2 of the Transaction Agreement and (ii) Pre-Closing Capital Expenditures in respect of Proposed Capital Projects listed in Exhibit D hereto in an amount up to $20,000,000 in the aggregate made by the KCS Member prior to the Closing Date as set forth in this Agreement, the Budget for the first Fiscal Year, the Business Plan for the first Fiscal Year, and Section 2.2 of the Transaction Agreement.

(c) Within 30 days of the receipt of a written notice from a Member holding a Preferred Return that has been outstanding for at least 84 months but not more than 96 months (as of the date of such distribution), which notice expressly invokes the Member's option pursuant to this Section 2.4(c), the Company shall make a distribution to such Member in an amount equal to (i) such Member's Preferred Return Amount as of the date of the distribution; plus (ii) the amount by which such Member's Accumulated Preference as of the date of the distribution exceeds any amount distributed to such Member pursuant to Section 4.2(a) of this Agreement prior to the date of the distribution. At the Company's discretion, such distribution may be in cash or property in kind. If made, such distribution shall be treated as a preferred return pursuant to Section 1.707-4 of the Regulations. Upon receipt of the full amount of the distribution under this Section 2.4(c), the Member shall have no further rights to receive any distribution under Section 4.2(a).

SECTION 3
ALLOCATIONS

3.1 Profits. After giving effect to the special allocations set forth in Section 3.3, Profits for any Fiscal Year shall be allocated to the Members as follows:

(a) First, Profits shall be allocated to each Member in an amount necessary to offset any previous allocations of Loss to such Member pursuant to Section 3.4.

(b) Second, Profits less any amounts allocated under Section 3.1(a) shall be allocated to the Members in proportion to their respective Percentage Interests.

3.2 Losses. After giving effect to the special allocations set forth in Section 3.3 and subject to Section 3.4, Losses for any Fiscal Year shall be allocated to the Members in proportion to their Percentage Interests.

3.3 Special Allocations. The following special allocations shall be made in the following order:

REDACTED

(a) Minimum Gain Chargeback. Except as otherwise provided in Regulations Section 1.704-2(f), notwithstanding any other provision of this Section 3, if there is a net decrease in Company Minimum Gain during any Fiscal Year, each Member shall be specially allocated items of Company income and gain for such Fiscal Year (and, if necessary, subsequent Fiscal Years) in an amount equal to such Members share of the net decrease in Company Minimum Gain, determined in accordance with Regulations Section 1.704-2(g). Allocations pursuant to the previous sentence shall be made in proportion to the respective amounts required to be allocated to each Member pursuant thereto. The items to be so allocated shall be determined in accordance with Regulations Sections 1.704-2(f)(6) and 1.704-2(j)(2). This Section 3.3(a) is intended to comply with the minimum gain chargeback requirement in Regulations Section 1.704-2(f) and shall be interpreted consistently therewith.

(b) Member Minimum Gain Chargeback. Except as otherwise provided in Regulations Section 1.704-2(i)(4), notwithstanding any other provision of this Section 3, if there is a net decrease in Member Nonrecourse Debt Minimum Gain attributable to a Member Nonrecourse Debt during any Fiscal Year, each Member who has a share of the Member Nonrecourse Debt Minimum Gain attributable to such Member Nonrecourse Debt, determined in accordance with Section 1.704-2(i)(5) of the Regulations, shall be specially allocated items of Company income and gain for such Fiscal Year (and, if necessary, subsequent Fiscal Years) in an amount equal to such Member's share of the net decrease in Member Nonrecourse Debt, determined in accordance with Regulations Section 1.704-2(i)(4). Allocations pursuant to the previous sentence shall be made in proportion to the respective amounts required to be allocated to each Member pursuant thereto. The items to be so allocated shall be determined in accordance with Regulations Sections 1.704-2(i)(4) and 1.704-2(j)(2). This Section 3.3(b) is intended to comply with the minimum gain chargeback requirement in Regulations Section 1.704-2(i)(4) and shall be interpreted consistently therewith.

(c) Qualified Income Offset. In the event any Member unexpectedly receives any adjustments, allocations, or distributions described in Regulations Sections 1.704-1(b)(2)(ii)*(d)(4)*, 1.704-1(b)(2)(ii)*(d)(5)*, or 1.704-1(b)(2)(ii)*(d)(6)*, items of Company income and gain shall be specially allocated to such Member in an amount and manner sufficient to eliminate, to the extent required by the Regulations, the Adjusted Capital Account Deficit of the Member as quickly as possible, provided that an allocation pursuant to this Section 3.3(c) shall be made only if and to the extent that the Member would have an Adjusted Capital Account Deficit after all other allocations provided for in this Section 3 have been tentatively made as if this Section 3.3(c) were not in the Agreement.

(d) Gross Income Allocation. In the event any Member has a deficit Capital Account at the end of any Fiscal Year which is in excess of the sum of the amount such Member is deemed obligated to restore pursuant to the penultimate sentences of Regulations Sections 1.704-2(g)(1) and 1.704-2(i)(5), each such Member shall be specially allocated items of Company income and gain in the amount of such excess as quickly as possible, provided that an allocation pursuant to this Section 3.3(d) shall be made only if and to the extent that such Member would have a deficit Capital Account in excess of such sum after all other allocations provided for in this Section 3 have been made as if Section 3.3(c) and this Section 3.3(d) were not in the Agreement.

REDACTED

(e) Nonrecourse Deductions. Nonrecourse Deductions for any Fiscal Year shall be specially allocated to the Members in proportion to their respective Percentage Interests.

(f) Member Nonrecourse Deductions. Any Member Nonrecourse Deductions for any Fiscal Year shall be specially allocated to the Member who bears the economic risk of loss with respect to the Member Nonrecourse Debt to which such Member Nonrecourse Deductions are attributable in accordance with Regulations Section 1.704-2(i)(1).

(g) Preferred Return Allocation. Gross income shall be allocated to any Member with a Preferred Return in an amount equal to (i) the cumulative amount of Net Cash Flow distributed to such Member under Section 4.2(a); plus (ii) any amounts distributed to such Member under Section 2.4(c) that are attributable to the amount by which such Member's Accumulated Preference exceeded the amounts distributed under Section 4.2(a); minus (iii) the cumulative amount of gross income previously allocated to such Member under this Section 3.3(g).

(h) Net Cash Flow Allocation. Gross income shall be allocated to each Member in an amount equal to (i) the cumulative amount of Net Cash Flow distributed to such Member under Section 4.2(b); minus (ii) the cumulative amount of gross income previously allocated to such Member under this Section 3.3(h).

(i) Section 754 Adjustments. To the extent an adjustment to the adjusted tax basis of any Company asset, pursuant to Code Section 734(b) or Code Section 743(b) is required, pursuant to Regulations Sections 1.704-1(b)(2)(iv)(*m*)(2) or 1.704-1(b)(2)(iv)(*m*)(4), to be taken into account in determining Capital Accounts as the result of a distribution to a Member in complete liquidation of such Member's interest in the Company, the amount of such adjustment to Capital Accounts shall be treated as an item of gain (if the adjustment increases the basis of the asset) or loss (if the adjustment decreases such basis) and such gain or loss shall be specially allocated to the Members in accordance with their Percentage Interests in the event Regulations Section 1.704-1(b)(2)(iv)(*m*)(2) applies, or to the Member to whom such distribution was made in the event Regulations Section 1.704-1(b)(2)(iv)(*m*)(4) applies.

(j) Allocations Relating to Taxable Issuance of a Membership Interest. Any income, gain, loss or deduction realized as a direct or indirect result of the issuance of a Membership Interest by the Company to a Member (the "Issuance Items") shall be allocated among the Members so that, to the extent possible, the net amount of such Issuance Items, together with all other allocations under this Agreement to each Member shall be equal to the net amount that would have been allocated to each such Member if the Issuance Items had not been realized.

(k) Guaranteed Payments. To the extent any compensation paid to any Member by the Company, including any fees payable by the Company to any Member, is determined by the Internal Revenue Service not to be a guaranteed payment under Code Section 707(c) or is not paid to the Member other than in its capacity as a partner (Member) within the meaning of Code Section 707(a), the Member shall be specially allocated gross income of the Company in an amount equal to the amount of that compensation.

REDACTED

(c) Solely for purposes of determining a Member's proportionate share of the "excess nonrecourse liabilities" of the Company within the meaning of Regulations Section 1.752-3(a)(3), the Members' interests in Company Profits are in proportion to their Percentage Interests.

(d) To the extent permitted by Regulations Section 1.704-2(h)(3), the Management Committee shall endeavor to treat distributions of Net Cash Flow as having been made from the proceeds of a Nonrecourse Liability or a Member Nonrecourse Debt only to the extent that such distributions would cause or increase an Adjusted Capital Account Deficit for any Member.

3.6 Tax Allocations; Code Section 704(c).

In accordance with Code Section 704(c) and the Regulations thereunder, income, gain, loss, deduction and credit with respect to any Property contributed to the capital of the Company shall, solely for tax purposes, be allocated among the Members so as to take account of any variation between the adjusted basis of such Property to the Company for federal income tax purposes and its initial Gross Asset Value (computed in accordance with the definition of Gross Asset Value) using the traditional method set forth in Regulations Section 1.704-3(b).

In the event the Gross Asset Value of any Company asset is adjusted pursuant to subparagraph (b) of the definition of Gross Asset Value, subsequent allocations of income, gain, loss, deduction and credit with respect to such asset shall take account of any variation between the adjusted basis of such asset for federal income tax purposes and its Gross Asset Value in the same manner as under Code Section 704(c) and the Regulations thereunder.

Any elections or other decisions relating to such allocations shall be made by the Management Committee in any manner that reasonably reflects the purpose and intention of this Agreement. Allocations pursuant to this Section 3.6 are solely for purposes of federal, state, and local taxes and shall not affect, or in any way be taken into account in computing, any Member's Capital Account or share of Profits, Losses, other items, or distributions pursuant to any provisions of this Agreement.

3.7 Revaluation of Capital Accounts. Capital Accounts shall not be revalued in connection with the Capital Contributions described in Section 2.3.

SECTION 4
DISTRIBUTIONS

4.1 Distributions. Except as otherwise provided in this Section 4 or Section 11, and after distribution of the cumulative amounts contemplated by Section 4.2 of this Agreement, remaining Net Cash Flow, if any, shall be distributed upon the approval of the Management Committee. Any distribution of Net Cash Flow (or otherwise) by the Company not otherwise governed by Section 4.2, Section 4.5, Section 4.6, Section 4.7 or Section 11.2(c) shall be distributed pro rata to the Members in accordance with each Member's Percentage Interest.

REDACTED

4.2 Priority Distributions. Notwithstanding anything to the contrary in Section 4.1, for each Fiscal Year of the Company, Net Cash Flow shall be distributed on at least an annual basis as follows:

(a) First, to any Member holding a Preferred Return in an amount equal to the Member's Accumulated Preference, less any amount previously distributed to such Member pursuant to this Section 4.2(a). Such distribution shall be treated as a preferred return pursuant to Section 1.707-4 of the Regulations.

(b) Second, any remaining Net Cash Flow shall be distributed pro rata to the Members in accordance with each Member's Percentage Interest.

4.3 Amounts Withheld. All amounts withheld pursuant to the Code or any provision of any state, local or foreign tax law with respect to any payment, distribution or allocation to the Company or the Members shall be treated as amounts paid or distributed, as the case may be, to the Members with respect to which such amount was withheld pursuant to this Section 4.3 for all purposes under this Agreement. The Company is authorized to withhold from payments and distributions, or with respect to allocations to the Members, and to pay over to any federal, state and local government or any foreign government, any amounts required to be so withheld pursuant to the Code or any provisions of any other federal, state or local law or any foreign law, and shall allocate any such amounts to the Members with respect to which such amount was withheld. The withholdings by the Company referred to in this Section 4.3 shall be made at the appropriate applicable statutory rate under the applicable tax as determined by the Management Committee.

4.4 Limitations on Distributions. The Company shall make no distributions to the Members except (i) as provided by and in accordance with this Section 4 and Section 11 or as agreed to by all of the Members and (ii) in conformance with the Act.

4.5 Distributions and Allocations in Respect of a Transferred Membership Interest. If any Membership Interest is Transferred during any Fiscal Year in compliance with the provisions of Section 9 or Section 10 or additional Members are admitted to the Company after the date hereof on different dates during any Fiscal Year, Profits, Losses, each item thereof, and all other items attributable to the Transferred Membership Interest or the newly issued Membership Interest, as the case may be, for such Fiscal Year shall be divided and allocated among the Members by taking into account their varying Percentage Interests during the Fiscal Year in accordance with Code Section 706(d), using the interim-closing-of-the-books method unless the Members agree otherwise in writing. In the case of a Transferred Interest, all distributions on or before the date of such Transfer shall be made to the transferor, and all distributions thereafter shall be made to the transferee. Solely for purposes of making such allocations and distributions, the Company shall recognize such Transfer not later than the end of the calendar month during which it is given notice of such Transfer, provided that, if the Company is given notice of a Transfer at least ten (10) Business Days prior to the Transfer, the Company shall recognize such Transfer as of the date of such Transfer, and provided further that if the Company does not receive a notice stating the date such Membership Interest (or portion thereof) was Transferred and such other information as the Management Committee may reasonably require within thirty (30) days after the end of the Fiscal Year during which the

REDACTED

Transfer occurs, then all such items shall be allocated, and all distributions shall be made, to the Person who, according to the books and records of the Company, was the owner of the Membership Interest on the last day of such Fiscal Year.

4.6 Special Distributions.

(a) Notwithstanding anything to the contrary in this Agreement, the Company may make the payments to the KCS Member specified in Section 4(e)(ii) of the Operating Agreement.

(b) Immediately prior to the consummation of any transaction which results in the NS Member owning all of the Membership Interests in the Company, the Company will make a distribution to the KCS Member or its Permitted Transferees of all previously undistributed Net Cash Flow due to the KCS Member and such Permitted Transferees (based upon their respective Percentage Interests). Immediately prior to the consummation of any transaction which results in the KCS Member or its Permitted Transferees owning all of the Membership Interests in the Company, the Company will make a distribution to the NS Member or its Permitted Transferees of all previously undistributed Net Cash Flow due to the NS Member and such Permitted Transferees (based upon their respective Percentage Interests).

4.7 Deemed Distributions. In the event of a Permitted Asset Transfer in which the Company receives consideration with a value less than the Fair Value of the asset(s) subject to such Permitted Asset Transfer, the excess of the Fair Value of such asset(s) over the consideration received therefor (such excess, the "Deemed Distribution Amount") shall be deemed to be a distribution to the KCS Member, and the NS Member shall be entitled to, in its sole discretion: (a) an immediate cash payment from the KCS Member equal to the NS Member's pro rata share of the Deemed Distribution Amount based on its Percentage Interest or (b) an immediate cash payment from the Company equal to the product of (i) such Deemed Distribution Amount and (ii) a fraction, the numerator of which is the NS Member's Percentage Interest and the denominator of which is the KCS Member's Percentage Interest.

SECTION 5
MANAGEMENT

5.1 Manner of Operations. The Members each agree to act in good faith to operate the Company in a manner reasonably designed to maximize the long-term value of the Company as a whole.

5.2 Management Committee.

(a) Management by the Management Committee. Subject to the provisions of this Agreement, the business, property and affairs of the Company shall be managed, and all powers of the Company shall be exercised, by or under the direction of a management committee (the "Management Committee"). Without limiting the generality of the foregoing, but subject to the express limitations set forth elsewhere in this Agreement, the Management Committee shall have all necessary powers to manage and carry out the purpose, business, property and affairs of the Company.

REDACTED

(b) Composition of Management Committee. The Management Committee shall consist of six committee representatives, four of whom shall be designated by the KCS Member and two of whom shall be designated by the NS Member, and any alternate selected by a Member, to serve in the absence or unavailability of one or more committee representatives (each, including alternates, a "Committee Representative"). Each Committee Representative shall serve at the pleasure of the Member or Members who designated such Committee Representative. The initial Committee Representatives are identified in Exhibit 5.2(b) attached hereto. Any Committee Representative may resign upon written notice to the Member who designated such Committee Representative and to the Company. The resignation of any such Committee Representative shall take effect upon receipt of such notice, or at such later time as shall be specified in such notice. A Committee Representative may be removed at any time with or without cause by the Member who originally designated such Committee Representative. Except as governed by Article 10 for an Event of Default by a Member, any vacancy occurring for any reason in the number of Committee Representatives shall be filled by the Member who originally designated the Committee Representative whose position has become vacant. The Chairman of the Management Committee shall be appointed by the KCS Member.

(c) Independent Activities. Except as otherwise restricted by the provisions of this Agreement or any other agreement between the Company and the Person acting as Committee Representative, each Committee Representative in his capacity as a Committee Representative shall be required to devote such time to the affairs of the Company as may be necessary to serve the Company in such capacity and shall be free to serve any other Person or enterprise in any capacity that such Committee Representative may deem appropriate in his discretion.

5.3 Committees of the Management Committee.

(a) Creation of Committees. Subject to Section 5.6, the Management Committee shall have the power and right (but not the obligation) to create and disband committees and to determine the duties, responsibilities, activities and composition thereof. Except as otherwise provided herein, the KCS Member and the NS Member shall each be entitled to representation on any such committee, such representation to be proportionate to their respective Percentage Interests in the Company.

(b) Capital Project Committee. The Members hereby agree that there shall be created a Capital Project Committee consisting of three Committee Representatives, two of whom shall be designated by the KCS Member and one of whom shall be designated by the NS Member. The Capital Project Committee shall establish a process (the "Capital Project Process") utilizing capacity modeling and field input to determine capacity needs and capital expenditures with respect to Capital Projects. The Capital Project Committee shall be responsible for (i) determining the optimum use of capital expenditures provided for in the Company's Budget (including any Rollover Budget) or Business Plan in accordance with the Capital Project Process and (ii) negotiating and entering into any Capital Improvement Agreements and overseeing the performance of the KCS Member thereunder, provided, however, that such Capital Improvement Agreements shall provide for construction of such Capital Projects at cost. The initial designees to the Capital Project Committee shall be those persons identified in Exhibit 5.3(b)(i) hereto. Except as provided in Section 5.12, the Capital Project

REDACTED

Committee shall follow any protocols approved by the Management Committee in accordance with Section 5.6 to guide capital expenditures decisions. The initial capital expenditure protocols for capital expenditures other than the Proposed Capital Projects are attached hereto as Exhibit 5.3(b)(ii).

(c) Joint Operating Committee. The Members hereby agree that there shall be created a Joint Operating Committee (the "Joint Operating Committee") consisting of the Chief Operations Officer, Chief Marketing Officer and Chief Engineering Officer, or their respective designees, of KCS and NS. The Joint Operating Committee shall make decisions by the unanimous vote of its members. The Joint Operating Committee shall have responsibility for (i) monitoring such matters as operations, performance and scheduling, (ii) managing maintenance and other operating matters arising upon the carrying out of the Operating Agreement and the KCSR Joint Use Agreement and the NSR Joint Use Agreement and (iii) seeking the resolution of disputes with respect to such matters. Meetings of the Joint Operating Committee may be convened by any member thereof. The Joint Operating Committee may meet by telephone or in any manner or place as shall be agreeable to its members. If the Joint Operating Committee is unable to reach a unanimous vote on any matter, it shall refer that matter to the Management Committee, provided, however, that any Member may require such matter to be referred to arbitration in accordance with Section 12.14, if such matter involves a breach or an alleged breach of this Agreement or of any of the JV Transaction Agreements.

5.4. Meetings of Management Committee.

(a) Notices. Meetings of the Management Committee shall be held at least once each calendar quarter and may be called by any Committee Representative. All meetings shall be held upon fifteen (15) Business Days' notice by mail or four (4) Business Days' notice delivered personally or by telephone, e-mail or facsimile stating the business to be transacted at such meeting; provided, that at least thirty (30) Business Days' notice shall be provided for any meeting in which approval of any action of the type set forth in clauses (xxi), (xxii) and/or (xxiii) of the definition of Major Decision is sought. Notice of a meeting need not be given to any Committee Representative who signs a waiver of notice or a consent to holding the meeting (which waiver or consent need not specify the purpose of the meeting) or an approval of the minutes thereof, whether before or after the meeting, or who attends the meeting without protesting, prior to its commencement, the lack of notice to such Committee Representative. All such waivers, consents and approvals shall be filed with the Company records or made a part of the minutes of the meeting. The Committee Representatives present may adjourn any meeting to another time and place. If any meeting of the Management Committee is adjourned, no less than four (4) Business Days' notice (delivered personally or by telephone, e-mail or facsimile) shall be given to each Committee Representative who is not present at the time of such adjournment prior to such meeting being reconvened. Meetings of the Management Committee shall be held at the offices of the Company unless another location shall have been designated in the notice of the meeting or at such place as may be approved by the Management Committee. Members of the Management Committee may participate in a meeting through use of conference telephone or similar communications equipment, so long as all Committee Representatives participating in such meeting can hear one another. Participation in a meeting in such manner constitutes presence in person at such meeting. No business other than that stated in the notice shall be transacted at any meeting without the unanimous consent of all

REDACTED

of the Committee Representatives. Any Committee Representative may authorize in writing any Person to act for it by proxy on all matters on which a Committee Representative is entitled to act, including waiving notice of, or voting or participating at, any meeting.

(b) Quorum. The presence in person of a majority of the Committee Representatives (at least one of whom shall be a Committee Representative appointed by the NS Member if a Major Decision is to be made) shall constitute a quorum for the transaction of business at a meeting of the Management Committee duly called in accordance with Section 5.4(a).

(c) Vote. Each Committee Representative shall have one vote to cast in person or by proxy.

(d) Action of the Committee. Except to the extent that this Agreement expressly requires otherwise (including as provided in Section 5.6), every action or resolution done or made by the majority approval of the Management Committee at a duly noticed meeting at which a quorum is present is the action of the Management Committee.

5.5 Action by Unanimous Written Consent. Any action required or permitted to be taken by the Management Committee other than approval of any action of the type set forth in clause (xx) of the definition of Major Decision may be taken by the Committee Representatives without a meeting without prior notice and without a vote, but only if a consent or consents in writing shall be signed by all of the Committee Representatives.

5.6 Major Decisions. Notwithstanding anything to the contrary contained in this Agreement, until such time as the NS Member no longer owns any Membership Interests, neither the Management Committee nor any committee thereof shall authorize or effect any action that constitutes a Major Decision unless such action has received the approval of at least one of the Committee Representatives appointed by NS.

5.7 Budget and Business Plan; Investment Policies.

(a) Attached as Exhibit 5.7(a) to this Agreement is the budget for the first Fiscal Year (the "Budget") and the business plan for the first Fiscal Year (the "Business Plan"). On or prior to the date which is sixty days before the end of each Fiscal Year, commencing with the Fiscal Year ending December 31, 2006, the Management Committee shall prepare a Budget and Business Plan for the following Fiscal Year. The Budget and Business Plan for the next succeeding Fiscal Year shall upon approval of the Management Committee in accordance with Section 5.6 become the Budget and Business Plan for such Fiscal Year. If the Management Committee does not approve a Budget or Business Plan for any Fiscal Year prior to the commencement of such year, then the Budget or Business Plan for that Fiscal Year shall be the Budget or Business Plan from the prior Fiscal Year (excluding the prior Fiscal Year's extraordinary and nonrecurring items, but including any contractually obligated or legally required commitments or expenditures for the current year), as the case may be, adjusted, in the case of the Budget based on the "AAR Railroad Cost Indexes – Table A – Annual indexes of charge-out prices and wage rates (1977 = 100) – East – Materials prices, wage rates and supplements combined (excluding fuel)," together with any adjustment of contractual

REDACTED

commitments in accordance with their terms (a "Rollover Budget"). Notwithstanding anything to the contrary set forth herein, the Budget (including any Rollover Budget) and Business Plan for any Fiscal Year shall take into account the capital expenditures for such Fiscal Year set forth in Schedule 2.2 to the Transaction Agreement.

(b) Attached as Exhibit 5.7(b) to this Agreement are the investment policies (the "Investment Policies") pursuant to which the initial Capital Contribution of the NS Member described in Section 2.1(a) and any additional cash Capital Contributions to the Company shall be invested by the Company.

5.8 Officers. Subject to Section 5.6, the Management Committee shall have the authority to appoint and terminate Officers of the Company and retain and terminate employees, agents and consultants of the Company and to delegate such duties to any such Officers, employees, agents and consultants as the Management Committee deems appropriate, including the power, acting individually or jointly, to represent and bind the Company in all matters, in accordance with the scope of their respective duties. The setting and modifications of compensation levels (including bonuses and benefits, if any) for any such Officers, employees, agents or consultants shall be set by the approval of the Management Committee in accordance with Section 5.6.

5.9 Exculpation and Indemnification.

(a) Indemnified Persons. The Committee Representatives, the Officers (if any) and each Member and its Affiliates, and the partners, members, shareholders, officers, directors, advisory directors, managers, employees and control persons (as such term is defined in the Securities Act) of each Member and its Affiliates (collectively, the "Indemnified Persons") shall not be liable, directly or indirectly, to the Company, any other Member or any other Person who has an interest in the Company for any act or omission (in relation to the Company or this Agreement) taken or omitted by such Indemnified Person in good faith in their capacity as such, provided that such act or omission did not constitute gross negligence, fraud or willful violation of the law, this Agreement or the fiduciary duties set forth in Section 5.10(a). To the fullest extent permitted by applicable law, the Company shall indemnify and hold harmless each Indemnified Person and may indemnify any other Person subject to approval and designation of such person for such indemnification by approval of the Management Committee against all claims, damages, losses, liabilities and expenses of whatever nature (including reasonable attorneys' fees and disbursements) ("Claims") relating to activities undertaken in connection with the Company in their capacity as such, including, but not limited to, amounts paid in satisfaction of judgments, in compromise or as fines and penalties, and counsel fees and expenses reasonably incurred in connection with the investigation, defense or disposition of any action, suit or other proceeding, whether civil or criminal, before any court or administrative body in which such Indemnified Person may be or may have been involved as a party or otherwise, or with which such Indemnified Person may be or may have been threatened, while acting as such Indemnified Person; provided that no indemnity shall be payable hereunder against any liability incurred by such Indemnified Person by reason of gross negligence, fraud, a willful violation of the law or a breach of this Agreement or the fiduciary duties set forth in Section 5.10(a). No Indemnified Person shall settle or compromise any Claim without the

REDACTED

written consent, which consent shall not be unreasonably withheld, of the Management Committee, subject to Section 5.6.

(b) Advance of Expenses. Expenses incurred by an Indemnified Person in defense or settlement of any Claim that may be subject to a right of indemnification hereunder may be advanced (and must be advanced to Members, the Committee Representatives and Officers, if any, of the Company) by the Company prior to the final disposition thereof upon receipt of an undertaking by or on behalf of the Indemnified Person to repay such amount if it shall ultimately be determined that the Indemnified Person is not entitled to be indemnified by the Company.

(c) Non-Exclusivity. The right of any Indemnified Person to the indemnification provided herein shall be cumulative of and in addition to any and all rights to which such Indemnified Person may otherwise be entitled by contract or as a matter of law or equity and shall extend to such Indemnified Person's successors, assigns and legal representatives.

(d) Satisfaction from Company Assets. All judgments against the Company or an Indemnified Person, in respect of which such Indemnified Person is entitled to indemnification, shall only be satisfied from Company assets and no other Person shall have any liability with respect thereto.

(e) Expenses. The Company is authorized to pay expenses, fees, withholding taxes and other costs reasonably incurred by the Company, including, without limitation, expenses incurred in connection with acquisitions or investments and expenses incurred under this Section 5.9.

5.10 Fiduciary Duty; Exculpation.

(a) Notwithstanding any other provisions of this Agreement, whether express or implied, or applicable law, the Members agree that, to the fullest extent permitted by Section 18-1101(c) of the Act, no Member shall owe any duties at law or in equity (including fiduciary duties) to the Company or any other Member; provided, that an Indemnified Person who is a Committee Representative and who shall also be an employee of a Member shall have a fiduciary duty to such Member and not to the Company; provided further, however, that, with respect to the approval of any Permitted Asset Transfer or any Permitted Indebtedness, each Committee Representative shall owe the same duties to the Company and the Members as a director of a Delaware corporation would owe to such corporation and its shareholders with respect to such matters. Notwithstanding the foregoing, nothing in this Section 5.10 shall eliminate any implied covenant of good faith and fair dealing between any Member and the Company or the other Members.

(b) The provisions of this Agreement, to the extent that they restrict the duties and liabilities of an Indemnified Person otherwise existing at law or in equity, are agreed by the Members hereunder to replace such other duties and liabilities of such Indemnified Person.

REDACTED

5.11 Interparty Matters. Notwithstanding anything to the contrary contained in this Agreement, in the event of any disagreement, dispute or controversy between any Member or any of its Affiliates (other than the Company), on the one hand, and the Company, on the other hand, arising out of or relating to this Agreement or any of the JV Transaction Agreements to which the Company is a party or is subject or the breach, termination or validity thereof, the Company Representatives designated by the other Member shall control (on behalf of the Company) the conduct or settlement of any such disagreement, dispute or controversy or any proceedings relating thereto.

5.12 Capacity Improvement Projects.

(a) Notwithstanding anything to the contrary herein, each Member (the "Sponsoring Member") may require the Company to perform all acts necessary in order to effectuate the construction of a Capacity Improvement Project. In order to initiate such construction, the Sponsoring Member may require the Company to perform a capacity model to determine the expected addition to capacity that would result from the construction of the specified Capacity Improvement Project, such capacity to be measured in the number of potential additional new overhead train movements permitted by such specified Capacity Improvement Project ("New Overhead Train Starts") and/or additional local train movements ("Local Train Starts").

(b) If the Capacity Improvement Project will result in only additional capacity through Local Train Starts, only the KCS Member may cause the Company to construct such Capacity Improvement Project, and such Capacity Improvement Project shall be constructed solely through a capital contribution of the KCS Member.

(c) If the Capacity Improvement Project will result in additional capacity through New Overhead Train Starts, then the Member that is not the Sponsoring Member ("Non-Sponsoring Member") shall have the right to require the Company to allocate to such Non-Sponsoring Member up to its share of the New Overhead Train Starts (up to two-thirds to KCSR through the KCSR Joint Use Agreement, if KCSR is the Non-Sponsoring Member or up to one-third to NSR through the NSR Joint Use Agreement, if NSR is the Non-Sponsoring Member),provided, however, that the Sponsoring Member shall always be entitled to at least one New Overhead Train Start. If the Non-Sponsoring Member elects to receive an allocation of New Overhead Train Starts as provided herein, the Capacity Improvement Project shall be constructed through a capital contribution of both Members in proportion to the number of New Overhead Train Starts allocated to each Member. Otherwise, the Capacity Improvement Project shall be constructed solely through a capital contribution of the Sponsoring Member. If either Member declines all or part of its allocation from one or more Capacity Improvement Projects, it may make up the resulting deficit in New Overhead Train Starts in any subsequent Capacity Improvement Project or Projects.

5.13 Construction of the Jackson Flyover

(a) Notwithstanding anything (except Section 5.13(b)) to the contrary, either Member may require the Company to perform all acts necessary (including requiring Capital Contributions in cash from each Member in proportion to its Percentage Interest) in order

to effectuate the construction of the Jackson Flyover. The Company shall thereafter progress the engineering, permitting (to the extent required) and construction of the Jackson Flyover with all deliberate speed.

(b) Section 5.13(a) shall be disregarded if, within thirty (30) days of the formation of the Company, the Company receives assignment of the CN Jackson Trackage Rights.

SECTION 6
ROLE OF MEMBERS

6.1 Rights or Powers. The Members in their capacity as Members shall not have any right or power to take part in the management or control of the Company or its business and affairs or to act for or bind the Company in any way. Notwithstanding the foregoing, the Members have all the rights and powers specifically set forth in this Agreement and, to the extent not inconsistent with this Agreement, in the Act. A Member shall cease to be a Member at the time such Member ceases to own any Membership Interests.

6.2 Voting Rights. No Member has any voting right except with respect to those matters specifically reserved for a Member vote which are set forth in this Agreement and as required in the Act.

6.3 Meetings of the Members.

(a) Meetings of the Members may be called upon the written request of any Member. The call shall state the location of the meeting and the nature of the business to be transacted. Notice of any such meeting, including any meeting that has been adjourned, shall be given to each Member not less than fifteen (15) Business Days (or four (4) Business Days if delivered personally or by telephone, email or facsimile) nor more than forty-five (45) days prior to the date of such meeting. Members may vote in person, by proxy or by telephone at such meeting and may waive advance notice of such meeting. Whenever the vote or consent of Members is permitted or required under the Agreement, such vote or consent may be given at a meeting of the Members or may be given in accordance with the procedure prescribed in Section 6.3(f). No business other than that stated in the notice shall be transacted at any meeting without the unanimous consent of all of the Members entitled to vote thereat.

(b) For the purpose of determining the Members entitled to vote on, or to vote at, any meeting of the Members or any adjournment thereof, the Management Committee or the Member requesting such meeting may fix, in advance, a date as the record date for any such determination. Such date shall not be more than thirty (30) days nor less than ten (10) days before any such meeting.

(c) Each Member may authorize any Person or Persons to act for it by proxy on all matters in which a Member is entitled to participate, including waiving notice of any meeting, or voting or participating at a meeting. Every proxy must be signed by the Member or its attorney-in-fact. No proxy shall be valid after the expiration of eleven (11) months from the

date thereof unless otherwise provided in the proxy. Every proxy shall be revocable at the pleasure of the Member executing it.

(d) Each meeting of Members shall be conducted by an individual Person selected by the Members holding a majority Percentage Interest. Except as otherwise required by law, the presence in person or by proxy of Members holding percentage interests of more than seventy-five percent (75%) shall constitute a quorum for the transaction of business at a meeting of the Members duly called in accordance with Section 6.3(a). In case a quorum shall not be present at any meeting, Members holding a majority of the Membership Interests held by Members represented thereat, in person or by proxy, shall have the power to adjourn the meeting from time to time until the requisite number of Members shall be present; provided, that, if any meeting of the Members is adjourned, no less than four (4) Business Days' notice (delivered personally or by telephone, e-mail or facsimile) shall be given to each Member who is not present at the time of such adjournment prior to such meeting being reconvened After two adjournments for lack of quorum, if notice has been given to each Member in accordance with the preceding sentence, then the quorum requirement set forth in this Section 6.3(d) for any such adjourned meeting at which no Major Decision (or any other decision that requires the unanimous agreement of the Members, as provided herein) is proposed to be made shall be reduced from seventy-five percent to fifty-one percent. At any such adjourned meeting at which the requisite number of Members shall be represented, any business may be transacted that might have been transacted at the meeting as originally noticed.

(e) At a meeting, any proposal shall be approved if it receives the affirmative vote of a majority of the Percentage Interests unless such a proposal would involve a Major Decision, in which event approval requires an affirmative vote of each of the Members.

(f) Notwithstanding this Section 6.3, any action required or permitted to be taken at any meeting of the Members may be taken without a meeting, without prior notice and without a vote, if a consent in writing, setting forth the action so taken, shall be signed by each Member.

6.4 Required Member Consents. Notwithstanding any other provision of this Agreement no action may be taken by the Company (whether by the Management Committee, or otherwise) in connection with any of the following matters without the written consent of all of the Members:

(a) Any act in contravention of this Agreement; or

(b) Any transaction to liquidate or dissolve the Company.

6.5 Member Compensation. No Member shall receive any interest, salary or drawing with respect to its Capital Contributions or its Capital Account or for services rendered on behalf of the Company, or otherwise, in its capacity as a Member, except as otherwise provided in this Agreement, any of the JV Transaction Agreements or in another agreement among the Company and a Member that received approval by the Management Committee in accordance with Section 5.6.

REDACTED

6.6 Members' Liability. No Member shall be liable under a judgment, decree or order of a court, or in any other manner for the debts or any other obligations or liabilities of the Company. A Member shall be liable only to make its Capital Contributions and shall not be required to restore a deficit balance in its Capital Account or to lend any funds to the Company or, after its Capital Contributions have been made, to make any additional contributions, assessments or payments to the Company, provided that a Member may be required to repay distributions made to it as provided in Section 4 or the Act. A Committee Representative shall not have any personal liability for the repayment of any Capital Contributions of any Member.

6.7 Partition. While the Company remains in effect or is continued, each Member agrees and waives its rights to have any Company Property partitioned, or to file a complaint or to institute any suit, action or proceeding at law or in equity to have any Company Property partitioned, and each Member, on behalf of itself, its successors and its assigns hereby waives any such right.

6.8 Transactions Between a Member and the Company. Except as otherwise provided by applicable law and the provisions of this Agreement, subject to the Management Committee's approval in accordance with Section 5.6, any Member may, but is not required to, enter into, directly or indirectly, any transaction, agreement, joint enterprise or arrangement, guarantee, loan, advance or investment with the Company provided the same is on an arms length basis and at fair market value. No Member may, without the approval of the other Member, enter into, directly or indirectly, any transaction, agreement, joint enterprise or arrangement, guarantee, loan, advance or investment with the Company other than on an arms length basis and at fair market value. The existence of these relationships and acting in such capacities will not result in the Member being deemed to be participating in the control of the business of the Company or otherwise affect the limited liability of the Member.

6.9 Other Instruments. Each Member hereby agrees to execute and deliver to the Company within five days after receipt of a written request therefor, such other and further documents and instruments, statements of interest and holdings, designations, powers of attorney and other instruments and to take such other action as the Management Committee deems necessary, useful or appropriate to comply with any laws, rules or relations as may be necessary to enable the Company to fulfill its responsibilities under this Agreement.

6.10 Advise of Changes. Each Member hereby agrees to notify the other Members as soon as practicable of any event, circumstance or fact of which it has knowledge which has had, or is reasonably likely to have, a material adverse effect on such Member's ability to fulfill its obligations under this Agreement.

SECTION 7
ACCOUNTING BOOKS AND RECORDS

7.1 Accounting Books and Records.

(a) The Company shall keep on site at its principal place of business each of the following:

REDACTED

(i) Separate books of account for the Company which shall show a true and accurate record of all costs and expenses incurred, all charges made, all credits made and received, and all income derived in connection with the conduct of the Company and the operation of the Business in accordance with this Agreement,

(ii) A current list of the full name and last known business, residence or mailing address of each Member and Committee Representative, both past and present,

(iii) A copy of the Certificate of Formation and all amendments thereto, together with executed copies of any powers of attorney pursuant to which any amendment has been executed,

(iv) Copies of the Company's federal, state, and local income tax returns and reports, if any, until one year after the period of limitations for auditing the return by the federal government or by any applicable state or local government expires,

(v) Copies of this Agreement,

(vi) Copies of any writings permitted or required under the Act regarding the obligation of a Member to perform any enforceable promise to contribute cash or property or to perform services as consideration for such Member's Capital Contribution, and

(vii) Any written consents obtained from Members pursuant to the Act regarding action taken by Members without a meeting.

(b) The Company shall use the accrual method of accounting in preparation of its financial reports and for tax purposes and shall keep its books and records accordingly. Any Member or its designated representative has the right to access and audit, inspect and copy the contents of such books or records and shall also have access during normal business hours to such additional financial information, documents, books and records as may be reasonably requested (including in order to comply with any reporting requirements of such Member under applicable laws or stock exchange regulations). The rights granted to a Member pursuant to this Section 7.1 are expressly subject to compliance by such Member with the safety, security and confidentiality procedures and guidelines of the Company, as such procedures and guidelines may be established from time to time.

(c) The accounting period of the Company shall be the Fiscal Year.

7.2 Reports.

(a) In General. Pursuant to the Operating Agreement, KCSR (or, following the termination thereof, such other Person as may be engaged by the Management Committee in accordance with Section 5.6) shall be responsible for causing the preparation of financial reports of the Company and the coordination of financial matters of the Company with the Company's accountants.

REDACTED

(b) Periodic and Other Reports. The Company shall cause to be delivered to each Member the financial statements listed in clauses (i) and (ii) below, prepared, in each case (other than with respect to Member's Capital Accounts, which shall be prepared in accordance with this Agreement) in accordance with GAAP consistently applied (and, if required by any Member or its Controlled Affiliates for purposes of reporting under the Exchange Act Regulation S-X), including any reports as may be required in accordance with the Company's or any of its Members' status as a rail carrier, and such other reports, representations and certifications as any Member may reasonably request from time to time, provided that, if the Management Committee so determines within 30 days thereof, such other reports shall be provided at such requesting Member's sole cost and expense. The monthly and quarterly financial statements referred to in clause (ii) below may be subject to normal year-end audit adjustments.

(i) As soon as practicable following the end of each Fiscal Year (and in any event not later than 45 days after the end of such Fiscal Year) the Company shall cause to be delivered to each Member, a balance sheet of the Company as of the end of such Fiscal Year and the related statements of operations, Members' Capital Accounts and changes therein, and cash flows for such Fiscal Year, together with appropriate notes to such financial statements and supporting schedules, all of which shall be audited and certified by the Auditors, and in each case, to the extent the Company was in existence, setting forth in comparative form the corresponding figures for the immediately preceding Fiscal Year end (in the case of the balance sheet) and the two immediately preceding Fiscal Years (in the case of the statements), and

(ii) As soon as practicable following the end of each of the first three Fiscal Quarters of each Fiscal Year (and in any event not later than 30 days after the end of each such Fiscal Quarter), the Company shall cause to be delivered to each Member, a balance sheet of the Company as of the end of such Fiscal Quarter and the related statements of operations and cash flows for such Fiscal Quarter and for the Fiscal Year to date, in each case, to the extent the Company was in existence, setting forth in comparative form the corresponding figures for the prior Fiscal Year's Fiscal Quarter and the interim period corresponding to the Fiscal Quarter and the interim period just completed.

The periodic statements described in clause (ii) above shall be accompanied by a written certification of the Chief Financial Officer of KCSR or such other individual performing a similar function (or any Person designated by the Management Committee in accordance with Section 5.6) that such statements have been prepared in accordance with GAAP consistently applied or this Agreement, as the case may be. The Company and the Management Committee shall also distribute to all Members, at the same time such reports are circulated, delivered or distributed internally, each and every internal management report prepared by, for or circulated among senior management of the Company relating to the business or financial performance of the Company.

7.3 Tax Matters.

REDACTED

(a) Partnership Status. It is the intent of the Members that the Company be classified as a partnership for U.S. federal, state and local income tax purposes. The Members hereby agree not to elect to be excluded from the application of Subchapter K of Chapter 1 of Subtitle A of the Code or any similar state statute.

(b) Company Tax Returns. The Tax Matters Partner (as defined in Section 7.3(d)) shall prepare (or cause to be prepared) the U.S. federal income tax returns and information returns for the Company and all other tax returns of the Company in a manner consistent with this Agreement. The federal income tax return shall contain an election under Section 6231(a)(1)(B)(ii) of the Code and the regulations thereunder to treat the Company as a partnership to which the provisions of Sections 6221 through 6234 of the Code, inclusive, apply. The Tax Matters Partner shall cause the Company's accountants to prepare and review the necessary federal and state income tax returns and information returns for the Company. Each Member shall provide such information, if any, as may be needed by the Company for purposes of preparing such tax and information returns, provided that such information is readily available from regularly maintained accounting records. Prior to April 1st of each year, or sooner as applicable, the Tax Matters Partner shall deliver to the other Member for its review a copy of the Company's federal and state income tax returns and information returns in the form proposed to be filed for each Fiscal Year, and shall reasonably consider and take into account all reasonable comments to such proposed tax returns and information returns provided by the other Member at least ten (10) days prior to the filing date for such returns. After taking into account any such comments, the Tax Matters Partner shall cause the Company to timely file such tax returns. Within two (2) Business Days after filing such federal and state income tax returns and information returns, the Tax Matters Partner shall cause the Company to deliver to each Member a copy of the Company's federal and state income tax returns and information returns as filed for each Fiscal Year, together with any additional tax-related information in the possession of the Company that such Member may reasonably and timely request in order to properly prepare its own income tax returns.

(c) Tax Information. Necessary tax information shall be delivered to each Member as soon as practicable after the end of each Fiscal Year of the Company but not later than five months after the end of each Fiscal Year.

(d) Tax Audits.

(i) The KCS Member is hereby designated as the "tax matters partner," as that term is defined in Section 6231(a)(7) of the Code (the "Tax Matters Partner") of the Company, with all of the rights, duties and powers provided for in Sections 6221 through 6234 of the Code, inclusive. The Tax Matters Partner is hereby directed and authorized to take whatever steps the Tax Matters Partner, in its sole discretion, deems necessary or desirable to perfect such designation, including, without limitation, filing any forms or documents with the IRS and taking such other action as from time to time is required under the Treasury Regulations.

(ii) The Tax Matters Partner, in consultation with the other Member, shall direct the defense of any claims made by the IRS (or by any other taxing authority) to the extent that such claims relate to the adjustment of Company items at the

REDACTED

Company level and, in connection therewith, shall cause the Company to retain and to pay the fees and expenses of counsel and other advisors chosen by the Tax Matters Partner with the consent of the other Member. The Tax Matters Partner shall promptly deliver to each other Member a copy of all notices, communications, reports and writings received from the IRS relating to or potentially resulting in an adjustment of Company items, shall promptly advise the other Member of the substance of any conversations with the IRS in connection therewith, and shall keep the other Member advised of all developments with respect to any proposed adjustments which come to its attention. In addition, the Tax Matters Partner shall (A) provide in a timely manner the other Member with a draft copy of any correspondence or filing to be submitted by the Company in connection with any administrative or judicial proceedings relating to the determination of Company items at the Company level reasonably in advance of such submission, (B) incorporate all reasonable changes or comments to such correspondence or filing requested by the other Member and (C) provide the other Member with a final copy of correspondence or filing. The Tax Matters Partner will provide the other Member with notice reasonably in advance of any meetings or conferences with respect to any administrative or judicial proceedings relating to the determination of Company items at the Company level (including any meetings or conferences with counsel or advisors to the Company with respect to such proceedings), and the other Member shall have the right to participate, at its sole cost and expense, in any such meetings or conferences.

(iii) Notwithstanding anything in this Section 7.3, the Tax Matters Partner shall not (A) extend the period of limitations for any tax year for Federal, state, and local income tax purposes, (B) enter into any settlement agreement that is binding upon the Members with respect to the determination of Company items at the Company level, (C) file a petition under Section 6226(a) of the Code for the readjustment of Company items, or (D) appeal any judicial decision with respect to any Company item, without the prior consent of the other Member which consent shall not be unreasonably withheld, conditioned or delayed.

SECTION 8
AMENDMENTS

8.1 Amendments. Amendments to this Agreement may be proposed by any Committee Representative or any Member. Following such proposal, the Management Committee shall submit to the Members a verbatim statement of any proposed amendment, and the Management Committee shall include in any such submission a recommendation as to the proposed amendment. The Management Committee shall seek the written consent of the Members pursuant to Section 6.3(f) on the proposed amendment or shall call a meeting to vote thereon and to transact any other business that it may deem appropriate. A proposed amendment shall be adopted and be effective as an amendment hereto only if it receives the affirmative vote of each of the Members.

SECTION 9
TRANSFERS AND CALL RIGHT

REDACTED

9.1 Restrictions on Transfers. Except as provided in Section 9.2 of this Agreement, no Member shall Transfer all or any portion of its Membership Interest.

9.2 Permitted Transfers. Subject to the conditions and restrictions set forth in Section 9.3, a Member may at any time Transfer all or any portion of its Membership Interest to (a) any Person that (i) is the surviving Person as a result of any merger or consolidation of either the NS Parent or KCS with or into any such Person or (ii) acquires all or substantially all of the assets of the NS Parent or KCS, (b) any other Member, (c) any Wholly-Owned Affiliate of either the NS Parent or KCS, (d) any administrator, trustee or other Person to whom such Membership Interest of any Member is transferred involuntarily by operation of law, or (e) subject to the prior written consent of all other Members, any Person (any such Transfer being referred to in this Agreement as a "Permitted Transfer").

9.3 Conditions to Permitted Transfers. A Transfer of a Membership Interest shall not be treated as a Permitted Transfer under Section 9.2 unless and until the following conditions are satisfied:

(a) Except in the case of a Transfer involuntarily by operation of law, the transferor and transferee shall execute and deliver to the Company such documents and instruments of conveyance as may be reasonably necessary or appropriate in the opinion of counsel to the Company to effect such Transfer. In the case of a Transfer of a Membership Interest involuntarily by operation of law, the Transfer shall be confirmed by presentation to the Company of legal evidence of such Transfer, in form and substance satisfactory to counsel to the Company. In all cases, the transferor and or transferee shall reimburse the Company for all costs and expenses that the Company reasonably incurs in connection with such Transfer.

(b) The transferor and transferee shall furnish the Company with the transferee's taxpayer identification number and any other information reasonably necessary to permit the Company to file all required federal and state tax returns and other legally required information statements or returns. Without limiting the generality of the foregoing, the Company shall not be required to make any distribution otherwise provided for in this Agreement with respect to any transferred Membership Interest until it has received such information.

(c) Except in the case of a Transfer of a Membership Interest involuntarily by operation of law, either (i) such Membership Interest shall be registered under the Securities Act and any applicable state securities laws or (ii) the transferor shall provide (unless waived by the Management Committee) an opinion of counsel which opinion and counsel shall be reasonably satisfactory to the Management Committee to the effect that such Transfer is exempt from all applicable registration requirements and that such Transfer will not violate any applicable laws regulating the Transfer of securities.

(d) Prior to any such transfer, the Transferee shall deliver to each Member a written commitment from such Transferee to be bound by this Agreement and complies with the applicable provisions of Section 9.6.

REDACTED

(e) The Transferee receives the prior written consent of each other Member if the transfer would cause the Company to terminate under Section 708(b)(1)(B) of the Code and the Regulations thereunder solely as a result of such Transfer.

9.4 Prohibited Transfers. Any purported Transfer of a Membership Interest that is not permitted by the terms of this Agreement shall be null and void and of no force or effect whatever; provided that, if the Company is required as a matter of law to recognize a Transfer that is not a Transfer permitted by the terms of this Agreement (unless the Management Committee, in its sole discretion and by unanimous action or consent, elects to recognize a Transfer that is not a Transfer permitted by the terms of this Agreement), the Membership Interest Transferred shall be strictly limited to the transferor's rights to allocations and distributions as provided by this Agreement with respect to the transferred Membership Interest, which allocations and distributions may be applied (without limiting any other legal or equitable rights of the Company) to satisfy any debts, obligations, or liabilities for damages that the transferor or transferee of such Membership Interest may have to the Company.

In the case of a Transfer or attempted Transfer of a Membership Interest that is not a Transfer permitted by the terms of this Agreement, the parties engaging or attempting to engage in such Transfer shall be liable to indemnify, and hold harmless the Company and the other Members from all cost, liability, and damage that any of such indemnified Person may incur (including, without limitation, incremental tax liabilities, attorneys' fees, fees of experts and accountants, and expenses) as a result of such Transfer or attempted Transfer and efforts to enforce the indemnity granted hereby.

9.5 Rights of Unadmitted Assignees. A Person who acquires a Membership Interest, but who is not admitted as a substituted Member pursuant to Section 9.6 shall be entitled only to allocations and distributions with respect to such Membership Interest in accordance with this Agreement, and shall have no right to any information or accounting of the affairs of the Company, shall not be entitled to inspect the books or records of the Company, and shall not have any of the rights of a Member under the Act or this Agreement but shall succeed to all of the obligations of the Member who purported to transfer a Membership Interest in violation hereof including without limitation the obligation of the transferee under this Section 9 with respect to any subsequent transfers.

9.6 Admission of New and Substituted Members. Subject to the other provisions of this Article 9, a transferee or acquiree of a Membership Interest shall be admitted to the Company as a new or substituted Member upon satisfaction of the conditions set forth in this Section 9.6:

(a) The Membership Interest with respect to which the transferee is being admitted was acquired by means of a Transfer permitted by the terms of this Agreement.

(b) The transferee of the Membership Interest (other than, with respect to clauses (i) and (ii) below, a transferee that was a Member or a Wholly-Owned Affiliate of a Member prior to the Transfer) shall, by written instrument in form and substance reasonably satisfactory to the Management Committee (and, in the case of clause (iii) below, the transferor Member), (i) make customary representations and warranties to each non-transferring Member as

REDACTED

to its due organization, authority to become a party to this Agreement, litigation and required consents, (ii) accept and adopt the terms and provisions of this Agreement, including this Section 9 and Section 10, and (iii) assume the obligations of the transferor Member under this Agreement with respect to the transferred Membership Interest. Upon unanimous agreement of all Members, a transferor Member transferring all but not less than all of its Membership Interest to any Permitted Transferee shall be released from all such assumed obligations except (x) those obligations or liabilities of the transferor Member arising out of a breach of this Agreement, and (y) in the case of a Transfer to any Person other than a Member or any of its Affiliates, those obligations or liabilities of the transferor Member based on events occurring, arising or maturing prior to the date of Transfer.

(c) A new Member acquiring a Membership Interest from the Company shall by written instrument in form and substance reasonably satisfactory to the Management Committee (i) make representations and warranties to the Members equivalent to those set forth in Section 9.6(b)(i) and (ii) accept and adopt the terms and provisions of this Agreement.

(d) The transferee or acquiree pays or reimburses the Company for all reasonable legal, filing, and publication costs that the Company incurs in connection with the admission of the transferee or acquiree as a Member with respect to the Transferred Membership Interest.

(e) Except in the case of a Transfer involuntarily by operation of law, if required by the Management Committee, the transferee (other than a transferee that was a Member or a Wholly-Owned Affiliate of a Member prior to the Transfer) shall deliver to the Company evidence of the authority of such Person to become a Member and to be bound by all of the terms and conditions of this Agreement, and the transferee and transferor shall each execute and deliver such other instruments as the Management Committee reasonably deems necessary or appropriate to effect, and as a condition to, such Transfer, including amendments to the Certificate or any other instrument filed with the State of Delaware or any other state or governmental authority. In the event of an involuntary Transfer by operation of law the transferee shall succeed to all of the obligations of the transferring Member under this Agreement but shall not have any rights (including rights with respect to Management Committee membership or under Section 9) other than with respect to allocations or distributions under this Agreement.

9.7 Representations Regarding Transfers; Legend. Each Member hereby represents and warrants to the Company and the Members that such Member's acquisition of a Membership Interest hereunder is made as principal for such Member's own account and not for resale or distribution of such Membership Interest. Each Member further hereby agrees that the following legends may be placed upon any counterpart of this Agreement, the Certificate of Formation, or any other document or instrument evidencing ownership of a Membership Interest:

> The Membership Interest represented by this document has not been registered under any securities laws and the transferability of such Membership Interest is restricted. Such Membership Interest may not be sold, assigned, or transferred, nor will any assignee, vendee, transferee, or endorsee thereof be recognized as

REDACTED

having acquired any such Membership Interest by the issuer for any purposes, unless (1) a registration statement under the United States Securities Act of 1933, as amended, with respect to such Membership Interest shall then be in effect and such transfer has been qualified under all applicable state securities laws or (2) the availability of an exemption from such registration and qualification shall be established to the satisfaction of counsel to the Company; and

The Membership Interest represented by this document is subject to, and is transferable only upon compliance with, the provisions of a limited liability company agreement, dated as of [ ], 2006. A copy of the above-referenced agreement is on file at the principal office of the Company.

9.8 Line Option Call Right. Upon NS' delivery, in accordance with Section 10.10(g) of the Transaction Agreement, of a Line Option Exercise Notice (as such term is defined in the Transaction Agreement) stating its election to acquire the KCS Membership Interests (as such term is defined in the Transaction Agreement) pursuant to Section 10.10(a)(i) thereof, the NS Member shall have the right to acquire or cause the Company to acquire the KCS Member's Membership Interests (the "Line Option Call Right") as follows:

(a) Purchase Price. If the NS Member delivers such a Line Option Exercise Notice, then the NS Member agrees to buy (or cause one or more of its Subsidiar(ies) to buy) and the KCS Member agrees to sell the KCS Member's Membership Interests, for the Membership Interest FMV (as such term is defined in the Transaction Agreement).

(b) Permitted Transfer; Closing. Promptly following the exercise of the Line Option Call Right, the Members shall take all actions reasonable and necessary to effect a Permitted Transfer of all of the Membership Interests of the KCS Member to the NS Member pursuant to this Section 9.8, including entering into of a transaction agreement with respect to such Permitted Transfer (the "Line Option Call Agreement") reflecting the key terms set forth in this Section 9.8 and otherwise containing representations, warranties, covenants and indemnities with respect to the Membership Interests of the KCS Member with terms at least as favorable to NS and its Subsidiaries as are set forth in the Transaction Agreement with respect to the Line and the Assets. Notwithstanding anything to the contrary contained herein, the completion of such sale pursuant to the Line Option Call Right and in accordance with the terms of the Line Option Call Agreement (the "Line Option Call Closing") shall occur, and the NS Member shall pay the Membership Interest FMV to the KCS Member, on a date (the "Line Option Call Closing Date") to be mutually agreed between the KCS Member and the NS Member, but in no event later than the later of (i) ninety (90) days after the delivery date of the Line Option Call Notice and (ii) five Business Days after the date on which the last of any required regulatory approvals in connection with such transaction is received. All payments of the Membership Interest FMV shall be made by wire transfer of immediately available funds to an account or accounts specified by the intended recipients. Upon the request of the NS Member, at the Line Option Call Closing, the KCS Member shall cause their respective representatives on the Management Committee to resign therefrom. The KCS Membership Interests shall be conveyed to the NS Member (or its designated Subsidiar(ies)) subject only to Permitted Liens (as defined in the Transaction Agreement) and the KCS Member shall be responsible for the payment of all transfer, filing and

REDACTED

recording taxes in connection with the exercise of the Line Option with respect to the KCS Membership Interests and the conveyance of such interests.

SECTION 10
EVENTS OF DEFAULT

10.1 Events of Default. The following acts shall constitute an Event of Default hereunder:

(a) A Transfer by any Member that is not a Permitted Transfer;

(b) Failure of any Member to materially comply with any material covenant or agreement hereunder in accordance with its terms within thirty (30) days after receipt of notice thereof; or

(c) The Bankruptcy of any Member.

10.2 Remedies Upon an Event of Default. If an Event of Default has occurred and is continuing:

(a) The non-defaulting Members may seek specific performance of any covenant or agreement contained herein, or seek to enjoin the breach of any covenant or agreement. It is acknowledged that in such event it would be impossible to measure in money the damages that would be suffered if the parties hereto fail to comply with any of the obligations imposed herein on them and that, in the event of any such failure, an aggrieved party hereto will be irreparably damaged and will not have an adequate remedy at law. In addition to being entitled to exercise all rights granted by law, any such party shall therefore, be entitled to equitable relief from any court having jurisdiction over such dispute, and if any action should be brought in equity to enforce any of the provisions of this Agreement, none of the parties shall raise the defense that there is an inadequate remedy at law; and

(b) Each non-defaulting Member shall be entitled to recover from the defaulting Member in an appropriate proceeding any and all claims, damages, losses, liabilities and expenses of whatever nature (including reasonable attorneys' fees and disbursements) (collectively, "Damages") suffered or incurred by the Company or the non-defaulting Members as a result of such Event of Default. No punitive damages shall be awarded as a result of an Event of Default hereunder.

(c) If the Event of Default arises from the Bankruptcy of a Member, no less than five Business Days after the commencement of a Bankruptcy proceeding, whether Voluntary or Involuntary, such Member shall provide notice of its offer to sell to all non-defaulting Members (the "Default Sale Notice") all but not less than all of the Membership Interest of the Company held by such defaulting Member. Each non-defaulting Member shall have the option within forty-five days of receiving the Default Sale Notice (the "Acceptance Period") to purchase all, but not less than all, of its pro rata share (based on the number of Membership Interest held by such non-defaulting Member as compared to the total number of Membership Interest held by all non-defaulting Members) of the Membership Interest offered.

REDACTED

The price of the Membership Interest offered by the defaulting Member shall be the Fair Value of such Membership Interest less any Damages incurred by the non-defaulting Member that are recoverable pursuant to Section 10.2(b). If such offer to purchase is accepted, and at least two Members remain, such Bankruptcy shall not be a Dissolution Event.

(d) Each non-defaulting Member shall if it so desires, exercise its rights under Section 10.2(c) by delivering to the defaulting Member written notice of election (the "Acceptance Agreement") prior to 5:00 p.m., Eastern standard time, on or before the last day of the Acceptance Period. By delivering the Acceptance Agreement, the non-defaulting Member agrees to purchase, and the defaulting Member agrees to sell, that portion of the defaulting Member's Membership Interest which corresponds to the non-defaulting Member's pro rata share. The Acceptance Agreement shall identify the committed source of financing for such purchase or provide evidence that the non-defaulting Member is able to effect the purchase.

The completion of the sale pursuant to Section 10.2(c) shall occur on a date to be mutually agreed between the defaulting Member and the non-defaulting Member, but in no event later than five Business Days after the latter of (i) the delivery date of the Acceptance Agreement or (ii) the date on which the last of any required regulatory approvals in connection with such transaction is received. All payments of the purchase price for a transaction pursuant to Section 10.2(c) shall be made by wire transfer of immediately available funds to an account or accounts designated by the defaulting Member for such purpose.

(e) If the Event of Default arises from a Transfer that is not a Permitted Transfer, the transferring Member shall take or cause to be taken all action necessary to reverse such Transfer.

(f) In addition to the foregoing remedies, each defaulting Member hereby agrees to indemnify, defend and hold harmless each non-defaulting Member, its Affiliates and their respective partners, officers, directors, agents, representatives, employees and trustees ("Indemnified Parties") from and against all Damages arising out of or related to such Event of Default.

SECTION 11
DISSOLUTION AND WINDING UP

11.1 Dissolution Events. The Company shall dissolve and shall commence winding up and liquidating upon the first to occur of any of the following (each a "Dissolution Event"):

(i) The unanimous vote of the Members to dissolve, wind up, and liquidate the Company; or

(ii) A judicial dissolution under Section 18-802 of the Act.

The Members hereby agree that, notwithstanding any provision of the Act, the Company shall not dissolve prior to the occurrence of a Dissolution Event.

REDACTED

11.2 Winding Up. Upon the occurrence of a Dissolution Event, the Company shall continue solely for the purposes of winding up its affairs in an orderly manner, liquidating its assets, and satisfying the claims of its creditors and Members, and no Member shall take any action that is inconsistent with, or not necessary to or appropriate for, the winding up of the Company's business and affairs, provided that all covenants contained in this Agreement and obligations provided for in this Agreement shall continue to be fully binding upon the Members until such time as the Property has been distributed pursuant to this Section 11.2 and the Certificate of Formation has been canceled pursuant to the Act. The Liquidator shall be responsible for overseeing the winding up and dissolution of the Company, which winding up and dissolution shall be completed within ninety days of the occurrence of the Dissolution Event. The Liquidator shall take full account of the Company's liabilities and Property and shall cause the Property or the proceeds from the sale thereof, to the extent sufficient therefor, to be applied and distributed, to the maximum extent permitted by law, in the following order:

(a) First, to creditors (including Members and Committee Representatives who are creditors, to the extent otherwise permitted by law) in satisfaction of all of the Company's debts and other liabilities (whether by payment or the making of reasonable provision for payment thereof), other than liabilities for which reasonable provision for payment has been made;

(b) Second, except as provided in this Agreement, to Members and former Members of the Company in satisfaction of liabilities for distribution under the Act;

(c) The balance, if any, to the Members in accordance with their positive Capital Account balances (after taking into account all adjustments thereto for contributions, distributions and allocations for the year of dissolution and all prior periods) to the extent thereof and then to the Members pro rata in accordance with their Percentage Interests.

Members or Committee Representatives may receive reasonable compensation for any services performed pursuant to this Section 11.

11.3 Compliance With Certain Requirements of Regulations; Deficit Capital Accounts. In the event the Company is "liquidated" within the meaning of Regulations Section 1.704-1(b)(2)(ii)(*g*), and any Member has a deficit balance in its Capital Account (after giving effect to all contributions, distributions and allocations for all Fiscal Years, including the Fiscal Year during which such liquidation occurs), such Member shall have no obligation to make any contribution to the capital of the Company with respect to such deficit, and such deficit shall not be considered a debt owed to the company or to any other Person for any purpose whatsoever. In the discretion of the Liquidator, a pro rata portion of the distributions that would otherwise be made to the Members pursuant to this Section 11 may be:

(a) Distributed to a trust established for the benefit of the Members for the purposes of liquidating Company assets, collecting amounts owed to the Company, and paying any contingent or unforeseen liabilities or obligations of the Company. The assets of any such trust shall be distributed to the Members from time to time, in the reasonable discretion of the Liquidator, in the same proportions as the amount distributed to such trust by the Company would otherwise have been distributed to the Members pursuant to Section 11.2; or

REDACTED

(b) Withheld to provide a reasonable reserve for Company liabilities (contingent or otherwise) and to reflect the unrealized portion of any installment obligations owed to the Company, provided that such withheld amounts shall be distributed to the Members as soon as practicable.

11.4 Distributions in Kind. Any non-cash asset distributed to one or more Members shall first be valued at its Fair Value to determine Profit and Loss that would have resulted if such asset were sold for such value. Such Profit or Loss shall then be allocated to reflect such allocation.

11.5 Rights of Members. In the event of any distribution of Property in accordance with Section 11 hereof, no Member shall have any right or power to demand or receive Property other than cash from the Company. If the assets of the Company remaining after payment or discharge of the debts or liabilities of the Company are insufficient to return such Capital Contributions, the Members shall have no recourse against the Company or any other Member or Committee Representative.

11.6 Notice of Dissolution/Termination.

(a) In the event a Dissolution Event occurs, the Management Committee shall promptly, but in no event later than seven (7) days thereafter, provide written notice thereof to each of the Members.

(b) Upon completion of the distribution of the Company's Property as provided in this Section 11, the Company shall be terminated, and the Liquidator shall cause the filing of the Certificate of Cancellation pursuant to the Act and shall take all such other actions as may be necessary to terminate the Company.

11.7 Allocations During Period of Liquidation. During the period commencing on the first day of the Fiscal Year during which a Dissolution Event occurs and ending on the date on which all of the assets of the Company have been distributed to the Members pursuant to Section 11.2 (the "Liquidation Period"), the Members shall continue to share Profits, Losses, gain, loss and other items of Company income, gain, loss or deduction in the manner provided in Section 3.

11.8 Character of Liquidating Distributions. All payments made in liquidation of the interest of a Member in the Company shall be made in exchange for the interest of such Member in Property pursuant to Section 736(b)(1) of the Code, including the interest of such Member in Company goodwill.

11.9 The Liquidator.

(a) Definition. The "Liquidator" shall mean a Person appointed by the unanimous vote of the Members to oversee the liquidation of the Company.

REDACTED

(b) Fees. The Company is authorized to pay a reasonable fee to the Liquidator for its services performed pursuant to this Section 11 and to reimburse the Liquidator for its reasonable costs and expenses incurred in performing those services.

(c) Indemnification. The Company shall indemnify, save harmless, and pay all judgments and claims against such Liquidator or any officers, directors, agents or employees of the Liquidator relating to any liability or damage incurred by reason of any act performed or omitted to be performed by the Liquidator, or any officers, directors, agents or employees of the Liquidator in connection with the liquidation of the Company, including reasonable attorneys' fees incurred by the Liquidator, officer, director, agent or employee in connection with the defense of any action based on any such act or omission, which attorneys' fees may be paid as incurred, except to the extent such liability or damage is caused by the fraud, intentional misconduct of, or a knowing violation of the laws by the Liquidator which was material to the cause of action.

SECTION 12
MISCELLANEOUS

12.1 Notices. Any notice, payment, demand, or communication required or permitted to be given by any provision of this Agreement shall be in writing and shall be deemed to have been delivered, given, and received for all purposes (i) if delivered personally to the Person or to an officer of the Person to whom the same is directed or (ii) when the same is actually received, if sent either by express delivery service or registered or certified mail, postage and charges prepaid and return receipt requested, or by facsimile, if such facsimile is followed by a hard copy of the facsimile communication sent promptly thereafter by registered or certified mail, postage and charges prepaid, addressed as follows or to such other address as such Person may from time to time specify, by notice to the Members and Committee Representatives:

12.2 Certificates.

(a) Right of the Management Committee to Issue Certificates. If at any time the Management Committee determines that it is in the best interests of the Company to issue certificates attesting to the ownership of Membership Interest in the Company by its Members, the provisions of this Section shall thereafter apply (and prior to such determination by the Management Committee, if any, this Section shall have no force or effect).

(b) Form of Certificates. Certificates attesting to the ownership of interests in the Company shall be in such form as shall be approved unanimously by the Management Committee and shall state that the Company is a limited liability company formed under the laws of the State of Delaware, the name of the Member to whom such certificate is issued and that the certificates represent limited liability company interests within the meaning of the Act. Each such certificate shall be signed by one Committee Representative appointed by the KCS Member and one Committee Member appointed by the NS Member and shall include the legends referred to in Section 9.7.

(c) Register. The transfer register or transfer books and blank share certificates shall be kept by the Secretary of the Company or by any transfer agent or registrar designated by the Management Committee for that purpose.

(d) Issuance. The certificates of the Company shall be numbered and registered in the share register or transfer books of the Company as they are issued.

(e) Transfer. Subject to all provisions hereof relating to Transfers of Membership Interest, if the Company shall issue certificates in accordance with the provisions of this Section, Transfers of Membership Interests shall be made on the register or transfer books of the Company upon surrender of the certificate therefor, endorsed by the Person named in the certificate or by an attorney lawfully constituted in writing.

REDACTED

(f) Record Holder. Except to the extent that the Company shall have received written notice of an assignment of a Membership Interest in the Company, the Company shall be entitled to treat the Person in whose name any certificates issued by the Company stand on the books of the Company as the absolute owner thereof, and shall not be bound to recognize any equitable or other claim to, or interest in, such Membership Interest on the part of any other Person.

(g) Lost Destroyed or Mutilated Certificates. The holder of any certificates issued by the Company shall promptly notify the Company of any loss, destruction or mutilation of such certificates, and the Management Committee may cause a new certificate or certificates to be issued to such holder, in case of mutilation of the certificate upon the surrender of the mutilated certificate or, in case of loss or destruction of the certificate, upon satisfactory proof of such loss or destruction and, if the Management Committee shall so determine, the granting of an indemnity and/or the deposit of a bond in such form and in such sum, and with such surety or sureties, as the Management Committee may direct.

12.3 Binding Effect. Except as otherwise provided in this Agreement every covenant, term and provision of this Agreement shall be binding upon and inure to the benefit of the Members and their respective successors, transferees and assigns.

12.4 Time. In computing any period of time pursuant to this Agreement, the day of the act, event or default from which the designated period of time begins to run shall not be included, but the time shall begin to run on the next succeeding day. The last day of the period so computed shall be included, unless it is a Saturday, Sunday or legal holiday, in which event the period shall run until the end of the next day which is not a Saturday, Sunday or legal holiday.

12.5 Headings. Section and other headings contained in this Agreement are for reference purposes only and are not intended to describe, interpret, define, or limit the scope, extent, or intent of this Agreement or any provision hereof.

12.6 Prior Agreements. This Agreement, the JV Transaction Agreements and the Certificate of Formation supersede all prior agreements among the parties hereto, written or oral, with respect to the operation of the Company or the transactions referred to herein and specifically any and all term sheets prepared in respect of such transactions.

12.7 Severability. Except as otherwise provided in the succeeding sentence, every provision of this Agreement is intended to be severable, and, if any term or provision of this Agreement is illegal or invalid for any reason whatsoever, such illegality or invalidity shall not affect the validity or legality of the remainder of this Agreement. The preceding sentence of this Section 12.7 shall be of no force or effect if the consequence of enforcing the remainder of this Agreement without such illegal or invalid term or provision would be to cause any Member to lose the material benefit of its economic bargain.

12.8 Incorporation by Reference. Every exhibit and other appendix attached to this Agreement and referred to herein is incorporated in this Agreement by reference unless this Agreement expressly otherwise provides.

REDACTED

12.9 Variation of Terms. All terms and any variations thereof shall be deemed to refer to masculine, feminine, or neuter, similar or plural, as the identity of the Person or Persons may require.

12.10 Counterpart Execution. This Agreement may be executed in any number of counterparts with the same effect as if all of the Members had signed the same document. All counterparts shall be construed together and shall constitute one agreement.

12.11 Third Party Beneficiaries. Except for Indemnified Persons, this Agreement shall not benefit or create any right or cause of action in or on behalf of any Person other than the parties hereto.

12.12 GOVERNING LAW. THE LAWS OF THE STATE OF DELAWARE SHALL GOVERN THE VALIDITY OF THIS AGREEMENT, THE CONSTRUCTION OF ITS TERMS AND THE INTERPRETATION OF THE RIGHTS AND DUTIES ARISING HEREUNDER.

12.13 Submission to Jurisdiction. Subject to Section 12.14 herein, each of the parties hereto hereby (i) consents to submit itself to the exclusive jurisdiction of any Federal or state court located in the State of Delaware (the "Delaware Courts") in any action to enforce or in aid of the agreement to arbitrate in Section 12.14 herein or for provisional relief to maintain the status quo or prevent irreparable harm pending the appointment of the arbitrators, and to the non-exclusive jurisdiction of the Delaware Courts for enforcement of any award issued hereunder (ii) agrees that it will not attempt to deny or defeat such personal jurisdiction by motion or other request for leave from any such court, and (iii) waives any objection based on forum non conveniens or any other objection to venue thereof.

12.14 Dispute Resolution. Except as provided in Section 10.2, each of the parties hereto stipulates and agrees that any dispute, controversy or claim arising out of or relating to this Agreement or the breach, termination or validity thereof ("Dispute") that is not resolved by negotiations between senior officers of the parties within sixty (60) days after receipt by a party of written notice ("Notice") of such Dispute, will be submitted to mediation in accordance with the Commercial Mediation Procedures of the AAA. If such dispute is not resolved within twenty (20) days after appointment of a mediator, or within sixty (60) days of receipt of Notice (whichever comes sooner), each of the parties hereto agrees that, at the demand of any party, such Dispute will be submitted to mandatory and binding arbitration, in New York, New York by three arbitrators, under the Commercial Arbitration Rules and the Large Complex Case Procedures of the AAA then in effect (the "Rules"), under the following terms and conditions:

(a) Selection of Arbitrator. A panel of three independent arbitrators shall be appointed by the AAA using the listing, ranking and striking procedure in the Rules. Any arbitrator appointed by the AAA shall be a retired judge or a practicing attorney with no less than fifteen years of experience with large commercial cases and an experienced arbitrator.

(b) Conduct of Arbitration. The arbitration shall be held and the award shall be issued in New York, New York. In addition to Damages, the arbitral tribunal may

REDACTED

award any remedy provided for under applicable law and the terms of this Agreement, including, without limitation, specific performance or other forms of injunctive relief. The arbitrators shall apply the law of the State of Delaware to the substance of the Dispute and will have no power or authority, under the rules of the AAA or otherwise, to amend or disregard any provision of this Agreement.

(c) Replacement of Arbitrator(s). Should any of the arbitrator(s) refuse or be unable to proceed with arbitration proceedings, replacement arbitrator(s) will be selected using the same method of selection as the original arbitrator(s).

(d) Findings and Conclusions. The arbitrators will, after reaching judgment and award, prepare and distribute to the parties a written award including the findings of fact and conclusions of law relevant to such award and containing an opinion setting forth the reasons for the giving or denial of any award.

(e) Time is of the Essence. The arbitrators are hereby instructed that time is of the essence in the arbitration proceeding, and that the arbitrators will have the right and authority to issue monetary sanctions against any party if, upon a showing that such party is unreasonably delaying the proceeding.

(f) Temporary Equitable Relief. By agreeing to arbitration, the parties do not intend to deprive any Delaware Court of its jurisdiction to issue a pre-arbitral injunction, pre-arbitral attachment, or other order in aid of arbitration proceedings and the enforcement of any award. Without prejudice to such provisional remedies as may be available under the jurisdiction of a Delaware Court, the arbitral tribunal shall have full authority to grant provisional remedies and to direct the parties to request that any court modify or vacate any temporary or preliminary relief issued by such court, and to award Damages for the failure of any party to respect the arbitral tribunal's orders to that effect.

(g) Consolidation. The Parties are committed to the prompt and efficient resolution of disputes. Accordingly, if one or more disputes arises under this Agreement and/or any JV Transaction Agreement, such disputes may be brought in a single arbitration. If more than one arbitration is brought with respect to disputes under this Agreement and/or any JV Transaction Agreement, then any Party may request that any arbitration or any new dispute arising under this Agreement or the JV Agreement be consolidated into any prior arbitration. The new dispute or arbitration shall be so consolidated, provided that the arbitral tribunal for the prior (or first filed) arbitration determines that (i) the new dispute or arbitration presents significant issues of law or fact common with those in the pending arbitration; (ii) no Party would be unduly prejudiced and (iii) consolidation under such circumstances would not result in undue delay for the prior arbitration. Any order of consolidation issued by such arbitral tribunal shall be final and binding upon the parties. Unless the parties otherwise agree, the arbitral tribunal appointed first in time shall serve as the arbitral tribunal for the consolidated arbitration. The Parties waive any right they have to appeal or to seek interpretation, revision or annulment of such order of consolidation under the Rules or in any court. The Parties agree that upon such an order of consolidation, they will promptly dismiss any arbitration brought under this Agreement, the subject of which has been consolidated into another arbitral proceeding.

REDACTED

(h) Discovery. Recognizing the express desire of the parties for an expeditious means of dispute resolution, the arbitrators will allow for limited discovery as may be reasonable under the circumstances.

(i) Costs and Attorneys' Fees. Notwithstanding any rule of the AAA to the contrary, the arbitrators rendering judgment under this Section 12.14 will have the power to award the costs of the arbitration, including reasonable attorneys' fees and expenses to the prevailing party or parties in the arbitration. In any action to enforce this agreement to arbitrate or any arbitral award rendered hereunder, the court may award costs and attorneys' fees against the party resisting enforcement.

12.15 Confidentiality. Except as provided by law or by rule, order, or regulation of any court or regulatory agency with jurisdiction over the subject matter of this Agreement, or in connection with an audit by the Internal Revenue Service or other tax authority, or as may be necessary or appropriate for a Member hereto to enforce its rights under this Agreement, during the term of this Agreement (including any extensions thereof), and for a period of three (3) years after termination or expiration of this Agreement, the terms and provisions of this Agreement and all information to which access is provided or which is obtained hereunder will be kept confidential and will not be disclosed by either Member to any person other than members, officers, employees, independent auditors, and attorneys, without the prior written approval of the other Member.

Capital Expenditure Protocols

Normalized capital maintenance includes anything used to keep the existing track structure going as a result of normal wear and tear. It may also include some betterment if the asset being replaced is obsolete and technology has improved it.

> **Recovery Method** — The Company shall maintain depreciation as a cash reserve, available for borrowing by KCS or NS.
>
> **Allocation Method** — For the first two years, capital maintenance shall be allocated to the Members on the basis of gross ton miles operated pursuant to the NSR Joint Use Agreement and the KCS Joint Use Agreement. After the first two years, the Company shall allocate normalized capital maintenance to the Members on the basis of resistance miles, an Eyeris tool that takes into account miles, grade, curve, weight, and speed to better depict the wear and tear on the track.
>
> **Deficits** — If the Recovery Method does not reserve sufficient funds for normalized capital maintenance, then the Company shall initiate a capital call on the basis of resistance miles at the time normalized capital maintenance actually is performed without sufficient funds in reserve.

Capacity projects shall include new assets that do not replace existing assets, such a new siding, a turnout, or a new technology that is not a replacement.

> **Recovery and Allocation Method** — Except as provided in Sections 5.12 and 5.13, capacity expansion projects will be funded by a joint capital call unless a Member objects that the capacity expansion is for the sole benefit of the traffic of the other partner. If such an objection occurs, the Members agree to defer to a dispute resolution involving system modeling, such as RTC. If material benefits are found to accrue to the service and transit time of only one partner, that partner shall bare the sole cost.

The Vicksburg Bridge is in a separate category because of its magnitude. If the bridge must be rebuilt, the Members shall bear the cost according to their percentage interest.

Approved Investment Policies

The Vice President and Treasurer of Meridian Speedway, LLC (the "Company"), or his or her delegate, is authorized to purchase and sell from time to time on behalf of the Company the classes of United States dollar securities, described herein, subject to the specified limitations and ratings, and subject to any limitations that may be fixed from time to time by the Management Committee of the Company.

Securities in the short-term portfolio will consist of those maturing not later than one year from date of purchase. Securities in the intermediate-term portfolio will consist of those maturing from one to five years from date of purchase.

I. SHORT-TERM PORTFOLIO

Investments and Credit Quality (See Item 11 this section)

1. U.S. Treasury obligations
2. Federal Agency obligations
3. Bank obligations (Domestic and Eurodollar)
   - U.S. and foreign banks: Time deposits, money market demand accounts, certificates of deposit, bankers' acceptances, letter of credit-backed paper, and commercial paper issued by domestic bank holding companies and foreign bank owned funding subsidiaries.
   - Minimum equity of $500 million for U.S. banks; $1 billion for foreign banks.
   - Thompson Financial Services rating of B/C (domestic banks) or II/III (foreign banks).
   - Moody's Aa long-term deposit rating, or Moody's Aa or S&P AA or Fitch long-term debt ratings. A1/P1 ratings on short-term deposits and commercial paper. In the absence of long-term ratings, Thompson Financial Services' ratings are acceptable.
4. Commercial Paper (U. S. and non-U.S.) Asset-backed and non asset-backed
   - Long-term debt ratings of Aa/AA, short-term ratings of A1/P1. If an issuer does not have a long-term debt rating, S&P common stock rating of A or better may be substituted for this debt requirement. In the case of asset-backed paper, the issuer may be backed by a letter of credit from a financial institution with a long-term debt rating of AA or better.
5. Repurchase Agreements
   - Overnight or term repos up to 30-day maturity.
   - Collateral coverage of not less than 102% (based upon current market value plus accrued interest), using Government, federal agencies and obligations of banks which otherwise meet the criteria of this policy.

6. Overnight Institutional Money Market Funds
   a. Minimum equity of $1 billion.

REDACTED

b. Money market mutual funds organized under the laws of the United States or any state thereof which have daily pricing and daily redemption features and invest at least ninety percent (90%) of their assets in the investments described in the investment policy.

7. Tax-exempt and taxable municipal securities –

a. General obligation notes; state and municipal authorities, school districts and other revenue notes and bonds; variable rate demand/Put notes and bonds; and Daily, Weekly, Monthly Floaters.

- Long-term debt ratings of Aa by Standard & Poor's, Moody's or Fitch
- Short-term debt ratings of MIG-1/VMIG-1 or SP-1/A-1.
- Long-term ratings of Aa and AA on issues insured by Municipal
- Bond Insurance Association (MBIA); Financial Guaranty Insurance Company (FGIC), and Bond Investors Guaranty Insurance Company (BIG).
- In the case of variable rate/Put bonds, underlying issuer must be
- rated A by at least one of the rating agencies. If the underlying issuer's rating is no higher than A, then the issue must be supported by an irrevocable letter of credit issued by a bank qualifying under
- the above credit quality standards.

b. Tax-exempt commercial paper

- Long-term debt ratings of Aa or AA . or backed by a letter of credit from a financial institution rated AA. commercial paper ratings of A1 or P1.

8. Variable Rate Preferred Stock

- Issuer's equity must meet minimum standards outlined above.
- Long-term debt ratings of Aa/AA.

9. Corporate Obligations

- Floating and fixed rates credit rating by at least one rating agency of AA.

10. Broker LLC private investment funds rated AAA.

11. Credit Quality Exception-

- Long-term rating requirements as stated above are Aa by Moody's and/or AA by Standard and Poor's. This requirement is modified to the extent that up to 25% of total securities in short and intermediate-term portfolios may carry a rating of A by Moody's and/or A by Standard and Poor's or Fitch.

II. INTERMEDIATE-TERM PORTFOLIO

- Credit requirements for these issues must adhere to the same standards as short-term issues. If the total of the short-term and intermediate-term portfolios exceeds $100 million, then no more than 50% of the total investments may be placed in the intermediate-term portfolio.

REDACTED

INVESTMENTS

1. All instruments included in the short-term portfolio.
2. Corporate Notes and Bonds, both Fixed and Floating rates.
3. Corporate Notes and Bonds with Put Features.
   - Puts must be at par and unconditional, date thereof to be considered final maturity date.
4. Eurodollar and Yankee Notes and Bonds.
5. Term Certificates of Deposit issued by U.S. and foreign banks.
6. Floating Rate Instruments –
   a. Domestic and Eurodollar certificates of deposit and notes.
   b. Variable Coupon Renewable Notes.
7. Asset-backed securities, defined as:
   a. Government National Mortgage Association (GNMA) Pass-Through Certificates.
   b. Federal National Mortgage Association (FNMA) Mortgage-Backed Securities.
   c. Federal Home Loan Mortgage Corporation (FHLMC) Participation Certificates.
   d. Collateralized Mortgage Obligations (CMOs) issued by Federal Home Loan Mortgage Corporation and Wall Street dealer-sponsored special purpose corporations.
   e. Auto Loan or Credit Card-backed Notes issued by various finance companies.

III. PORTFOLIO LIMITS

1. U. S. Treasury obligations – no limits.
2. Federal Agency obligations – not more than 50% of the total portfolio.
3. Bank obligations
   a. Any single issuer is limited to 10% of total portfolio.
   b. Total bank related obligations may not exceed 50% of total portfolio.
   c. Foreign bank obligations may not exceed 25% of the total portfolio.
4. Commercial Paper
   a. Any single issuer is limited to 10% of the total portfolio.
   b. Not more than 50% of the total portfolio may be invested in commercial paper.
   c. Not more than 25% of the total portfolio may be invested in foreign commercial paper (excluding foreign bank related commercial paper).
5. Repurchase Agreements
   a. No limits on total repurchase agreements.
   b. Any approved dealer is limited to 10% of total portfolio.
6. Tax-exempt and taxable securities
   a. Any single issuer is limited to 10% of total portfolio.
   b. Total tax-exempt obligations shall not exceed 2%.
7. Variable Rate Preferred Stock

REDACTED

a. Any single issuer is limited to 5% of the total portfolio, with a maximum of 5% of any single issue.
b. Total Variable Rate Preferred Stock may not exceed 10% of the total portfolio.

8. Corporate obligations (other than bank obligations)
   a. Any single issue is limited to 10% of total portfolio.
   b. Corporate obligations may not exceed 50% of total portfolio.
9. Miscellaneous
   a. Obligations of any one industry shall not exceed 25% of the total Portfolio, with the exception of 50% limitation for bank related obligations.
   b. Not more than 5% of the total portfolio may be invested in any category or obligation of any issuer not covered by the limitations or credit standards established above, provided the investment within this limitation are consistent with the objectives of the portfolio.
   c. The total of all securities issued by foreign governments and agencies, foreign supra-national corporations, U.S. subsidiaries of foreign corporations, and foreign banks (including U. S. subsidiaries) shall not exceed 50% of the total portfolio with no more than 10% of the total portfolio invested in any one country.
   d. The total limitations on Federal Agency, Commercial Paper, bank obligations and corporate obligations will not apply when the total of the short-term and intermediate portfolios $200 million or less.
   e. Any single issuer cannot exceed the lesser of $50 million or 10% of the portfolio.

B

EXHIBIT B
to Transaction Agreement

MERIDIAN SPEEDWAY LLC – KANSAS CITY SOUTHERN OPERATING AGREEMENT

THIS AGREEMENT (the "Operating Agreement" or "Agreement") is entered into as of this ____ day of _____, 200__, by and between MERIDIAN SPEEDWAY LLC , a Delaware limited liability company ("MSLLC"), on the one hand, and on the other hand, KANSAS CITY SOUTHERN ("KCS") and THE KANSAS CITY SOUTHERN RAILWAY COMPANY ("KCSR"). MSLLC and KCSR are referred to individually herein as a "Party" and collectively as the "Parties".

RECITALS:

WHEREAS, on December 1, 2005, KCS, KCSR, The Alabama Great Southern Railroad Company and Norfolk Southern Corporation ("NSC") entered into a transaction agreement (the "Transaction Agreement") that, among other things, provided for the creation of MSLLC, the transfer from KCSR to MSLLC of the Subject Trackage, as hereinafter defined, the construction, at MSLLC's cost, of certain infrastructure improvement projects and the performance of an intensive capital maintenance program, and the grant by MSLLC to Norfolk Southern Railway Company ("NSR") and KCSR of certain rights over the entirety of the Subject Trackage; and

WHEREAS, pursuant to the Transaction Agreement, MSLLC has agreed to grant NSR certain trackage and haulage rights for NSR to transport NS Traffic over the Subject Trackage consistent with the NSR Joint Use Agreement; and

WHEREAS, pursuant to the Transaction Agreement, MSLLC has agreed to grant KCSR local and overhead trackage rights as necessary for KCSR to continue to conduct railroad operations over the Subject Trackage and to fulfill its common carrier obligations with respect to all traffic except for the right to transport NS Traffic and Third Party Traffic over the Subject Trackage consistent with the KCSR Joint Use Agreement; and

WHEREAS, the Transaction Agreement anticipates that, pursuant to an Operating Agreement, MSLLC will hire KCSR for the duration of the joint venture to perform as the designated operator ("Designated Operator") for all railroad and other operations of MSLLC, including MSLLC railway operations required pursuant to the KCSR Joint Use Agreement and the NSR Joint Use Agreement, as well as, to perform all general and administrative services required by MSLLC; and

WHEREAS, the Parties desire to set forth the terms and conditions upon which KCSR shall provide services to MSLLC as MSLLC's Designated Operator;

NOW, THEREFORE, the Parties hereto, intending to be legally bound, agree as follows:

SECTION 1. DEFINITIONS

(a) Interpretation Generally.

REDACTED

(i) Unless otherwise defined herein, all words, terms and phrases used in this Agreement shall be construed in accordance with the generally applicable definition or meaning of such words, terms and phrases in the railroad industry.

(ii) Each definition in this Agreement includes the singular and the plural, and references in this Agreement to the neuter gender include the masculine and feminine where appropriate. References herein to any agreement or contract mean such agreement or contract as amended. As used in this Agreement, the word "including" means "without limitation", and the words "herein", "hereof" and "hereunder" refer to this Agreement as a whole. All dollar amounts stated herein are in United States currency.

(iii) The division of this Agreement into sections and subsections and the insertion of headings and references are for convenience of reference only, and shall not affect the construction or interpretation of this Agreement. Unless the context otherwise requires, all references to sections or subsections are to articles, sections or subsections of this Agreement.

(iv) As used in this Agreement, whenever reference is made to the trains, locomotives, cars or equipment of, or in the account of, one of the Parties hereto, such expression means the trains, locomotives, cars and equipment in the possession of or operated by such Party and includes such trains, locomotives, cars and equipment which are owned by, leased to, or in the account of such Party.

(b) Capitalized Terms.

All capitalized terms shall have the defined meaning set forth below:

"Accounting Conversion Date" shall have the meaning given that term in Section 7(a).

"Agreement" shall have the meaning given that term in the introductory paragraph.

"Ancillary Agreements" shall mean agreements assigned pursuant to the Unified Assignment and Assumption Agreement.

"BNSF" shall have the meaning given that term in the Recitals.

"Claim" or **"Claims"** shall mean any and all claims, demands, losses (including the loss of use), costs (including investigation, remedial and clean-up costs), expenses (including attorneys', consultants' or experts' fees and expenses), judgments, awards, penalties, governmental action (including fines and liens), causes of action, liens, suits or liability of every kind and nature suffered, including for exemplary, special or consequential damages.

"Designated Engineer" shall mean Chief Engineer or designee of NSR or KCSR.

"Designated Operator" shall have the meaning given that term in the Recitals.

"Effective Date" shall have the meaning given that term in Section 10(a).

REDACTED

"**Foreign Railroad**" shall mean a railroad that is not a party to this Agreement.

"**FRA**" shall mean the Federal Railroad Administration.

"**Freight Railroad Services**" shall have the meaning given that term in Section 5.

"**General and Administrative Services**" shall have the meaning given that term in Section 6.

"**Governmental Action**" shall mean any applicable law, rule, regulation or ordinance promulgated by any Governmental Entity having jurisdiction.

"**Governmental Entity**" shall mean any federal, state, local or foreign court, administrative agency or commission or other governmental or regulatory authority or commission or any arbitration tribunal.

"**Infrastructure Improvement Services**" shall have the meaning given that term in Section 4.

"**Infrastructure Improvement Project**" shall have the meaning given that term in Section 4(a)(i).

"**Infrastructure Improvement Project Cost**" shall have the meaning given that term in Section 4(a)(i).

"**Jackson Trackage Rights Section**" shall mean the approximately four-tenths of a mile section of track in Jackson, Mississippi that is controlled by Canadian National (as successor to Illinois Central Gulf Railroad Company pursuant to that certain trackage rights agreement (the "MSR Trackage Rights Agreement"), as supplemented and amended from time to time, dated March 26, 1986, between Midsouth Rail Corporation and Illinois Central Gulf Railroad Company.

"**Joint Operating Committee**" shall have the meaning given that term in the Meridian Speedway LLC Agreement.

"**JOC**" shall mean the Joint Operating Committee.

"**KCSR**" shall have the meaning given that term in the introductory paragraph.

"**KCSR Key Contact**" shall have the meaning given that term in Section 2(j).

"**KCSR Joint Use Agreement**" shall have the meaning given that term in the Recitals.

"**Lien**" shall have the meaning given that term in Section 10(b)(i).

"**LLC Agreement**" shall mean the Limited Liability Company Agreement of MSLLC.

"**Maintenance Services**" shall have the meaning given that term in Section 3.

REDACTED

"Master KCS-MSLLC Interchange Agreement" shall have the meaning given that term in the Recitals.

"Material Change" shall have the meaning given that term in Section 4(b)(iii).

"MSLLC" shall have the meaning given that term in the introductory paragraph.

"MSR Trackage Rights Agreement" shall have the meaning given that term in the Recitals.

"Monthly Statement" shall have the meaning given that term in Section 10(n)(ii).

"NSC" shall have the meaning given that term in the Recitals.

"NSR" shall have the meaning given that term in the Recitals.

"NSR Joint Use Agreement" shall have the meaning given that term in the Recitals.

"NSR Revenues" shall have the meaning given that term in Section 7(a).

"Operating Agreement" shall have the meaning given that term in the introductory paragraph.

"Parties" shall have the meaning given that term in the introductory paragraph.

"Party" shall have the meaning given that term in the introductory paragraph.

"Plans" shall have the meaning given that term in Section 4(b)(i).

"Revised Infrastructure Improvement Project Cost Estimate" shall have the meaning given that term in Section 4(d)(i).

"**Services**" shall have the meaning given that term in Section 2(a).

"**Subject Trackage**" shall have the meaning given that term in Section 1(c).

"**Third Party Traffic**" shall mean freight rail service provided for a Foreign Railroad under a haulage or trackage rights agreement between MSLLC and the Foreign Railroad.

"Transaction Agreement" shall have the meaning given that term in the Recitals.

"USOA" shall mean the uniform system of accounts prescribed for Class 1 railroads by the STB or any successor federal agency that succeeds to the functions of the STB in prescribing uniform systems of accounts for rail carriers, provided, that if there shall be no STB and no such federal agency, USOA shall mean such system of accounts as is generally maintained by rail carriers consistent with GAAP as applied in the rail industry.

"Work" shall mean all tasks, duties, obligations, services, requirements and activities of whatever kind or nature, express or implied, direct or incidental, to be performed, and all items

tangible and intangible, to be provided by KCSR at the direction of MSLLC, respecting the Infrastructure Improvements pursuant to this Agreement, including but not limited to preliminary engineering design and review, construction, construction monitoring and inspection, and the furnishing of materials, supplies and equipment associated with the Infrastructure Improvement Projects.

(c) Subject Trackage and the Jackson Trackage Rights Section.

A reference to the Subject Trackage shall be:

(i) A reference to the railroad line generally running between Shreveport, LA and Meridian, MS, depicted in Appendix A – Railroad Premises Description, together with the adjacent property of every kind and description, real, personal and mixed, including the right-of-way, roadbed, tracks, track materials, poles, wire lines, signals, and other related facilities, as more fully described in Appendix A– Railroad Premises Description, and generally consisting of all the property conveyed to MSLLC from KCSR pursuant to the Transaction Agreement, excluding the Jackson Trackage Rights Section, and including any newly constructed track if constructed by MSLLC and the Jackson Flyover, if constructed; and

(ii) The Jackson Trackage Rights Section, which consists of that trackage covered by the MSR Trackage Rights Agreement, provided such MSR Trackage Rights Agreement is assigned to MSLLC.

SECTION 2. KCSR AS DESIGNATED OPERATOR

(a) MSLLC hereby retains and engages KCSR, and KCSR agrees to become and act as the Designated Operator for the Subject Trackage to provide all services as necessary or appropriate to conduct the business of MSLLC, which services shall include Maintenance Services, Infrastructure Improvement Services, Freight Railroad Services, and General and Administrative Services, on behalf of MSLLC (collectively, "Services").

(b) It is the intention of the Parties that KCSR be compensated for its fully allocated costs in providing the Services as provided in Section 7. Damages allocated to KCSR due to application of the Uniform Liability Agreement shall not be counted as costs of provision of the Services.

(c) KCSR shall not have any liability to MSLLC or NSR based on KCSR's obligations or performance as the Designated Operator for Claims covered by the Unified Liability Agreement other than as set forth therein. With respect to FELA claims, trespasser claims, employment claims, and claims arising from train operations (including derailments, crossing accidents and collisions), KCSR's liability shall be solely as provided in the Unified Liability Agreement and nothing in this Agreement shall be a basis for any KCSR liability with respect to such claims. With respect to other third party claims, KCSR shall indemnify MSLLC and NSR for any liability caused by KCSR's breach of this Agreement. KCSR shall have no liability under this Agreement other than as set forth specifically in this paragraph (and except for the injunctive remedies provided for in Section 9(a) hereof).

REDACTED

(d) It is the intention of the Parties that Section 2(a) be read expansively, including the notion that MSLLC hires KCSR to maintain and operate the Subject Trackage as if the Subject Trackage were a continual integral part of KCSR's freight rail system, except to the extent set forth herein and except to the extent that the Services shall be performed on behalf of MSLLC rather than KCSR. In this regard, KCSR shall:

(i) act in accordance with its then-current collective bargaining agreements as if the Subject Trackage was an integral part of the KCSR railroad network;

(ii) observe and comply with any and all requirements of the constituted public authorities and with all applicable federal, state and local statutes, ordinances, regulations and standards applicable to MSLLC, KCSR or KCSR's operation of the Subject Trackage on behalf of MSLLC; and

(iii) obtain all applicable approvals, authorizations, franchises, licenses, and permits of any Governmental Entity as may be required.

As the Designated Operator, KCSR may execute agreements or other documents on behalf of MSLLC pursuant to appropriate authorization from MSLLC.

(g) KCSR's Relationship to Transported Traffic.

(i) KCSR shall not, pursuant to this Agreement, have any right (although it may have that right independent of this Agreement) to establish rates, charges, service terms, routes or divisions, or to collect freight revenues, relating to freight traffic transported over all or any portion of the Subject Trackage.

(ii) KCSR shall not, pursuant to this Agreement (although it may have that right independent of this Agreement), participate or appear in, or quote or establish, any rates, routes or divisions, or enter into any transportation contracts (other than this Agreement), relating to any freight traffic whatsoever that is transported over all or any portion of the Subject Trackage.

(iii) KCSR shall not, pursuant to this Agreement (although it may have that right independent of this Agreement), have any right to require shippers or carriers to provide to KCSR the nature, level or existence of any rates or charges levied against, charged to or otherwise applicable to shippers for traffic that moves over all or any portion of the Subject Trackage.

(iv) KCSR shall not, by reason of this Agreement (although it may have that responsibility independent of this Agreement), have any responsibility for railcar ownership costs, including per-diem charges and mileage allowances, for car hire, demurrage or detention charges for traffic that moves over all or any portion of the Subject Trackage.

(h) KCSR shall not, by reason of this Agreement, have any right to permit any rail carrier access to operate over or use the Subject Trackage via trackage rights, haulage rights or any other means.

REDACTED

(i) Access to the Railroad Premises and Provision of Equipment.

MSLLC hereby provides KCSR with access to and use of the Subject Trackage, under the terms and conditions of this Agreement, for the purposes of providing the Services. MSLLC, its members, or their respective designated representatives, shall have the right to enter upon the Subject Trackage upon reasonable notice at any time for the purpose of inspecting and examining the property, the facilities, and the performance of the obligations of KCSR hereunder.

(j) Appointment of a KCSR Key Contact

KCSR promptly shall appoint and maintain a single point of contact ("KCSR Key Contact") to provide MSLLC and its members a single person at KCSR with whom MSLLC and its members may communicate regarding the management, supervision, maintenance, and use of the Subject Trackage. The KCSR Key Contact shall be a member of the Joint Operating Committee ("JOC"), as defined in the LLC Agreement. KCSR shall promptly notify MSLLC and its members of the name and contact information of the KCSR Key Contact, and any replacement thereof.

SECTION 3. MAINTENANCE SERVICES

Maintenance Services shall include the management, administration, supervision, and performance of all Maintenance Services concerning the Subject Trackage, including but not limited to, routine maintenance and inspection, additional non-routine maintenance, and grade crossing facility maintenance.

(a) Routine Maintenance and Inspection.

KCSR shall perform the inspection and routine, non-catastrophic, and non-capital maintenance and repair of the Subject Trackage right-of-way, track, communications, and signals fixtures and appurtenances.

(b) Additional Non-Routine Maintenance and Repair.

KCSR shall perform any non-routine maintenance, repair, upgrade, or additional maintenance and repair item that is required in order to keep the Subject Trackage in the operating condition specified by Section 3(e) of this Agreement.

(c) Grade Crossing Facility Maintenance and Repair.

KCSR shall undertake and perform any grade crossing facility maintenance, repair and inspection obligation of MSLLC arising from the creation or maintenance of any public highway-railroad grade crossing or private grade crossing, including any present or future obligations that may arise as a result of the receipt of funding or other support from a Governmental Entity for the grade crossing warning devices or other highway-railroad grade crossing facility. KCSR shall undertake and perform the obligations of MSLLC pursuant to any

agreements covering the maintenance or operation of any public highway-railroad grade crossing of such facilities which are on or adjacent to the Subject Trackage.

(d) Ownership Of Materials

Any rails, ties and other items of track, signaling equipment or other materials that KCSR installs into the Subject Trackage in furtherance hereof shall become the property of MSLLC. Any rails, ties and other items of track, signaling equipment or other materials that KCSR removes from the Subject Trackage in furtherance hereof shall become the property of KCSR, and MSLLC shall be credited for its value regardless of whether such removed property is sold or thereafter retained by KCSR for material and supplies.

(e) Minimum Standards

In performing the Maintenance Services, KCSR shall keep and maintain the Subject Trackage, including any buildings or other structures used by or leased or occupied by KCSR thereon, in good operating condition and repair in a manner consistent with sound, accepted engineering principles and maintain the main line of the Subject Trackage to a minimum of FRA Class 3 standards, capable of handling cars of 286,000 lbs.

SECTION 4. INFRASTRUCTURE IMPROVEMENT SERVICES

(a) Requirement to Construct Specified Infrastructure Improvements.

(i) Existing Infrastructure Improvement Projects.

Subject to and in accordance with the terms and conditions of this Agreement, KCSR shall perform, at the direction of MSLLC, the Work in connection with the infrastructure improvement projects as shown on Appendix B – Infrastructure Improvement Projects. Each separate project shall be hereinafter referred to as an "Infrastructure Improvement Project," and the cost of construction of the Infrastructure Improvement Project shall be hereinafter referred to as an "Infrastructure Improvement Project Cost."

(ii) New Infrastructure Improvement Projects.

During the term of this Agreement, KCSR shall perform such additional Infrastructure Improvement Projects as MSLLC may from time to time require, provided, however, that no additional Infrastructure Improvement Projects shall be constructed unless approved by MSLLC's members in accordance with the LLC Agreement.

(b) Project Plans and Specifications.

(i) Preparation and Approval.

KCSR shall prepare, and/or shall cause to be prepared, all plans, specifications and drawings necessary or appropriate to the Work to be performed by KCSR hereunder. Those plans, specifications, and drawings prepared by or on behalf of KCSR shall be

subject to the review and approval of the JOC. If the JOC cannot reach agreement on whether or not the plans should be approved, the Management Committee shall be charged with the decision to approve the plans. Approved plans, specifications and drawings, whether in original or amended form, are referred to as the "Plans." Approved Plans shall become the property of MSLLC.

(ii) Activities Not Specified by Plans.

KCSR, in its performance and/or direction of the Work, shall provide all services that are reasonably necessary or appropriate, whether or not specified in the Plans, to preserve and maintain MSLLC's property and operations in compliance with all applicable laws, ordinances, rules and regulations of Governmental Entities and MSLLC's contractual obligations, including, but not limited to, existing or proposed third party agreements and collective bargaining agreements. Further, KCSR shall furnish, and/or shall cause to be furnished, any material necessary to the provision of such services, and shall perform, and/or shall cause to be performed, any such activities as fully as if they were particularly delineated or described by the Plans.

(iii) Material Changes.

In the event that KCSR determines that the Work or materials to be provided by KCSR pursuant to this Agreement will require a material deviation from the Plans or determines that an unanticipated condition(s) will result in an increase of the costs of any particular Infrastructure Improvement Project in excess of ten percent (10%) of the costs for said particular Infrastructure Improvement Project or the total estimated costs, as the case may be (in any case, a "Material Change"), KCSR shall promptly notify the JOC and act in accordance with its direction.

(iv) Effect of Approval of Plans.

By its review and approval of Plans by the JOC or the Management Committee, KCSR, MSLLC, and NSR signify that such Plans and improvements constructed in accordance with the Plans satisfy their approval.

(v) Compliance with Plans.

KCSR shall construct the Infrastructure Improvement Projects in accordance with the Plans, as may be modified from time to time.

(c) Conduct of Work.

(i) Right(s) of Entry.

MSLLC grants to KCSR and NSR, and to the extent necessary KCSR grants to MSLLC and NSR, a non-exclusive right and permission to enter upon MSLLC's and KCSR's respective property to the extent reasonable and necessary for the performance, supervision and oversight of the Work, along such routes and upon such terms as may be

defined and imposed by MSLLC, and upon such temporary construction easements as may be designated on the Plans.

(ii) Property Acquisition.

If any additional real property interests are needed in order to construct an Infrastructure Improvement Project, MSLLC shall be solely responsible for acquiring such real property interests at MSLLC's sole expense. The acquisition of sufficient interest to the real property as may be needed for performance of an Infrastructure Improvement Project will be a precondition to KCSR's responsibility to construct such Infrastructure Improvement Project.

(iii) Construction Schedule.

Upon approval of Plans, KCSR shall develop a construction schedule satisfactory to the JOC or the Management Committee. KCSR shall use commercially reasonable efforts to attempt completion of the Infrastructure Improvement Project within the construction schedule. Consistent with this Agreement, KCSR shall manage and execute the Work to cause the least practicable amount of interference with the operation, management, maintenance, business, or traffic over the Subject Trackage.

(iv) Provision of Labor, Materials And Equipment

KCSR shall furnish, and/or shall cause to be furnished, all labor, materials, supplies, tools, and equipment needed for the Infrastructure Improvement Projects.

(v) Workmanship and Material Standards.

All materials of every description furnished by KCSR under this Agreement and all workmanship shall be of a grade specified in Plans, and such material shall be of an acceptable quality for the purpose intended.

(vii) Safety and Operating Rules.

KCSR shall use the utmost diligence in the prosecution of the Work pertaining to the Infrastructure Improvement Projects to effectively guard against all accidents on or damages to the Subject Trackage in its performance of the Work.

(d) Cost of the Construction of the Infrastructure Improvement Projects.

(i) KCSR and NSR have estimated the cost of construction of the Infrastructure Improvements Projects as shown by the cost statement attached as Appendix C – Infrastructure Improvement Project Cost Estimate. The Designated Engineers for each party will meet at least once each quarter to discuss the progress of the Work and to review the actual Infrastructure Improvement Project Costs incurred up to that point. In the event that KCSR anticipates that actual Infrastructure Improvement Project Costs may exceed such estimate by ten percent (10%) or more, (including, but not limited to, Material Changes), KCSR shall provide MSLLC and NSR with a proposed

REDACTED

Revised Infrastructure Improvement Project Cost estimate for MSLLC's and NSR's review. If the Designated Engineers mutually determine that a new estimate is required, KCSR shall prepare same and submit it to the JOC for approval. Upon the JOC's approval, or the approval of the Management Committee if the JOC cannot reach agreement, of the proposed revised estimate, such revised estimate shall replace Appendix C of this Agreement ("Infrastructure Improvement Project Cost Estimate"). The Revised Infrastructure Improvement Project Cost Estimate will then govern the Infrastructure Improvement Project Costs for the Work.

(ii) MSLLC shall bear the Infrastructure Improvement Project Costs.

(e) Invoices.

(i) From time to time, KCSR shall submit statements to MSLLC, with a copy to NSR, for Infrastructure Improvement Project Costs incurred at the direction of MSLLC. MSLLC shall remit payment of the invoiced sum to KCSR within thirty (30) days following receipt of such invoice.

(ii) Following the completion of each Infrastructure Improvement Project, KCSR shall submit to MSLLC, with a copy to NSR, a final invoice for that Infrastructure Improvement Project that shall reconcile the total Infrastructure Improvement Project Cost, less the total payments received by KCSR for such Infrastructure Improvement Project, less the total outside or third-party funding received for the Infrastructure Improvement Project (if any). Within thirty (30) days of delivery of such invoice, MSLLC shall then pay the balance of unpaid Infrastructure Improvement Project Costs to KCSR.

(iii) Invoices submitted by KCSR pursuant to this Section 4 shall have sufficient detail (including identification of any applicable Infrastructure Improvement Project component) that will reasonably enable MSLLC and NSR to verify the invoices and statements and to audit work performed. No payments shall be withheld on account of a billing dispute. Disputes shall be resolved in accordance with the provisions of Section 11(e) of this Agreement. KCSR shall maintain records pertaining to Infrastructure Improvement Project Costs and shall allow the other parties reasonable access to such records for the purpose of verifying Infrastructure Improvement Project Costs.

(f) Payment on Invoices.

All invoices from KCSR to MSLLC pursuant to this Section 4 shall be delivered to MSLLC and NSR in accordance with Section 11(f) of this Agreement. All payments shall be made by electronic funds transfer or by a check.

(g) Completion of Project.

Each Infrastructure Improvement Project shall be deemed completed upon the final inspection and acceptance of all Work by each of the Designated Engineers or their respective representatives, and shall be confirmed by a certification letter executed by the respective

REDACTED

Designated Engineers designating the date of completion of said Infrastructure Improvement Project.

(h) Permits.

KCSR shall prepare, prosecute and procure in MSLLC's name and account all permits and/or approvals required by any Governmental Entity for the Work and/or completion of the Infrastructure Improvement Projects.

(i) Dispute Resolution.

In the event of a dispute between them as to any matter arising under Section 4 of this Agreement that solely concerns design and construction of the Infrastructure Improvement Projects, the Designated Engineers shall attempt to resolve such dispute. If they are unable to do so, the Designated Engineers shall submit the matter to the JOC. If the JOC is unable to resolve the dispute, the Management Committee shall resolve the dispute in accordance with the LLC Agreement.

(j) Ownership of Infrastructure Improvements.

KCSR's construction of any and all Infrastructure Improvement Projects shall be performed on behalf of MSLLC, and ownership of said Infrastructure Improvements Projects shall, as between KCSR and MSLLC, lie with MSLLC. Upon completion of an Infrastructure Improvement Project, said Infrastructure Improvement Project shall become a part of the Subject Trackage covered by this Agreement.

SECTION 5 – FREIGHT RAILROAD SERVICES

Freight Railroad Services shall include the management, administration, supervision, and performance of all railroad services over the Subject Trackage on behalf of MSLLC, including but not limited to the following:

(a) provision of haulage services and access for trackage rights pursuant to the NSR Joint Use Agreement and the KCSR Joint Use Agreement;

(b) in accordance with the NSR Joint Use Agreement and the KCSR Joint Use Agreement, provide schedules and timetables for regularly scheduled trains operating over the Subject Trackage, as well as any proposed modifications thereto, to each of MSLLC, NSR and KCSR, and to such other carriers or persons as MSLLC may specifically direct;

(c) provision of train and crew dispatching, scheduling and traffic movement control, switching and yard services, for all trains over the Subject Trackage, as directed by MSLLC;

(d) weighing railcars when requested, required, or needed;

(e) provision of fuel, sand, and service for locomotives when required, requested, or needed;

REDACTED

(f) provision of such labor and materials as may be required to perform, and performance of light repairs on bad ordered railcars as may be necessary to make such railcars legal and safe for movement, or, for any such bad ordered railcars that cannot reasonably be made legal and safe for movement, arrangement for the appropriate removal of the affected railcar in accordance with MSLLC's instructions;

(g) provision of special services from time to time as is requested by MSLLC with respect to trains, locomotives and railcars;

(h) provision of rerailing, wrecking service or wrecking train service as may be required, including the repair and restoration of roadbed, track, structures and the environment, as promptly as possible;

(i) preparation of an Operating Plan and operating protocols, which shall be subject to the review and approval of JOC or the Management Committee;

(j) preparation and submission to the JOC and the Management Committee of a program maintenance plan.

SECTION 6. GENERAL AND ADMINISTRATIVE SERVICES

(a) General and Administrative Services shall include the management, administration, supervision and performance of all general and administrative services necessary or appropriate to conduct the business of MSLLC, including, but not limited to:

(i) accounting, treasury, and tax services;

(ii) legal services, pursuant to the direction of MSLLC;

(iii) claims handling;

(iv) information technology services;

(v) ancillary agreement management;

(vi) human resources and labor relations services.

(b) Ancillary Agreement Management

(i) KCSR shall manage, on behalf of MSLLC, any Ancillary Agreements that are assigned to MSLLC pursuant to the Omnibus Assignment and Assumption Agreement. Such management shall include the collection and payment of rents and fees, the providing and receipt of notices and other communications as required or advisable, and the performance and receipt of the performance of such other acts as may be required or advisable under such Ancillary Agreements, all in accordance with the terms and conditions thereof and KCSR's existing practices.

(ii) Within a reasonable period of time prior to the date such action is

REDACTED

required, KCSR shall present to MSLLC any Ancillary Agreement subject to renewal or termination, together with KCSR's recommendation concerning renewal or termination. Upon approval of the JOC or the Management Committee, KCSR shall review and execute all documents reasonably required for such renewal or termination.

(iii) KCSR shall account to MSLLC for any amounts received and any amounts paid by KCSR pursuant to such agreement.

(iv) KCSR shall negotiate agreements similar to the Ancillary Agreements upon direction of, and for the execution of, MSLLC. MSLLC shall be a party to all the same. KCSR shall report periodically to MSLLC the nature of said proposed new ancillary agreements, as well as the status of any negotiations thereof. KCSR shall provide any negotiated new MSLLC ancillary agreement to the JOC for review and execution.

(v) Once a new ancillary agreement has been assigned to MSLLC, that agreement shall become an ancillary agreement to be managed by KCSR pursuant to this Section.

(c) Books of Record and Account And Access To Same.

KCSR shall keep proper books of record and account in which full and correct entries shall be made of all costs, expenses, and revenues performed as part of its Services. Such books of record and account shall be in accordance with then-current generally accepted accounting principles and the USOA and shall be readily identifiable by distinct accounting codes. KCSR shall give to each of MSLLC and NSR access, during normal business hours, to inspect and make copies of any and all books of record and accounts relating to this Agreement, all of which shall be maintained by KCSR at its headquarters in Kansas City, MO, or such other location as KCSR shall specify to MSLLC and NSR from time to time.

SECTION 7. COMPENSATION

(a) Until [

], MSLLC shall pay to KCSR an Operating Fee [

].

(b) Subsequent to [ ], MSLLC shall pay to KCSR an Operating Fee equal to[

REDACTED

]·

SECTION 8. TERM AND TERMINATION

(a) Effective Date.

This Agreement shall become effective following the latest date of: (i) the date first written above; (ii) receipt of any required regulatory approvals or exemptions; and (iii) the expiration of any time periods required by the issuance of labor notices by KCSR and/or MSLLC, should such labor notices be required ("Effective Date"). The Parties shall determine the Effective Date through an exchange of written correspondence.

(b) Term.

This Agreement shall commence on the Effective Date, and, except as provided for in Section 8(c), shall continue for the duration of the joint venture or until terminated hereunder.

(c) Termination.

(i) This Agreement shall be terminated, without penalty or payment to either Party, should MSLLC no longer own or control the Subject Trackage.

(ii) This Agreement shall be terminated, without penalty or payment to either Party, should KCSR discontinue railroad operations pursuant to the KCSR Joint Use Agreement over all or substantially all of the Subject Trackage.

(iii) This Agreement may be terminated, without penalty or payment to either Party, by mutual agreement of the Parties.

SECTION 9. REMEDIES AND INSURANCE

(a) Breach of this Agreement.

Each Party acknowledges and agrees that the other Party would be irreparably damaged in the event any of the provisions of this Agreement were not performed by it in accordance with their specific terms or were otherwise breached. It is accordingly agreed that, except as provided in Section 2(c), each Party shall be entitled to an injunction or injunctions to prevent further breaches of such provisions and to specifically enforce such provisions as the exclusive remedy for breaches of this Agreement.

(b) Service Standard Failure Indemnification.

KCSR shall indemnify MSLLC for any Service Standard Failure payment requirement in accordance with the NSR Joint Use Agreement. No costs associated with the indemnification provided by KCSR pursuant to this Section 9(b) shall be considered to be a cost of providing services for the purpose of determining compensation payable to KCSR under this Agreement.

REDACTED

(c) Insurance.

KCSR shall ensure that the Subject Trackage and all services provided by KCSR pursuant to this Agreement are at all times covered by insurance to the same degree and in the same manner as maintained from time to time by KCSR and its affiliates for comparable property and operations. In addition, KCSR shall cause MSLLC and NSR to be named as additional named insureds under any and all such policies.

SECTION 10. CONDEMNATION AND LIENS

(a) Condemnation.

If any or all of the Subject Trackage is condemned or taken by any competent authority, the award for payment of damages resulting therefrom, or any amount paid in settlement thereof, shall be paid to and retained by, in its entirety, MSLLC and no other Party shall have a claim to such proceeds. If the entire Subject Trackage is so taken, or such substantial portion thereof as shall materially impair or interfere with KCSR's ability to perform the Services, this Agreement shall terminate as of the date of such taking, without penalty to either Party, otherwise this Agreement shall continue in full force and effect as to the remainder thereof.

(b) Liens.

(i) KCSR shall not create, permit to be created, or permit to remain undischarged, any contingent or actual lien or other encumbrance of any kind (each a "Lien") as to the Subject Trackage that: (A) arise out of the obligations it has undertaken pursuant to this Agreement; (B) involve materials and/or supplies furnished and/or delivered by KCSR; or (C) arise out of any mortgage, conditional sale, security agreement or chattel mortgage not related to the Transaction Agreement.

(ii) KCSR shall provide notice to MSLLC and NSR of any Lien against the Subject Trackage or any part thereof. KCSR shall, within ten (10) days after demand from MSLLC or NSR, cause the same to be discharged of record by payment, deposit, bond, order of a court of competent jurisdiction or otherwise at MSLLC's expense. If KCSR fails to cause such Lien to be discharged within the aforesaid time, then MSLLC or NSR may arrange to discharge such Lien by the lienor and pay the amount of the judgment in favor of the lienor with interest, costs and allowances.

SECTION 11. PROVISIONS OF GENERAL APPLICATION

(a) Mileage and Car Hire.

As between KCSR and MSLLC, nothing in this Agreement shall modify any existing mileage and car hire charges allocations or any mileage and car hire charges obligations pursuant to the NSR Joint Use Agreement or the KCSR Joint Use Agreement .

(b) Force Majeure.

REDACTED

The obligations, other than payment obligations, of the Parties to this Agreement shall be subject to force majeure (including strikes, riots, floods, accidents, Acts of God, acts of terrorism, and other causes or circumstances beyond the control of the Party invoking such force majeure as an excuse for nonperformance), but only as long as, and to the extent that, such force majeure shall reasonably prevent performance of such obligations by the affected Party. In the event that an event of force majeure impairs either Party's ability to fulfill its obligations to the other Party under this Agreement, said Party shall take all commercially reasonable measures to restore performance of its obligations in a timely manner.

(c) Successors and Assigns.

(i) This Agreement shall inure to the benefit of and be binding upon each of the Parties and their respective successors and permitted assigns. Third party beneficiary status shall inure to the benefit of NSR and each of its successors and permitted assigns.

(ii) Except as otherwise specifically provided hereinafter, neither Party may assign this Agreement, or any of its rights, interests or obligations hereunder, including by operation of law, without the prior consent in writing of the other Party, which consent may be withheld at the discretion of such other Party.

(iii) In the event of a sale of substantially all of the assets or business of KCSR, or the merger or consolidation of KCSR into or with a firm or corporation not controlled by KCS, KCSR may, without the prior consent of MSLLC, assign this Agreement to such firm or corporation acquiring substantially all of the assets or business of KCSR, or merging or consolidating with KCSR; provided, however, that such assignment shall not transfer or extinguish any liability or obligation of KCSR under this Agreement that existed prior to such assignment.

(iv) In the event of a sale of substantially all of the assets or business of MSLLC, or the merger or consolidation of MSLLC, MSLLC may, without the prior consent of KCSR, assign this Agreement to such firm or corporation acquiring substantially all of the assets or business of MSLLC, or merging or consolidating with MSLLC; provided, however, that such assignment shall not transfer or extinguish any liability or obligation of MSLLC under this Agreement that existed prior to such assignment.

(d) Invalid or Unenforceable Provisions.

If any provision of this Agreement or the application thereof to any Party hereto or to any circumstance shall be determined by a court of competent jurisdiction to be invalid or unenforceable to any extent or for any reason, the remainder of this Agreement or the application of the provisions thereof to such Party or circumstance, other than those determined to be invalid or unenforceable, shall not be affected thereby and shall be enforced to the fullest extent permitted by law, and the Parties shall promptly enter into such other agreement(s) as their respective legal counsel may deem appropriate in order to replace such invalid or unenforceable provisions in a manner that produces a result which is substantially equivalent to the terms of this Agreement in all material respects.

REDACTED

(e) Arbitration.

(i) Except as otherwise provided for in this Agreement, any dispute arising between the Parties with respect to an alleged breach of this Agreement shall be referred to the JOC for resolution and if the JOC is unable to resolve the dispute, it shall be referred to the Management Committee, provided however, that any Member (as defined in the LLC Agreement) may submit the dispute for binding arbitration by a panel of three independent arbitrators before the American Arbitration Association under the Commercial Arbitration Rules, who shall render a written decision on the controversy. The written decision of the arbitrators, reached upon a majority vote, shall be final and conclusive upon the Parties. Each Party to the arbitration shall pay the compensation, costs, fees, and expenses of its own witnesses, experts, and counsel. The compensation, costs, and expenses of the three arbitrators, if any, shall be borne by KCSR and MSLLC, with each paying 50 percent of such compensation, costs, and expenses. The arbitrators shall not have the power to award consequential or punitive damages or to determine violations of criminal or antitrust laws, or to render any award for damages other than is provided for in Section 2(c). Pending the written decision of the arbitrators, there shall be no interruption in the transaction of business under this Agreement, and all payments in respect thereto shall be made in the same manner as prior to the arising of the dispute until the matter in dispute shall have been fully determined by arbitration.

(ii) As a Third Party Beneficiary, NSR may initiate and prosecute arbitration pursuant to this Section 11(e) on behalf of MSLLC. Provided that MSLLC does not enter into the arbitration in its own stead, MSLLC shall cooperate with NSR in the preparation for, and the initiation and prosecution of, such arbitration, at NSR's expense.

(f) Notice.

Any notice required or permitted to be given by one Party to the other Party under this Agreement shall be deemed given on the date sent by certified mail, or by such other means as the Parties may mutually agree, and shall be addressed as follows:

(i) If to KCSR:

Chief Operating Officer
The Kansas City Southern Railway Company
P.O. Box 219335
Kansas City, MO 64121-9335

with a copy to:

Senior Vice President and General Counsel
The Kansas City Southern Railway Company
P.O. Box 219335
Kansas City, MO 64121-9335

(ii) If to MSLLC:

REDACTED

Chief Operating Officer
The Kansas City Southern Railway Company
P.O. Box 219335
Kansas City, MO 64121-9335

Executive Vice President Operations
Norfolk Southern Corporation
Three Commercial Place
Norfolk, Virginia 23510-2191

with a copy to:

Senior Vice President and General Counsel
The Kansas City Southern Railway Company
P.O. Box 219335
Kansas City, MO 64121-9335

Senior Director – Joint Facilities
Norfolk Southern Corporation
1200 Peachtree Street, N.E., Box 158
Atlanta, Georgia 30309

(iii) If to NSR:

Executive Vice President Operations
Norfolk Southern Corporation
Three Commercial Place
Norfolk, Virginia 23510-2191

with a copy to:

Senior Director – Joint Facilities
Norfolk Southern Corporation
1200 Peachtree Street, N.E., Box 158
Atlanta, Georgia 30309

Any of MSLLC, KCSR or NSR may provide changes in the above addresses to the others by personal service or certified mail.

(g) Confidentiality.

(i) Except as provided by law or by rule, order, or regulation of any Governmental Entity or the New York Stock Exchange, or in connection with an audit by the Internal Revenue Service or other tax authority, or as may be necessary or appropriate for a Party hereto to enforce its rights under this Agreement, during the Term of this Agreement, and for a period of three (3) years after termination of this Agreement, the terms and provisions of this Agreement and all information to which access is provided or which is obtained hereunder will be kept confidential and will not be disclosed by

REDACTED

either Party to any person other than members, officers, employees, independent auditors and attorneys, without the prior written approval of the other Party.

(ii) Notwithstanding the foregoing Section 10(g)(i), the Parties acknowledge and agree that in any STB proceeding, the Parties may be required to submit this Agreement into the record. The Parties will propose to request a protective order to protect the payment provisions of this Agreement. Following issuance of a protective order, a copy (with the highly confidential provisions redacted) may be entered into the public STB record and a highly confidential unredacted copy of this Agreement may be entered into the STB record subject to the provisions of the applicable protective order.

(h) Third Party Beneficiaries.

This Operating Agreement and each and every provision hereof is for the exclusive benefit of the Parties hereto and not for the benefit of any third party, except NSR.

(i) Entire Understanding.

This Agreement contains the entire understanding of the Parties hereto with respect to the subject matter hereof and supersedes any and all oral understandings between the Parties.

(j) Waiver.

No term or provision of this Agreement may be changed, waived, discharged or terminated except by an instrument in writing and signed by all Parties. No consent or waiver, expressed or implied, by a Party of any breach or default by the other Party in the performance by such other Party of its obligations hereunder shall be deemed or construed to be a consent to or waiver of any other breach or default in the performance hereunder by such other Party. Failure on the part of a Party to complain of any act or failure of the other Party or to declare the other Party in default, irrespective of how long such failure continues, shall not constitute a waiver by such first mentioned Party of its rights hereunder.

(k) Drafters.

This Agreement is the result of mutual negotiations between the Parties hereto, neither of whom shall be considered the drafter for purposes of contract construction.

(l) Choice of Law.

This Agreement shall be governed and interpreted in accordance with the laws of the State of Delaware, without regard to application of the choice of law principles thereof.

(m) Execution in Counterparts.

This Agreement may be executed in any number of counterparts, each of which shall be deemed to be an original, but all such separate counterparts shall together constitute but one and the same instrument.

REDACTED

(n) Invoices and Payment of Bills.

(i) Except with regard to invoices and payments of bills covered by Section 4(e), this Section 10(n) shall govern the invoicing and payment of bills for matters arising pursuant to this Agreement.

(ii) On or before the 15th day of each calendar month during the term of this Agreement, KCSR shall prepare and deliver to MSLLC and NSR a statement setting forth the charges to be invoiced in accordance with agreement and the basis for the charges, (the Monthly Statement"). KCSR shall deliver the Monthly Statement to MSLLC and to NSR's designee in electronic format. MSLLC shall make payment to KCSR within thirty (30) days after the date of such Monthly Statement, with confirmation of such payment provided to NSR.

(iii) Any dispute regarding the amount of a Monthly Statement shall be reconciled between the Parties (including NSR) using the JOC or the Management Committee, and any adjustment resulting from such reconciliation shall be reflected in a subsequent Monthly Statement. If MSLLC or NSR disputes any portion of a Monthly Statement, MSLLC shall nevertheless pay such Monthly Statement in full, subject to adjustment upon resolution of the dispute; provided, however, that (A) no exception to any charge in a Monthly Statement shall be honored, recognized or considered if filed after the expiration of three (3) years from the date of the Monthly Statement, and (B) no invoice shall be rendered more than three (3) years (a) after the last day of the calendar month in which the expense covered thereby is incurred, or (b) in the case of charges disputed as to amount or liability, after the amount owed or liability therefor is established. Any claim for the adjustment of a Monthly Statement shall be deemed to be waived if not made in writing within three (3) years after the date of the relevant Monthly Statement.

(iv) All invoices submitted by KCSR under this Agreement shall be consistent with the books and records maintained by KCSR pursuant to Section 7(a) hereof.

SECTION 12. AUDIT

KCSR, MSLLC, and NSR shall each have the right to audit the records of the other Parties pertaining to the subject matter of this Agreement, with each Party bearing its own expense, and any invoice issued by KCSR pursuant to this Agreement, provided such audit is initiated at any time within three (3) years of the date of the relevant invoice. All such audits shall be conducted at reasonable intervals, locations, and times. All such audits shall be prosecuted with reasonable due diligence. Each agrees that all information disclosed to it or its representatives in connection with such an audit will be held in strictest confidence and will not be disclosed to any third party (other than to an arbitrator in connection with an arbitration conducted pursuant this Agreement or as required by applicable law). Any adjustment resulting from an audit conducted pursuant to this Section 12 with respect to which KCSR, MSLLC, and NSR are in concurrence shall be reflected in a subsequent invoice.

SECTION 13. STATUS OF KCSR

REDACTED

(a) In the performance of the services described herein, KCSR shall be an independent contractor of MSLLC. KCSR shall have managerial control with respect to the provision of the Services provided hereunder. All personnel of KCSR shall be subject to the direction, supervision and control of KCSR and not MSLLC or NSR. Nothing herein shall be interpreted as creating an association, partnership, joint venture or other joint undertaking between KCSR and MSLLC.

(b) For the Services provided by KCSR pursuant to this Agreement, KCSR may engage the services of subcontractors or agents to the extent consistent with KCSR's collective bargaining agreements.

REDACTED

IN WITNESS WHEREOF, the Parties hereto have caused this Agreement to be duly executed as of the date first above written.

EXHIBIT C
to Transaction Agreement

NORFOLK SOUTHERN RAILWAY COMPANY – MERIDIAN SPEEDWAY LLC JOINT USE AGREEMENT

THIS AGREEMENT (the "NSR Joint Use Agreement" or "Agreement") is entered into as of this ____ day of _____, 200__, by and between NORFOLK SOUTHERN RAILWAY COMPANY, a Virginia corporation ("NSR"), KANSAS CITY SOUTHERN ("KCS") AND THE KANSAS CITY SOUTHERN RAILWAY COMPANY, ("KCSR"), and MERIDIAN SPEEDWAY LLC, a Delaware limited liability company ("MSLLC"). NSR, MSLLC, and KCSR are referred to individually herein as a "Party" and collectively as the "Parties".

RECITALS:

WHEREAS, on December 1, 2005, KCS, KCSR, The Alabama Great Southern Railroad Company and Norfolk Southern Corporation ("NSC") entered into a transaction agreement (the "Transaction Agreement") that, among other things, provided for the creation of MSLLC, the transfer from KCSR to MSLLC of the Subject Trackage as defined herein, the construction, at MSLLC's cost, of certain infrastructure improvement projects, and the grant by MSLLC to Norfolk Southern Railway Company and KCSR of certain rights over the entirety of the Subject Trackage; and

WHEREAS, pursuant to the Transaction Agreement, MSLLC has agreed to grant NSR certain trackage and haulage rights for NSR to transport NS Traffic over the Subject Trackage; and

WHEREAS, pursuant to the Transaction Agreement, MSLLC has agreed to grant KCSR local and overhead trackage rights as necessary for KCSR to continue to conduct railroad operations over the Subject Trackage and to fulfill its common carrier obligations with respect to all traffic except for the right to transport NS Traffic and Third Party Traffic over the Subject Trackage ("KCS Trackage Rights"); and

WHEREAS, the Transaction Agreement anticipates that, pursuant to an Operating Agreement, MSLLC will hire KCSR to perform as the designated operator ("Designated Operator") for all railroad operations on behalf of MSLLC, including MSLLC railway operations required pursuant to the KCSR Joint Use Agreement and the NSR Joint Use Agreement, and

WHEREAS, the route traversed by traffic moving pursuant to this Joint Use Agreement includes approximately four-tenths of a mile section of track in Jackson, Mississippi that is controlled by Canadian National (as successor to Illinois Central Gulf Railroad Company) (the "Jackson Trackage Rights Section") pursuant to that certain trackage rights agreement (the "MSR Trackage Rights Agreement"), as supplemented and amended from time to time, dated March 26, 1986, between Midsouth Rail Corporation and Illinois Central Gulf Railroad Company; and

WHEREAS, pursuant to the Transaction Agreement, KCSR shall provide haulage ("KCSR Haulage") for NSR over the Jackson Trackage Rights Section until either the MSR

REDACTED

Trackage Rights Agreement is assigned to MSLLC or MSLLC constructs a "flyover" bridge to carry MSLLC's tracks over the tracks and real property of Canadian National Railway Company at Jackson, MS which establishes a continuous line of rail between Shreveport and Meridian (the "Jackson Flyover"); and

WHEREAS, the Parties intend that the MSR Trackage Rights Agreement will be assigned to MSLLC and the Parties desire to set forth the terms and conditions upon which MSLLC shall provide haulage services to KCSR and NSR over the Jackson Trackage Rights Section in the event of such assignment; and

WHEREAS, pursuant to an agreement of even date herewith between KCSR and MSLLC (the "Master KCSR-MSLLC Interchange Agreement"), MSLLC and KCSR have documented, among other things, the method for the physical interchange of traffic between KCSR and MSLLC at points on the Subject Trackage; and

WHEREAS, the Transaction Agreement anticipates that, pursuant to a haulage agreement, KCSR will provide haulage for NSR for certain traffic between Shreveport, LA, on the one hand, and an interchange point with BNSF Railway Company ("BNSF") in the Dallas, TX area, on the other hand (the "Western Haulage Agreement"); and

WHEREAS, the rights granted in this NSR Joint Use Agreement are intended to be connective with: (a) the Union Pacific Railroad Company (or its subsidiaries and its successors) at Shreveport; and (b) KCSR (or its subsidiaries and its successors) at Shreveport, either (i) moving traffic to a BNSF connection in the Dallas area or Shreveport; or (ii) hauling traffic for NSR under the Western Haulage Agreement; and

WHEREAS, pursuant to the Transaction Agreement, that certain Interchange Agreement between KCSR and NSR dated as of June 4, 1986, as supplemented as of January 24, 2003 (the "Meridian Interchange Agreement") has been assigned to MSLLC; and

WHEREAS, the Parties desire to set forth the terms and conditions upon which MSLLC has agreed to grant NSR certain trackage and haulage rights for NSR to transport NS Traffic over the Subject Trackage;

NOW, THEREFORE, the Parties hereto, intending to be legally bound, agree as follows:

SECTION 1. DEFINITIONS AND INTERPRETATION

(a) Interpretation Generally.

(i) Unless otherwise defined herein, all words, terms and phrases used in this Agreement shall be construed in accordance with the generally applicable definition or meaning of such words, terms and phrases in the railroad industry.

REDACTED

(ii) Each definition in this Agreement includes the singular and the plural, and references in this Agreement to the neuter gender include the masculine and feminine where appropriate. References herein to any agreement or contract mean such agreement or contract as amended. As used in this Agreement, the word "including" means "without limitation", and the words "herein", "hereof" and "hereunder" refer to this Agreement as a whole. All dollar amounts stated herein are in United States currency.

(b) Capitalized Terms.

All capitalized terms shall have the defined meaning set forth below:

"Abandonment Notice Period" shall have the meaning given to that term in Section 7(m)(iii).

"Abandonment Segment" shall have the meaning given to that term in Section 7(m)(i).

"Additional Compensation" shall have the meaning given to that term in Appendix B, Section 1.A(2)(b).

"Agreement" shall have the meaning given to that term in the introductory paragraph.

"AAR" shall have the meaning given to that term in Section 6(e).

"BNSF" shall have the meaning given to that term in the Recitals.

"Cars" means each loaded or empty railroad freight car (including platform and well rail cars) or similar equipment.

"Clearance File" shall have the meaning given to that term in Section 6(f).

"Cost Factor" shall have the meaning given to that term in Section 1.D.2 of Appendix B – Commercial Appendix.

"CTC" shall have the meaning given to that term in Section 6(a)(iv).

"Dallas Intermodal Terminal Traffic" means all domestic intermodal containers or trailers with an origin and destination in the United States, with a lift or drop at KCSR's Dallas Intermodal terminal, that moves over the Subject Trackage and over KCSR's tracks between Shreveport and the terminal, and that originates or terminates at or east of Meridian, and that originates or terminates at or west of the Dallas / Ft. Worth, TX. Standard Metropolitan Statistical Area (SMSA) as published by the Office of Management and Budget (OMB).

"Dallas Terminal Marketing Agreement" shall mean that certain Dallas Terminal Marketing Agreement dated the date hereof by and between NSR and KCSR.

"Designated Operator" shall have the meaning given to that term in the Recitals.

REDACTED

"Effective Date" shall have the meaning given to that term in Section 7(f)(i).

"Election Notice" shall have the meaning given to that term in Section 2(a)(ii).

"End Points" shall mean: (1) Meridian, MS, M.P. 0.0; and (2) Shreveport, LA, M.P. V-169.85.

"EOTs" shall have the meaning given to that term in Section 2(b)(ii).

"Equipment" shall mean and be confined to hi-rail vehicles, track inspection equipment and other non-revenue vehicles and machinery (other than locomotives) capable of being operated on railroad tracks that, at the time of an occurrence, are (i) being operated on the trackage upon which such occurrence takes place, or (ii) are on the trackage upon which such occurrence takes place, or on the adjoining right-of-way, for the purpose of maintenance or repair thereof or the clearing of wrecks thereon.

"Exercise Notice" shall have the meaning given to that term in Section 7(l)(iii).

"FMV" shall have the meaning given to that term in Section 7(l)(iii).

"Foreign Railroad" shall mean a railroad that is not a party to this Agreement.

"Foreign Railroad Interchange Agreement" shall have the meaning given to that term in Section 3(b).

"Imbalanced Market" shall have the meaning given to that term in Section 3(b)(ii) of Appendix B – Commercial Appendix.

"Imbalance Threshold" shall have the meaning given to that term in Section 4 of Appendix B – Commercial Appendix.

"Jackson Flyover" shall have the meaning given to that term in the Recitals.

"Jackson Trackage Rights Section" shall have the meaning given to that term in the Recitals.

"JOC" shall have the meaning given to that term in Section 6(a)(ii).

"KCS" shall have the meaning given to that term in the Recitals.

"KCSR" shall have the meaning given to that term in the introductory paragraph.

"KCSR Haulage" shall have the meaning given to that term in the Recitals.

REDACTED

"KCSR Trackage Rights" shall have the meaning given to that term in the Recitals.

"Liquidated Damages" shall have the meaning given to that term in Section 2(b)(i) of Appendix B – Commercial Appendix.

"Management Committee" shall mean the Management Committee of MSLLC as provided in the LLC Agreement.

"Master KCS-MSLLC Interchange Agreement" shall have the meaning given to that term in the Recitals.

"Meridian Interchange Agreement" shall have the meaning given to that term in the Recitals.

"Monthly Statement" shall have the meaning given to that term in Section 7(b)(i).

"MSLLC" shall have the meaning given to that term in the introductory paragraph.

"MSR Trackage Rights Agreement" shall have the meaning given to that term in the Recitals.

"NS Traffic" shall mean all intermodal traffic that: (i) originates or terminates in the United States west of Dallas/Ft. Worth (including intermodal traffic originating by steamship line at a port along the west coast of the United States) and enters or exits the Subject Trackage at Shreveport; and (ii) originates or terminates in the United States at or east of Meridian and enters or exits the Subject Trackage at Meridian; and (iii) does not consist of traffic originating or terminating at any station on the KCSR system which includes the Texas Mexican Railway Company, (including any station where KCSR, or the Texas Mexican Railway Company have trackage rights or access via reciprocal switch), as it exists on the date of the Transaction Agreement.

"NSC" shall have the meaning given to that term in the Recitals.

"NSR" shall have the meaning given to that term in the introductory paragraph.

"NSR Cars" shall mean Cars and Equipment in the revenue and/or car hire account of NSR.

"NSR Haulage Cars" shall mean NSR Cars being transported pursuant to NSR Haulage Rights.

"NSR Haulage Rights" shall have the meaning given to that term in Section 2(b).

"NSR Joint Use Agreement" shall have the meaning given to that term in the introductory paragraph.

REDACTED

"NSR Master Locomotive Run Through Agreement" shall have the meaning given to that term in Section 2(b)(iii).

"NSR Trackage Rights" shall have the meaning given to that term in Section 2(a).

"NSR Trackage and Haulage Rights" shall mean the rights granted in Sections 2(a) and 2(b).

"Operating Agreement" shall have the meaning given to that term in the Recitals.

"Parties" shall have the meaning given to that term in the introductory paragraph.

"Party" shall have the meaning given to that term in the introductory paragraph.

"Permitted Asset Transfer" shall have the meaning given to that term in the LLC Agreement.

"Qualifying Trains" shall have the meaning given to that term in Appendix B.

"Revenue Factor" shall have the meaning given to that term in Section 1.D.1. of Appendix B – Commercial Appendix.

"RPU" shall have the meaning given to that term in Section 1.E(i)(b) of Appendix B – Commercial Appendix.

"Service Reports" shall have the meaning given to that term in Section 2(a)(ii).

"Shortfall Damages" shall have the meaning given to that term in Section 3(a) of Appendix B – Commercial Appendix.

"STB" shall mean the Surface Transportation Board or any successor entity thereto.

"Subject Trackage" shall mean the certain lines of railroad generally running between Meridian, MS and Shreveport, LA as defined in the Transaction Agreement, together with the Jackson Flyover, as hereinafter defined, when constructed, and a bridge over the Mississippi River at Vicksburg.

"Third Party Traffic" shall mean freight rail service provided for a Foreign Railroad under a haulage or trackage rights agreement between MSLLC and the Foreign Railroad.

"Transaction Agreement" shall have the meaning given to that term in the Recitals.

"Triggering Event Notice" shall have the meaning given to that term in Section 2(a)(ii).

"UP" shall mean the Union Pacific Railroad Company or any of its subsidiaries.

REDACTED

"Use Invoice" shall have the meaning given to that term in Section 7(b)(i).

"Waiver Notice" shall have the meaning given to that term in Section 7(m)(v).

"Weighted Cost Adjustment Factor" shall have the meaning given to that term in Section 1.D. of Appendix B – Commercial Appendix.

"Western Haulage Agreement" shall have the meaning given to that term in the Recitals.

(c) Successor Laws.

A reference to any particular statute or regulation shall include a reference to any successor statute or regulation.

SECTION 2. OPERATING RIGHTS

(a) Trackage Rights.

(i) Pursuant to the Transaction Agreement and subject to the terms set forth in this Agreement, MSLLC hereby grants NSR trackage rights for the sole purpose of transporting NS Traffic over the Subject Trackage, excluding the Jackson Trackage Rights Section, and of fulfilling its common carrier obligations with respect to NS Traffic (collectively, "NSR Trackage Rights"). These rights include, but are not limited to, the right to operate its trains, locomotives, cars, and Equipment with its own crews over the entirety of the Subject Trackage, excluding the Jackson Trackage Rights Section. NSR's use of the NSR Trackage Rights shall be subject to the limitations and restrictions set forth in this Section 2(a).

REDACTED

(ii) NSR shall not exercise its trackage rights unless and until: (A) a Major Service Standard Failure, as defined in Appendix B to this Agreement, has occurred; or (B) a Permitted Asset Transfer as defined in the LLC Agreement has occurred. MSLLC shall provide NSR with monthly reports, quarterly reports and annual reports ("Service Reports") that will provide data to NSR sufficient to permit it to determine whether a Major Service Standard Failure has occurred. MSLLC shall provide NSR written notice ("Triggering Event Notice") of the happening of a Permitted Asset Transfer. NSR shall have sixty (60) days from the receipt of the Service Report that demonstrates that a Major Service Standard Failure has occurred, and sixty (60) days from the receipt of a Triggering Event Notice, as the case may be, to provide MSLLC written notice, a copy to KCSR, making an election to exercise its trackage rights ("Election Notice"), which such Election Notice will specify the date for beginning use of the trackage rights, such date may be up to six (6) months after the delivery of the Election Notice. Failure to exercise its rights under this subsection at any one time shall not prejudice NSR's rights to exercise its rights at any subsequent time.

(iii) NSR locomotives and crews operating over the Subject Trackage shall be equipped to communicate with MSLLC on radio frequencies normally used by MSLLC in directing train movements on the Subject Trackage.

(iv) NSR's operations over the Subject Trackage shall at all times be subject to the direction and control of the Designated Operator and comply in all respects with the safety rules, operating rules and other regulations of the Designated Operator.

(v) NSR shall make such arrangements with MSLLC as may be required to have all of its employees who shall operate its trains, locomotives, cars and Equipment over the Subject Trackage qualified for operation thereover. MSLLC shall provide reasonable cooperation and assistance in the qualification of NSR operating (train and engine) crews for service over the Subject Trackage upon request. NSR supervisory personnel who have been qualified to operate over the Subject Trackage may qualify other NSR employees for operation of trains over the Subject Trackage.

(vi) MSLLC shall allow NSR to, at NSR's sole cost, establish, locate and construct personnel facilities for changing crews on NSR trains that are moving pursuant to this Section 2(a), but shall not impose a lease fee for the property upon which such personnel facilities are located. The design and location of any such facility shall be pre-approved by MSLLC, said approval not to be unreasonably withheld or delayed.

(vii) The compensation for the trackage rights shall be typical in the industry for overhead intermodal trackage rights and consistent with STB decisional principles for the determination of the same.

(b) Grant of Haulage Rights.

Pursuant to the Transaction Agreement and consistent with the terms of this Agreement, MSLLC hereby grants NSR haulage rights for the sole purpose of transporting NS Traffic over the Subject Trackage, including the Jackson Trackage Rights Section (collectively, "NSR

REDACTED

Haulage Rights"). NSR's use of its Haulage Rights shall be subject to the limitations and restrictions set forth in this Section 2.

(i) NSR Haulage Cars shall at all times remain in the revenue waybill and car hire accounts of NSR while moving over the Subject Trackage via the NSR Haulage Rights. MSLLC shall not be entitled to any line haul revenue for the handling of NSR Haulage Cars, nor shall MSLLC participate in the routing of, nor appear in tariffs, waybills or other shipping documents as a participating carrier in connection with, the movement of NSR Haulage Cars.

(ii) MSLLC's obligation to provide NSR Haulage Rights hereunder shall permanently cease in the event that NSR initiates its NSR Trackage Rights operations pursuant to Section 2(d)(vi) of this Agreement.

(iii) The Parties will execute an agreement (the "NSR Master Locomotive Run Through Agreement") consistent with, and with terms materially identical to, the Supplemental Agreement dated May 11, 2000, to the Master Locomotive Run Through Agreement of November 29, 1994, provided, however, that MSLLC shall not be responsible for providing any equipment (locomotives, cars, end of train units ("EOTs"), etc.), or fuel for the trains providing the NSR Haulage Rights. Locomotives on trains providing the NSR Haulage Rights shall be governed by the NSR Master Locomotive Run Through Agreement. .

(c) Use Of The Subject Trackage.

(i) NSR's use of Subject Trackage pursuant to Section 2(a) or Section 2(b) shall be in common with MSLLC and KCSR, and other than as explicitly set forth herein, MSLLC's and KCSR's right to use the Subject Trackage shall not be diminished by this Agreement.

(ii) NSR may operate trains pursuant to Section 2(a) or Section 2(b) in either direction over the Subject Trackage.

(iii) Except as may be elsewhere provided for herein, NSR may use its NSR Trackage and Haulage Rights for NS Traffic to interchange with UP at Shreveport, LA, and with KCSR at Shreveport, LA, for (i) hauling traffic for NSR under the Western Haulage Agreement; (ii) connectivity with a possible BNSF Shreveport Agreement, as defined in the Western Haulage Agreement; or (iii) moving Dallas Intermodal Terminal Traffic provided the Dallas Option, as each term is defined in the Dallas Terminal Marketing Agreement, is exercised.

(d) Restrictions on Use.

(i) NSR may use its NSR Trackage and Haulage Rights solely for the purposes of the movement of: (A) NS Traffic; and (B) moving Dallas Intermodal Terminal Traffic provided the Dallas Option, as each term is defined in the Dallas Terminal Marketing Agreement, is exercised.

REDACTED

(ii) The NSR Trackage and Haulage Rights shall be for the purpose of NSR using the Subject Trackage to operate its trains in overhead movements only and shall not include the right of ingress and egress to any tracks, switches, turnouts, or other track classifications that connect to any point along the Subject Trackage except the End Points.

(iii) Except as otherwise permitted in this Agreement, NSR's Trackage and Haulage Rights shall not include the right to enter or exit the Subject Trackage other than at the End Points, or at either end of the Jackson Trackage Rights Section.

(iv) Except as may otherwise be permitted by this Agreement, NSR shall not use any part of the Subject Trackage for the purpose of switching, storage or servicing cars or Equipment, or the making or breaking up of trains, except as necessary for the handling of locomotives or cars bad ordered en route; provided, that NSR shall use such auxiliary Subject Trackage as may be designated by the Designated Operator for such purposes.

(v) NSR may not, pursuant to this Agreement, grant haulage rights, trackage rights, or other operating rights of any nature on or over the Subject Trackage to any other party.

SECTION 3. INTERCHANGE

From time to time MSLLC and NSR shall consult as to the various interchange locations for the delivery and receipt of traffic being physically transferred between NSR and MSLLC. Unless otherwise mutually agreed, interchange operations shall be governed as follows:

(a) Interchange For NSR Haulage Cars

(i) MSLLC shall deliver eastbound NSR Haulage Cars to NSR at Meridian, MS, on such track(s) as shall be designated from time to time by local operating personnel or other designated representative in charge of such tracks at Meridian pursuant to the Meridian Interchange Agreement.

(ii) MSLLC shall deliver westbound NSR Haulage Cars to KCSR and UP and, if KCSR enters into a BNSF Shreveport Agreement as defined in the Western Haulage Agreement, with BNSF for continued westbound movement, at or near M.P. V-169.85 in Shreveport, LA on such track(s) as shall be designated from time to time by KCSR's dispatcher or other designated representative in charge of such tracks at Shreveport pursuant to the KCSR Master Interchange Agreement.

(iii) Nothing herein shall be interpreted as prohibiting the Designated Operator from transporting NSR Haulage Cars in a continuous movement operating over both the haulage routes covered by: (i) this Agreement and (ii) the Western Haulage Agreement.

REDACTED

(b) Interchange With A Foreign Railroad

Interchange operations between NSR and a Foreign Railroad shall be governed by the terms of the relevant interchange agreement between NSR and said Foreign Railroad ("Foreign Railroad Interchange Agreement"), which may not be inconsistent with this Agreement.

SECTION 4. PERMITTED SERVICE

(a) NS Traffic

NSR shall have the exclusive right to transport NS Traffic over the Subject Trackage.

(b) MSLLC's Retained Rights

(i) MSLLC may perform haulage services for, or provide trackage or operating rights to, KCSR or a Foreign Railroad provided the traffic moved for said carrier remains in that other carrier's revenue waybill account.

(ii) Notwithstanding the foregoing Section 4(b)(i), for NS Traffic only, MSLLC may not perform haulage services for any carrier other than NSR or grant trackage rights or operating rights to KCSR or any Foreign Railroad on the Subject Trackage for NS Traffic, absent the express written consent of NSR, which may be withheld in NSR's sole discretion.

(iii) MSLLC shall not permit trains moving NSR Haulage Cars to contain any traffic in the revenue waybill account of any carrier other than NSR.

(c) Rebilling.

It is the intent of the Parties that rebilling of traffic is not a permissible method of avoiding any direct traffic limitation, including those set forth in Section 4(a), or imposition of charges for services set forth herein.

SECTION 5. INFRASTRUCTURE

(a) Maintenance.

(i) MSLLC shall be solely responsible for the maintenance, repair, and renewal of the Subject Trackage. MSLLC shall keep and maintain the Subject Trackage in reasonably good condition for the use herein contemplated, but MSLLC does not guarantee the condition of the Subject Trackage or that operations thereover will not be interrupted. MSLLC shall take reasonable steps to ensure that any interruptions will be kept to a minimum and shall use commercially reasonable efforts to avoid such interruptions.

REDACTED

(ii) Existing connections or facilities shall continue to be maintained, repaired, and renewed by and at the expense of the party or parties responsible for such maintenance, repair, and renewal under applicable agreements.

(iii) Notwithstanding anything to the contrary herein, MSLLC shall maintain the main line of the Subject Trackage to a minimum of FRA Class 3 standards, capable of handling cars of 286,000 lbs.

SECTION 6. MANAGEMENT AND OPERATIONS

(a) Dispatching

(i) The Designated Operator shall have exclusive control over the management and dispatching of the Subject Trackage. Dispatching of the Subject Trackage shall be conducted in a manner as to afford each of the Parties, and any other present or future user of the Subject Trackage (or any portion thereof) the most economical and efficient movement of its traffic over the Subject Trackage consistent with the demands and needs of other authorized users.

(ii) Although the Designated Operator will be the dispatcher, the Joint Operating Committee ("JOC"), subject to the direction of the Management Committee, will develop and implement appropriate dispatching protocols and adjust those protocols from time to time as necessary to carry out this Agreement. In dispatching the Subject Trackage, the Designated Operator shall follow any protocols developed by the JOC, provided, that in the event of a conflict between the dispatching protocols and the need to economically and efficiently move the traffic over the Subject Trackage, the dispatcher shall be empowered to employ best practices to efficiently move all trains consistent with the principles of this Agreement.

(iii) NSR shall have the right to station an NSR employee or agent in the dispatch center operated by MSLLC or its Designated Operator in the event that it initiates its trackage rights pursuant to Section 2(a)(ii) herein. Said person shall be present solely as an observer, and shall have no authority to control the movement of trains or otherwise interfere with or adjust the operation of trains, Cars or Equipment operating on the Subject Trackage.

(iv) MSLLC shall cause its Designated Operator to provide NSR with read-only access to the Designated Operator's central traffic control ("CTC") screens for the Subject Trackage in the offices of NSR designated by NSR. As KCSR is MSLLC's Designated Operator, KCSR shall be responsible for the cost of modifying its system to the extent necessary to provide NSR access to its CTC screens, and NSR shall be responsible for the cost of the communications link with NSR and the costs to use such link incurred in NSR's offices.

(v) Notwithstanding anything in this Agreement to the contrary, all overhead trains of both KCSR and NSR will have dispatching priority over local trains.

REDACTED

(b) Capacity Rights

Notwithstanding any other provisions of this Agreement, the Parties acknowledge that there may be capacity constraints from time to time for traffic covered under this Agreement. Whenever capacity of the Subject Trackage is insufficient to handle the total traffic demands of KCSR and NSR, the following capacity allocation rules shall apply:

(i) Prior to the start of the calendar year following the earlier of (a) completion of the spending of the Capital Proceeds as defined in the Transaction Agreement; or (b) the fourth anniversary of the Closing as defined in the Transaction Agreement, KCSR and NSR will each have a minimum of five (5) daily overhead train starts over the Subject Trackage. For purposes of determining capacity rights, NSR's daily overhead train starts will include NS Traffic and Dallas Intermodal Terminal Traffic.

(ii) As incremental overhead train starts become available, NSR shall receive the first of every three (3) new daily overhead train starts, and NSR acknowledges that KCSR shall be allocated the second and third of every three (3) new daily overhead train starts. Following the start of the calendar year following the earlier of (a) completion of the spending of the Capital Proceeds as defined in the Transaction Agreement; or (b) the fourth anniversary of the Closing as defined in the Transaction Agreement, NSR will have a minimum of thirteen (13) daily overhead train starts. If through this allocation process NSR does not have at least thirteen (13) daily overhead train starts, then KCSR agrees to relinquish such daily overhead train starts as needed to provide NSR with thirteen (13) daily overhead train starts. Of the thirteen (13) total daily overhead train starts, a minimum of eight (8) may be utilized for traffic interchanged with parties other than the Union Pacific Railroad Company in Shreveport.

(iii) NSR acknowledges that, after providing for NSR's minimum guarantee of thirteen (13) daily overhead train starts, KCSR shall receive all additional incremental daily overhead train starts until KCSR has a total of twenty-one (21) daily overhead train starts. Thereafter, NSR shall be allocated the first of every three (3) additional new incremental daily overhead train starts, and NSR acknowledges that the second and third of every three (3) new daily overhead train starts shall be allocated to KCSR.

(iv) If the Foreign Railroad fails to supply all necessary capital required to accommodate its new train start, the first new daily overhead train start of any Foreign Railroad admitted to the Subject Trackage by MSLLC shall be considered to be a KCSR train start for the purpose of the allocation of daily overhead trains starts of under these capacity allocation provisions. If the Foreign Railroad supplies all necessary capital required to accommodate its new train start, the Foreign Railroad's train start shall count against neither KCSR's nor NSR's train start allocation.

(v) The maximum length of NSR trains (including locomotives and other motive power units) operating pursuant to this Agreement, whether pursuant to Section

REDACTED

2(a) or Section 2(b), shall be the greater of: (a) 7,500 feet or (b) the maximum train length as may be permitted from time to time for any other train regularly operated over the Subject Trackage. Upon substantial completion of the capital projects list found in Appendix C - Capital Improvement Projects to the KCSR-MSLLC Operating Agreement, the maximum length shall be increased to no less than 8,500 feet.

(c) Volume And Service Guarantees

(i) NSR commits to the Volume Guarantees set forth in Appendix B – Commercial Appendix, Section 5.

(ii) MSLLC commits to the Service Standards set forth in Appendix B – Commercial Appendix, Section 2.

(d) Defective Or Overloaded Cars

MSLLC may arrange for repairs to and adjustments to, or transfers of lading from bad ordered, defective or overloaded NSR Haulage Cars, as in MSLLC's judgment may be necessary to move such cars safely. NSR shall reimburse MSLLC for the cost of such work at rates prescribed in, and submitted pursuant to, the Field and Office Manuals of the Interchange Rules of the Association of American Railroads ("AAR").

(e) Use Of A Clearance File

NSR shall have the right to operate all dimensional loads and excess clearance railcars for handling over the Subject Trackage, subject to a clearance file (the "Clearance File") applicable to traffic of NSR, KCSR, and MSLLC maintained by MSLLC. MSLLC shall promptly inform NSR of any changes made to the Clearance File.

(f) Modification of NSR Train Schedules.

NSR shall provide the Designated Operator reasonable notice of the schedules for regularly scheduled NSR trains operating over the Subject Trackage, as well as any proposed modifications, and shall coordinate train operations with the Designated Operator and its dispatcher.

(g) Compensation.

NSR shall compensate MSLLC for the use of the Subject Trackage in accordance with Appendix B – Compensation for NS Traffic.

(h) Mileage and Car Hire.

All mileage and car hire charges accruing on NSR Cars on the Subject Trackage shall be assumed by NSR and reported and paid by it directly.

REDACTED

SECTION 7. GENERALLY APPLICABLE PROVISIONS

(a) Compliance with Applicable Law and Rules.

(i) Each Party hereto shall comply with all applicable and lawful federal, state and local laws, rules, regulations and orders promulgated by any government or governmental agency that relate to the operations contemplated hereunder. If any fine, penalty, cost, or charge is imposed or assessed on or against either Party hereto by reason of the other Party's non-compliance with any such laws, rules, regulations or orders, liability will be allocated in accordance with the Unified Liability Agreement.

(ii) Without affecting the generality of the foregoing Section 7(a)(i), the Parties shall comply with the provisions of the Federal Locomotive Inspection Act and the Federal Safety Appliance Act, as amended, and any other lawful federal and state and local laws, regulations and rules respecting the operation, condition, inspection and safety of its trains, locomotives, cars and Equipment while such trains, locomotives, cars, and Equipment are being operated over the Subject Trackage. Liability for a violation of this section shall be determined in accordance with Unified Liability Agreement.

(iii) NSR's trains shall not include locomotives, cars or Equipment which exceed the width, height, weight or other restrictions or capacities of the Subject Trackage as contained in the Clearance File maintained by MSLLC, and no train shall contain locomotives, cars or Equipment which require speed restrictions or other movement restrictions below the maximum authorized freight speeds as provided by the Designated Operator's operating rules and regulations, without the prior consent of MSLLC. The JOC shall make proper accommodation for exceptions, should that be reasonable, necessary, and practicable. All NSR trains shall be operated by locomotives with horsepower sufficient to permit operation at posted speeds.

(iv) If any employee of NSR shall neglect, refuse, or fail to abide by MSLLC's rules, instructions and restrictions governing the operation on or along MSLLC's property, such employee shall, upon written request of MSLLC, be prohibited by NSR from working on MSLLC's property. If any party shall deem it necessary to hold a formal investigation to establish such neglect, refusal, or failure on the part of any employee of NSR, then upon such notice presented in writing, NSR shall promptly hold an investigation in which all parties concerned shall participate, with each party bearing the expense for its officers', counsel's, witnesses' and employees' participation. Notice of such investigations to NSR's employees shall be given by NSR's officers, and such investigation shall be conducted in accordance with the terms and conditions of schedule agreements between NSR and its employees. If the result of such investigation warrants, such employee shall, upon written request by MSLLC, be withdrawn by NSR from service on MSLLC's property and NSR shall release and indemnify MSLLC from and against any and all claims and expenses because of such withdrawal.

(b) Invoices and Payment of Bills.

REDACTED

(i) On or before the 15th day of each calendar month during the term of this Agreement, KCSR shall prepare on behalf of MSLLC a monthly statement setting forth the number of NSR Cars operated over the Subject Trackage during the month (the "Monthly Statement") and an invoice (the "Use Invoice"). The Monthly Statement shall be in electronic format, and shall contain a detailed list of the NSR Cars that moved during the subject month, which list shall include, for each Car, information relating to such cars that MSLLC may reasonably request in connection with accounting for the use of the services and rights provided hereunder. The Monthly Statement and the Use Invoice shall be delivered to NSR and NSR shall make payment to MSLLC within thirty (30) days after the date of receipt of such Use Invoice.

(ii) Any dispute regarding the amount of a Monthly Statement or Use Invoice shall be reconciled between the Parties pursuant to Section 7(i), and any adjustment resulting from such reconciliation shall be reflected in a subsequent Use Invoice. If NSR disputes any portion of a Use Invoice, it shall nevertheless pay such Use Invoice in full subject to adjustment upon resolution of the dispute; provided, however, that (i) no exception to any charge in a Use Invoice shall be honored, recognized or considered if filed after the expiration of three (3) years from the date of the Use Invoice, and (ii) no invoice shall be rendered more than three (3) years (a) after the last day of the calendar month in which the expense covered thereby is incurred, or (b) in the case of charges disputed as to amount or liability, after the amount owed or liability therefor is established. Any claim for the adjustment of a Monthly Statement or Use Invoice shall be deemed to be waived if not made in writing within three (3) years after the date of the relevant Monthly Statement for statement adjustments and the date of the relevant Use Invoice for invoice adjustments.

(iii) MSLLC and NSR shall each have the right, at its own expense, to audit the records of any other Party pertaining to the use of the Subject Trackage under this Agreement, and any Monthly Statement, Use Invoice or other invoice issued by MSLLC or KCSR, respectively, pursuant to this Agreement, provided such audit is initiated at any time within three (3) years of the date of the relevant Use Invoice or other invoice (as applicable) relating to this Agreement. All such audits shall be conducted at reasonable intervals, locations, and times. All such audits shall be prosecuted with reasonable due diligence. Each Party agrees that all information disclosed to it or its representatives in connection with such an audit will be held in strictest confidence and will not be disclosed to any third party (other than to an arbitrator in connection with an arbitration conducted pursuant this Agreement or as required by applicable law). Any adjustment resulting from an audit conducted pursuant to this Section 7(b)(iii) with respect to which the Parties are in concurrence shall be reflected in a subsequent Use Invoice.

(iv) Invoices rendered pursuant to the provisions of this Agreement, other than Use Invoices, shall include direct labor and material costs, together with the surcharges, overhead percentages, and Equipment rentals as specified by MSLLC at the time any work is performed by MSLLC for NSR, or shall include actual costs and expenses, upon mutual agreement of the Parties.

(c) Liability.

As between the Parties hereto, responsibility for any loss or destruction of, or damage to, any property whatsoever, and any injury to or death of any person or persons whomever (including employees of NSR or MSLLC) or other matters covered by the Uniform Liability Agreement, resulting from, arising out of, incidental to or occurring in connection with this Agreement shall be allocated as is set forth in the Unified Liability Agreement.

(d) Rerailing, Wrecking, Bad Orders and Repairs.

(i) Whenever one or more cars and/or locomotives in the account of NSR requires rerailing, wrecking service or wrecking train service, MSLLC shall arrange for the provision of such service, including the repair and restoration of roadbed, the Subject Trackage and structures. MSLLC shall promptly inform NSR of its intent to proceed with wrecking service or wrecking train service, and shall permit a NSR representative to be present on the scene, to work in concert with the employees of its Designated Operator to manage such wrecking service or wrecking train service. The cost, liability and expense of the foregoing, including without limitation loss of, damage to, or destruction of any property whatsoever and injury to and death of any person or persons whomsoever or any damage to or destruction of the environment whatsoever, including without limitation land, air, water, wildlife, and vegetation, resulting therefrom shall be apportioned in accordance with the provisions of Section 7(c) hereof. All locomotives, cars, Equipment and salvage from the same so picked up and removed which is owned by or under the management and control of or used by NSR at the time of such wreck, shall be promptly delivered to it.

(ii) If any cars or locomotives of NSR are bad ordered en route on the Subject Trackage and it is necessary that they be set out, those cars or locomotives shall, after being repaired, be picked up by MSLLC, or if agreed upon by the parties, MSLLC will transport them to a mutually acceptable location to be picked up by NSR. MSLLC may, upon request of NSR and at the expense of NSR, unless otherwise provided for in the Field and Office Manuals of the Interchange Rules of the AAR, furnish required labor and material to perform light repairs required to make such bad ordered Cars or locomotives safe and lawful for movement, and billing for this work shall be at rates prescribed in, and submitted pursuant to, the Field and Office Manuals of the Interchange Rules of the AAR.

(e) Force Majeure.

The obligations, other than payment obligations, of the Parties to this Agreement shall be subject to force majeure (including flood, earthquake, hurricane, tornado, or other such severe weather or climatic condition, riot, accident, wreck, derailment, washout, explosion, Acts of God, act of terrorism and public enemy, war, blockage, insurrection, vandalism or sabotage, fire, strike, lockout or labor dispute, embargoes or AAR service orders, or governmental laws, orders or regulations, and other causes or circumstances beyond the control of the Party invoking such force majeure as an excuse

for nonperformance), but only as long as, and to the extent that, such force majeure shall reasonably prevent performance of such obligations by the affected Party. In the event that an event of force majeure impairs either Party's ability to fulfill its obligations to the other Party under this Agreement, said Party shall take all commercially reasonable measures to restore performance of its obligations in a timely manner.

(f) Term and Termination.

(i) This Agreement shall become effective following the latest date of: (a) the date first written above; (b) receipt of any required regulatory approvals or exemptions; and (c) the expiration of any time periods required by the issuance of labor notices by NSR and/or MSLLC, should such labor notices be required ("Effective Date"). The Parties shall determine the Effective Date through an exchange of written correspondence.

(ii) This Agreement shall commence on the Effective Date and shall continue until terminated by mutual agreement.

(iii) Termination of this Agreement shall not relieve or release any Party hereto from any obligations assumed or from any liability which may have arisen or been incurred by such Party under the terms of this Agreement prior to termination hereof, nor shall it terminate any underlying right, or contingent right, of movement pursuant to the trackage rights grant.

(g) Successors and Assigns.

(i) This Agreement shall inure to the benefit of and be binding upon each of the Parties and their respective successors and permitted assigns. Third party beneficiary status shall inure to the benefit of KCSR and each of its successors and permitted assigns.

(ii) Except as otherwise specifically provided hereinafter, neither Party may assign this Agreement, or any of its rights, interests or obligations hereunder, including by operation of law, without the prior consent in writing of the other Party, which consent may be withheld at the discretion of such other Party.

(iii) In the event of a sale of substantially all of the assets or business of NSR, or the merger or consolidation of NSR into or with a firm or corporation not controlled by NSC, NSR may, without the prior consent of MSLLC, assign this Agreement to such firm or corporation acquiring substantially all of the assets or business of NSR, or merging or consolidating with NSR; provided, however, that such assignment shall not transfer or extinguish any liability or obligation of NSR under this Agreement that existed prior to such assignment.

(iv) In the event of a sale of substantially all of the assets or business of MSLLC, or the merger or consolidation of MSLLC, MSLLC may, without the prior consent of NSR, assign this Agreement to such firm or corporation acquiring

substantially all of the assets or business of MSLLC, or merging or consolidating with MSLLC; provided, however, that such assignment shall not transfer or extinguish any liability or obligation of MSLLC under this Agreement that existed prior to such assignment.

(h) Notice.

Any notice required or permitted to be given by one Party to the other Party under this Agreement shall be deemed given on the date sent by certified mail, or by such other means as the Parties may mutually agree, and shall be addressed as follows:

(i) If to KCSR:

Chief Operating Officer
The Kansas City Southern Railway Company
P.O. Box 219335
Kansas City, MO 64121-9335

with a copy to:

Senior Vice President and General Counsel
The Kansas City Southern Railway Company
P.O. Box 219335
Kansas City, MO 64121-9335

(ii) If to MSLLC:

Chief Operating Officer
The Kansas City Southern Railway Company
P.O. Box 219335
Kansas City, MO 64121-9335

Executive Vice President Operations
Norfolk Southern Corporation
Three Commercial Place
Norfolk, Virginia 23510-2191

with a copy to:

Senior Vice President and General Counsel
The Kansas City Southern Railway Company
P.O. Box 219335
Kansas City, MO 64121-9335

Senior Director – Joint Facilities
Norfolk Southern Corporation

1200 Peachtree Street, N.E., Box 158
Atlanta, Georgia 30309

If to NSR:

Executive Vice President Operations
Norfolk Southern Corporation
Three Commercial Place
Norfolk, Virginia 23510-2191

with a copy to:

Senior Director – Joint Facilities
Norfolk Southern Corporation
1200 Peachtree Street, N.E., Box 158
Atlanta, Georgia 30309

Either Party may provide notice of changes in the above addressees to the other Party by personal service or certified mail.

(i) Arbitration.

(i) Any dispute arising between the Parties with respect to an alleged breach of this Agreement shall be referred to the JOC for resolution and if the JOC is unable to resolve the dispute, it will be referred to the Management Committee, provided however, that any Member (as defined in the LLC Agreement) may submit the dispute for binding arbitration by a panel of three independent arbitrators before the American Arbitration Association under the Commercial Arbitration Rules, who shall render a written decision on the controversy. The written decision of the arbitrators, reached upon a majority vote, shall be final and conclusive upon the Parties. Each Party to the arbitration shall pay the compensation, costs, fees, and expenses of its own witnesses, experts, and counsel. The compensation, costs, and expenses of the three arbitrators, if any, shall be borne by NSR and MSLLC, with each paying 50 percent of such compensation, costs, and expenses. The arbitrators shall not have the power to award consequential or punitive damages or to determine violations of criminal or antitrust laws. Pending the written decision of the arbitrators, there shall be no interruption in the transaction of business under this Agreement, and all payments in respect thereto shall be made in the same manner as prior to the arising of the dispute until the matter in dispute shall have been fully determined by arbitration, and thereupon such payment or restitution shall be made as required by the written decision of the arbitrators.

(ii) As a third party beneficiary, KCSR may initiate and prosecute arbitration pursuant to Section 7(i)(i) on behalf of MSLLC. MSLLC shall cooperate with KCSR in the preparation for, and the initiation and prosecution of, such arbitration, at KCSR's expense.

(j) Confidentiality.

(i) Except as provided by law or by rule, order, or regulation of any court or regulatory agency with jurisdiction over the subject matter of this Agreement, or in connection with an audit by the Internal Revenue Service or other tax authority, or as may be necessary or appropriate for a Party hereto to enforce its rights under this Agreement, during the term of this Agreement (including any extensions thereof), and for a period of three (3) years after termination or expiration of this Agreement, the terms and provisions of this Agreement and all information to which access is provided or which is obtained hereunder will be kept confidential and will not be disclosed by either Party to any person other than members, officers, employees, independent auditors, and attorneys, without the prior written approval of the other Party.

(ii) Notwithstanding the foregoing Section 7(j)(i), the Parties acknowledge and agree that in any STB proceeding, the Parties may be required to submit this Agreement into the record. The Parties will seek a protective order to protect the payment provisions of this Agreement. Following issuance of a protective order, a copy (with certain confidential provisions redacted) may be entered into the public STB record and a highly confidential unredacted copy of this Agreement may be entered into the STB record subject to the provisions of the applicable protective order.

(k) Claims.

The Parties shall agree between themselves on the fairest, practical, and efficient arrangements for handling and administering freight loss and damage Claims. Such arrangements, and the allocation of responsibility for such Claims, shall be subject to the provisions of the Unified Liability Agreement.

(l) Abandonment.

(i) MSLLC shall have the right, subject to securing any necessary regulatory approval or exemption, to abandon or discontinue service on the Subject Trackage or any portion thereof (the "Abandonment Segment") during the term of this Agreement. MSLLC shall provide NSR no less than ninety (90) days prior notice of its intention to seek to abandon or discontinue service over any Abandonment Segment.

(ii) If MSLLC elects to abandon or discontinue service over the Subject Trackage (or any portion thereof) pursuant to Section 7(l)(i), this Agreement shall continue to apply in all respects to any remaining portion of the Subject Trackage not abandoned or subject to discontinuance by MSLLC.

(iii) MSLLC shall, not less than 60 days prior to any submission to the Surface Transportation Board (or successor agency having jurisdiction over said abandonment or discontinuance) of an application or exemption for authority to abandon or discontinue service over an Abandonment Segment(s), first offer NSR the first right to purchase such Abandonment Segment(s) for fair market value ("FMV") of such Abandonment

Segment(s), and on such other terms and conditions as are customary with respect to line sales, which such notice shall specifically identify this Section 7(l) and the time periods for action hereunder. NSR shall have forty-five (45) days ("Abandonment Notice Period") within which to advise MSLLC that it will exercise its right to purchase ("Exercise Notice"). If the Parties are unable to agree upon the FMV of the Abandonment Segment(s) that NSR wishes to purchase, either Party may refer the issue to arbitration pursuant to Section 7(i), which arbitration shall determine all other issues relating to terms and conditions for the sale not then (at the time of the initiation of the arbitration) agreed to by the Parties. Such arbitration shall be conducted on an expedited basis, with selection of the arbitrators within thirty (30) days of the initiation of arbitration, all submissions to be made by the Parties within ninety (60) days of the initiation of arbitration, and a written decision to be rendered within thirty (30) days following the final submissions of the Parties.

(iv) The Parties shall consummate the sale contemplated by this Section 7(l) within forty-five (45) days of the latest of: (a) the rendering of a written arbitration decision, should issues related to the sale proceed to arbitration; (b) the execution of a purchase and sale agreement, should the Parties execute the same; and (c) the grant of authority, or exemption from the need to obtain a grant of authority, from any regulatory body having jurisdiction over the same.

(v) If NSR elects not to purchase the Abandonment Segment, it shall so advise MSLLC within the same forty-five (45) day Abandonment Notice Period by delivering to MSLLC a notice of waiver of right to purchase said segment ("Waiver Notice"). Failure of NSR to provide MSLLC with either an Exercise Notice or a Waiver Notice within the aforesaid forty-five (45) day period shall constitute a Waiver Notice.

(vi) In the event of a Waiver Notice and KCSR does not purchase the Abandonment Segment pursuant to its rights in the KCSR Joint Use Agreement, MSLLC shall promptly file such application, petition or exemption notice as may then be required to obtain regulatory authority or exemption for the Abandonment Segment and for the discontinuance of KCSR's and NSR's (if any) trackage rights over the Abandonment Segment.

(m) MSLLC Liability.

For the purposes of this Agreement, MSLLC shall be liable for the actions and omissions of its Designated Operator for the performance of its duties as such as if such actions or omissions were those of MSLLC.

(n) Miscellaneous Provisions.

(i) This Agreement and each and every provision hereof is for the exclusive benefit of the Parties hereto. Nothing herein contained shall be taken as creating or increasing any right of any third party to recover by way of damages or otherwise against any of the Parties hereto.

(ii) This Agreement contains the entire understanding of the Parties hereto with respect to the subject matter hereof and supersedes any and all oral understandings between the Parties.

(iii) No term or provision of this Agreement may be changed, waived, discharged, or terminated except by an instrument in writing and signed by all Parties.

(iv) The division of this Agreement into articles, sections, and subsections and the insertion of headings and references are for convenience of reference only, and shall not affect the construction or interpretation of this Agreement. Unless the context otherwise requires, all references to articles, sections or subsections are to articles, sections or subsections of this Agreement.

(v) This Agreement is the result of mutual negotiations between the Parties hereto, neither of whom shall be considered the drafter for purposes of contract construction.

(vi) No consent or waiver, expressed or implied, by a Party of any breach or default by the other Party in the performance by such other Party of its obligations hereunder shall be deemed or construed to be a consent to or waiver of any other breach or default in the performance hereunder by such other Party. Failure on the part of a Party to complain of any act or failure of the other Party or to declare the other Party in default, irrespective of how long such failure continues, shall not constitute a waiver by such first mentioned Party of its rights hereunder.

(vii) If any provision of this Agreement or the application thereof to any Party hereto or to any circumstance shall be determined by a court of competent jurisdiction to be invalid or unenforceable to any extent or for any reason, the remainder of this Agreement or the application of the provisions thereof to such Party or circumstance, other than those determined to be invalid or unenforceable, shall not be affected thereby and shall be enforced to the fullest extent permitted by law, and the Parties shall promptly enter into such other agreement(s) as their respective legal counsel may deem appropriate in order to replace such invalid or unenforceable provisions in a manner that produces a result which is substantially equivalent to the terms of this Agreement in all material respects.

(viii) Nothing herein shall be interpreted as creating an association, partnership, joint venture or other joint undertaking between MSLLC and NSR.

(ix) This Agreement shall be governed and interpreted in accordance with the laws of the State of Delaware, without regard to application of the choice of law principles thereof.

(x) This Agreement may be executed in any number of counterparts, each of which shall be deemed to be an original, but all such separate counterparts shall together constitute but one and the same instrument.

(2) Other Interchange Compensation

(a) NSR shall pay to MSLLC the following as compensation for providing NSR with NSR Haulage Rights over the Subject Trackage to an interchange with UP at M.P. V-169.85:

[ ]	[ ]
[ ]	[ ]
[ ]	[ ]
[ ]	[ ]

(b) NSR shall also pay to MSLLC [ ] as "Additional Compensation".

B. Empties – Initial Pricing:

(1) NSR shall pay to MSLLC [ ] on an empty railcar moving in NSR Haulage Service between Meridian (M.P. 0.0) and Shreveport (M.P. V- 169.85) upon the following conditions:

(a) Empty cars ride on a haulage train consisting of [ ] [ ]. Empty cars will not be limited in number as long as the maximum train length allowable at that time is not exceeded. All empty cars will ride as one block at the end of the haulage train.

(b) The loaded cars meet or exceed[ ]. In the event NSR fails to maintain [ ], then the Parties agree

REDACTED

to meet at MSLLC's request to establish rates to compensate MSLLC adequately for the excess empty wells and platforms.

(c) A "slot" is defined as any available rail car space that can minimally hold a 40' TOFC/COFC unit. There are (i) two slots per well of a single or multi-well stack car; or (ii) one slot per hitch on a single flat car or multi-platform conventional spine car. The following table serves as an example of pricing scenarios for empty rail car moves. There may be other pricing scenarios.

Empty Car Description	Number of Slots	Price per Car
[ ]	[ ]	[ ]
[ ]	[ ]	[ ]
[ ]	[ ]	[ ]
[ ]	[ ]	[ ]
[ ]	[ ]	[ ]
[ ]	[ ]	[ ]
[ ]	[ ]	[ ]

Section 2. Service Standards.

A. The Service Standards contained in this Section 2 shall become effective beginning with the start of the calendar year following the earlier of (i)

completion of the spending of the Capital Proceeds as defined in the Transaction Agreement; or (ii) the fourth anniversary of the Closing of the Transaction.

B. For the purpose of this Section, Qualifying Trains are defined as: (i) trains carrying NSR Cars moving across the Subject Trackage between Meridian (MP 0.0) and Shreveport (MP V- 169.85), and Meridian (MP 0.0) and Metro Junction (MP D – 110.2) or other mutually-designated interchange locations in the Dallas, TX area; or (ii) KCSR trains moving traffic subject to the Dallas Terminal Marketing Agreement. In addition, Qualifying Trains must meet the following criteria to be included in the computation for Service Standards:

(1) The train must not have been delayed en route between the End Points directly as a result of:

(a) a crossing accident;

(b) the failure of locomotives in NSR's account on the train, unless said failure is intentionally caused by the acts of the crews, in the case of trains moving NSR Cars,

(c) trains carrying NSR Cars that undergo a 1,000 mile inspection between the End Points;

(d) concentrated FRA audits;

(e) a scheduled maintenance of way window where MSLLC or KCSR have given NSR at least [ ]advance notice, and, despite the good faith efforts of the Designated Operator, NSR and KCSR under the direction of the JOC to resolve potential conflicts in scheduling, said train delays could not be avoided;

(f) the failure of NSR to provide locomotive consists that meet the HPT requirements set forth from time to time by the JOC that apply equally to all carriers operating similar traffic on the Subject Trackage;

(g) or Force Majeure; or

(2) The train must not have begun its transit over the Subject Trackage on any of the following holidays: New Years Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.

C. At the time Service Standards become effective, the following transit times for Qualifying Trains will apply:

(1) The transit time for a Qualifying Train moving NSR Cars between the End Points will be [ ] from the time the train is actually available to

MSLLC, provided that the actual availability of such train is within [ ] on either side of its scheduled arrival time, and further provided that if said Qualifying Train is actually available to MSLLC more than [ ] before the scheduled arrival time, the transit time will be [ ] from the starting edge of the window (two hours before the scheduled arrival time), and provided further that if said Qualifying Train is not actually available to MSLLC until more than [ ]after the scheduled arrival time, then the transit time will be [ ].

(2) The transit time for a Qualifying Train moving traffic subject to the Dallas Terminal Marketing Agreement between the End Points will be [ ] from the time the train reaches the first End Point.

(3) The transit time for a Qualifying Train moving between Metro Junction (MP D – 110.2), or other mutually-designated interchange location in the Dallas, TX area, and Meridian (MP 0.0) that is actually available within [ ] on either side of its scheduled arrival time will be [ ] from the time actually available to MSLLC, KCSR or BNSF, as the case may be, provided however, if said Qualifying Train is actually available to MSLLC, KCSR or BNSF, as the case may be, more than[ ]before the scheduled arrival time, the transit time will be [ ] from the starting edge of the window (two hours before the scheduled arrival time), and provided further that if said Qualifying Train is not actually available to MSLLC until more than[ ] after the scheduled arrival time, then the transit time will be [ ].

(4) In the event that a train requires fueling en route over MSLLC, then a [ ] allowance shall be added to the relevant service standard.

(5) For the purpose of computing the Service Standard transit times, the origin time shall be the time that the Qualifying Train is actually available to the receiving carrier at the origin End Point (or, in the case of a run through train, when the train moves over the origin End Point) and the destination time shall be the time that the Qualifying Train is actually available to the receiving carrier at the destination End Point (or, in the case of a run through train, when the train moves over the destination End Point), unless the train is refused in interchange by the receiving carrier (other than KCSR), in which case the destination time will be the arrival time at the location on the delivering carrier where the train will be held awaiting acceptance for the interchange from the receiving carrier.

D. The Service Standard Transit Times provided for herein will not be amended or modified as a result of a change in control of KCSR.

Section 3. Liquidated Damages

A. Payment of liquidated damage by MSLLC to NSR will be triggered by the following conditions:

Section 5. Volume Guarantees.

The Volume Guarantees described in this section shall not apply until the first full calendar year following the year in which the service standards described in Section 2 are in effect. If NSR receives[ ] train starts by the third anniversary of the Closing (as defined in the Transaction Agreement), and [ ]trains starts by the fourth anniversary of the Closing (as defined in the Transaction Agreement), an additional year will be added to the contemplated initiation of the Volume Guarantees.

(1) NSR commits that [

].

(2) The Volume Guarantee shall be reduced if [

]. The percentage of such a decline will result in an equivalent percentage reduction to the Volume Guarantee for that calendar year.

(3) The Volume Guarantee shall be reduced by [ ]for any calendar year in which [

], and reduced by [ ]as well [

].

(4) The Volume Guarantee shall cease to be in effect [
] and shall not become effective again until[

].

(5) The Volume Guarantee shall cease to be in effect [

EXHIBIT D
to Transaction Agreement

THE KANSAS CITY SOUTHERN RAILWAY COMPANY – MERIDIAN SPEEDWAY LLC -- JOINT USE AGREEMENT

THIS AGREEMENT (the "KCSR Joint Use Agreement" or "Agreement") is entered into as of this ____ day of _____, 200__, by and between KANSAS CITY SOUTHERN ("KCS") AND THE KANSAS CITY SOUTHERN RAILWAY COMPANY, ("KCSR"), MERIDIAN SPEEDWAY LLC, a Delaware limited liability company ("MSLLC"), and NORFOLK SOUTHERN RAILWAY COMPANY, a Virginia corporation ("NSR"). NSR, MSLLC, and KCSR are referred to individually herein as a "Party" and collectively as the "Parties".

RECITALS:

WHEREAS, on December 1, 2005, KCS, KCSR, The Alabama Great Southern Railroad Company and Norfolk Southern Corporation ("NSC") entered into a transaction agreement (the "Transaction Agreement") that, among other things, provided for the creation of MSLLC, the transfer from KCSR to MSLLC of the Subject Trackage as defined herein, the construction, at MSLLC's cost, of certain infrastructure improvement projects, and the grant by MSLLC to Norfolk Southern Railway Company and KCSR of certain rights over the entirety of the Subject Trackage; and

WHEREAS, pursuant to the Transaction Agreement, MSLLC has agreed to grant NSR certain trackage and haulage rights for NSR to transport NS Traffic over the Subject Trackage; and

WHEREAS, pursuant to the Transaction Agreement, MSLLC has agreed to grant KCSR local and overhead trackage rights as necessary for KCSR to continue to conduct railroad operations over the Subject Trackage and to fulfill its common carrier obligations with respect to all traffic except for the right to transport NS Traffic and Third Party Traffic over the Subject Trackage ("KCS Trackage Rights"); and

WHEREAS, the Transaction Agreement anticipates that, pursuant to an Operating Agreement, MSLLC will hire KCSR to perform as the designated operator ("Designated Operator") for all railroad operations on behalf of MSLLC, including MSLLC railway operations required pursuant to the KCSR Joint Use Agreement and the NSR Joint Use Agreement, and

WHEREAS, the route traversed by traffic moving pursuant to this Joint Use Agreement includes approximately four-tenths of a mile section of track in Jackson, Mississippi that is controlled by Canadian National (as successor to Illinois Central Gulf Railroad Company) (the "Jackson Trackage Rights Section") pursuant to that certain trackage rights agreement (the "MSR Trackage Rights Agreement"), as supplemented and amended from time to time, dated March 26, 1986, between Midsouth Rail Corporation and Illinois Central Gulf Railroad Company; and

WHEREAS, pursuant to the Transaction Agreement, KCSR shall provide haulage ("KCSR Haulage") for NSR over the Jackson Trackage Rights Section until either the MSR Trackage Rights Agreement is assigned to MSLLC or MSLLC constructs a "flyover" bridge to

REDACTED

carry MSLLC tracks over the tracks and real property of Canadian National Railway Company at Jackson, MS which establishes a continuous line of rail between Shreveport and Meridian (the "Jackson Flyover"); and

WHEREAS, the Parties intend that the MSR Trackage Rights Agreement will be assigned to MSLLC and the Parties desire to set forth the terms and conditions upon which MSLLC shall provide haulage services to KCSR and NSR over the Jackson Trackage Rights Section in the event of such assignment; and

WHEREAS, pursuant to an agreement of even date herewith between KCSR and MSLLC (the "Master KCSR-MSLLC Interchange Agreement"), MSLLC and KCSR have documented, among other things, the method for the physical interchange of traffic between KCSR and MSLLC at points on the Subject Trackage; and

WHEREAS, pursuant to the Transaction Agreement, that certain Interchange Agreement between KCSR and NSR dated as of June 4, 1986, as supplemented as of January 24, 2003, (the "Meridian Interchange Agreement") has been assigned to MSLLC; and

WHEREAS, the Parties desire to set forth the terms and conditions upon which MSLLC has agreed to grant KCSR its KCSR Trackage Rights;

NOW, THEREFORE, the Parties hereto, intending to be legally bound, agree as follows:

SECTION 1. DEFINITIONS AND INTERPRETATION

(a) Interpretation Generally.

(i) Unless otherwise defined herein, all words, terms and phrases used in this Agreement shall be construed in accordance with the generally applicable definition or meaning of such words, terms and phrases in the railroad industry.

(ii) Each definition in this Agreement includes the singular and the plural, and references in this Agreement to the neuter gender include the masculine and feminine where appropriate. References herein to any agreement or contract mean such agreement or contract as amended. As used in this Agreement, the word "including" means "without limitation", and the words "herein", "hereof" and "hereunder" refer to this Agreement as a whole. All dollar amounts stated herein are in United States currency.

(b) Capitalized Terms.

All capitalized terms shall have the defined meaning set forth below:

"Abandonment Notice Period" shall have the meaning given to that term in Section 7(l)(iii).

"Abandonment Segment" shall have the meaning given to that term in Section 7(l)(i).

REDACTED

"Agreement" shall have the meaning given to that term in the introductory paragraph.

"AAR" shall have the meaning given to that term in Section 6(c).

"Cars" means each loaded or empty railroad freight car (including platform and well rail cars) or similar equipment.

"Clearance File" shall have the meaning given to that term in Section 6(d).

"Dallas Intermodal Terminal Traffic" means all domestic intermodal containers or trailers with an origin and destination in the United States, with a lift or drop at the Terminal, that moves over the Subject Trackage and over KCSR's tracks between Shreveport and the Terminal, and that originates or terminates at or east of Meridian, and that originates or terminates at or west of the Dallas / Ft. Worth, TX. Standard Metropolitan Statistical Area (SMSA) as published by the Office of Management and Budget (OMB).

"Dallas Terminal Marketing Agreement" shall mean that certain Dallas Terminal Marketing Agreement dated the date hereof by and between NSR and KCSR.

"Designated Operator" shall have the meaning given to that term in the Recitals.

"End Points" shall mean: (1) Meridian, MS, M.P. 0.0; and (2) Shreveport, LA, M.P. V-169.85.

"Effective Date" shall have the meaning given to that term in Section 7(f)(i).

"EOTs" shall have the meaning given to that term in Section 2(b)(iii).

"Equipment" shall mean and be confined to hi-rail vehicles, track inspection equipment and other non-revenue vehicles and machinery (other than locomotives) capable of being operated on railroad tracks that, at the time of an occurrence, are (i) being operated on the trackage upon which such occurrence takes place, or (ii) are on the trackage upon which such occurrence takes place, or on the adjoining right-of-way, for the purpose of maintenance or repair thereof or the clearing of wrecks thereon.

"Exercise Notice" shall have the meaning given to that term in Section 7(l)(iii).

"FMV" shall have the meaning given to that term in Section 7(l)(iii).

"Foreign Railroad" shall mean a railroad that is not a party to this Agreement.

"Foreign Railroad Interchange Agreement" shall have the meaning given to that term in Section 3(c).

"GTMs" shall have the meaning given to that term in Appendix B, Section 1.A.

"Jackson Trackage Rights Section" shall have the meaning given to that term in the Recitals.

"Jackson Flyover" shall have the meaning given to that term in the Recitals.

"JOC" shall have the meaning given to that term in Section 6(a)(ii).

"KCSR Cars" shall mean Cars and Equipment in the revenue and/or car hire account of KCSR.

"KCSR Haulage Cars" shall mean KCSR Cars being transported pursuant to KCSR Haulage Rights.

"KCSR Haulage Rights" shall have the meaning given to that term in Section 2(a).

"KCSR" shall have the meaning given to that term in the introductory paragraph.

"KCSR Master Locomotive Run Through Agreement" shall have the meaning given to that term in Section 2(b)(ii).

"KCSR Permitted Traffic" shall have the meaning given to that term in Section 4(a).

"KCSR Trackage and Haulage Rights" shall mean those rights granted in Sections 2(a) and 2(b) of this Agreement.

"KCSR Trackage Rights" shall have the meaning given to that term in Section 2(a).

"KCSR Trackage Rights Cars" shall mean KCSR Cars and Equipment transported pursuant to KCSR Trackage Rights.

"Management Committee" shall mean the Management Committee of MSLLC as provided in the LLC Agreement.

"Master KCS-MSLLC Interchange Agreement" shall have the meaning given to that term in the Recitals.

"Meridian Interchange Agreement" shall have the meaning given to that term in the Recitals.

"Monthly Statement" shall have the meaning given to that term in Section 7(b)(i).

"MSR Trackage Rights Agreement" shall have the meaning given to that term in the Recitals.

"MSLLC" shall have the meaning given to that term in the introductory paragraph.

"NS Traffic" shall mean all intermodal traffic that: (i) originates or terminates in the United States west of Dallas/Ft. Worth (including intermodal traffic originating by steamship line at a port along the west coast of the United States) and enters or exits the Subject Trackage at Shreveport; and (ii) originates or terminates in the United States at or east of Meridian and enters or exits the Subject Trackage at Meridian; and (iii) does not consist of traffic originating or terminating at any station on the KCSR system which includes the Texas Mexican Railway

Company, (including any station where KCSR, or the Texas Mexican Railway Company have trackage rights or access via reciprocal switch), as it exists on the date of the Transaction Agreement.

"NSC" shall have the meaning given to that term in the Recitals.

"NSR" shall have the meaning given to that term in the introductory paragraph.

"NSR Cars" shall mean Cars and Equipment in the revenue and/or car hire account of NSR.

"NSR Haulage Cars" shall mean NSR Cars being transported pursuant to haulage rights granted in the NSR Joint Use Agreement.

"NSR Joint Use Agreement" shall meaning an agreement of even date herewith by which MSLLC grants NSR certain trackage and haulage rights to transport NS Traffic.

"Operating Agreement" shall have the meaning given to that term in the Recitals.

"Parties" shall have the meaning given to that term in the introductory paragraph.

"Party" shall have the meaning given to that term in the introductory paragraph.

"Permitted Transfer" shall have the meaning given to that term in the Transaction Agreement.

"Subject Trackage" shall mean the certain lines of railroad generally running between Meridian, MS and Shreveport, LA as defined in the Transaction Agreement, together with the Jackson Flyover, as hereinafter defined, when constructed, and a bridge over the Mississippi River at Vicksburg.

"Third Party Traffic" shall mean freight rail service provided for a Foreign Railroad under a haulage or trackage rights agreement between MSLLC and the Foreign Railroad.

"Transaction Agreement" shall have the meaning given to that term in the Recitals.

"UP" shall mean the Union Pacific Railroad Company or any of its subsidiaries.

"Use Invoice" shall have the meaning given to that term in Section 7(b)(i).

"Waiver Notice" shall have the meaning given to that term in Section 7(l)(v).

(c) Successor Laws.

A reference to any particular statute or regulation shall include a reference to any successor statute or regulation.

SECTION 2. OPERATING RIGHTS

(a) Trackage Rights.

Pursuant to the Transaction Agreement and subject to the terms set forth in this Agreement, MSLLC hereby grants KCSR Trackage Rights for KCSR to transport KCSR Permitted Traffic over the Subject Trackage, excluding the Jackson Trackage Rights Section, and to fulfill its common carrier obligations with respect to KCSR Permitted Traffic (the "KCSR Trackage Rights"). These rights include, but are not limited to, the right to operate its trains, locomotives, cars, and Equipment with its own crews over the entirety of the Subject Trackage excluding the Jackson Trackage Rights Section. KCSR's use of its KCSR Trackage Rights shall be subject to the limitations and restrictions set forth in this Section 2(a), Section 2(c) and Section 2(d). KCSR Trackage Rights Cars shall at all times remain in the revenue waybill and car hire accounts of KCSR while moving over the Subject Trackage.

(b) Grant of Haulage Rights.

Pursuant to the Transaction Agreement and consistent with the terms of this Agreement, MSLLC hereby grants KCSR Haulage Rights solely for the purpose of transporting KCSR Permitted Traffic over the Jackson Trackage Rights Section, connective only with the KCSR Trackage Rights ("KCSR Haulage Rights"), should the MSR Trackage Rights Agreement be assigned to MSLLC. KCSR's use of its KCSR Haulage Rights shall be subject to the limitations and restrictions set forth in this Section 2(b), Section 2(c) and Section 2(d).

(i) KCSR Haulage Cars shall at all times remain in the revenue waybill and car hire accounts of KCSR while moving over the Jackson Trackage Rights Section via the KCSR Haulage Rights. MSLLC shall not be entitled to any line haul revenue for the handling of KCSR Haulage Cars, nor shall MSLLC participate in the routing of, nor appear in tariffs, waybills or other shipping documents as a participating carrier in connection with, the movement of KCSR Haulage Cars.

(ii) The Parties will execute an agreement (the "KCSR Master Locomotive Run Through Agreement") consistent with, and with terms materially identical to, the Supplemental Agreement dated May 11, 2000, to the Master Locomotive Run Through Agreement of November 29, 1994. The KCSR shall be responsible for providing any equipment (locomotives, cars, end of train units ("EOTs"), etc.), and fuel for the trains used in providing the KCSR Haulage Rights. Locomotives on trains providing the KCSR Haulage Rights shall be governed by the KCSR Master Locomotive Run Through Agreement.

(c) Use Of The Subject Trackage.

(i) KCSR's use of Subject Trackage shall be in common with MSLLC, and, other than as explicitly set forth herein, MSLLC's right to use the Subject Trackage shall not be diminished by this Agreement.

(ii) KCSR may operate trains in either direction over the Subject Trackage.

(iii) KCSR may use its KCSR Trackage and Haulage Rights solely for the purposes of the movement of KCSR Permitted Traffic.

(iv) The KCSR Trackage and Haulage Rights shall be for the purpose of KCSR using the Subject Trackage to operate its trains in overhead and local movements, including, where applicable, the right of ingress and egress to any tracks, switches, turnouts, or other track classifications that connect to any point along the Subject Trackage.

(v) KCSR Trackage and Haulage Rights include the right to serve all existing or future shippers and receivers, including any transload operations, ports, industrial facilities or facilities of any type, that connect to (or are located on, at, along, or near) the Subject Trackage.

(vi) Subject to Section 3 and except as they may otherwise be restricted by the MSR Trackage Rights Agreement, KCSR may use the KCSR Trackage and Haulage Rights to interchange with any railroad at any location along the Subject Trackage, whether or not such a railroad is a private or common carrier that connects to the Subject Trackage.

(vii) KCSR shall have the right to use the Subject Trackage for the purpose of switching, storing, and servicing Cars, locomotives and Equipment, and for the making or breaking up of trains in order to conduct its railroad operations.

(viii) KCSR shall have the right to establish rates, charges, service terms, routes, and divisions, and to collect freight revenues or other transportation charges relating to KCSR Permitted Traffic transported over all or any portion of the Subject Trackage.

(d) Restrictions on Use.

(i) KCSR shall not use the KCSR Trackage and Haulage Rights for the movement of NS Traffic or Third Party Traffic, and KCSR may not move traffic over the Subject Trackage in the account of any railroad other than KCSR.

(ii) KCSR may not, pursuant to this Agreement, grant haulage rights, trackage rights, or other operating rights of any nature on or over the Subject Trackage to any other party.

SECTION 3. INTERCHANGE

From time to time MSLLC and KCSR shall consult as to the various interchange locations for the delivery and receipt of traffic, if any, being physically transferred between KCSR, MSLLC, and a Foreign Railroad. Unless otherwise mutually agreed, interchange operations shall be governed as follows:

(a) Interchange Between KCSR and MSLLC

Interchange operations between and among KCSR and MSLLC shall be governed by the terms of the Master KCS-MSLLC Interchange Agreement.

(b) Interchange Between KCSR and NSR

Interchange operations between and among KCSR and NSR shall be governed by the terms of the Meridian Interchange Agreement.

(c) Interchange With A Foreign Railroad

Interchange operations between KCSR and a Foreign Railroad shall be governed by the terms of the relevant interchange agreement between KCSR and said Foreign Railroad ("Foreign Railroad Interchange Agreement"), which may not be inconsistent with this Agreement.

(d) Continuous Movement

Nothing herein shall be interpreted as prohibiting the Designated Operator from transporting KCSR Haulage Cars over the Jackson Trackage Rights Section in a continuous movement with KCSR operating over the Subject Trackage via the KCSR Trackage Rights.

SECTION 4. PERMITTED SERVICE

(a) KCSR Permitted Traffic.

KCSR Permitted Traffic shall consist of all commodities transported to and from all origins and destinations other than NS Traffic or Third Party Traffic, except that KCSR may not move traffic over the Subject Trackage or the Jackson Trackage Rights Section in the account of any railroad other than KCSR.

(b) Dallas Intermodal Terminal Traffic

As KCSR Permitted Traffic, KCSR shall have the exclusive right to transport Dallas Intermodal Terminal Traffic over the Subject Trackage, except as provided in, and subject to, the Dallas Terminal Marketing Agreement.

(c) MSLLC's Retained Rights

(i) MSLLC may perform haulage services for, or provide trackage rights or operating right to, NSR or a Foreign Railroad provided the traffic moved for that carrier remains in that other carrier's revenue waybill account.

(ii) Notwithstanding the foregoing Section 4(c)(i), for NS Traffic only, MSLLC may not perform haulage services for any carrier other than NSR or grant trackage rights or operating rights to KCSR or any Foreign Railroad on the Subject Trackage for NS Traffic, absent the express written consent of NSR, which may be withheld in NSR's sole discretion.

(d) Rebilling.

It is the intent of the Parties that rebilling of traffic is not a permissible method of avoiding any direct traffic limitation, including those set forth in Section 4(a), or imposition of charges for services set forth herein.

REDACTED

SECTION 5. INFRASTRUCTURE

(a) Maintenance.

(i) MSLLC shall be solely responsible for the maintenance, repair, and renewal of the Subject Trackage. MSLLC shall keep and maintain the Subject Trackage in reasonably good condition for the use herein contemplated, but MSLLC does not guarantee the condition of the Subject Trackage or that operations thereover will not be interrupted. MSLLC shall take reasonable steps to ensure that any interruptions will be kept to a minimum and shall use commercially reasonable efforts to avoid such interruptions.

(ii) Existing connections or facilities shall continue to be maintained, repaired, and renewed by and at the expense of the party or parties responsible for such maintenance, repair, and renewal under applicable agreements.

(iii) Notwithstanding anything to the contrary herein, MSLLC shall maintain the main line of the Subject Trackage to a minimum of FRA Class 3 standards, capable of handling cars of 286,000 lbs.

SECTION 6. MANAGEMENT AND OPERATIONS

(a) Dispatching

(i) The Designated Operator shall have exclusive control over the management and dispatching of the Subject Trackage. Dispatching of the Subject Trackage shall be conducted in a manner as to afford each of the Parties, and any other present or future user of the Subject Trackage (or any portion thereof) the most economical and efficient movement of its traffic over the Subject Trackage consistent with the demands and needs of other authorized users.

(ii) Although the Designated Operator will be the dispatcher, the Joint Operating Committee ("JOC"), subject to the direction of the Management Committee, will develop and implement appropriate dispatching protocols and adjust those protocols from time to time as necessary to carry out this Agreement. In dispatching the Subject Trackage, the Designated Operator shall follow any protocols developed by the JOC, provided, that in the event of a conflict between the dispatching protocols and the need to economically and efficiently move the traffic over the Subject Trackage, the dispatcher shall be empowered to employ best practices to efficiently move all trains consistent with the principles of this Agreement.

(b) Capacity Rights

Notwithstanding any other provisions of this Agreement, the Parties acknowledge that there may be capacity constraints from time to time for traffic covered under this Agreement. Whenever capacity of the Subject Trackage is insufficient to handle the total traffic demands of KCSR and NSR, the following capacity allocation rules shall apply:

(i) Prior to the start of the calendar year following the earlier of (a) completion of the spending of the Capital Proceeds as defined in the Transaction Agreement; or (b) the fourth anniversary of the Closing as defined in the Transaction Agreement, KCSR and NSR will each have a minimum of five (5) daily overhead train starts over the Subject Trackage. For purposes of determining capacity rights, NSR's train starts will include NS Traffic and Dallas Intermodal Terminal Traffic.

(ii) As incremental overhead train starts become available, KCSR acknowledges that NSR shall receive the first of every three (3) new daily overhead train starts, and NSR acknowledges that KCSR shall be allocated the second and third of every three (3) new daily overhead train starts. Following the start of the calendar year following the earlier of (a) completion of the spending of the Capital Proceeds as defined in the Transaction Agreement; or (b) the fourth anniversary of the Closing as defined in the Transaction Agreement, KCSR acknowledges that NSR will have a minimum of thirteen (13) daily overhead train starts. If through this allocation process NSR does not have at least thirteen (13) daily overhead train starts, then KCSR agrees to relinquish such train starts as needed to provide NSR with thirteen (13) daily overhead train starts.

(iii) NSR acknowledges that, after providing for NSR's minimum guarantee of thirteen (13) daily overhead train starts, KCSR shall receive all additional incremental daily overhead train starts until KCSR has a total of twenty-one (21) daily overhead train starts. Thereafter, KCSR acknowledges that NSR shall be allocated the first of every three (3) additional new incremental daily overhead train starts, and NSR acknowledges that the second and third of every three (3) new daily overhead train starts shall be allocated to KCSR.

(iv) If the Foreign Railroad fails to supply all necessary capital required to accommodate its new train start, KCSR acknowledges and agrees that the first new daily train start of any Foreign Railroad admitted to the Subject Trackage by MSLLC shall be considered to be a KCSR daily overhead train start for the purpose of the allocation of daily overhead trains starts of under these capacity allocation provisions. If the Foreign Railroad supplies all necessary capital required to accommodate its new train start, the Foreign Railroad's train start shall count against neither KCSR's nor NSR's train start allocation.

(c) Defective Or Overloaded Cars

KCSR or, as to movement of KCSR Cars over the Jackson Trackage Rights Segment, MSLLC may arrange for repairs to and adjustments to, or transfers of lading from bad ordered, defective or overloaded KCSR Cars, as in KCSR's or MSLLC's judgment, as the case may be, may be necessary to move such KCSR Cars safely. KCSR shall reimburse MSLLC for the cost of such work done by or on behalf of MSLLC at rates prescribed in, and submitted pursuant to, the Field and Office Manuals of the Interchange Rules of the Association of American Railroads ("AAR").

(d) Use Of A Clearance File

KCSR shall have the right to operate all dimensional loads and excess clearance railcars for handling over the Subject Trackage, subject to a clearance file (the "Clearance File") applicable to traffic of NSR, KCSR, and MSLLC maintained by MSLLC. MSLLC shall promptly inform KCSR of any changes made to the Clearance File.

(e) Radio Communication

KCSR locomotives and crews operating over the Subject Trackage shall be equipped to communicate with the Designated Operator on radio frequencies normally used by the Designated Operator in directing train movements on the Subject Trackage.

(f) Safety Rules

KCSR's operations over the Subject Trackage shall at all times be subject to the direction and control of the operating officer in charge of the Subject Trackage and comply in all respects with the safety rules, operating rules and other regulations of the Designated Operator.

(g) Training of KCSR Crews.

KCSR shall make such arrangements with MSLLC as may be required to have all of its employees who shall operate its trains, locomotives, cars and Equipment over the Subject Trackage qualified for operation thereover. MSLLC shall provide reasonable cooperation and assistance in the qualification of KCSR operating (train and engine) crews for service over the Subject Trackage upon request. KCSR supervisory personnel who have been qualified to operate over the Subject Trackage may qualify other KCSR employees for operation of trains over the Subject Trackage.

(h) Modification of KCSR Train Schedules.

KCSR shall provide the Designated Operator reasonable notice of the schedules for regularly scheduled KCSR trains operating over the Subject Trackage, as well as any proposed modifications, and shall coordinate train operations with the Designated Operator and its dispatcher.

(i) Compensation.

KCSR shall compensate MSLLC for the use of the Subject Trackage pursuant to this Section 6 in accordance with Appendix B – Compensation.

(j) Mileage and Car Hire.

All mileage and car hire charges accruing on KCSR Cars on the Subject Trackage and the Jackson Trackage Rights Segment shall be assumed by KCSR and reported and paid by it directly.

SECTION 7. GENERALLY APPLICABLE PROVISIONS

(a) Compliance with Applicable Law and Rules.

(i) Each Party hereto shall comply with all applicable and lawful federal, state and local laws, rules, regulations and orders promulgated by any Governmental Entity that relate to the operations contemplated hereunder, including but not limited to the provisions of the Federal Locomotive Inspection Act and the Federal Safety Appliance Act, as amended, and any other lawful federal and state and local laws, regulations and rules respecting the operation, condition, inspection and safety of its trains, locomotives, cars and Equipment while such trains, locomotives, cars, and Equipment are being operated over the Route. If any fine, penalty, cost, or charge is imposed or assessed on or against either Party hereto by reason of the other Party's non-compliance with any such laws, rules, regulations or orders, such non-complying Party shall reimburse and indemnify the other Party for or on account of any such fine, penalty, cost or charge, and all expenses and attorneys fees incurred. As a part of the consideration hereof, each Party hereby agrees that the indemnity commitments in this Section in favor of the other Party hereto shall extend to and indemnify the parent corporation, subsidiaries and affiliates of such other Party, and all of their respective directors, officers, agents and employees.

(ii) KCSR's trains shall not include locomotives, cars or Equipment which exceed the width, height, weight or other restrictions or capacities of the Subject Trackage as contained in the Clearance File maintained by MSLLC, and no train shall contain locomotives, cars or Equipment which require speed restrictions or other movement restrictions below the maximum authorized freight speeds as provided by the Designated Operator's operating rules and regulations, without the prior consent of MSLLC. The JOC shall make proper accommodation for exceptions, should that be reasonable, necessary, and practicable. All KCSR trains shall be operated by locomotives with horsepower sufficient to permit operation at posted speeds.

(iii) If any employee of KCSR shall neglect, refuse, or fail to abide by MSLLC's rules, instructions and restrictions governing the operation on or along MSLLC's property, such employee shall, upon written request of MSLLC, be prohibited by KCSR from working on MSLLC's property. If any party shall deem it necessary to hold a formal investigation to establish such neglect, refusal, or failure on the part of any employee of KCSR, then upon such notice presented in writing, KCSR shall promptly hold an investigation in which all parties concerned shall participate, with each party bearing the expense for its officers', counsel's, witnesses' and employees' participation. Notice of such investigations to KCSR's employees shall be given by KCSR's officers, and such investigation shall be conducted in accordance with the terms and conditions of schedule agreements between KCSR and its employees. If the result of such investigation warrants, such employee shall, upon written request by MSLLC, be withdrawn by KCSR from service on MSLLC's property and KCSR shall release and indemnify MSLLC from and against any and all claims and expenses because of such withdrawal.

(b) Invoices and Payment of Bills.

(i) On or before the 15th day of each calendar month during the term of this Agreement, KCSR shall prepare and deliver to MSLLC a monthly statement (the "Monthly Statement"). The Monthly Statement shall be delivered to MSLLC's designee

in electronic format. MSLLC shall develop and present to KCSR an invoice (the "Use Invoice"). That Monthly Statement shall be in electronic format, and shall contain a detailed list of the KCSR Cars that moved during the subject month, which list shall include, for each Car, the following information: (A) the GTMs and, when applicable, the resistance miles; (B) the location that the Car entered the Subject Trackage; (C) the location that the Car exited the Subject Trackage; and (D) such other information relating to the cars that MSLLC may reasonably request in connection with accounting for the use of the services and rights provided hereunder. The Monthly Statement and the Use Invoice shall be delivered to KCSR and KCSR shall make payment to MSLLC within thirty (30) days after the date of such Use Invoice.

(ii) Any dispute regarding the amount of a Monthly Statement or Use Invoice shall be reconciled between the Parties pursuant to Section 7(i), and any adjustment resulting from such reconciliation shall be reflected in a subsequent Use Invoice. If KCSR disputes any portion of a Use Invoice, it shall nevertheless pay such Use Invoice in full subject to adjustment upon resolution of the dispute; provided, however, that (i) no exception to any charge in a Use Invoice shall be honored, recognized or considered if filed after the expiration of three (3) years from the date of the Use Invoice, and (ii) no invoice shall be rendered more than three (3) years (a) after the last day of the calendar month in which the expense covered thereby is incurred, or (b) in the case of charges disputed as to amount or liability, after the amount owed or liability therefor is established. Any claim for the adjustment of a Monthly Statement or Use Invoice shall be deemed to be waived if not made in writing within three (3) years after the date of the relevant Monthly Statement for statement adjustments and the date of the relevant Use Invoice for invoice adjustments.

(iii) NSR, MSLLC and KCSR shall each have the right, at its own expense, to audit the records of the other Party pertaining to the use of the Subject Trackage and the Jackson Trackage Rights Section under this Agreement, and any Monthly Statement, Use Invoice or other invoice issued by MSLLC pursuant to this Agreement, provided such audit is initiated at any time within three (3) years of the date of the relevant Use Invoice or other invoice (as applicable) relating to this Agreement. All such audits shall be conducted at reasonable intervals, locations, and times. All such audits shall be prosecuted with reasonable due diligence. Each Party agrees that all information disclosed to it or its representatives in connection with such an audit will be held in strictest confidence and will not be disclosed to any third party (other than to an arbitrator in connection with an arbitration conducted pursuant this Agreement or as required by applicable law). Any adjustment resulting from an audit conducted pursuant to this Section 7(b)(iii) with respect to which the Parties are in concurrence shall be reflected in a subsequent Use Invoice.

(iv) Invoices rendered pursuant to the provisions of this Agreement, other than Use Invoices, shall include direct labor and material costs, together with the surcharges, overhead percentages, and Equipment rentals as specified by MSLLC at the time any work is performed by MSLLC for KCSR, or shall include actual costs and expenses, upon mutual agreement of the Parties.

(c) Liability.

As between the Parties hereto, responsibility for any loss or destruction of, or damage to, any property whatsoever, and any injury to or death of any person or persons whomever (including employees of KCSR or MSLLC) or other matters covered by the Uniform Liability Agreement, resulting from, arising out of, incidental to or occurring in connection with this Agreement shall be allocated as is set forth in the Unified Liability Agreement.

(d) Rerailing, Wrecking, Bad Orders and Repairs.

(i) Whenever one or more cars and/or locomotives in KCSR haulage service requires rerailing, wrecking service or wrecking train service, MSLLC shall arrange for the provision of such service, including the repair and restoration of roadbed, the Subject Trackage and structures. MSLLC shall promptly inform KCSR of its intent to proceed with wrecking service or wrecking train service, and shall permit a KCSR representative to be present on the scene, to work in concert with the employees of its Designated Operator to manage such wrecking service or wrecking train service. The cost, liability and expense of the foregoing, including without limitation loss of, damage to, or destruction of any property whatsoever and injury to and death of any person or persons whomsoever or any damage to or destruction of the environment whatsoever, including without limitation land, air, water, wildlife, and vegetation, resulting therefrom shall be apportioned in accordance with the provisions of Section 7(c) hereof. All locomotives, cars, Equipment and salvage from the same so picked up and removed which is owned by or under the management and control of or used by KCSR at the time of such wreck, shall be promptly delivered to it.

(ii) Whenever one or more cars and/or locomotives in KCSR Trackage Rights service requires rerailing, wrecking service or wrecking train service, KCSR shall arrange for the provision of such service, including the repair and restoration of roadbed, the Subject Trackage and structures. KCSR shall promptly inform MSLLC of its intent to proceed with wrecking service or wrecking train service, and shall permit a MSLLC representative to be present on the scene, to work in concert with the employees of the Designated Operator to manage such wrecking service or wrecking train service. The cost, liability and expense of the foregoing, including without limitation loss of, damage to, or destruction of any property whatsoever and injury to and death of any person or persons whomsoever or any damage to or destruction of the environment whatsoever, including without limitation land, air, water, wildlife, and vegetation, resulting therefrom shall be apportioned in accordance with the provisions of Section 7(c) hereof. All locomotives, cars, Equipment, and salvage from the same so picked up and removed which is owned by or under the management and control of or used by KCSR at the time of such wreck, shall be the responsibility of KCSR.

(iii) If any cars or locomotives of KCSR are bad ordered en route on the Subject Trackage and it is necessary that they be set out, those cars or locomotives shall, after being repaired, be picked up by KCSR after receiving proper authority from MSLLC, or if agreed upon by the parties, MSLLC will transport them to a mutually acceptable location to be picked up by KCSR. MSLLC may, upon request of KCSR and

at the expense of KCSR, unless otherwise provided for in the Field and Office Manuals of the Interchange Rules of the AAR, furnish required labor and material to perform light repairs required to make such bad ordered Cars or locomotives safe and lawful for movement, and billing for this work shall be at rates prescribed in, and submitted pursuant to, the Field and Office Manuals of the Interchange Rules of the AAR.

(e) Force Majeure.

The obligations, other than payment obligations, of the Parties to this Agreement shall be subject to force majeure (including flood, earthquake, hurricane, tornado, or other such severe weather or climatic condition, riot, accident, wreck, derailment, washout, explosion, Acts of God, act of terrorism and public enemy, war, blockage, insurrection, vandalism or sabotage, fire, strike, lockout or labor dispute, embargoes or AAR service orders, or governmental laws, orders or regulations, and other causes or circumstances beyond the control of the Party invoking such force majeure as an excuse for nonperformance), but only as long as, and to the extent that, such force majeure shall reasonably prevent performance of such obligations by the affected Party. In the event that an event of force majeure impairs either Party's ability to fulfill its obligations to the other Party under this Agreement, said Party shall take all commercially reasonable measures to restore performance of its obligations in a timely manner.

(f) Term and Termination.

(i) This Agreement shall become effective following the latter of: (a) the date first written above; (b) receipt of any required regulatory approvals or exemptions; and (c) the expiration of any time periods required by the issuance of labor notices by KCSR and/or MSLLC, should such labor notices be required ("Effective Date"). The Parties shall determine the Effective Date through an exchange of written correspondence.

(ii) This Agreement shall commence on the Effective Date and shall continue until terminated by mutual agreement.

(iii) Termination of this Agreement shall not relieve or release any Party hereto from any obligations assumed or from any liability which may have arisen or been incurred by such Party under the terms of this Agreement prior to termination hereof, nor shall it terminate any underlying right, or contingent right, of movement pursuant to the trackage rights grant.

(g) Successors and Assigns.

(i) This Agreement shall inure to the benefit of and be binding upon each of the Parties and their respective successors and permitted assigns. Third party beneficiary status shall inure to the benefit of NSR and each of its successors and permitted assigns.

(ii) Except as otherwise specifically provided hereinafter, neither Party may assign this Agreement, or any of its rights, interests or obligations hereunder, including by operation of law, without the prior consent in writing of the other Party, which consent may be withheld at the discretion of such other Party.

(iii) In the event of a sale of substantially all of the assets or business of KCSR, or the merger or consolidation of KCSR into or with a firm or corporation not controlled by KCS, KCSR may, without the prior consent of MSLLC, assign this Agreement to such firm or corporation acquiring substantially all of the assets or business of KCSR, or merging or consolidating with KCSR; provided, however, that such assignment shall not transfer or extinguish any liability or obligation of KCSR under this Agreement that existed prior to such assignment.

(iv) In the event of a sale of substantially all of the assets or business of MSLLC, or the merger or consolidation of MSLLC, MSLLC may, without the prior consent of KCSR, assign this Agreement to such firm or corporation acquiring substantially all of the assets or business of MSLLC, or merging or consolidating with MSLLC; provided, however, that such assignment shall not transfer or extinguish any liability or obligation of MSLLC under this Agreement that existed prior to such assignment.

(h) Notice.

Any notice required or permitted to be given by one Party to the other Party under this Agreement shall be deemed given on the date sent by certified mail, or by such other means as the Parties may mutually agree, and shall be addressed as follows:

(i) If to KCSR:

Chief Operating Officer
The Kansas City Southern Railway Company
P.O. Box 219335
Kansas City, MO 64121-9335

with a copy to:

Senior Vice President and General Counsel
The Kansas City Southern Railway Company
P.O. Box 219335
Kansas City, MO 64121-9335

(ii) If to MSLLC:

Chief Operating Officer
The Kansas City Southern Railway Company
P.O. Box 219335
Kansas City, MO 64121-9335

Executive Vice President Operations
Norfolk Southern Corporation
Three Commercial Place
Norfolk, Virginia 23510-2191

with a copy to:

Senior Vice President and General Counsel
The Kansas City Southern Railway Company
P.O. Box 219335
Kansas City, MO 64121-9335

Senior Director – Joint Facilities
Norfolk Southern Corporation
1200 Peachtree Street, N.E., Box 158
Atlanta, Georgia 30309

(iii) If to NSR:

Executive Vice President Operations
Norfolk Southern Corporation
Three Commercial Place
Norfolk, Virginia 23510-2191

with a copy to:

Senior Director – Joint Facilities
Norfolk Southern Corporation
1200 Peachtree Street, N.E., Box 158
Atlanta, Georgia 30309

Either Party may provide notice of changes in the above addressees to the other Party by personal service or certified mail.

(i) Arbitration.

(i) Any dispute arising between the Parties with respect to an alleged breach of this Agreement shall be referred to the JOC for resolution and if the JOC is unable to resolve the dispute, it shall be referred to the Management Committee, provided however, that any Member (as defined in the LLC Agreement) may submit the dispute for binding arbitration by a panel of three independent arbitrators before the American Arbitration Association under the Commercial Arbitration Rules, who shall render a written decision on the controversy. The written decision of the arbitrators, reached upon a majority vote, shall be final and conclusive upon the Parties. Each Party to the arbitration shall pay the compensation, costs, fees, and expenses of its own witnesses, experts, and counsel. The compensation, costs, and expenses of the three arbitrators, if any, shall be borne by KCSR and MSLLC, with each paying 50 percent of such compensation, costs, and expenses. The arbitrators shall not have the power to award consequential or punitive damages or to determine violations of criminal or antitrust laws. Pending the written decision of the arbitrators, there shall be no interruption in the transaction of business under this Agreement, and all payments in respect thereto shall be made in the same manner as prior to the arising of the dispute until the matter in dispute shall have been

fully determined by arbitration, and thereupon such payment or restitution shall be made as required by the written decision of the arbitrators.

(ii) As a third party beneficiary, NSR may initiate and prosecute arbitration pursuant to Section 7(i)(i) on behalf of MSLLC. MSLLC shall cooperate with NSR in the preparation for, and the initiation and prosecution of, such arbitration, at NSR's expense.

(j) Confidentiality.

(i) Except as provided by law or by rule, order, or regulation of any court or regulatory agency with jurisdiction over the subject matter of this Agreement, or in connection with an audit by the Internal Revenue Service or other tax authority, or as may be necessary or appropriate for a Party hereto to enforce its rights under this Agreement, during the term of this Agreement (including any extensions thereof), and for a period of three (3) years after termination or expiration of this Agreement, the terms and provisions of this Agreement and all information to which access is provided or which is obtained hereunder will be kept confidential and will not be disclosed by either Party to any person other than members, officers, employees, independent auditors, and attorneys, without the prior written approval of the other Party.

(ii) Notwithstanding the foregoing Section 7(j)(i), the Parties acknowledge and agree that in any STB proceeding, the Parties may be required to submit this Agreement into the record. The Parties will seek a protective order to protect the payment provisions of this Agreement. Following issuance of a protective order, a copy (with certain confidential provisions redacted) may be entered into the public STB record and a highly confidential unredacted copy of this Agreement may be entered into the STB record subject to the provisions of the applicable protective order.

(k) Claims.

The Parties shall agree between themselves on the fairest, practical, and efficient arrangements for handling and administering freight loss and damage Claims. Such arrangements, and the allocation of responsibility for such Claims, shall be subject to the provisions of the Unified Liability Agreement.

(l) Abandonment.

(i) MSLLC shall have the right, subject to securing any necessary regulatory approval or exemption, to abandon or discontinue service on the Subject Trackage or any portion thereof (the "Abandonment Segment") during the term of this Agreement. MSLLC shall provide KCSR no less than ninety (90) days prior notice of its intention to seek to abandon or discontinue service over any Abandonment Segment.

(ii) If MSLLC elects to abandon or discontinue service over the Subject Trackage (or any portion thereof) pursuant to Section 7(l)(i), this Agreement shall continue to apply in all respects to any remaining portion of the Subject Trackage not abandoned or subject to discontinuance by MSLLC.

(iii) MSLLC shall, not less than 60 days prior to any submission to the Surface Transportation Board (or successor agency having jurisdiction over said abandonment or discontinuance) of an application or exemption for authority to abandon or discontinue service over an Abandonment Segment(s), first offer NSR the first right to purchase such Abandonment Segment(s) in accordance with provisions of Section 7(l) of the NSR Joint Use Agreement. In the event NSR determines not to exercise its rights to purchase the Abandonment Segment(s), MSLLC shall then offer KCSR the right to purchase such Abandonment Segment(s) for the fair market value ("FMV"), and on such terms and conditions as are customary with respect to line sales, which such notice shall specifically identify this Section 7(l) and the time periods for action hereunder. NSR shall have forty-five (45) days ("Abandonment Notice Period") within which to advise MSLLC that it will exercise its right to purchase ("Exercise Notice"). If the Parties are unable to agree upon the FMV of the Abandonment Segment(s) that KCSR wishes to purchase, either Party may refer the issue to arbitration pursuant to Section 7(i), which arbitration shall determine all other issues relating to terms and conditions for the sale not then (at the time of the initiation of the arbitration) agreed to by the Parties.

(iv) The Parties shall consummate the sale contemplated by this Section 7(l) within forty-five (45) days of the latest of: (a) the rendering of a written arbitration decision, should issues related to the sale proceed to arbitration; (b) the execution of a purchase and sale agreement, should the Parties execute the same; and (c) the grant of authority, or exemption from the need to obtain a grant of authority, from any regulatory body having jurisdiction over the same.

(v) If KCSR elects not to purchase the Abandonment Segment, it shall so advise MSLLC within the same forty-five (45) day Abandonment Notice Period by delivering to MSLLC a notice of waiver of right to purchase said segment ("Waiver Notice"). Failure of KCSR to provide MSLLC with either an Exercise Notice or a Waiver Notice within the aforesaid forty-five (45) day period shall constitute a Waiver Notice.

(vi) In the event of a Waiver Notice and NSR does not purchase the Abandonment Segment pursuant to its rights in this Agreement, MSLLC shall promptly file such application, petition or exemption notice as may then be required to obtain regulatory authority or exemption for the Abandonment Segment and for the discontinuance of KCSR's and NSR's (if any) trackage rights over the Abandonment Segment.

(m) MSLLC Liability.

For the purposes of this Agreement, MSLLC shall be liable for the actions and omissions of its Designated Operator for the performance of its duties as such as if such actions or omissions were those of MSLLC.

(n) Miscellaneous Provisions.

(i) This Agreement and each and every provision hereof is for the exclusive

benefit of the Parties hereto. Nothing herein contained shall be taken as creating or increasing any right of any third party to recover by way of damages or otherwise against any of the Parties hereto.

(ii) This Agreement contains the entire understanding of the Parties hereto with respect to the subject matter hereof and supersedes any and all oral understandings between the Parties.

(iii) No term or provision of this Agreement may be changed, waived, discharged, or terminated except by an instrument in writing and signed by all Parties.

(iv) The division of this Agreement into articles, sections, and subsections and the insertion of headings and references are for convenience of reference only, and shall not affect the construction or interpretation of this Agreement. Unless the context otherwise requires, all references to articles, sections or subsections are to articles, sections or subsections of this Agreement.

(v) This Agreement is the result of mutual negotiations between the Parties hereto, neither of whom shall be considered the drafter for purposes of contract construction.

(vi) No consent or waiver, expressed or implied, by a Party of any breach or default by the other Party in the performance by such other Party of its obligations hereunder shall be deemed or construed to be a consent to or waiver of any other breach or default in the performance hereunder by such other Party. Failure on the part of a Party to complain of any act or failure of the other Party or to declare the other Party in default, irrespective of how long such failure continues, shall not constitute a waiver by such first mentioned Party of its rights hereunder.

(vii) If any provision of this Agreement or the application thereof to any Party hereto or to any circumstance shall be determined by a court of competent jurisdiction to be invalid or unenforceable to any extent or for any reason, the remainder of this Agreement or the application of the provisions thereof to such Party or circumstance, other than those determined to be invalid or unenforceable, shall not be affected thereby and shall be enforced to the fullest extent permitted by law, and the Parties shall promptly enter into such other agreement(s) as their respective legal counsel may deem appropriate in order to replace such invalid or unenforceable provisions in a manner that produces a result which is substantially equivalent to the terms of this Agreement in all material respects.

(viii) Nothing herein shall be interpreted as creating an association, partnership, joint venture or other joint undertaking between MSLLC and KCSR.

(ix) This Agreement shall be governed and interpreted in accordance with the laws of the State of Delaware, without regard to application of the choice of law principles thereof.

(x) This Agreement may be executed in any number of counterparts, each of which shall be deemed to be an original, but all such separate counterparts shall together constitute but one and the same instrument.

IN WITNESS WHEREOF, the Parties hereto have caused this Agreement to be duly executed as of the date first above written.

INDEX TO APPENDICES

APPENDIX A. [Intentionally Omitted]
APPENDIX B. COMPENSATION

REDACTED

APPENDIX B – COMPENSATION

Section 1. Compensation for KCS Traffic

A. KCSR shall compensate MSLLC based upon [

].

B. As soon as practical after the end of each calendar quarter during the term of this Agreement, MSLLC shall prepare a statement setting forth the following:

[

]

From this information, an invoice will be prepared and delivered to KCSR specifying the compensation KCSR shall pay to MSLLC for use of the Subject Trackage for that time period. KCSR shall make payment to MSLLC within thirty (30) days after date of such invoice.

EXHIBIT E
to Transaction Agreement

NORFOLK SOUTHERN RAILWAY COMPANY
THE KANSAS CITY SOUTHERN RAILWAY COMPANY
WESTERN HAULAGE AGREEMENT

THIS WESTERN HAULAGE AGREEMENT (this "Agreement") is entered into as of this ____ day of _____, 200__, by and between NORFOLK SOUTHERN RAILWAY COMPANY, a Virginia corporation ("NSR"), and THE KANSAS CITY SOUTHERN RAILWAY COMPANY, a Missouri corporation ("KCSR"). NSR and KCSR are referred to individually herein as a "Party" and collectively as the "Parties".

RECITALS:

WHEREAS, on December 1, 2005, Kansas City Southern ("KCS"), KCSR, Norfolk Southern Corporation ("NSC"), and The Alabama Great Southern Railroad Company entered into a transaction agreement (the "Transaction Agreement") that, among other things, contemplated the creation of a limited liability company, Meridian Speedway LLC ("MSLLC"), the transfer from KCSR, a wholly-owned subsidiary of KCS, to MSLLC of the rail line generally between Meridian, Mississippi and Shreveport, Louisiana (the "Subject Trackage"), and the grant by MSLLC to NSR and KCSR of certain rights over the entirety of the Subject Trackage; and

WHEREAS, pursuant to a joint use agreement of even date hereof (the "NSR Joint Use Agreement"), MSLLC has granted to NSR certain overhead rights over the Subject Trackage; and further pursuant to which MSLLC has committed to perform certain haulage services for NSR; and

WHEREAS, pursuant to an operating agreement of even date hereof (the "Operating Agreement"), MSLLC will contract with KCSR to provide certain services as the designated operator ("Designated Operator") all railroad operations on behalf of MSLLC, including the railway operations of MSLLC required pursuant to the NSR Joint Use Agreement; and

WHEREAS, pursuant to the Transaction Agreement, KCSR has agreed to provide haulage for NSR for certain traffic between an interchange point with MSLLC in Shreveport, Louisiana, and an interchange point with BNSF Railway Company ("BNSF") in the Dallas, Texas area (the "Western Haulage Services"); and

WHEREAS, KCSR desires, within six (6) months of the date hereof, to enter into a haulage agreement with BNSF that would provide for an interchange between MSLLC and BNSF at Shreveport, Louisiana for NS Traffic, as hereinafter defined; and

WHEREAS, the rights granted to NSR under the NSR Joint Use Agreement are intended to be connective with the haulage service to be provided under this Agreement; and

WHEREAS, the Parties desire to set forth the terms and conditions upon which KCSR shall provide the Western Haulage Services to NSR.

REDACTED

NOW, THEREFORE, the Parties hereto, intending to be legally bound, agree as follows:

SECTION 1. DEFINITIONS AND INTERPRETATION

(a) Interpretation Generally.

(i) Unless otherwise defined herein, all words, terms and phrases used in this Agreement shall be construed in accordance with the generally applicable definition or meaning of such words, terms and phrases in the railroad industry.

(ii) Each definition in this Agreement includes the singular and the plural, and references in this Agreement to the neuter gender include the masculine and feminine where appropriate. References herein to any agreement or contract mean such agreement or contract as amended. As used in this Agreement, the word "including" means "without limitation", and the words "herein", "hereof" and "hereunder" refer to this Agreement as a whole. All dollar amounts stated herein are in United States currency.

(b) Capitalized Terms.

All capitalized terms shall have the meaning set forth as follows:

"Abandonment Notice Period" shall have the meaning given that term in Section 5(m)(iii).

"Abandonment Segment" shall have the meaning given that term in Section 5(m)(i).

"Agreement" shall have the meaning given that term in the introductory paragraph.

"AAR" shall have the meaning given that term in Section 2(b)(vii).

"BNSF" shall have the meaning given that term in the Recitals.

"BNSF Dallas Interchange Fee" shall have the meaning given that term in Appendix C, Section 1.A.

"BNSF Shreveport Agreement" shall have the meaning given that term in Section 2(a)(ii).

"Cars" means each loaded or empty railroad freight car (including platform and well rail cars) or similar equipment.

"Clearance File" shall have the meaning given that term in Section 2(b)(viii).

"Cost Factor" shall have the meaning given that term in Appendix C, Section 1.D(2).

"Designated Operator" shall have the meaning given that term in the Recitals.

"EOTs" shall have the meaning given to that term in Section 2(a)(iv).

REDACTED

"Effective Date" shall have the meaning given that term in Section 5(f)(i).

"Equipment" shall mean and be confined to hi-rail vehicles, track inspection equipment and other non-revenue vehicles and machinery (other than locomotives) capable of being operated on railroad tracks that, at the time of an occurrence, are (i) being operated on the trackage upon which such occurrence takes place, or (ii) are on the trackage upon which such occurrence takes place, or on the adjoining right-of-way, for the purpose of maintenance or repair thereof or the clearing of wrecks thereon.

"Exercise Notice" shall have the meaning given that term in Section 5(m)(iii).

"FMV" shall have the meaning given that term in Section 5(m)(iii).

"Governmental Entity" shall mean any federal, state, local or foreign court, administrative agency or commission or other governmental or regulatory authority or commission or any arbitration tribunal.

"Haulage Services" shall have the meaning given that term in Section 2(a)(i).

"Imbalance Threshold" shall have the meaning given that term in Appendix C, Section 2.

"JOC" shall have the meaning given that term in Section 5(i).

"MSLLC" shall have the meaning given that term in the Recitals.

"KCS" shall have the meaning given that term in the Recitals.

"KCSR" shall have the meaning given that term in the introductory paragraph.

"KCSR-MSLLC Master Interchange Agreement" shall mean that interchange agreement of even date hereof entered into by and among KCSR, MSLLC and NSR that governs interchange between KCSR and MSLLC.

"Minimum Availability" shall have the meaning given that term in Section 3(a)(iii).

"Monthly Statement" shall have the meaning given that term in Section 5(b)(i).

"NS Traffic" shall mean all intermodal traffic that: (i) originates or terminates in the United States west of Dallas/Ft. Worth (including intermodal traffic originating by steamship line at a port along the west coast of the United States) and enters or exits the Subject Trackage at Shreveport; and (ii) originates or terminates in the United States at or east of Meridian and enters or exits the Subject Trackage at Meridian; and (iii) does not consist of traffic originating or terminating at any station on the KCSR system which includes the Texas Mexican Railway Company, (including any station where KCSR, or the Texas Mexican Railway Company have trackage rights or access via reciprocal switch), as it exists on the date of the Transaction Agreement.

REDACTED

"NSC" shall have the meaning given that term in the Recitals.

"NSR" shall have the meaning given that term in the introductory paragraph.

"NSR Haulage Cars" shall mean cars transporting NS Traffic, and empty cars intended for moving such traffic.

"NSR Locomotives" shall mean locomotives supplied to provide the Haulage Service under the agreement referenced in Section 2(a)(iv).

"NSR Trains" shall mean trains containing NSR Haulage Cars.

"NSR Joint Use Agreement" shall have the meaning given that term in the Recitals.

"Operating Agreement" shall have the meaning given that term in the Recitals.

"Parties" shall have the meaning given that term in the introductory paragraph.

"Party" shall have the meaning given that term in the introductory paragraph.

"Revenue Factor" shall have the meaning given that term in Appendix C.

"Route" shall have the meaning given that term in Section 2(a)(i).

"RPM" shall have the meaning given that term in Appendix C.

"Subject Trackage" shall have the meaning given that term in the Recitals.

"Term" shall have the meaning given that term in Section 5(f)(ii).

"Transaction Agreement" shall have the meaning given that term in the Recitals.

"Use Invoice" shall have the meaning given that term in Section 5(b)(1).

"Waiver Notice" shall have the meaning given that term in Section 5(m)(v).

"Weighted Adjustment Factor" shall have the meaning given that term in Appendix C, Section D(3).

"Western Haulage Services" shall have the meaning given that term in the Recitals.

(c) Successor Laws.

A reference to any particular statute or regulation shall include a reference to any successor statute or regulation.

SECTION 2. GRANT OF HAULAGE SERVICES

(a) Haulage Services Generally.

(i) The haulage services to be provided by KCSR to NSR shall consist of, as applicable, the following (collectively, the rights granted herein are the "Haulage Services"):

(A) the transportation by KCSR of NSR Haulage Cars over the lines of KCSR from Metro Junction, or such other location in the Dallas/Ft. Worth area as the Parties may from time to time mutually designate, to an interchange with the lines owned by MSLLC at Shreveport, LA at or near M.P. V-169.85, said route being generally described and depicted in Appendix A – Map, (the "Route");

(B) the interchange of NSR Haulage Cars with BNSF in the Dallas/Ft. Worth, Texas area;

(C) the movement of bad order NSR Haulage Cars and NSR locomotives to or from repair tracks, provided, that NSR will be billed separately for repairs to such equipment performed by KCSR pursuant to Section 2(b)(vii) of this Agreement;

(D) such mechanical or other inspection of NSR Haulage Cars and locomotives as may be prescribed by regulation or KCSR's operating practices; and

(E) provision of supervision as required.

(ii) KCSR shall be relieved of its obligation to provide Haulage Services to NSR over the Route if, on or before[ ], KCSR and BNSF enter into an agreement ("BNSF Shreveport Agreement") with scheduled duration of at least [ ] whereby KCSR is obligated to provide haulage services or trackage rights to BNSF on commercially reasonable terms for the movement of NS Traffic between the Dallas, Texas area and an interchange point with MSLLC for the continued movement of NSR Cars or NSR Trains at or near Shreveport, Louisiana area.

(iii) Capacity Rights

Notwithstanding any other provisions of this Agreement, the Parties acknowledge that there may be capacity constraints from time to time for traffic covered under this Agreement. Further, the Parties acknowledge that NSR is allocated certain overhead train starts pursuant to the NSR Joint Use Agreement, and that a portion of those NSR overhead train starts are reserved for the overhead movement of traffic moving pursuant to this Agreement, the Dallas Terminal Marketing Agreement, and the BNSF Shreveport Agreement. Whenever capacity of the Route is insufficient to handle the total traffic demands of users of the line, the capacity allocation rules in the last sentence of Section 6(b)(ii) of the NSR Joint Use Agreement shall apply. Nothing in this Section 2(a)(iii) shall be interpreted as requiring NSR to pay for any service not used.

(iv) The Parties continue to be bound by the Supplemental Agreement dated May 11, 2000, to the Master Locomotive Run Through Agreement of November 29, 1994, attached hereto as Appendix B and the Amendment No. 1 to the Haulage Agreement dated February 1, 2002. KCSR shall not be responsible for providing any equipment (locomotives, cars, end of train units ("EOTs"), etc.), or fuel for the trains providing the Haulage Services.

(v) NSR Haulage Cars shall at all times remain in the revenue waybill and car hire accounts of NSR while moving in Haulage Service on KCSR's lines. KCSR shall not be entitled to any line haul revenue for the handling of NSR Haulage Cars, nor shall KCSR participate in the routing of, nor appear in tariffs, waybills or other shipping documents as a participating carrier in connection with, the movement of NSR Haulage Cars. As between KCSR and NSR, NSR shall be responsible for all mileage and car hire charges accruing on NSR Haulage Cars, and NSR shall report and pay, or arrange to have reported and paid, all appropriate allowances and charges directly to the owner(s) of such cars.

(b) Conduct Of Operations.

(i) Unless and until NSR exercises its trackage rights pursuant to the NSR Joint Use Agreement, KCSR shall deliver eastbound NSR Haulage Cars to MSLLC, and shall receive westbound NSR Haulage Cars from MSLLC, at Shreveport, LA, on such track(s) as shall be designated from time to time by KCSR's dispatcher pursuant to the KCSR-MSLLC Master Interchange Agreement. Nothing herein shall be interpreted as prohibiting KCSR, as the Designated Operator, from transporting NSR Haulage Cars in a continuous movement operating over both the haulage routes covered by: (i) the NSR Joint Use Agreement and (ii) this Agreement.

(ii) In the event that NSR exercises its trackage rights pursuant to the NSR Joint Use Agreement, KCSR shall deliver eastbound NSR Haulage Cars to NSR, and shall receive westbound NSR Haulage Cars from NSR, at Shreveport, LA, on such track(s) as shall be designated from time to time by KCSR's dispatcher or other designated representative in charge of such tracks at Shreveport pursuant to the NSR-KCSR Master Interchange Agreement.

(iii) KCSR shall deliver westbound NSR Haulage Cars to BNSF, and shall receive eastbound NSR Haulage Cars from BNSF at Metro Junction or such other location in the Dallas/Ft. Worth area, as the parties may from time to time mutually designate, and on such tracks at such delivery location as shall be designated from time to time by KCSR and BNSF.

(iv) The party delivering NSR Haulage Cars to the receiving party shall provide, via EDI transmission (or by such other means as may be mutually agreed by said parties), information necessary for the further handling and movement of NSR Haulage Cars that are delivered by the delivering party to the receiving party. Such information shall include, for each car:

REDACTED

(A) Car initial and number.

(B) Loaded or empty.

(C) All required hazardous materials information.

(D) Such other information as the parties may agree to be necessary or convenient for the safe and efficient exchange and further movement of such cars.

(v) KCSR shall have exclusive management and control over the movement of trains containing NSR Haulage Cars while on the Route.

(vi) KCSR shall not have the right to fill out any NSR Trains with the rail cars or Equipment in the revenue waybill or car hire account of any party other than NSR.

(vii) KCSR may arrange for such repairs to NSR Haulage Cars, and adjustments to or transfers of lading from bad ordered, defective or overloaded NSR Haulage Cars, as in KCSR's judgment may be necessary to move such NSR Haulage Cars safely. NSR shall reimburse KCSR for the cost of such work at rates prescribed in, and submitted pursuant to, the Field and Office Manuals of the Interchange Rules of the Association of American Railroads ("AAR").

(viii) NSR shall have the right to tender all dimensional loads and excess clearance Cars for handling by KCSR over the Route, subject to a clearance file (the "Clearance File") applicable to traffic of both Parties maintained by KCSR. KCSR shall promptly inform NSR of any changes made to the Clearance File.

(c) Service Standards.

(i) It is the intent of the Parties that KCSR shall generally accord NSR Haulage Cars the same level of service as the KCSR provides to KCSR's traffic of the same type.

(ii) NSR shall provide KCSR with reasonable notice of the schedules for regularly scheduled NSR trains operating over the Subject Trackage and KCSR shall attempt to accommodate such schedules but does not guarantees that it will do so.

(d) Compensation.

NSR shall pay to KCSR, as compensation for Haulage Services provided pursuant to this Agreement as set forth in Appendix C – Haulage Compensation.

SECTION 3. INFRASTRUCTURE MAINTENANCE

(a) KCSR shall be solely responsible for the maintenance, repair and renewal of the Route. KCSR shall keep and maintain the Route in reasonably good condition for the use herein contemplated, but KCSR does not guarantee the condition of the Route or that operations thereover will not be interrupted. KCSR shall take reasonable steps to ensure that any

interruptions will be kept to a minimum and shall use commercially reasonable efforts to avoid such interruptions.

(b) Existing connections or facilities, which are jointly used by the Parties hereto under existing agreements, shall continue to be maintained, repaired and renewed by and at the expense of the party or parties responsible for such maintenance, repair and renewal under such agreements.

SECTION 4. MANAGEMENT OF THE ROUTE

(a) Control And Dispatching

(i) KCSR shall have exclusive control of the management and operation (including dispatching) of the Route. Operation and control, including train and crew dispatching, of the Route shall be conducted in a manner as to afford each of the Parties, and any other present or future user of the Route (or any portion thereof) the most economical and efficient movement of its traffic over the line.

(ii) KCSR shall have exclusive control over the dispatching of the Route. Dispatching of the Route shall be conducted in a manner as to afford each of the Parties, and any other present or future user of the Route (or any portion thereof) the most economical and efficient movement of its traffic over the line consistent with the demands and needs of other authorized uses.

(iii) The maximum length of NSR Trains (including locomotives and other motive power units) operating pursuant to Section 2 of this Agreement shall be the greater of: (a) 7,500 feet or (b) the maximum train length as may be permitted from time to time for any other train regularly operated over the Route.

(b) Loss of Use of the Route.

(i) Other than as specifically set forth in this Agreement, NSR shall not have, pursuant to this Agreement, any claim against KCSR for liability on account of loss or damage of any kind in the event the use of the Route by NSR is interrupted or delayed at any time from any cause.

(ii) If the Route is unavailable for service due to a derailment, line outage or other interruption of service, then KCSR shall cooperate and consult with NSR in order to address any resulting backlog of trains over a period of time following the resolution of such derailment or other interruption as may be required to reduce such backlog of NSR Traffic or NSR Trains.

SECTION 5. GENERALLY APPLICABLE PROVISIONS

(a) Compliance with Applicable Law and Rules.

Each Party hereto shall comply with all applicable and lawful federal, state and local laws, rules, regulations and orders promulgated by any Governmental Entity that

relate to the operations contemplated hereunder, including but not limited to the provisions of the Federal Locomotive Inspection Act and the Federal Safety Appliance Act, as amended, and any other lawful federal and state and local laws, regulations and rules respecting the operation, condition, inspection and safety of its trains, locomotives, cars and Equipment while such trains, locomotives, cars, and Equipment are being operated over the Route. If any fine, penalty, cost, or charge is imposed or assessed on or against either Party hereto by reason of the other Party's non-compliance with any such laws, rules, regulations or orders, such non-complying Party shall reimburse and indemnify the other Party for or on account of any such fine, penalty, cost or charge, and all expenses and attorneys fees incurred. As a part of the consideration hereof, each Party hereby agrees that the indemnity commitments in this Section in favor of the other Party hereto shall extend to and indemnify the parent corporation, subsidiaries and affiliates of such other Party, and all of their respective directors, officers, agents and employees.

(b) Invoices and Payment of Bills.

(i) As soon as practical after the end of each calendar month during the term of this Agreement, KCSR shall prepare a statement setting forth the number of eastbound and westbound NSR Haulage Cars, the number of intermodal units in each, the total number of intermodal units handled in Haulage Service during the then-current calendar quarter, and the number of empty slots operated over the Route during the month (the "Monthly Statement") and an invoice (the "Use Invoice"). The Monthly Statement shall be in electronic format, and shall contain a detailed list of the NSR Haulage Cars that moved during the subject month, which list shall include, for each Car, the following information: (1) car initial and number, (2) whether the car exceeded ninety-six (96) feet in length (including, without limitation, articulated cars), (3) for each car exceeding ninety-six (96) feet in length, the number of axles on such car, and (4) any other information relating to such cars that NSR may reasonably request in connection with accounting for the use of the services and rights provided hereunder. The Monthly Statement and the Use Invoice shall be delivered to NSR and NSR shall make payment to KCSR within thirty (30) days after the date of receipt of such Use Invoice.

(ii) Any dispute regarding the amount of a Monthly Statement or Use Invoice shall be reconciled between the Parties, and any adjustment resulting from such reconciliation shall be reflected in a subsequent Use Invoice. If NSR disputes any portion of an Use Invoice, it shall nevertheless pay such Use Invoice in full less disputed charges, subject to adjustment upon resolution of the dispute; provided, however, that (i) no exception to any charge in a Use Invoice shall be honored, recognized or considered if filed after the expiration of three (3) years from the date of the Use Invoice, and (ii) no invoice shall be rendered more than three (3) years (a) after the last day of the calendar month in which the expense covered thereby is incurred, or (b) in the case of charges disputed as to amount or liability, after the amount owed or liability therefor is established. Any claim for the adjustment of a Monthly Statement or Use Invoice shall be deemed to be waived if not made in writing within three (3) years after the date of the relevant Monthly Statement for statement adjustments and the date of the relevant Use Invoice for invoice adjustments.

(iii) KCSR and NSR shall each have the right, at its own expense, to audit the records of the other Party pertaining to the use of the Route under this Agreement, and any Monthly Statement, Use Invoice or other invoice or notice of dispute thereof issued by KCSR or NSR pursuant to this Agreement, provided such audit is initiated at any time within three (3) years of the date of the relevant Use Invoice or other invoice (as applicable) relating to this Agreement. All such audits shall be conducted at reasonable intervals, locations, and times. All such audits shall be prosecuted with reasonable due diligence. Each Party agrees that all information disclosed to it or its representatives in connection with such an audit will be held in strictest confidence and will not be disclosed to any third party (other than to an arbitrator in connection with an arbitration conducted pursuant this Agreement or as required by applicable law). Any adjustment resulting from an audit conducted pursuant to this Section 5(b)(iii) with respect to which the Parties are in concurrence shall be reflected in a subsequent Use Invoice.

(iv) Invoices rendered pursuant to the provisions of this Agreement, other than Use Invoices, shall include direct labor and material costs, together with the surcharges, overhead percentages, and Equipment rentals as specified by KCSR at the time any work is performed by KCSR for NSR, unless the amount of such invoice is governed by Field and Office Manuals of the Interchange Rules of the AAR or unless the Parties otherwise agree to use actual costs and expenses.

(c) Liability.

As between the Parties hereto, responsibility for any loss or destruction of, or damage to, any property whatsoever, and any injury to or death of any person or persons whomever (including employees of NSR or KCSR), or other matters covered by the Unified Liability Agreement, resulting from, arising out of, incidental to or occurring in connection with this Agreement shall be allocated as is set forth in the Unified Liability Agreement.

(d) Rerailing, Wrecking, Bad Orders and Repairs.

(i) Whenever NSR Haulage Cars require rerailing, wrecking service or wrecking train service, KCSR shall arrange for the provision of such service, including the repair and restoration of roadbed, the Route and structures. KCSR shall promptly inform NSR of its intent to proceed with wrecking service or wrecking train service, and shall permit a NSR representative to be present on the scene, to work in concert with KCSR employees to manage such wrecking service or wrecking train service. The cost, liability and expense of the foregoing, including without limitation loss of, damage to, or destruction of any property whatsoever and injury to and death of any person or persons whomsoever or any damage to or destruction of the environment whatsoever, including without limitation land, air, water, wildlife, and vegetation, resulting therefrom shall be apportioned in accordance with the provisions of Section 5(c) hereof. All locomotives, cars, Equipment and salvage from the same so picked up and removed which is owned by or under the management and control of or used by NSR at the time of such wreck, shall be promptly delivered to it.

(ii) If any NSR Haulage Cars or NSR Locomotives are bad ordered en route on the Route and it is necessary that they be set out, those cars or locomotives shall, after being repaired, be transported by KCSR to be picked up by NSR. KCSR may, upon request of NSR and at the expense of NSR, unless otherwise provided for in the Field and Office Manuals of the Interchange Rules of the AAR, furnish required labor and material to perform light repairs required to make such bad ordered cars or locomotives safe and lawful for movement, and billing for this work shall be at rates prescribed in, and submitted pursuant to, the Field and Office Manuals of the Interchange Rules of the AAR.

(e) Force Majeure.

The obligations, other than payment obligations, of the Parties to this Agreement shall be subject to force majeure (including flood, earthquake, hurricane, tornado, or other such severe weather or climatic condition, riot, accident, wreck, derailment, washout, explosion, Acts of God, act of terrorism and public enemy, war, blockage, insurrection, vandalism or sabotage, fire, strike, lockout or labor dispute, embargoes or AAR service orders, or governmental laws, orders or regulations, and other causes or circumstances beyond the control of the Party invoking such force majeure as an excuse for nonperformance), but only as long as, and to the extent that, such force majeure shall reasonably prevent performance of such obligations by the affected Party. In the event that an event of force majeure impairs either Party's ability to fulfill its obligations to the other Party under this Agreement, said Party shall take all commercially reasonable measures to restore performance of its obligations in a timely manner.

(f) Term and Termination.

(i) This Agreement shall become effective following the latest date of: (a) the date first written above; (b) receipt of any required regulatory approvals or exemptions; and (c) the expiration of any time periods required by the issuance of labor notices by NSR and/or KCSR, should such labor notices be required ("Effective Date"). The Parties shall determine the Effective Date through an exchange of written correspondence.

(ii) This Agreement shall commence on the Effective Date, and shall continue until terminated in writing jointly by the Parties (the "Term").

(iii) Termination of this Agreement shall not relieve or release any Party hereto from any obligations assumed or from any liability which may have arisen or been incurred by such Party under the terms of this Agreement prior to termination.

(g) Successors and Assigns.

(i) This Agreement shall inure to the benefit of and be binding upon each of the Parties and their respective successors and permitted assigns.

(ii) Except as otherwise specifically provided hereinafter, neither Party may assign this Agreement, or any of its rights, interests or obligations hereunder, including

by operation of law, without the prior consent in writing of the other Party, which consent may be withheld at the discretion of such other Party.

(iii) In the event of a sale of substantially all of the assets or business of NSR, or the merger or consolidation of NSR into or with a firm or corporation not controlled by NSC, NSR may, without the prior consent of KCSR, assign this Agreement to such firm or corporation acquiring substantially all of the assets or business of NSR, or merging or consolidating with NSR; provided, however, that such assignment shall not transfer or extinguish any liability or obligation of NSR under this Agreement that existed prior to such assignment.

(iv) In the event of any of the following, KCSR shall, without the prior consent of NSR, assign this Agreement to such firm or corporation acquiring substantially all of the assets or business of KCSR, or merging or consolidating with KCSR: (A) a sale of substantially all of the assets or business of KCSR; (B) a sale or lease or other change of control of all or substantially all of the Route to a party other than KCSR; or (C) the merger or consolidation of KCSR; provided, however, that such assignment shall not transfer or extinguish any liability or obligation of KCSR under this Agreement that existed prior to such assignment

(h) Notice.

Any notice required or permitted to be given by one Party to the other Party under this Agreement shall be deemed given on the date sent by certified mail, or by such other means as the Parties may mutually agree, and shall be addressed as follows:

(i) If to KCSR:

Chief Operating Officer
The Kansas City Southern Railway Company
P.O. Box 219335
Kansas City, MO 64121-9335

with a copy to:

Senior Vice President and General Counsel
The Kansas City Southern Railway Company
P.O. Box 219335
Kansas City, MO 64121-9335

(ii) If to NSR:

Executive Vice President Operations
Norfolk Southern Corporation
Three Commercial Place
Norfolk, Virginia 23510-2191

with a copy to:

REDACTED

Senior Director – Joint Facilities
Norfolk Southern Corporation
1200 Peachtree Street, N.E., Box 158
Atlanta, Georgia 30309

Either Party may provide notice of changes in the above addressees to the other Party by personal service or certified mail.

(i) Arbitration.

Any dispute arising between the Parties with respect to an alleged breach of this Agreement shall be referred to the Joint Operating Committee ("JOC"), as defined in the NSR Joint Use Agreement, for resolution, and if the JOC is unable to resolve the dispute, it shall be referred to the Management Committee, provided however, that any Member (as defined in the LLC Agreement) may submit the dispute for binding arbitration by a panel of three independent arbitrators before the American Arbitration Association under the Commercial Arbitration Rules, who shall render a written decision on the controversy. The written decision of the arbitrators, reached upon a majority vote, shall be final and conclusive upon the Parties. Each Party to the arbitration shall pay the compensation, costs, fees, and expenses of its own witnesses, experts, and counsel. The compensation, costs, and expenses of the three arbitrators, if any, shall be borne by NSR and KCSR, with each paying 50 percent of such compensation, costs, and expenses. The arbitrators shall not have the power to award consequential or punitive damages or to determine violations of criminal or antitrust laws. Pending the written decision of the arbitrators, there shall be no interruption in the transaction of business under this Agreement, and all payments in respect thereto shall be made in the same manner as prior to the arising of the dispute until the matter in dispute shall have been fully determined by arbitration.

(j) Confidentiality.

(i) Except as provided by law or by rule, order, or regulation of any Governmental Entity or the New York Stock Exchange, or in connection with an audit by the Internal Revenue Service or other tax authority, or as may be necessary or appropriate for a Party hereto to enforce its rights under this Agreement, during the Term, and for a period of three (3) years after termination of this Agreement, the terms and provisions of this Agreement and all information to which access is provided or which is obtained hereunder will be kept confidential and will not be disclosed by either Party to any person other than members, officers, employees, independent auditors and attorneys, without the prior written approval of the other Party.

(ii) Notwithstanding the foregoing Section 5(j)(i), the Parties acknowledge and agree that in any STB proceeding, the Parties may be required to submit this Agreement into the record. The Parties will seek a protective order to protect the payment provisions of this Agreement. Following issuance of a protective order, a copy (with certain confidential provisions redacted) may be entered into the public STB record

and a highly confidential unredacted copy of this Agreement may be entered into the STB record subject to the provisions of the applicable protective order.

(k) Breach of this Agreement.

(a) Each Party acknowledges and agrees that the other Party would be irreparably damaged in the event any of the provisions of this Agreement were not performed by it in accordance with their specific terms or were otherwise breached. It is accordingly agreed that each Party shall be entitled to an injunction or injunctions to prevent further breaches of such provisions and to specifically enforce such provisions, in addition to any other remedy to which such entity may be entitled, at law or in equity.

(b) In no event shall either or KCSR or NSR (including, in each case, their affiliates) be liable to the other for any consequential, indirect, incidental, punitive or other similar damages including, but not limited to, lost profits for any breaches or defaults, or any act or omission arising out of or in any way relating to this Agreement, under any form or theory of action whatsoever, whether in contract, tort or otherwise.

(l) Claims.

The Parties shall agree between themselves on the most fair, practical, and efficient arrangements for handling and administering freight loss and damage Claims. Such arrangements, and the allocation of responsibility for such Claims, shall be subject to the provisions of the Unified Liability Agreement.

(m) Abandonment.

(i) KCSR shall have the right, subject to securing any necessary regulatory approval or exemption, to abandon or discontinue service on the Route or any portion thereof (the "Abandonment Segment") during the term of this Agreement. KCSR shall provide NSR no less than ninety (90) days prior notice of its intention to seek regulatory authority to abandon or discontinue service over any Abandonment Segment.

(ii) If KCSR elects to abandon or discontinue service over the Route (or any portion thereof) pursuant to Section 5(l)(i), this Agreement shall continue to apply in all respects to any remaining portion of the Route not abandoned or subject to discontinuance by KCSR.

(iii) KCSR shall, not less than 90 days prior to any submission to the Surface Transportation Board (or successor agency having jurisdiction over said abandonment or discontinuance of service) of an application or exemption for authority to abandon or discontinue service over an Abandonment Segment(s), offer NSR the first right to purchase such Abandonment Segment(s) for fair market value ("FMV") of such Abandonment Segment(s) at the time of purchase, and on such other terms and conditions as are customary with respect to line sales at the time, which such notice shall specifically identify this Section 5(m) and the time periods for action hereunder. NSR shall have seventy-five (75) days ("Abandonment Notice Period") within which to advise KCSR that it will exercise its right to purchase ("Exercise Notice"). If the Parties are unable to

agree upon the FMV of the Abandonment Segment(s) that NSR wishes to purchase, either Party may refer the issue to arbitration pursuant to Section 5(i), which arbitration shall determine all other issues relating to terms and conditions for the sale not then (at the time of the initiation of the arbitration) agreed to by the Parties. Such arbitration shall be conducted on an expedited basis, with selection of the arbitrators within forty-five (45) days of the initiation of arbitration, all submissions to be made by the Parties within ninety (90) days of the initiation of arbitration, and a written decision to be rendered within thirty (30) days following the final submissions of the Parties.

(iv) The Parties shall consummate the sale contemplated by this Section 5(m) within forty-five (45) days of the latest of: (a) the rendering of a written arbitration decision, should issues related to the sale proceed to arbitration; (b) the execution of a purchase and sale agreement, should the Parties execute the same; and (c) the grant of authority, or exemption from the need to obtain a grant of authority, from any regulatory body having jurisdiction over the same.

(v) If NSR elects not to purchase the Abandonment Segment, it shall so advise KCSR within the same seventy-five (75) day Abandonment Notice Period by delivering to KCSR a notice of waiver of right to purchase said segment ("Waiver Notice"). Failure of NSR to provide KCSR with either an Exercise Notice or a Waiver Notice within the aforesaid seventy-five (75) day period shall constitute a Waiver Notice.

(vi) In the event of a Waiver Notice, KCSR shall promptly file such application, petition or exemption notice as may then be required to obtain regulatory authority or exemption for the Abandonment Segment and for the discontinuance of its rights over the Abandonment Segment.

(o) Miscellaneous Provisions.

(i) This Agreement and each and every provision hereof is for the exclusive benefit of the Parties hereto and not for the benefit of any third party. Nothing herein contained shall be taken as creating or increasing any right of any third party to recover by way of damages or otherwise against any of the Parties hereto.

(ii) This Agreement contains the entire understanding of the Parties hereto with respect to the subject matter hereof and supersedes any and all oral understandings between the Parties.

(iii) No term or provision of this Agreement may be changed, waived, discharged or terminated except by an instrument in writing and signed by all Parties.

(iv) The division of this Agreement into articles, sections and subsections and the insertion of headings and references are for convenience of reference only, and shall not affect the construction or interpretation of this Agreement. Unless the context otherwise requires, all references to articles, sections or subsections are to articles, sections or subsections of this Agreement.

REDACTED

(v) This Agreement is the result of mutual negotiations between the Parties hereto, neither of whom shall be considered the drafter for purposes of contract construction.

(vi) No consent or waiver, expressed or implied, by a Party of any breach or default by the other Party in the performance by such other Party of its obligations hereunder shall be deemed or construed to be a consent to or waiver of any other breach or default in the performance hereunder by such other Party. Failure on the part of a Party to complain of any act or failure of the other Party or to declare the other Party in default, irrespective of how long such failure continues, shall not constitute a waiver by such first mentioned Party of its rights hereunder.

(vii) If any provision of this Agreement or the application thereof to any Party hereto or to any circumstance shall be determined by a court of competent jurisdiction to be invalid or unenforceable to any extent or for any reason, the remainder of this Agreement or the application of the provisions thereof to such Party or circumstance, other than those determined to be invalid or unenforceable, shall not be affected thereby and shall be enforced to the fullest extent permitted by law, and the Parties shall promptly enter into such other agreement(s) as their respective legal counsel may deem appropriate in order to replace such invalid or unenforceable provisions in a manner that produces a result which is substantially equivalent to the terms of this Agreement in all material respects.

(viii) Nothing herein shall be interpreted as creating an association, partnership, joint venture or other joint undertaking between KCSR and NSR.

(ix) This Agreement shall be governed and interpreted in accordance with the laws of the State of Delaware, without regard to application of the choice of law principles thereof.

(x) This Agreement may be executed in any number of counterparts, each of which shall be deemed to be an original, but all such separate counterparts shall together constitute but one and the same instrument.

IN WITNESS WHEREOF, the Parties hereto have caused this Agreement to be duly executed as of the date first above written.

INDEX TO APPENDICES

APPENDIX A.	ROUTE AND MAP
APPENDIX B.	MASTER LOCOMOTIVE RUN THROUGH AGREEMENT
APPENDIX C.	HAULAGE COMPENSATION FOR NS TRAFFIC

REDACTED

APPENDIX C – HAULAGE COMPENSATION

Section 1. Pricing For NS Traffic

A. NS Traffic – Initial Pricing

NSR shall pay to KCSR the following for Haulage Services in the movement of NS Traffic for transportation over the Route between the Dallas, TX, area and Shreveport (MP V – 169.85):

[ ]	[ ]
[ ]	[ ]
[ ]	[ ]
[ ]	[ ]

[

].

B. Empties – Initial Pricing:

(1) NSR shall pay to KCSR [ ] on an empty railcar moving over the Route between Shreveport (MP V- 169.85) and the Dallas, TX, area upon the following conditions:

(a) Empty cars ride on a haulage train consisting of [ ]. Empty cars will not be limited in number as long as the maximum train length allowable at that time is not exceeded. All empty cars will ride as one block at the end of the haulage train.

(b) The loaded cars meet or exceed [ ]. In the event NSR fails to maintain[ ], then the Parties agree to meet at KCSR's request to establish rates to compensate KCSR adequately for the excess empty wells and platforms.

(c) A "slot" is defined as any available rail car space that can minimally hold a 40' TOFC/COFC unit. There are (i) two slots per well of a single or multi-well stack car; or (ii) one slot per hitch on a single flat car or multi-platform conventional spine car. The following table serves as an example of pricing scenarios for empty rail car moves. There may be other pricing scenarios.

Empty Car Description	Number of Slots	Price per Car
[ ]	[ ]	[ ]
[ ]	[ ]	[ ]
[ ]	[ ]	[ ]

REDACTED

[ ]	[ ]	[ ]
[	[ ]	[ ]
[ ]	[ ]	[ ]
[ ]	[ ]	[ ]

C. Adjustments to Pricing:

The pricing described in this Agreement shall be in effect as of the effective date of this Agreement, and shall continue in effect through December 31, 2006. Effective with trains that originate on January 1, 2007, an Adjustment Factor of [ ]will be applied to per train pricing, per unit pricing, and empty rail car pricing. Effective with trains that originate on January 1, 2008 a Weighted Adjustment Factor (as described below) will be applied to per train pricing, per unit pricing and empty platform pricing. The Weighted Adjustment Factor will be calculated as follows:

[

]:

[

].

[

].

[

].

[

].

[ ].

[

REDACTED

[

].

[

].

[

].

[

].

(4) The Weighted Adjustment Factor will be applied to Calendar Year 2007 Prices to determine pricing for 2008. The same method will be applied to adjust prices for each subsequent year (by multiplying the then current prices by the new Weighted Adjustment Factor).

Section 2. Imbalance Fees.

[

]:

[

].

[

].

[

].

[

].

Section 3. Miscellaneous Provisions.

REDACTED

A. Either Party shall have the right to conduct an audit, by a third party acceptable to the other Party, with respect to any of the provisions of this Agreement, provided that the third party's report to the Party requesting the audit shall be limited to whether or not the Agreement has been complied with, and the extent of the inaccuracy, if any. However, the Party whose records are being audited shall receive a full report from the auditor concerning the findings from such audit.

B. Payments of any liquidated damages pursuant to this Agreement shall be made no later than [

].

to Transaction Agreement

KCS MSLLC MASTER INTERCHANGE AGREEMENT

THIS AGREEMENT (the "KCS MSLLC Master Interchange Agreement" or "Agreement") is entered into as of this ____ day of _____, 200___, by and between MERIDIAN SPEEDWAY LLC, a Delaware limited liability company ("MSLLC"), and THE KANSAS CITY SOUTHERN RAILWAY COMPANY, a Missouri corporation ("KCSR"). MSLLC and KCSR are referred to individually herein as a "Party" and collectively as the "Parties".

RECITALS:

WHEREAS, on December 1, 2005, Kansas City Southern ("KCS"), KCSR, The Alabama Great Southern Railroad Company and Norfolk Southern Corporation ("NSC") entered into a transaction agreement (the "Transaction Agreement") that, among other things, provides for the creation of MSLLC, the transfer from KCSR to MSLLC of the Subject Trackage, as defined in the Transaction Agreement, and the grant by MSLLC to KCSR and Norfolk Southern Railway Company ("NSR") of certain rights over the Subject Trackage; and

WHEREAS, on even date hereof, KCSR and MSLLC entered into the KCSR Joint Use Agreement, pursuant to which KCSR has been granted certain local and overhead trackage rights and haulage rights over the Subject Trackage; and

WHEREAS, the Transaction Agreement anticipates that, pursuant to an operating agreement, MSLLC will hire KCSR to perform as the designated operator ("Designated Operator") all railroad operations on behalf of MSLLC, including the railway operations required pursuant to the KCS Joint Use Agreement and the NSR Joint Use Agreement; and

WHEREAS, the Parties desire to set forth, among other things, the method for the physical interchange of traffic between KCSR and MSLLC;

NOW, THEREFORE, the Parties hereto, intending to be legally bound, agree as follows:

SECTION 1. INTERCHANGE LOCATIONS

Each Party shall deliver railroad cars and intermodal platforms, loaded and empty ("Interchange Cars"), and all other equipment and locomotives to be interchanged between the Parties ("Run-Through Equipment"), to the other Party, on tracks owned or controlled by one of the Parties along the Subject Trackage ("Interchange Tracks"), as shown on the map appended hereto as Appendix A – Map, as well as other locations that, from time to time, the Parties may designate.

SECTION 2. DEFINITIONS

In each case, the Party that owns or controls the relevant Interchange Tracks shall hereinafter be referred to as the "owner" of said Interchange Tracks or the "receiving carrier", and the other Party shall hereinafter be referred to as the "user" of said Interchange Tracks or the "delivering carrier." Designation of specific tracks for delivery to and from KCSR and MSLLC will be agreed upon between local KCSR and MSLLC operating officers. A "train" consists of at least one locomotive connected to at least one Interchange Car.

SECTION 3. USE AND RESTRICTION OF USE OF INTERCHANGE TRACKS

(a) KCSR's and MSLLC's use of the Interchange Tracks shall be in common with each other and neither Party's right to use the Interchange Tracks shall be diminished by this Agreement.

(b) Neither Party shall use any part of the Interchange Tracks for the purpose of switching, storage of cars, locomotives or equipment, or the making or breaking up of trains, except as necessary for interchange purposes, provided, however, that nothing contained herein shall preclude the emergency use by either Party, upon prior approval of the other Party, of such auxiliary tracks as may be designated by the owner for that purpose.

(c) Each Party hereby grants to the other Party the right to use so much of the Interchange Tracks and connecting trackage as may be necessary to accomplish such interchange between the Parties hereto.

(d) No compensation shall be payable by either KCSR or MSLLC to the other for use of the Interchange Tracks granted pursuant to this Interchange Agreement.

SECTION 4. INTERCHANGE

(a) Interchange Cars not accompanied by Run-Through Equipment shall be deemed interchanged from the delivering carrier to the receiving carrier when the locomotive consist is uncoupled from such Interchange Cars after such Interchange Cars are placed on the Interchange Tracks by the delivering carrier and proper notification and documentation sufficient to permit further movement of said Interchange Cars is delivered to the receiving carrier.

(b) Run-Through Equipment and Interchange Cars accompanied by Run-Through Equipment (in each case, a "Run-Through Train") shall be deemed interchanged when: (i) the Run-Through Train is placed on the interchange tracks and the delivering crew has disembarked from the Run-Through Train; or (ii) for a Run-Through Train that moves between KCSR owned or controlled track and MSLLC owned or controlled track, at the time the locomotives on the Run-Through Train cross the property line between the KCSR owned or controlled track and the MSLLC owned or controlled track. KCSR and MSLLC may jointly agree that data provided by Automatic Equipment Identification

(AEI) readers at specified locations will be used to identify the interchange time between KCSR and MSLLC.

(c) Except as may be provided in the KCSR Joint Use Agreement, once an Interchange Car or Run-Through Equipment is interchanged onto Interchange Tracks, it shall transfer to the account of the receiving carrier for, as may be relevant for said particular Interchange Car or Run-Through Equipment, the purpose of determining liability for car hire charges and liability under the provisions of Section 6. The interchange of Interchange Cars also shall be subject to the interchange rules adopted by the Association of American Railroads, as the same shall be amended from time to time (the "AAR Interchange Rules"). To the extent that the terms of this Agreement conflict with the AAR Interchange Rules, the terms of this Agreement shall control.

(d) Neither KCSR nor MSLLC shall have the right to permit or admit any third party to the use of all or any portion of the other Party's Interchange Tracks without the prior written approval of the other Party, which may be withheld in said other Party's sole discretion.

SECTION 5. MANAGEMENT AND OPERATIONS

(a) The locomotives and crews of the user when operating over the Interchange Tracks shall be equipped to communicate with owner of the Interchange Tracks on radio frequencies normally used by the owner in directing train movements on the Interchange Tracks.

(b) Procedures for qualification and occupancy of the Interchange Tracks by the user shall be arranged by the local supervisors of KCSR and MSLLC. The user's operations over the Interchange Tracks shall at all times be subject to the direction and control of the owner's operating officer in charge of the Interchange Tracks and to applicable provisions of owner's safety and operating rules.

(c) Locomotives providing the power as Run-Through Equipment shall be in good running order, properly serviced and equipped, and adequately fuelled.

(d) Interchange Cars and Run-Through Equipment shall not exceed the width, height, weight or other restrictions or capacities on the Interchange Tracks.

(e) The owner shall have exclusive control of the management and operation (including dispatching) of the Interchange Trackage. The owner shall exercise control over the Interchange Tracks in a fair, equitable and impartial manner in order to promote the most economical and efficient movement of all traffic over the Interchange Tracks.

(f) The owner shall be solely responsible for the maintenance, repair and renewal of the Interchange Tracks. The owner shall keep and maintain the Interchange Tracks in reasonably good condition for the use herein contemplated, but the owner does not guarantee the condition of the Interchange Tracks or that operations thereover will

not be interrupted. The owner shall take reasonable steps to ensure that any interruptions will be kept to a minimum and shall use its best efforts to avoid such interruptions.

(g) The user shall comply with the provisions of the Federal Locomotive Inspection Act and the Federal Safety Appliance Act, as amended, and any other federal and state and local laws, regulations and rules respecting the operation, condition, inspection and safety of the its trains, Interchange Cars and Run-Through Equipment while such trains, Interchange Cars and Run-Through Equipment are being operated over the Interchange Tracks.

(h) The user in its use of the Interchange Tracks shall comply in all respects with the safety rules, operating rules and other regulations of the owner, and the movement of the user's trains, Interchange Cars and Run-Through Equipment over the Interchange Tracks shall at all times be subject to the orders of the transportation officers of the owner; provided, however, that such safety rules, operating rules, other regulations and orders of the transportation officers of the owner shall not discriminate between the Parties.

(i) If any employee of the user shall neglect, refuse or fail to abide by the owner's rules, the instructions and restrictions governing the operation on or along the Interchange Tracks or the associated owner's property, such employee shall, upon written request of the owner, be promptly withheld from working on the owner's property pending the results of a formal investigation of the alleged neglect, refusal or failure. After the foregoing request is given to the user, the user shall promptly hold an investigation, in which all parties concerned shall participate and bear the expense for its officers, counsel, employees and witnesses. Notice of such investigation to the user's employees shall be given by the user's officers. The investigation shall be conducted in accordance with any applicable terms and conditions of schedule agreements between the user and its employees. If the result of such investigation warrants, such employee shall, upon written request by the owner, be restricted by the user from service on the Interchange Tracks.

(j) The user shall not have any claim against the owner for liability on account of loss or damage of any kind in the event the use of the Interchange Tracks by the user is temporarily interrupted or delayed at any time from any cause.

SECTION 6. LIABILITY

As between the Parties hereto, liability for loss or destruction of, or damage to, any property whatsoever, and any injury to or death of any person or persons whomever (including employees of KCSR or MSLLC), resulting from, arising out of, incidental to or occurring in connection with operations conducted pursuant to this Agreement shall be apportioned between the Parties hereto pursuant to the terms and conditions of the Unified Liability Agreement.

SECTION 7. TERM

(a) Effective Date.

This Agreement shall become effective following the latest date of: (i) the date first written above; (ii) following receipt of any required regulatory approvals or exemptions; and (iii) following the expiration of any time periods required by the issuance of labor notices by KCSR, KCS and/or MSLLC, should such labor notices be required ("Effective Date"). The Parties will determine the Effective Date through an exchange of written correspondence.

(b) Initial Term.

This Agreement shall commence on the Effective Date, and shall continue until terminated by mutual agreement of the Parties.

(c) Termination.

Termination of this Agreement shall not relieve or release either Party hereto from any obligations assumed or from any liability which may have arisen or been incurred by such Party under the terms of this Agreement prior to termination hereof.

SECTION 8. ARBITRATION

Any dispute arising among the Parties with respect to an alleged breach of this Agreement shall be resolved pursuant to the arbitration provisions of the Unified Liability Agreement. As a Third Party Beneficiary, NSR may initiate and prosecute arbitration pursuant to this Section 8 on behalf of MSLLC. MSLLC shall cooperate with NSR in the preparation for, and the initiation and prosecution of, such arbitration, at NSR's expense.

SECTION 9. NOTICES

Any notice required or permitted to be given by one Party to another under this Interchange Agreement shall be sent to each of MSLLC, NSR and KCSR, and deemed given on the date sent by certified mail, or by such other means as the Parties may agree, and shall be addressed as follows:

If to MSLLC:

Chief Operating Officer
The Kansas City Southern Railway Company
P.O. Box 219335
Kansas City, MO 64121-9335

With a copy to:

Senior Director – Joint Facilities
Norfolk Southern Corporation

1200 Peachtree Street, N.E., Box 158
Atlanta, Georgia 30309

If to KCSR:

Chief Operating Officer
The Kansas City Southern Railway Company
P.O. Box 219335
Kansas City, MO 64121-9335

With a copy to:

Senior Vice President and General Counsel
The Kansas City Southern Railway Company
P.O. Box 219335
Kansas City, MO 64121-9335

If to NSR:

Executive Vice President Operations
Norfolk Southern Corporation
Three Commercial Place
Norfolk, Virginia 23510-2191

with a copy to:

Senior Director – Joint Facilities
Norfolk Southern Corporation
1200 Peachtree Street, N.E., Box 158
Atlanta, Georgia 30309

Any of MSLLC, KCSR or NSR may provide changes in the above addresses to the others by personal service or certified mail.

SECTION 10. FORCE MAJEURE

The obligations, other than payment obligations, of the Parties to this Agreement shall be subject to force majeure (including flood, earthquake, hurricane, tornado, or other such severe weather or climatic condition, riot, accident, wreck, derailment, washout, explosion, Acts of God, act of terrorism and public enemy, war, blockage, insurrection, vandalism or sabotage, fire, strike, lockout or labor dispute, embargoes or AAR service orders, or governmental laws, orders or regulations, and other causes or circumstances beyond the control of the Party invoking such force majeure as an excuse for nonperformance), but only as long as, and to the extent that, such force majeure shall reasonably prevent performance of such obligations by the affected Party. In the event that an event of force majeure impairs either Party's ability to fulfill its obligations to the

other Party under this Agreement, said Party shall take all commercially reasonable measures to restore performance of its obligations in a timely manner.

SECTION 11. CONFIDENTIALITY

(a) Except as provided by law or by rule, order, or regulation of any court or regulatory agency with jurisdiction over the subject matter of this Interchange Agreement, or as a result of an audit by the Internal Revenue Service or other taxing authority, or as may be necessary or appropriate for a Party hereto to enforce its rights under this Interchange Agreement, during the term, the terms and provisions of this Interchange Agreement and all information to which access is provided or which is obtained hereunder will be kept confidential and will not be disclosed by any Party to any person other than such Party's respective, members, officers, employees, independent auditors, and attorneys without the prior written approval of the other Party.

(b) Notwithstanding the foregoing Section 11(i), the Parties acknowledge and agree that in any Surface Transportation Board ("STB") proceeding, the Parties may be required to submit this Agreement into the record. The Parties will propose to request a protective order to protect the payment provisions of this Agreement. Following issuance of a protective order, a copy (with the highly confidential provisions redacted) may be entered into the public STB record and a highly confidential unredacted copy of this Agreement may be entered into the STB record subject to the provisions of the applicable protective order.

SECTION 12. SUCCESSORS AND ASSIGNS

(a) This Agreement shall inure to the benefit of and be binding upon each of the Parties and their respective successors and permitted assigns. Third party beneficiary status shall inure to the benefit of NSR and each of its successors and permitted assigns.

(b) Neither Party may assign this Agreement, or any of its rights, interests or obligations hereunder, including by operation of law, without the prior consent in writing of the other Party, which consent may be withheld at the discretion of such other Party.

SECTION 13. GENERAL

(a) This Agreement and each and every provision hereof is for the exclusive benefit of the Parties hereto and not for the benefit of any third party except NSR, which shall have standing to enforce the terms hereof. Other than the foregoing sentence, nothing herein contained shall be taken as creating or increasing any right of any third party to recover by way of damages or otherwise against any of the Parties hereto.

(b) This Agreement contains the entire understanding of the Parties hereto with respect to the subject matter hereof and supersedes any and all oral understandings between the Parties.

(c) No term or provision of this Agreement may be changed, waived, discharged or terminated except by an instrument in writing and signed by all Parties and NSR.

(d) Each definition in this Agreement includes the singular and the plural, and references in this Agreement to the neuter gender include the masculine and feminine where appropriate. References herein to any agreement or contract mean such agreement or contract as amended. As used in this Agreement, the word "including" means "without limitation", and the words "herein", "hereof" and "hereunder" refer to this Agreement as a whole. All dollar amounts stated herein are in United States currency.

(e) All words, terms and phrases used in this Agreement, and not otherwise defined, shall be construed in accordance with the generally applicable definition or meaning of such words, terms and phrases in the railroad industry.

(f) All Section headings are inserted for convenience only and shall not affect any construction or interpretation of this Agreement.

(g) This Agreement is the result of mutual negotiations between the Parties hereto, none of whom shall be considered the drafter for purposes of contract construction.

(h) If any provision of this Agreement or the application thereof to any Party hereto or to any circumstance shall be determined by a court of competent jurisdiction to be invalid or unenforceable to any extent or for any reason, the remainder of this Agreement or the application of the provisions thereof to such Party or circumstance, other than those determined to be invalid or unenforceable, shall not be affected thereby and shall be enforced to the fullest extent permitted by law, and the Parties shall promptly enter into such other agreement(s) as their respective legal counsel may deem appropriate in order to replace such invalid or unenforceable provisions in a manner that produces a result which is substantially equivalent to the terms of this Agreement in all material respects.

(i) Nothing herein shall be interpreted as creating an association, partnership, joint venture or other joint undertaking between or among MSLLC, KCSR and NSR.

(j) This Agreement shall be governed and interpreted in accordance with the laws of the State of Delaware, without regard to application of the choice of law principles thereof.

(k) This Agreement may be executed in any number of counterparts, each of which shall be deemed to be an original, but all such separate counterparts shall together constitute but one and the same instrument.

IN WITNESS WHEREOF the Parties have executed this Agreement as of the date first above written.

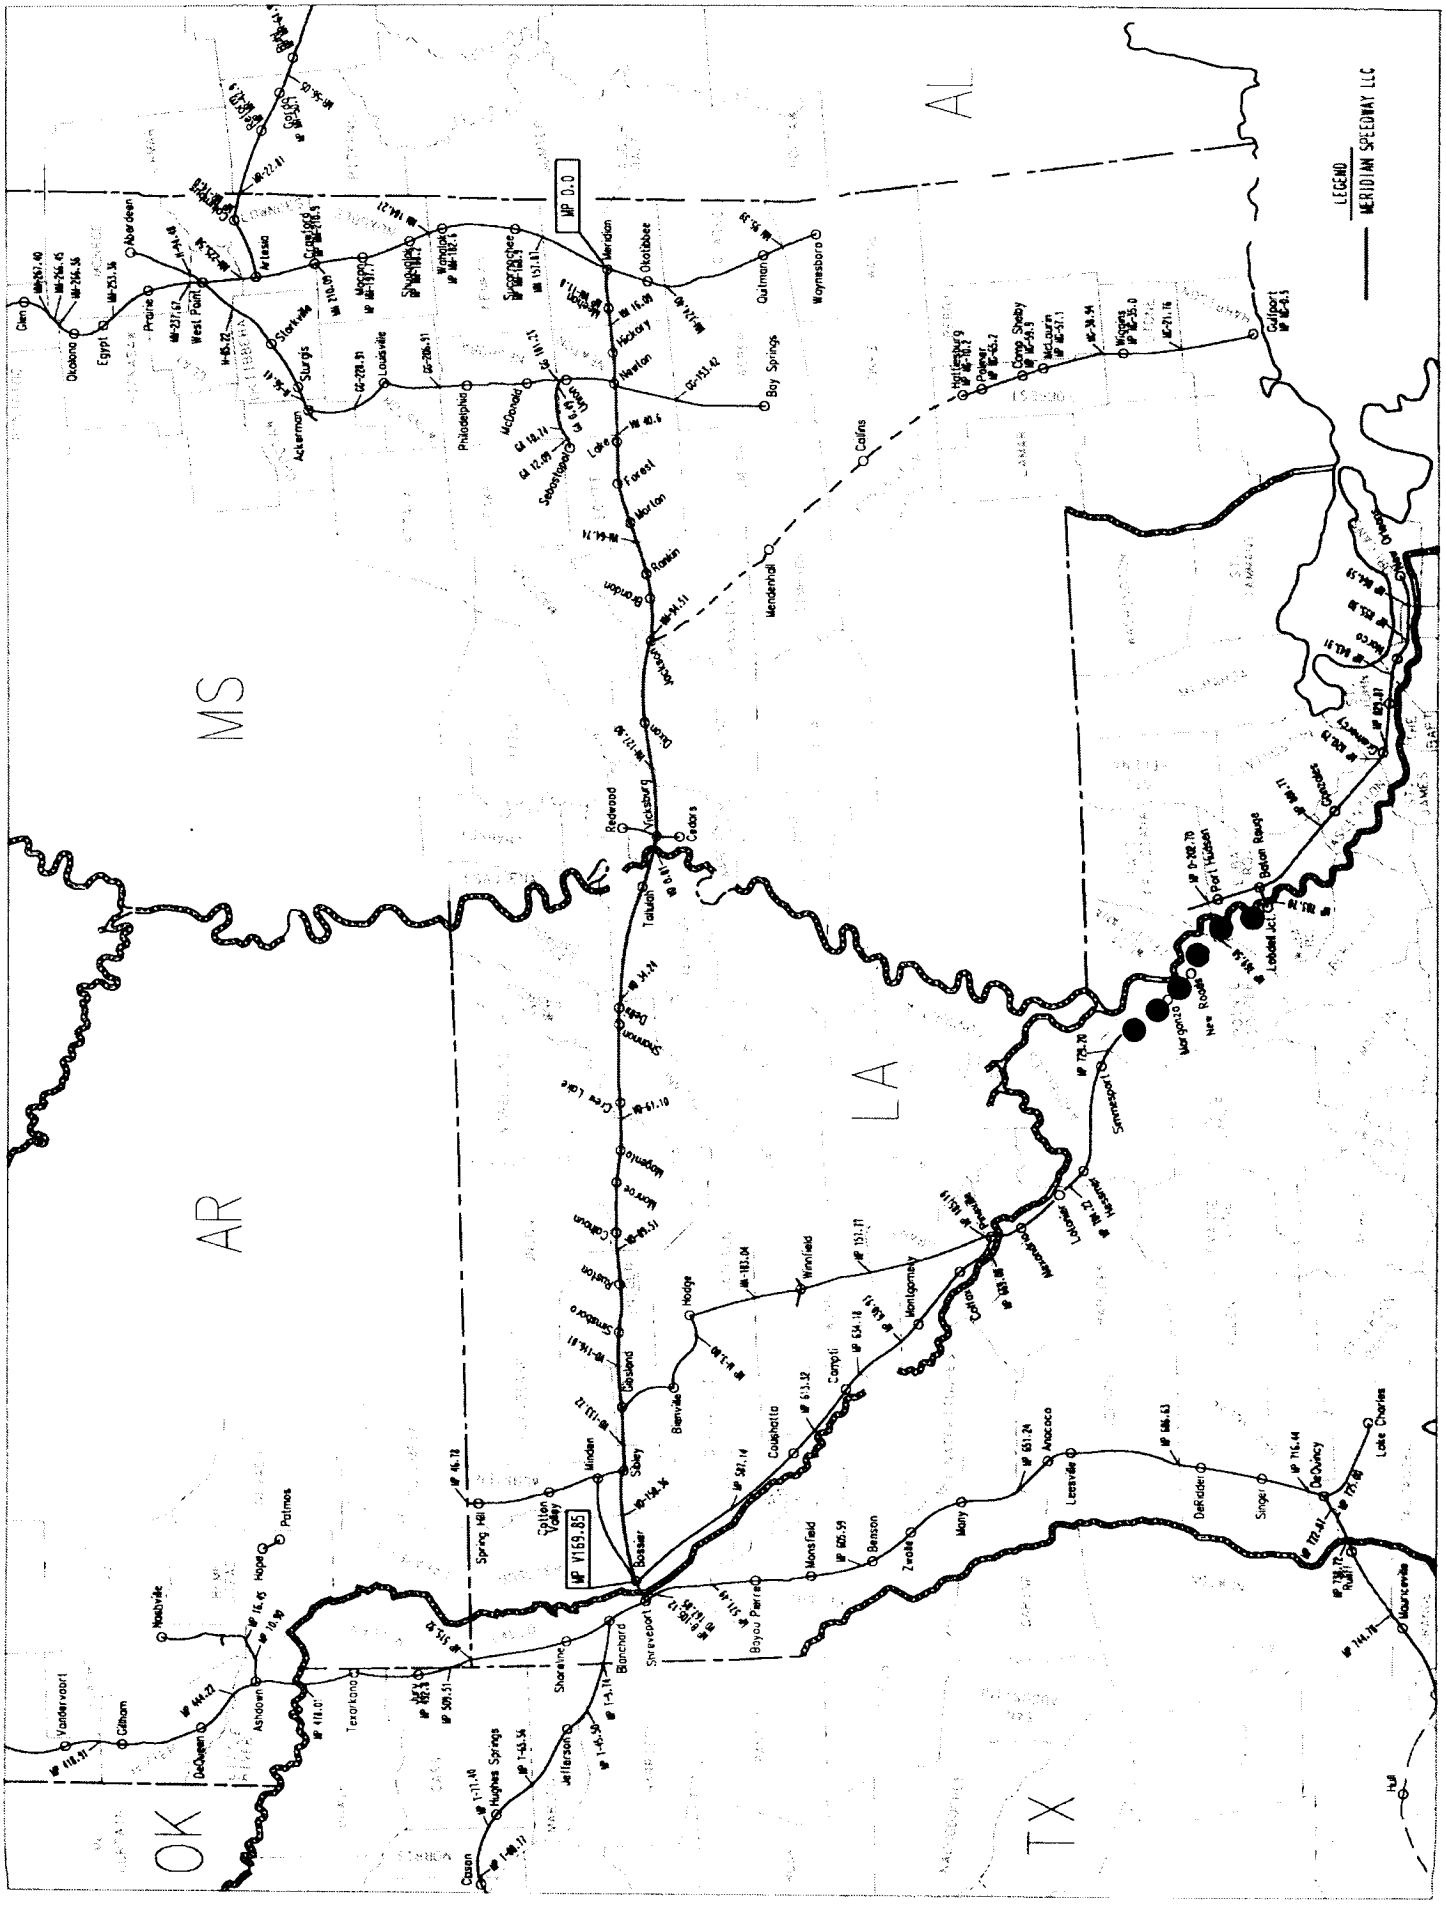
APPENDIX A
Map

General Guidelines - Asset Identification
KCSR / NSR Joint Venture

KCS will contribute assets to the Joint Venture subject to the following restrictions:

The single main line track will be included, (Highlighted in "green" on the attached SLIC charts) extending between Meridian, MS., at Milepost 0.0, and Shreveport, LA., at Milepost V - 169.85, and including the right of way extending from the center point of the track to the prevailing right of way line for that location on either side of the track. (Right of way not included is highlighted in "blue" on the attached track charts)



Sidings connected to and adjacent to the single main line track that are within the prevailing right of way line on either side of the track and whose primary use is to meet and pass trains will be included. Sidings can generally be identified on the Track Charts by the Control Point (CP) designation at each end of the siding. They may also be identified by their SLIC number, and are highlighted in "green" on the SLIC Charts.

All KCS owned tracks including but not limited to yard (see additional explanation below), branch line, industrial lead, intermodal or strip, interchange, mechanical, car repair or rip, and storage tracks; and all industry and privately owned tracks or leased branch lines that connect to the single main line are excluded. The Joint Venture will be responsible for maintaining to the clearance point any switches connecting such tracks to the single main line track. The attached SLIC charts and the MCS Track Identification Table below will be used to determine the status of each track along the route.

Where the single main line track runs through a yard only the single main line track will be included (Highlighted in "green" on the attached SLIC charts). Through yards the right of way line for the single main line track will be defined as the imaginary line running between the clearance points of switches connecting to the single main line track.

MCS Track Identification Table

1 – 199	Yard tracks
200 – 299	Intermodal / Strip tracks
300 – 399	Interchange tracks
400 – 499	Mechanical / Rip tracks
500 – 599	Main line / Main tracks
600 – 699	Sidings
700 – 799	Industry tracks
800 – 899	Storage tracks

TRACK CHART FEATURE LEGEND
NOTES
BRIDGES
THE MILEPOST LOCATIONS OF BRIDGES SHOWN ON THE GRADE ARE AT THE CENTER OF THE BRIDGES.
GRADE
RAILROAD ELEVATIONS ARE SHOWN PERIODICALLY AND USGS ELEVATIONS ARE SHOWN WHERE KNOWN. WHERE THE GRADE CHANGES ARE TOO NUMEROUS OVER A SHORT DISTANCE TO CLEARLY TO SHOW, THE GRADE IS SHOWN AS AN AVERAGE.
MILEPOST
SIGNIFICANTLY LONG OR SHORT MILES ARE NOTED WITH THEIR RESPECTIVE EQUATIONS.
TRACK
MAIN LINES ARE SHOWN WITH A BOLD LINE. SIDING CAPACITIES ARE TRAIN CAPACITIES IN FEET.
RAIL
WELDED RAIL IS SHOWN WITH A BOLD LINE.
BOLTED RAIL IS SHOWN WITH A THIN LINE.
HORIZONTAL SCALE 1" = 2640'
VERTICAL SCALE 1" = 2.5 MILES. 1/4" = 3300'

EXHIBIT G
to Transaction Agreement

UNIFIED ASSIGNMENT AND ASSUMPTION AGREEMENT

This UNIFIED ASSIGNMENT AND ASSUMPTION AGREEMENT, dated as of the ___ day of _____, 200__ (the "Unified Assignment and Assumption Agreement"), is by and among The Kansas City Southern Railway Company ("KCSR"), a Missouri corporation, Kansas City Southern, a Delaware corporation ("KCS") (KCS and KCSR are collectively referred to herein as "Assignors"), and Meridian Speedway LLC (MSLLC), a Delaware limited liability company ("Assignee"). KCSR, KCS and MSLLC are referred to individually here as a "Party" and collectively as the "Parties".

RECITALS:

WHEREAS, on December 1, 2005, KCS, KCSR, The Alabama Great Southern Railroad and Norfolk Southern Corporation ("NSC") entered into a transaction agreement (the "Transaction Agreement") that, among other things, contemplated the creation of Assignee, and the transfer from KCSR, a wholly-owned subsidiary of KCS, to Assignee of the Subject Trackage, as defined in the Transaction Agreement; and

WHEREAS, the Transaction Agreement anticipates that, pursuant to the Operating Agreement, the form of which appears as an appendix to the Transaction Agreement, Assignee will hire KCSR to perform as the designated operator ("Designated Operator") all railroad operations required pursuant to the KCSR-MSLLC Joint Use Agreement and the NSR-MSLLC Joint Use Agreement, and all general and administrative services, including claims handling, accounting, legal services, human relations and labor relations services, and other like services, on behalf of Assignee; and

WHEREAS, Assignors and Assignee desire to enter into an assignment and assumption agreement pursuant to which Assignors assign, and Assignee assumes, certain agreements pursuant to which third parties have rights with respect to the Assets, generally consisting of public, private and pedestrian grade crossing, interlocking track, interlocking signal, joint use, and joint facility agreements, and such other like agreements associated with the usage of the Subject Trackage (the "Ancillary Agreements"); and

WHEREAS, Assignors agreed to contribute, transfer and assign to Assignee all of Assignors' right, title and interest in and to the Assets. For the avoidance of doubt, the Assets include without limitation (i) all Permits reasonably necessary to operate the Subject Trackage, (ii) Assignors' rights under the Ancillary Agreements, (iii) the right to review and copy all architectural, mechanical, engineering and other plans and specifications relating to the Assets and in Assignors' possession and control, (iv) all deposits under all contracts, agreements, leases and licenses relating to the Assets and (v) all warranties, guarantees, contract rights and miscellaneous rights relating to the Assets, except in the case of each of (i) – (v) for the portions thereof relating to assets that are not included in the Assets; and

WHEREAS, Assignee desires to accept assignment of the Ancillary Agreements and the Assets, and to assume the Assumed Liabilities, but only on the terms and conditions contained herein.

NOW, THEREFORE, the Parties hereto, for and in consideration of the premises, the mutual covenants and agreements contained herein and in the Transaction Agreement, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, and intending to be legally bound, agree as follows:

Section 1. Assignments.

(a) Subject to the terms of the Transaction Agreement, and for value received, Assignors do hereby transfer and assign unto Assignee, to the fullest extent that they lawfully may, all of Assignors' rights, titles and interests in those various Ancillary Agreements indicated on Exhibit A, attached hereto and made a part hereof; to the extent that said instruments affect the Subject Trackage. Assignors further partially transfer and assign unto Assignee, to the fullest extent that they lawfully may, the respective rights, titles and interests of Assignors, if any, in those various Ancillary Agreements indicated on Exhibit A, attached hereto and made a part hereof; to the extent that the instruments affect property only partially within the Subject Trackage, it being the intent to transfer and assign only so much of the instruments indicated on Exhibit A as affects the Subject Trackage. Notwithstanding anything to the contrary in this Unified Assignment and Assumption Agreement, Assignors withhold from assignment each and every agreement listed on Exhibit B hereto.

(b) Subject to the terms of the Transaction Agreement, for value received, Assignors do hereby transfer and assign unto Assignee, to the fullest extent that they lawfully may, all of Assignors' rights, titles and interests, in the Assets and the Assumed Liabilities.

Section 2. Assumption.

Subject to the terms of the Transaction Agreement, Assignee does hereby accept and assume, to the extent of the interest hereby assigned, all of the rights, titles, interests, covenants, promises and obligations of Assignors contained within the Ancillary Agreements (listed on Exhibit A), the Assets, and the Assumed Liabilities.

Section 3. Delivery of Assigned Agreements.

After the effective date of this Unified Assignment and Assumption Agreement, Assignors will make available for inspection and copying by Assignee the documents indicated on Exhibit A and Exhibit B. Assignee reserves the right to reject and refuse to accept assignment of any of the aforesaid instruments if and/or to the extent that they do not affect the Subject Trackage by giving Assignors notice within thirty (30) days of the date of delivery of same to Assignee. Subject to Section 4 hereof, failure of Assignee to reject or refuse to accept assignment will constitute assumption by Assignee of the rights, titles, interests, covenants, promises, and obligations of Assignors under said instruments as of the effective date of this Unified Assignment and Assumption Agreement.

Section 4. Erroneous Assignment.

It is the intent of Assignors to assign their interest in only those instruments affecting, and only to the extent that they affect, the Subject Trackage. Should any instruments that do not affect the Subject Trackage be included on the instruments provided herein to Assignee, and notwithstanding anything to the contrary herein, this Unified Assignment and Assumption Agreement shall be void and of no effect as to those instruments. Upon determination by either party that any instruments have been erroneously included in this Unified Assignment and Assumption Agreement, the instruments shall be promptly returned to Assignors, if already in the custody of Assignee.

Section 5. After-Discovered Agreements.

The instruments listed on the exhibits hereto constitute all of such instruments known to Assignors affecting the Subject Trackage. If subsequent to the effective date of this instrument, Assignors discover any additional instruments which affect the Subject Trackage, said instruments shall be automatically assigned as if included herein upon Assignors' mailing by Certified Mail copies of said instruments to Assignee.

Section 6. The Transaction Agreement.

This Unified Assignment and Assumption Agreement is subject to the terms and conditions of the Transaction Agreement. Nothing herein shall be deemed to amend, modify, alter, expand or diminish the terms and conditions of the Transaction Agreement, including the covenants, representations, warranties and indemnity obligations contained therein.

Section 7. Governing Law.

The laws of the state of Delaware shall govern the validity of this Unified Assignment and Assumption Agreement, the construction of its terms, and the interpretation of the rights and duties arising hereunder, without regard to the laws that might otherwise govern under the applicable principles of conflicts of law thereof.

Section 8. Counterparts.

This Unified Assignment and Assumption Agreement may be executed in any number of counterparts, each of which shall be deemed to be an original, but all of which together shall constitute one and the same instrument.

Section 9. Successors and Assigns.

This Unified Assignment and Assumption Agreement shall be binding upon and inure solely to the benefit of each Party hereto and their respective successors and permitted assigns, and nothing in this Unified Assignment and Assumption Agreement, express or implied, is intended to or shall confer upon any other person any rights, interests, benefits or remedies of any nature whatsoever under or by reason of this Unified Assignment and Assumption Agreement.

Section 10. Further Assurances.

Assignors shall, from time to time upon the reasonable request of Assignee, execute and deliver all such further documents and instruments, and take all such further acts as shall be reasonably necessary or desirable to give full effect to the intent and meaning of this Agreement.

The effective date of this instrument is _____, 200__.

DATED this _____ day of _____, 200__.

EXHIBIT I
to Transaction Agreement

UNIFIED LIABILITY AGREEMENT

THIS AGREEMENT (the "Agreement") is entered into as of this ____ day of _____, 200__, by and among **NORFOLK SOUTHERN RAILWAY COMPANY**, a Virginia corporation ("NSR"), **THE KANSAS CITY SOUTHERN RAILWAY COMPANY**, a Missouri corporation ("KCSR"), and **MERIDIAN SPEEDWAY LLC**, a Delaware limited liability company ("MSLLC"). NSR, KCSR and MSLLC are referred to individually herein as a "Party" and collectively as the "Parties."

RECITALS:

WHEREAS, on December 1, 2005, Kansas City Southern ("KCS"), KCSR, The Alabama Great Southern Railroad Company and Norfolk Southern Corporation ("NSC") entered into a transaction agreement (the "Transaction Agreement") that, among other things, provided for the creation of MSLLC, and the transfer from KCSR, a wholly-owned subsidiary of KCS, to MSLLC of certain lines of railroad generally running between Meridian, MS and Shreveport, LA; and

WHEREAS, pursuant to Norfolk Southern – MSLLC Joint Use Agreement, MSLLC has agreed to grant to NSR haulage rights between Meridian, MS and Shreveport, LA, and an additional grant of trackage rights over that same track, which may be exercised only upon the happening of certain events; and

WHEREAS, pursuant to The Kansas City Southern Railway Company – MSLLC Joint Use Agreement, MSLLC has agreed to grant to KCSR certain haulage and trackage rights between Meridian, MS and Shreveport, LA; and

WHEREAS, pursuant to the NSR-KCSR Western Haulage Agreement, KCSR has agreed to grant to NSR haulage rights between Shreveport, LA and the Dallas, TX area; and

WHEREAS, pursuant to The Kansas City Southern Railway Company – MSLLC Operating Agreement, MSLLC will hire KCSR for the duration of the joint venture to perform as the Designated Operator for MSLLC for all railroad and other operations of MSLLC, including MSLLC railway operations pursuant to the KCSR Joint Use Agreement and the NSR Joint Use Agreement, as well as, to perform all general and administrative services required by MSLLC; and

WHEREAS, pursuant to the KCS – MSLLC Master Interchange Agreement, MSLLC and KCSR have agreed to terms governing the interchange of traffic between them; and

WHEREAS, pursuant to The Kansas City Southern Railway Company – NSR Haulage Agreement, KCSR may perform haulage services over the Jackson Gap, as that term is defined therein; and

WHEREAS, the Parties desire to set forth the terms and conditions pursuant to which liability shall be apportioned by and among MSLLC, KCSR, and NSR under the Norfolk

Southern – MSLLC Joint Use Agreement, The Kansas City Southern Railway Company – MSLLC Joint Use Agreement, the NSR-KCSR Western Haulage Agreement, the KCS MSLLC Master Interchange Agreement, The Kansas City Southern Railway Company – NSR Haulage Agreement, and The Kansas City Southern Railway Company – MSLLC Operating Agreement (collectively the "Various Agreements"); and

WHEREAS, under the Norfolk Southern - MSLLC Joint Use Agreement and The Kansas City Southern Railway Company - MSLLC Joint Use Agreement, MSLLC will provide certain haulage and trackage rights to NS and KCS, as further defined in those agreements. The Parties intend in this Agreement to set forth the basis for allocating various liabilites between and among them related to those agreements; and

WHEREAS, under the NSR-KCSR Western Haulage Agreement and the KCS MSLLC Master Interchange Agreement, the Parties have arranged for the efficient operation of MSLLC and defined the relationship among the Parties. The Parties intend in this Agreement to set forth the basis for allocating various liabilities between and among them related to those agreements; and

NOW, THEREFORE, the Parties hereto, intending to be legally bound, agree as follows:

SECTION 1. DEFINITIONS AND INTERPRETATION

(a) "Account" shall mean a revenue waybill or car hire account

(b) "Agreement" shall mean this Unified Liability Agreement

(c) "Cars" shall include all rail cars and intermodal cars (including trailers and containers loaded thereon), and lading contained therein, if any.

(d) "Environmental Loss" shall mean damage to or destruction of the environment, including without limitation land, air, water, wildlife, and vegetation, or death or injury to third parties or damage to or destruction of property, as a result of the release of a hazardous substance, waste or material as said terms are defined in any Federal, State or local law.

(e) "Equipment" shall mean any on-track vehicle of any type whatsoever not otherwise a Car or Locomotive.

(f) "Gross negligence or willful or wanton misconduct" shall mean the intentional failure to perform a manifest duty in reckless disregard of the consequences as affecting the life or property of another; such a gross want of care and regard for the rights of others as to justify the presumption of willfulness and wantonness.

(g) "Locomotive" shall have the meaning assigned by the Federal Railroad Administration.

(h) "Loss or Damage" shall mean loss or destruction of, or damage to, any property whatsoever, and any injury to or death of any person or persons whomever (including employees of NSR, KCSR or MSLLC), resulting from, arising out of, incidental to or occurring in connection with the Agreements.

(i) "Trains" shall mean one or more Locomotives, whether or not coupled to one or more Cars.

(j) "Various Agreements" shall mean the Norfolk Southern – MSLLC Joint Use Agreement, The Kansas City Southern Railway Company – NSR Haulage Agreement, The Kansas City Southern Railway Company – MSLLC Joint Use Agreement, the NSR-KCSR Western Haulage Agreement, the KCS MSLLC Master Interchange Agreement, and The Kansas City Southern Railway Company – MSLLC Operating Agreement.

SECTION 2. LIABILITY

(a) Except as provided for elsewhere herein, whenever any Loss or Damage occurs in connection with the operation of Trains or Equipment provided for under one or more of the Various Agreements, the Party under whose control a Train or Equipment is operating (which shall be KCSR for trains operating under KCSR's trackage rights and for trains operating under the Western Haulage Agreement, MSLLC for NS haulage trains and third party traffic, KCSR or MSLLC for all trains operated under the KCS MSLLC Master Interchange Agreement depending on the status of the train under that Agreement at the time of the loss or damage, and NSR for trains operating under NSR trackage rights) shall assume and bear all liability, cost, and expense for claims, demands and exposures, including attorneys' fee incurred in defending such claims, demands, and exposures arising therefrom, with the exception that the Party in whose Account the Cars in a Train are traveling shall be solely responsible and shall assume all liability (including consequential, special and incidental damages) for loss, destruction or damage to Cars (including contents).

(b) Notwithstanding Section 2(a), if the Loss or Damage is caused by track conditions, the Party responsible for track maintenance (MSLLC for the trackage between Meridian and Shreveport, and KCSR for the track west of Shreveport) shall assume[ ] of the liability (including consequential, special and incidental damages) for the damage to Cars (including contents) pursuant to this Section, and if the Loss or Damage is caused by Train handling (which shall be KCSR for trains operating under KCSR's trackage rights and for trains operating under the Western Haulage Agreement, MSLLC for NS haulage trains and third party traffic, and NSR for trains operating under NSR trackage rights), the Party responsible for Train handling shall assume [ ] of the liability (including consequential, special and incidental damages) for the damage to Cars (including contents) pursuant to this Section.

(c) Whenever Loss or Damage occurs with more than one Train and more than one controlling Party involved, then said Loss or Damage (other than Loss and Damage to Cars, including contents) shall be allocated equally among the Parties controlling such Trains, then, for each train, pursuant to Section 2(a) and 2(b).

(d) For the purposes of assigning responsibility for Loss and Damage under this Agreement, as to liability arising from operations over trackage other than that covered by the Western Haulage Agreement, the Trains and Cars and crew of a party not a Party to this Agreement shall be considered to be the Trains and Cars and crew of MSLLC, and the actions or inactions of any person when acting as the Designated Operator for MSLLC shall be considered the actions or inactions of MSLLC, and for and in the account of MSLLC, regardless of whether the Designated Operator is also a Party to this Agreement. For the purposes of assigning responsibility for Loss and Damage under this Agreement, as to liability arising from operations

over the trackage covered by the Western Haulage Agreement, the Trains and Cars and crew of a party not a Party to this Agreement shall be considered to be the Trains and Cars and crew of KCSR.

(e) Notwithstanding anything to the contrary in Section 2(a) and 2(b), if Loss or Damage is attributable solely to the gross negligence or willful or wanton misconduct of KCSR's managers (defined herein as all non-union personnel) under The Kansas City Southern Railway Company – MSLLC Operating Agreement, KCSR shall assume all liability, cost and expense in connection with such Loss or Damage. Except for such occurrence, and notwithstanding anything to the contrary in Section 2(a) and 2(b), if Loss or Damage is attributable solely to the gross negligence or willful or wanton misconduct of only one of the Parties to this Agreement, the Party to which such gross negligence or willful or wanton misconduct is attributable shall assume all liability, cost and expense in connection with such Loss or Damage.

(f) Notwithstanding anything to the contrary in Sections 2(a) through 2(d) above, when any Environmental Loss occurs from substances transported in cars or contained in locomotives occurs, with one or more than one Train involved, and one or more than one controlling Party involved, then, as between themselves, (i) NSR shall be solely responsible for any Environmental Loss which results solely from a substance transported in Cars and Equipment in NSR's Account which was released, (ii) KCSR shall be solely responsible for any Environmental Loss which results solely from a substance transported in Cars and Equipment in KCSR's Account which was released, and (iii) responsibility for Environmental Loss which results from one or more substances which was (or were) being transported in the Cars and Equipment in the Accounts of both NSR and KCSR which was (or were) released shall be shared by the Parties in proportion to the total number of such Cars and Equipment in the Account of each Party from which there was such a release of said substance.

(g) Notwithstanding any other provision contained in this Unified Liability Agreement, any liability arising from any agreement affecting the Assets and not assigned by KCSR to MSLLC shall be borne solely by KCSR.

(h) If any suit or action shall be brought against any Party for Loss or Damage which under the provisions of this Agreement are in whole or in part the responsibility of any other Party or Parties, said responsible Party or Parties shall be promptly notified in writing by the Party sued, and the Party or Parties so notified shall have the right and be obligated to take part in the defense of such suit and shall pay its or their share of the judgment and the costs and expense incurred in such suit in accordance with the terms of this Section 2.

(i) In every case of death or injury suffered by an employee of any of the Parties hereto, when compensation to such employee or employee's dependents is required to be paid under any present or future state or federal worker's compensation, occupational disease, employers' liability or other law or settlement, and one or more of the Parties under provisions of this Agreement is or are required to pay same or a portion of same in installments over a period of time, said Party or Parties shall not be released from paying any such future installment(s) by reason of the expiration or other termination of this Agreement prior to any of the respective date(s) upon which any such future installments are to be paid.

REDACTED

(j) **WHENEVER ANY LIABILITY, COST OR EXPENSE IS ASSUMED BY OR ALLOCATED TO A PARTY UNDER THIS SECTION 2, THAT PARTY SHALL (i) FOREVER DEFEND, INDEMNIFY AND SAVE HARMLESS THE OTHER PARTIES FROM AND AGAINST THAT LIABILITY, COST AND EXPENSE, REGARDLESS OF WHETHER SUCH LIABILITY, COST AND EXPENSE WAS CAUSED IN WHOLE OR IN PART BY THE FAULT, FAILURE, NEGLIGENCE, MISCONDUCT, MALFEASANCE OR MISFEASANCE OF THE PARTIES INDEMNIFIED, OR THEIR DIRECTORS, OFFICERS, AGENTS OR EMPLOYEES, AND (ii) DEFEND SUCH PARTIES AGAINST SUCH CLAIMS WITH COUNSEL SELECTED BY THE RESPONSIBLE PARTIES AND REASONABLY ACCEPTABLE TO THE INDEMNIFIED PARTIES.**

(k) All costs and expenses in connection with the investigation, adjustment and defense of any claim or suit under this Agreement shall be included as costs and expenses in applying the liability provisions of this Section 2; provided, however, that salaries or wages of full-time agents, full-time attorneys and other full-time employees of any Party engaged directly or indirectly in such work shall be borne by such Party.

(l) No Party shall settle or compromise any claim, demand, suit or cause of action for which any other Party has any liability or proportionate share liability under this Agreement of at least [ ] without the concurrence of such other Party or Parties. The foregoing amount of [ ]shall be adjusted from time to time by agreement of the Parties.

(m) Should any non-party railroad be admitted to operate via haulage or trackage rights on all or any portion of the railroad generally running between Meridian, MS and Shreveport, LA referenced in the first Whereas clause above, the Parties agree that said non-party railroad shall provide full and complete defense and indemnity to the Parties for all Loss and Damage incurred as a result or in connection with said operations.

SECTION 3. INDEMNITY COVERAGE

(a) As a part of the consideration hereof, each Party hereby agrees that each and all of its commitments to defend, indemnify and hold harmless in this Agreement in favor of the other Parties hereto shall extend to the parent corporation, subsidiaries and affiliates of such other Parties, and all of their respective directors, officers, agents and employees.

(b) NSR, KCSR and MSLLC shall defend, indemnify and hold harmless one another against any and all costs and payments, including benefits, allowances, and arbitration, administrative and litigation expenses, arising out of lawsuits, claims or grievances brought by or on behalf of its own employees or their collective bargaining representatives, either pursuant to employee protective conditions imposed by a governmental agency upon the agency's approval or exemption of this Agreement and operations hereunder or pursuant to a collective bargaining agreement. It is the Parties' intention that MSLLC, KCSR, and NSR each shall bear the full costs of protection of its own employees under employee protective conditions that may be imposed, and of grievances filed by its own employees arising under its collective bargaining agreements with its employees.

REDACTED

SECTION 4. TERM

This Agreement shall become effective upon execution and shall remain in force and effect so long as any of the Various Agreements are in force and effect.

SECTION 5. ARBITRATION

Any dispute arising among the Parties with respect to this Agreement or any of the Various Agreements shall be referred to their respective senior operating officers. In the event such officers are unable to resolve the dispute, any Party may submit the dispute for binding arbitration by three independent arbitrators before the American Arbitration Association under the Commercial Arbitration Rules, who shall render a written decision on the controversy. The written decision of the arbitrators, acting by majority rule, shall be final and conclusive upon the Parties. Each Party to the arbitration shall pay the compensation, costs, fees and expenses of its own witnesses, experts and counsel. The compensation, costs and expense of the arbitrators, if any, shall be borne by the Parties, with each Party paying an equal share of such costs. The arbitrators shall not have the power to award consequential or punitive damages or to determine violations of criminal or antitrust laws. Pending the written decision of the arbitrators, there shall be no interruption in the transaction of business under this Agreement or the Various Agreements, and all payments in respect thereto shall be made in the same manner as prior to the arising of the dispute until the matter in dispute shall have been fully determined by arbitration, and thereupon such payment or restitution shall be made as required by the decision of the arbitrators.

SECTION 6: MISCELLANEOUS PROVISIONS

(a) This Agreement and each and every provision hereof is for the exclusive benefit of the Parties hereto and, not for the benefit of any third party. Nothing herein contained shall be taken as creating or increasing any right of any third party to recover by way of damages or otherwise against any of the Parties hereto.

(b) This Agreement contains the entire understanding of the Parties hereto with respect to the subject matter hereof and supersedes any and all oral understandings between the Parties.

(c) No term or provision of this Agreement may be changed, waived, discharged or terminated except by an instrument in writing and signed by all Parties.

(d) The division of this Agreement into articles, sections, and subsections and the insertion of headings and references are for convenience of reference only, and shall not affect the construction or interpretation of this Agreement. Unless the context otherwise requires, all references to articles, sections or subsections are to articles, sections or subsections of this Agreement.

(e) This Agreement is the result of mutual negotiations between the Parties hereto, neither of whom shall be considered the drafter for purposes of contract construction.

(f) No consent or waiver, expressed or implied, by a Party of any breach or default by the other Party in the performance by such other Party of its obligations hereunder shall be deemed or construed to be a consent to or waiver of any other breach or default in the performance hereunder by such other Party. Failure on the part of a Party to complain of any act or failure of the other Party or to declare the other Party in default, irrespective of how long such failure continues, shall not constitute a waiver by such first mentioned Party of its rights hereunder.

(g) If any provision of this Agreement or the application thereof to any Party hereto or to any circumstance shall be determined by a court of competent jurisdiction to be invalid or unenforceable to any extent or for any reason, the remainder of this Agreement or the application of the provisions thereof to such Party or circumstance, other than those determined to be invalid or unenforceable, shall not be affected thereby and shall be enforced to the fullest extent permitted by law, and the Parties shall promptly enter into such other agreement(s) as their respective legal counsel may deem appropriate in order to replace such invalid or unenforceable provisions in a manner that produces a result which is substantially equivalent to the terms of this Agreement in all material respects.

(h) Nothing herein shall be interpreted as creating an association, partnership, joint venture or other joint undertaking among MSLLC, NSR, and KCSR.

(i) This Agreement shall be governed and interpreted in accordance with the laws of the State of Delaware, without regard to application of the choice of law principles thereof.

(j) This Agreement may be executed in any number of counterparts, each of which shall be deemed to be an original, but all such separate counterparts shall together constitute but one and the same instrument.

IN WITNESS WHEREOF, the Parties hereto have caused this Agreement to be duly executed as of the date first above written.

DALLAS TERMINAL MARKETING AGREEMENT

THIS DALLAS TERMINAL MARKETING AGREEMENT (the "Agreement") is entered into as of this ____ day of _____, 200__, by and between NORFOLK SOUTHERN RAILWAY COMPANY, a Virginia corporation ("NSR"), and THE KANSAS CITY SOUTHERN RAILWAY COMPANY, a Missouri corporation ("KCSR"). NSR and KCSR are referred to individually herein as a "Party" and collectively as the "Parties."

RECITALS:

WHEREAS, on December 1, 2005, Kansas City Southern ("KCS"), KCSR, The Alabama Great Southern Railroad Company and Norfolk Southern Corporation ("NSC") entered into a transaction agreement (the "Transaction Agreement") that, among other things, provided for the creation of Meridian Speedway LLC, a Delaware limited liability company ("MSLLC"), the transfer from KCSR to MSLLC of the Subject Trackage, as defined herein, and the grant by MSLLC to NSR and KCSR of certain rights over the entirety of the Subject Trackage; and

WHEREAS, KCSR and NSR desire to set forth the terms and conditions pursuant to which NSR will have commercial access for the movement of certain intermodal freight between Meridian, MS and KCSR's existing or future intermodal facility in the vicinity of Dallas, TX, handling Dallas Intermodal Terminal Traffic as defined herein, and to further provide the terms and conditions pursuant to which NSR may exercise an option to purchase KCSR's existing or future intermodal facility in the vicinity of Dallas, TX, with a corresponding change in NSR's commercial access to said facility.

NOW, THEREFORE, the Parties hereto, intending to be legally bound, agree as follows:

SECTION 1. DEFINITIONS

(a) Interpretation Generally.

(i) Unless otherwise defined herein, all words, terms and phrases used in this Agreement shall be construed in accordance with the generally applicable definition or meaning of such words, terms and phrases in the railroad industry.

(ii) Unless otherwise defined herein, each capitalized term in this Agreement shall have the same meaning given to said term in the Transaction Agreement.

(iii) The division of this Agreement into sections and subsections and the insertion of headings and references are for convenience of reference only, and shall not affect the construction or interpretation of this Agreement. Unless the context otherwise requires, all references to sections or subsections are to articles, sections or subsections of this Agreement.

(b) Capitalized Terms.

All capitalized terms shall have the defined meaning set forth below:

"Abandonment Notice" shall have the meaning given that term in Section 4(a).

"Agreement" shall have the meaning given that term in the introductory paragraph.

"Dallas Intermodal Terminal Traffic" means all domestic intermodal containers or trailers with an origin and destination in the United States, with a lift or drop at the Terminal, that moves over the Subject Trackage and over KCSR's tracks between Shreveport and the Terminal, and that originates or terminates at or east of Meridian, and that originates or terminates at or west of the Dallas / Ft. Worth, TX. Standard Metropolitan Statistical Area (SMSA) as published by the Office of Management and Budget (OMB).

"Fair Market Value" shall have the meaning given that term in Section 3.

"Foreign Railroad" shall mean a railroad not a Party to this Agreement.

"Indentures" shall mean, collectively, the Indenture, dated as of September 27, 2000, among KCSR, KCS, certain Subsidiaries of KCS and The Bank of New York, as trustee, governing the terms of KCS' 9½% Senior Notes due 2008 and the Indenture, dated as of June 12, 2002, among KCSR, KCS, certain Subsidiaries of KCS and U.S. Bank National Association, as trustee, governing the terms of KCS' 7½% Senior Notes due 2009, as they may be amended from time to time in a manner not prohibited by the Transaction Agreement.

"Independent Terminal Appraiser" shall have the meaning given that term in Section 4(e).

"**Joint Operating Committee**" shall have the meaning given that term in the Meridian Speedway LLC – Kansas City Southern Operating Agreement.

"JOC" shall mean the Joint Operating Committee.

"Notice" shall have the meaning given that term in Section 4(b).

"Notice Trigger Period" shall be the one (1) year period beginning on the earlier of: (i) the eighteenth (18th) anniversary of the Closing (as defined in the Transaction Agreement); and (ii) the date that KCSR gives written notice to NSR through the service of an Abandonment Notice of its intent to abandon, discontinue the use of, sell, lease or otherwise transfer control or use of the Terminal.

"Option" shall have the meaning given that term in Section 3.

"Party Terminal Appraiser" shall have the meaning given that term in Section 4(c).

"Rate Quote" shall be an offer to a potential shipper for transportation of Dallas Intermodal Terminal Traffic under certain specified terms, conditions and divisions.

"SMSA" shall mean a Standard Metropolitan Statistical Area as may be defined from time to time by the United States Office of Management and Budget.

REDACTED

"Subject Trackage" shall have the meaning set forth in the Meridian Speedway LLC – Kansas City Southern Operating Agreement

"STB" shall mean the Surface Transportation Board or successor agency.

"Terminal" shall mean the intermodal facility owned and operated by KCSR in the vicinity of Dallas, TX, now or in the future handling Dallas Intermodal Terminal Traffic, the current location of which is near Zacha Junction, including all of KCSR's right, title and interest in land, buildings and improvements (including but not limited to rail improvements) but not including any main line track or right of way adjacent to said facility.

"Terminal Appraisal Report" shall have the meaning given that term in Section 4(g).

SECTION 2. RELATIONSHIP PRIOR TO EXERCISE OF OPTION

(a) From and after the Closing (as defined in the Transaction Agreement), and thereafter for the term of this Agreement until NSR exercises the Option, KCSR and NSR shall jointly work to market the movement of Dallas Intermodal Terminal Traffic [

]

(b) Rates and rate increases for the interline movement of Dallas Intermodal Terminal Traffic shall be established jointly by KCSR and NSR on the basis of [
]. KCSR shall publish the pricing from the Terminal. NSR shall publish the pricing to the Terminal. All containers and trailers and their contents handled under this Agreement shall be subject to KCSR's intermodal rules circular while on KCSR (including any trackage rights over MSLLC), and subject to NSR's intermodal rules circular while on NSR. Any charges due from customers for ancillary or incidental services or any charges set forth in the intermodal rules circular of the railroad authorized to assess such charges shall be payable to the railroad assessing and collecting such charges, and will not be divided pursuant to this Agreement, unless, in accordance with established intermodal practice such charges (for example, fuel surcharges) are split among the carriers, in which case established intermodal practice shall govern. All costs for operations, equipment, fuel and other costs to provide the services hereunder shall be borne by the carrier incurring those costs.

(c) Nothing in this Agreement shall be construed as requiring or effecting a modification or amendment of any of the terms, conditions or customary business practices (including rates, blocking, movement of empty cars, and service), if any, that apply to the movement of intermodal containers and trailers between KCSR and NSR as of the date of this Agreement. Notwithstanding the foregoing, KCSR and NSR agree to add and/or amend train schedules as may be required to efficiently and effectively respond to the market conditions and effectuate the intent of this Agreement, as expressed in Section 2(a). Nothing herein shall be construed to impose any obligation on KCSR to add capacity to its trackage between Shreveport, LA and the Terminal in excess of that provided for in the NSR Joint Use Agreement.

(d) KCSR shall develop a Rate Quote based upon Section 2(b), and shall offer a potential movement to NSR utilizing such developed Rate Quote, for any Dallas Intermodal Terminal Traffic. KCSR shall not enter into a transportation agreement involving a Rate Quote in conjunction with a Foreign Railroad unless KCSR first offers such a potential movement to NSR and NSR declines the offer to participate in such movement. NSR shall have[ ] from the receipt of the offer to accept or decline the offer. Failure to decline the offer within the [ ] shall be deemed an acceptance. Should NSR decline the offer to participate in such movement, KCSR may then offer to enter into a transportation agreement involving a Rate Quote with a Foreign Railroad for the same traffic for movement between the same SMSAs, upon the same terms, conditions and divisions (for all parties in the route) as offered to NSR.

(e) Unless specifically agreed upon by both Parties, Dallas Intermodal Terminal Traffic will [

] Neither Party may move Dallas Intermodal Terminal Traffic by means of a haulage arrangement with any Foreign Carrier other than is set forth hereinafter as to haulage performed by KCSR for NSR following the exercise of the Option.

SECTION 3. GRANT OF OPTION

Subject to the provisions of Section 4 herein, KCSR hereby grants to NSR an option to permit it or any of its subsidiaries or affiliates to purchase, at Fair Market Value as defined below, all of KCSR's right, title and interest in the Terminal, together with all of the buildings, improvements and other fixtures located on the Terminal, but only upon the terms and conditions stated herein (the "Option"). The Option is an interest that shall run with the land and shall continue in effect without regard to the identity of the owner of the Terminal, including following any conveyance of any interest in the Terminal by KCSR or a change in control of KCSR or KCS. For purposes of this Agreement, "Fair Market Value" shall be the appraised value of the real estate on which the Terminal is located plus the net liquidation value of the components of the Terminal, determined in accordance with Section 4 herein.

SECTION 4. EXERCISE OF OPTION

(a) KCSR shall give written notice to NSR of its intent to abandon, discontinue the use of, sell, lease or otherwise transfer control or use of the Terminal ("Abandonment Notice").

(b) NSR may exercise the Option only by serving, at any time during the Notice Trigger Period, a written notice to KCSR ("Notice") declaring NSR's intent to exercise the Option. In the event that NSR elects not to exercise the Option or fails to exercise the Option during the Notice Trigger Period, then: (i) the Option shall expire and be of no further effect, and (ii) NSR shall use commercially reasonable efforts to indicate the expiration of the Option in the same manner as provided for in Section 4(l) herein.

(c) Within [ ] days of receipt of the Notice from NSR, each of KCSR and NSR shall engage a reputable, independent M.A.I. designated appraiser with at least ten (10) years of experience in valuing: (i) real property in Texas and (ii) commercial values for rail yard property ("Party Terminal Appraiser"), and notify the other Party thereof in writing of the name of the Party Terminal Appraiser chosen. KCSR and NSR shall each cooperate with each Party Terminal Appraiser and promptly provide all records and files, correspondence, properties and personnel, as well as all other information relating to the Terminal reasonably requested by each Party Terminal Appraiser in connection with its appraisal. Each Party Terminal Appraiser shall develop an appraisal report which shall set forth the basis for the respective Party Terminal Appraiser's appraisal, together with such information as is customary in the industry for such a written appraisal report including, but not limited to, the supporting working data and appraisal approach. Within sixty (60) days after their selection by KCSR and NSR, each Party Terminal Appraiser shall provide both NSR and KCSR with its written appraisal report of such Fair Market Value, which for all purposes in this Section 4 shall be based upon the asset value of the assets subject to the Option rather than the going concern value of the Terminal as part of the KCSR railroad system or any other railroad system.

(d) In the event that either NSR or KCSR fails to select a Party Terminal Appraiser, or if a Party Terminal Appraiser fails to timely provide its appraisal report with its determination of Fair Market Value to both NSR and KCSR, then the only appraisal report timely submitted by a Party Terminal Appraiser shall be final and binding on both NSR and KCSR.

(e) If the Fair Market Value of both appraisal reports are within [ ] of each other, the Option price shall be an average of Fair Market Values of both Party Terminal Appraisers. If there is more than [ ] difference in the Party Terminal Appraisers' Fair Market Values, then each Party Terminal Appraiser will submit to the other Party within fifteen (15) days of receipt of the other Party's Party Terminal Appraiser's appraisal a critique of the other Party Terminal Appraiser's appraisal. If KCSR and NSR cannot agree on the Fair Market Value of the Terminal within fifteen (15) days after the date the critiques are delivered, such Party Terminal Appraisers shall consult with each other in good faith and select a third independent M.A.I. designated appraiser (A) with at least ten (10) years of experience in valuing real property in Texas and commercial values for rail yard property, (B) who is not an affiliate, employee or agent of either party or either Party Terminal Appraiser and (C) who shall not at such time be engaged by either Party to perform any work and shall not have performed any work for either Party for at least two (2) years prior to engagement hereunder (the "Independent Terminal Appraiser").

(f) If neither appraisal report is timely delivered, or if both appraisal reports are timely delivered but the Party Terminal Appraisers do not timely select an Independent Terminal Appraiser, then both NSR and KCSR shall have the right, upon written Notice to the other Party, to cause the American Arbitration Association to appoint the Independent Terminal Appraiser.

(g) The Independent Terminal Appraiser shall, within forty-five (45) days of the selection thereof, (i) review each Party Terminal Appraiser's appraisal report, critique, statements provided by the Parties and the respective proposed Fair Market Value, and (ii) issue a report selecting one or the other proposed Fair Market Values which has been submitted to it (the "Terminal Appraisal Report") as best reflecting the Fair Market Value of the Terminal. In

the event that neither Party Terminal Appraiser's appraisal report is timely delivered, the Independent Terminal Appraiser shall deliver a Terminal Appraisal Report reflecting its determination of Fair Market Value. The determination of Fair Market Value by the Independent Terminal Appraiser set forth in the Terminal Appraisal Report shall be final and binding on NSR and KCSR.

(h) Each of NSR and KCSR agrees to execute, if requested by the Independent Terminal Appraiser, a reasonable engagement letter in customary form. Each of NSR and KCSR shall cooperate with the Independent Terminal Appraiser and promptly provide, and shall cause its respective Party Terminal Appraiser to promptly provide, access to all records and files, correspondence, properties and personnel, as well as to all other information, in each case, relating to the Terminal reasonably requested by the Independent Terminal Appraiser in connection with its appraisal.

(i) Each Party shall bear its own expenses as to its respective Party Terminal Appraiser, and the appraisal expenses associated with the Independent Terminal Appraiser shall be borne equally by the Parties.

(j) For a reasonable period of time following KCSR's receipt of the Notice, KCSR shall allow, to the extent not prohibited by applicable Law, the officers, attorneys, accountants and other duly authorized representatives of NSR reasonable access during regular business hours to any books, records, files, correspondence, audits, properties, personnel and other information of KCSR and its affiliates and subsidiaries relating to the Terminal that is reasonably requested by NSR or its representatives.

(k) Within forty-five (45) days of the final determination of the Fair Market Value, as provided above, if NSR elects to proceed with the facility purchase transaction in light of such Fair Market Value determination, NSR (or, at NSR's sole discretion, a subsidiary) shall purchase, and KCSR shall sell, the Terminal at a price consistent with the methodology set forth in this Section 4, and each shall effect, or shall cause their respective subsidiaries, as applicable, to effect, the necessary transactions pursuant to customary documentation reasonably acceptable to the Parties, the transfer by quitclaim deed of all of KCSR's right, title and interest in the Terminal to NSR (or its designated subsidiary), which shall include representations, warranties, covenants and indemnities with respect to the Terminal with terms at least as favorable to NSR (and/or its subsidiaries) as set forth in the Transaction Agreement with respect to the transfer of the Subject Trackage. If the Indentures remain in effect at the time of the purchase of the Terminal, the terms and conditions of such purchase shall comply with the requirements of the Indentures. If KCSR and NSR are unable to agree upon the agreement containing the terms and conditions of purchase of the Terminal, then both NSR and KCSR shall have the right on written notice to the other Party to cause the American Arbitration Association to select between the agreement proposed by KCSR or the agreement proposed by NSR and that selection shall be final and binding upon KCSR and NSR, except that the compensation to be paid for the Terminal shall be determined as otherwise provided for in this Section 4.

(l) NSR shall be responsible for the payment of all transfer, filing and recording taxes in connection with the purchase and sale of the Terminal pursuant to this Section 4.

(m) Nothing set forth in this Section 4 or elsewhere in this Agreement shall restrict or prohibit, nor shall the rights provided in this Section 4 be triggered by, any transfer of any portion of the Terminal by KCSR, or a change in control of KCSR or KCS, provided however, that such transfer or change of control, as the case may be, shall be subject to this Agreement.

(n) NSR may record a memorandum or short form of this Agreement in the local land records setting forth the essential terms of this Option.

(o) If NSR exercises the Option pursuant to part (i) of the definition of "Notice Trigger Period," then NSR (or, for all purposes of this Section 4(o), the designated subsidiary through which NSR purchases the Terminal), at the closing of its purchase of the Terminal, will grant KCSR an option to repurchase the Terminal on the following terms: within [ ] following the date on which NSR purchased the Terminal, if NSR wishes to sell all or any interest in the Terminal and receives a bona fide offer to purchase the Terminal, or NSR wishes to discontinue intermodal operations at the Terminal, NSR shall notify KCSR of its intent in writing, and KCSR shall have [ ] to submit a written offer to repurchase the Terminal at a price to be set pursuant to the procedures provided for in this Section 4. If KCSR submits such an offer, NSR shall reconvey the Terminal to KCSR within thirty (30) days of receipt of payment of the repurchase price. KCSR shall be responsible for the payment of all transfer, filing and recording taxes in connection with the repurchase and resale of the Terminal pursuant to this Section 4(o).

SECTION 5. POST-OPTION

(a) If NSR exercises the Option pursuant to Section 4:

(i) all NSR Dallas Intermodal Terminal Traffic shall move between Shreveport and the Terminal pursuant to [

] and duration (which shall be until terminated by mutual agreement of the Parties).

(ii) NSR agrees to provide to KCSR, for KCSR intermodal traffic, other than traffic to be interchanged at Meridian, on a nondiscriminatory basis with its own traffic and pursuant to agreements typical to the industry, all services normally provided by an intermodal rail terminal to a third party railroad, including but not limited to: inbound and outbound gate inspections, inspection of seals, removal of trailers and containers, with or without chassis, from intermodal cars, loading and securing of trailers and containers on intermodal equipment, loading and unloading of containers, chassis, and trailers from trackside to designated parking space, loading and unloading of containers to chassis to ground, ground to chassis, and

ground, inbound and outbound rail running inspections of trailers and containers under the applicable AAR rules, physical security for KCSR trailers and containers, intermodal cars and chassis to the same general level and quality as KCSR provides for its own equipment and business at the Terminal, storage for containers, trailers and chassis, onsite repair services for trailers, container, chassis, and intermodal rail cars, and reasonably suitable and sufficient office space for two KCSR employees.

(b) NSR charges for services provided to KCSR pursuant to Section 5(a)(ii) shall be [

] If NSR employs a third party independent contractor at the Terminal, KCSR charges assessed by NSR shall be [

]

SECTION 6. TERM AND TERMINATION

(a) Effective Date.

This Agreement shall become effective only if the Transaction, as defined Transaction Agreement referenced in the Recitals hereto, closes, and following the latest date of: (i) the date first written above; (ii) receipt of any required regulatory approvals or exemptions; and (iii) the expiration of any time periods required by the issuance of labor notices by KCSR and/or NSR, should such labor notices be required ("Effective Date"). The Parties shall determine the Effective Date through an exchange of written correspondence.

(b) Term.

This Agreement shall commence on the Effective Date, and shall continue until terminated by the Parties hereto.

SECTION 7. REMEDIES AND INSURANCE

(a) Breach of this Agreement.

Each Party acknowledges and agrees that the other Party would be irreparably damaged in the event any of the provisions of this Agreement were not performed by it in accordance with their specific terms or were otherwise breached. It is accordingly agreed that each Party shall be entitled to an injunction or injunctions to prevent further breaches of such provisions and to specifically enforce such provisions, in addition to other remedies available at law or in equity.

(b) Insurance.

KCSR shall ensure that the Terminal and all services provided by KCSR pursuant to this Agreement are at all times covered by insurance to the same degree and in the same manner as maintained from time to time by KCSR and its affiliates for comparable property and operations.

SECTION 8. PROVISIONS OF GENERAL APPLICATION

(a) Force Majeure.

The obligations, other than payment obligations, of the Parties to this Agreement shall be subject to force majeure (including strikes, riots, floods, accidents, Acts of God, acts of terrorism, and other causes or circumstances beyond the control of the Party invoking such force majeure as an excuse for nonperformance), but only as long as, and to the extent that, such force majeure shall reasonably prevent performance of such obligations by the affected Party. In the event that an event of force majeure impairs either Party's ability to fulfill its obligations to the other Party under this Agreement, said Party shall take all commercially reasonable measures to restore performance of its obligations in a timely manner.

(b) Successors and Assigns.

(i) This Agreement shall inure to the benefit of and be binding upon each of the Parties and their respective successors and permitted assigns.

(ii) Except as otherwise specifically provided hereinafter, neither Party may assign this Agreement, or any of its rights, interests or obligations hereunder, including by operation of law, without the prior consent in writing of the other Party, which consent may be withheld at the discretion of such other Party, provided however, consent to assignment will not be required for assignment to a majority owned subsidiary of either Party, however any subsequent transfer or assignment by such subsidiary shall require prior written consent of the other Party, not to be unreasonably withheld or delayed.

(iii) In the event of a sale of substantially all of the assets or business of KCSR, or the merger or consolidation of KCSR into or with a firm or corporation not controlled by KCS, KCSR may, without the prior consent of NSR, assign this Agreement to such firm or corporation acquiring substantially all of the assets or business of KCSR, or merging or consolidating with KCSR; provided, however, that such assignment shall not transfer or extinguish any liability or obligation under this Agreement that existed prior to such assignment.

(c) Invalid or Unenforceable Provisions.

If any provision of this Agreement or the application thereof to any Party hereto or to any circumstance shall be determined by a court of competent jurisdiction to be invalid or unenforceable to any extent or for any reason, the remainder of this Agreement or the application of the provisions thereof to such Party or circumstance, other than those determined to be invalid or unenforceable, shall not be affected thereby and shall be enforced to the fullest extent permitted by law, and the Parties shall promptly enter into such other agreement(s) as their respective legal counsel may deem appropriate in order to replace such invalid or unenforceable provisions in a manner that produces a result which is substantially equivalent to the terms of this

Agreement in all material respects, unless the provisions determined to be unenforceable or invalid substantially affect the value of this Agreement to either of the Parties and the Parties are unable to agree upon terms which would be substantially equivalent to the terms found to be invalid or unenforceable, in which event this Agreement shall terminate.

(d) Arbitration.

(i) Except as otherwise provided in this Agreement, any dispute arising between the Parties or between KCSR and NSR with respect to the alleged breach of this Agreement shall be initially referred to the JOC for informal dispute resolution. In the event the JOC is unable to resolve the dispute, KCSR or NSR shall submit the dispute to the Management Committee, provided, however, that any Member (as defined in the LLC Agreement) may refer the issue to binding arbitration by a panel of three independent arbitrators before the American Arbitration Association under the Commercial Arbitration Rules, who shall issue a written decision on the controversy. The written decision of the arbitrators, reached upon a majority vote, shall be final and conclusive upon KCSR and NSR. Each Party to the arbitration shall pay the compensation, costs, fees, and expenses of its own witnesses, experts, and counsel. The compensation, costs and expenses of the three arbitrators, if any, shall be borne equally by the Parties. The arbitrators shall not have the power to award consequential or punitive damages or to determine violations of criminal or antitrust laws. Pending the written award of the arbitrators, there shall be no interruption in the transaction of business under this Agreement, and thereupon such payment or restitution shall be made as required by the written decision of the arbitrators.

(e) Notice.

Any notice required or permitted to be given by one Party to the other Party under this Agreement shall be deemed given on the date sent by certified mail, or by such other means as the Parties may mutually agree, and shall be addressed as follows:

(i) If to KCSR:

Chief Operating Officer
The Kansas City Southern Railway Company
P.O. Box 219335
Kansas City, MO 64121-9335

with a copy to:

Senior Vice President and General Counsel
The Kansas City Southern Railway Company
P.O. Box 219335
Kansas City, MO 64121-9335

(ii) If to NSR:

Executive Vice President Operations
Norfolk Southern Corporation
Three Commercial Place
Norfolk, Virginia 23510-2191

with a copy to:

Senior Director – Joint Facilities
Norfolk Southern Corporation
1200 Peachtree Street, N.E., Box 158
Atlanta, Georgia 30309

KCSR or NSR may provide changes in the above addresses to the others by personal service or certified mail.

(f) Confidentiality.

(i) Except as provided by law or by rule, order, or regulation of any Governmental Entity or the New York Stock Exchange, or in connection with an audit by the Internal Revenue Service or other tax authority, or as may be necessary or appropriate for a Party hereto to enforce its rights under this Agreement, during the Term of this Agreement, and for a period of three (3) years after termination of this Agreement, the terms and provisions of this Agreement and all information to which access is provided or which is obtained hereunder will be kept confidential and will not be disclosed by either Party to any person other than officers, employees, independent auditors and attorneys, without the prior written approval of the other Party.

(ii) Notwithstanding the foregoing Section 8(f)(i), the Parties acknowledge and agree that in any STB proceeding, the Parties may be required to submit this Agreement into the record. The Parties will propose to request a protective order to protect the payment provisions of this Agreement. Following issuance of a protective order, a copy (with the highly confidential provisions redacted) may be entered into the public STB record and a highly confidential unredacted copy of this Agreement may be entered into the STB record subject to the provisions of the applicable protective order.

(g) Third Party Beneficiaries.

This Agreement and each and every provision hereof is for the exclusive benefit of the Parties hereto and not for the benefit of any third party.

(h) Entire Understanding.

This Agreement contains the entire understanding of the Parties hereto with respect to the subject matter hereof and supersedes any and all oral understandings between the Parties.

(i) Waiver.

No term or provision of this Agreement may be changed, waived, discharged or terminated except by an instrument in writing and signed by all Parties. No consent or waiver, expressed or implied, by a Party of any breach or default by the other Party in the performance by such other Party of its obligations hereunder shall be deemed or construed to be a consent to or waiver of any other breach or default in the performance hereunder by such other Party. Failure on the part of a Party to complain of any act or failure of the other Party or to declare the other Party in default, irrespective of how long such failure continues, shall not constitute a waiver by such first mentioned Party of its rights hereunder.

(j) Drafters.

This Agreement is the result of mutual negotiations between the Parties hereto, neither of whom shall be considered the drafter for purposes of contract construction.

(k) Choice of Law.

This Agreement shall be governed and interpreted in accordance with the laws of the State of Delaware, without regard to application of the choice of law principles thereof.

(l) Execution in Counterparts.

This Agreement may be executed in any number of counterparts, each of which shall be deemed to be an original, but all such separate counterparts shall together constitute but one and the same instrument.

REDACTED

IN WITNESS WHEREOF, the Parties hereto have caused this Agreement to be duly executed as of the date first above written.

VICKSBURG ASSIGNMENT AND ASSUMPTION AGREEMENT

This **VICKSBURG ASSIGNMENT AND ASSUMPTION AGREEMENT** (this "Agreement") is dated as of the ____ day of _____, 200__ by and among The Kansas City Southern Railway Company, a Missouri corporation ("Assignor"), and Meridian Speedway LLC, a Delaware limited liability company ("Assignee"). All capitalized terms used but not otherwise defined in this Agreement shall have the meaning ascribed to such terms in the Transaction Agreement by and among Kansas City Southern, Assignor, The Alabama Great Southern Railroad Company and Norfolk Southern Corporation, dated December 1, 2005 (the "Transaction Agreement").

RECITALS:

WHEREAS, there exists that certain Bridge Lease between Vicksburg Bridge and Terminal Company (predecessor in interest to the Warren County Bridge Commission) and The Yazoo and Mississippi Valley Railroad Company (predecessor in interest to Assignor), dated February 11, 1928, as amended from time to time (the "Vicksburg Bridge Lease"); and

WHEREAS, on the terms and subject to the conditions set forth in the Transaction Agreement, Assignor agrees to assign the Vicksburg Bridge Lease to Assignee, and Assignee desires to accept such assignment; and

WHEREAS, the Warren County Bridge Commission has consented to such assignment.

NOW, THEREFORE, for and in consideration of the premises, the mutual covenants and agreements contained herein and in the Transaction Agreement, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the parties hereto, intending to be legally bound, hereby agree as follows:

Section 1. Assignment. Assignor hereby contributes, assigns, sets over and transfers to Assignee, its successors and assigns, all of Assignor's right, title and interest, in, to and under the Vicksburg Bridge Lease.

Section 2. Assumption. Subject to the terms and conditions of the Transaction Agreement, Assignee hereby accepts the assignment of all of Assignor's right, title and interest in, to and under the Vicksburg Bridge Lease and the Assumed Liabilities related to the Vicksburg Bridge Lease and agrees to observe, pay, perform and discharge such Assumed Liabilities, in accordance with their respective terms, as and when due.

Section 3. The Transaction Agreement. This Agreement is controlled by the terms and conditions of the Transaction Agreement. Nothing herein shall be deemed to amend, modify, alter, expand or diminish the terms and conditions of the Transaction Agreement, including,

without limitation, the covenants, representations, warranties and indemnification obligations contained therein.

Section 4. Further Assurances. Assignor shall, from time to time upon the reasonable request of Assignee, execute and deliver all such further documents and instruments, and take all such further acts as shall be necessary or desirable to give full effect to the intent and meaning of this Agreement.

Section 5. Governing Law. The laws of the state of Delaware shall govern the validity of this Agreement, the construction of its terms and the interpretation of the rights and duties arising hereunder, without regard to the laws that might otherwise govern under the applicable principles of conflicts of law thereof.

Section 6. Counterparts. This Agreement may be executed in any number of counterparts, each of which shall be deemed to be an original, but all of which together shall constitute one and the same instrument.

Section 7. Successors and Assigns. This Agreement shall be binding upon and inure solely to the benefit of each party hereto and their respective successors and permitted assigns, and nothing in this Agreement, express or implied, is intended to or shall confer upon any other Person any rights, interests, benefits or remedies of any nature whatsoever under or by reason of this Agreement.

JACKSON ASSIGNMENT AND ASSUMPTION AGREEMENT

This **JACKSON ASSIGNMENT AND ASSUMPTION AGREEMENT** (this "Agreement") is dated as of the ____ day of _____, 200__ by and among The Kansas City Southern Railway Company, a Missouri corporation ("Assignor"), and Meridian Speedway LLC, a Delaware limited liability company ("Assignee"). All capitalized terms used but not otherwise defined in this Agreement shall have the meaning ascribed to such terms in the Transaction Agreement by and among Kansas City Southern, Assignor, The Alabama Great Southern Railroad Company and Norfolk Southern Corporation, dated December 1, 2005 (the "Transaction Agreement").

RECITALS:

WHEREAS, there exists that certain MSR Jackson Trackage Rights agreement between Illinois Central Gulf Railroad Company and MidSouth Rail Corporation (predecessor in interest to Assignor), dated March 26, 1986, as amended from time to time (the "MSR Jackson Trackage Rights"); and

WHEREAS, on the terms and subject to the conditions set forth in the Transaction Agreement, Assignor agreed to assign the MSR Jackson Trackage Rights to Assignee, and Assignee desires to accept such assignment; and

WHEREAS, Canadian National has consented to such assignment.

NOW, THEREFORE, for and in consideration of the premises, the mutual covenants and agreements contained herein and in the Transaction Agreement, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the parties hereto, intending to be legally bound, hereby agree as follows:

Section 1. Assignment. Assignor hereby contributes, assigns, sets over and transfers to Assignee, its successors and assigns, all of Assignor's right, title and interest, in, to and under the MSR Jackson Trackage Rights.

Section 2. Assumption. Subject to the terms and conditions of the Transaction Agreement, Assignee hereby accepts the assignment of all of Assignor's right, title and interest in, to and under the MSR Jackson Trackage Rights and the Assumed Liabilities related to the MSR Jackson Trackage Rights and agrees to observe, pay, perform and discharge such Assumed Liabilities, in accordance with their respective terms, as and when due.

Section 3. The Transaction Agreement. Nothing herein shall be deemed to amend, modify, alter, expand or diminish the terms and conditions of the Transaction Agreement,

including, without limitation, the covenants, representations, warranties and indemnification obligations contained therein.

Section 4. Further Assurances. Assignor shall, from time to time upon the reasonable request of Assignee, execute and deliver all such further documents and instruments, and take all such further acts as shall be necessary or desirable to give full effect to the intent and meaning of this Agreement.

Section 5. Governing Law. The laws of the state of Delaware shall govern the validity of this Agreement, the construction of its terms and the interpretation of the rights and duties arising hereunder, without regard to the laws that might otherwise govern under the applicable principles of conflicts of law thereof.

Section 6. Counterparts. This Agreement may be executed in any number of counterparts, each of which shall be deemed to be an original, but all of which together shall constitute one and the same instrument.

Section 7. Successors and Assigns. This Agreement shall be binding upon and inure solely to the benefit of each party hereto and their respective successors and permitted assigns, and nothing in this Agreement, express or implied, is intended to or shall confer upon any other Person any rights, interests, benefits or remedies of any nature whatsoever under or by reason of this Agreement.

JACKSON HAULAGE AGREEMENT

THIS JACKSON HAULAGE AGREEMENT (this "Agreement") is entered into as of this ____ day of _____, 200__, by and between NORFOLK SOUTHERN RAILWAY COMPANY, a Virginia corporation ("NSR") and THE KANSAS CITY SOUTHERN RAILWAY COMPANY, a Missouri corporation ("KCSR"). NSR and KCSR are referred to individually herein as a "Party" and collectively as the "Parties".

RECITALS:

WHEREAS, on December 1, 2005, Kansas City Southern ("KCS"), KCSR, Norfolk Southern Corporation, and The Alabama Great Southern Railroad Company entered into a transaction agreement (the "Transaction Agreement") that, among other things, provided for the creation of Meridian Speedway, LLC ("MSLLC"), the transfer from KCSR, a wholly-owned subsidiary of KCS, to MSLLC of the rail line generally between Meridian, Mississippi and Shreveport, Louisiana (the "Subject Trackage"), and the grant by MSLLC to NSR of certain rights over the entirety of the Subject Trackage pursuant to the NSR Joint Use Agreement; and

WHEREAS, pursuant to an agreement of even date herewith between KCSR and MSLLC (the "Master KCSR-MSLLC Interchange Agreement"), MSLLC and KCSR have documented, among other things, the method for the physical interchange of traffic between KCSR and MSLLC at points on the Subject Trackage; and

WHEREAS, the route traversed by traffic moving pursuant to the NSR Joint Use Agreement over the Subject Trackage includes approximately four-tenths of a mile section of track in Jackson, Mississippi that is controlled by Canadian National (as successor to Illinois Central Gulf Railroad Company) (the "Jackson Trackage Rights Segment") pursuant to that certain trackage rights agreement (the "MSR Trackage Rights Agreement"), as supplemented and amended from time to time, dated March 26, 1986, between Midsouth Rail Corporation and Illinois Central Gulf Railroad Company; and

WHEREAS, pursuant to the Transaction Agreement, KCSR shall provide haulage for NSR over the Jackson Trackage Right Segment until either the MSR Trackage Rights Agreement is assigned to MSLLC or MSLLC constructs a "flyover" bridge to carry MSLLC's tracks over the tracks and real property of Canadian National Railway Company ("Canadian National") at Jackson, MS which establishes a continuous line of rail between Shreveport and Meridian (the "Jackson Flyover"); and

WHEREAS, the Parties desire to set forth the terms and conditions upon which KCSR shall provide haulage services to NSR over the Jackson Trackage Rights Section until either the MSR Trackage Rights Agreement is assigned to MSLLC or MSLLC constructs the Jackson Flyover.

NOW, THEREFORE, the Parties hereto, intending to be legally bound, agree as follows:

SECTION 1. DEFINITIONS AND INTERPRETATION

(a) Interpretation Generally.

(i) Unless otherwise defined herein, all words, terms and phrases used in this Agreement shall be construed in accordance with the generally applicable definition or meaning of such words, terms and phrases in the railroad industry.

(ii) Unless otherwise defined herein, each capitalized term in this Agreement shall have the same meaning given to said term in the Transaction Agreement.

(iii) Each definition in this Agreement includes the singular and the plural, and references in this Agreement to the neuter gender include the masculine and feminine where appropriate. References herein to any agreement or contract mean such agreement or contract as amended. As used in this Agreement, the word "including" means "without limitation", and the words "herein", "hereof" and "hereunder" refer to this Agreement as a whole. All dollar amounts stated herein are in United States currency.

(b) Capitalized Terms.

All capitalized terms shall have the meaning set forth as follows:

"Agreement" shall have the meaning given that term in the introductory paragraph.

"AAR" shall have the meaning given to that term in Section 2(b)(vii).

"Canadian National" shall have the meaning given that term in the Recitals.

"Cars" means each loaded or empty railroad freight car (including platform and well rail cars) or similar equipment.

"Clearance File" shall have the meaning given that term in Section 2(b)(viii).

"Discontinuance Notice Period" shall have the meaning given that term in Section 6(m)(i).

"Discontinuance Segment" shall have the meaning given that term in Section 6(m)(i).

"Effective Date" shall have the meaning given to that term in Section 76(fe)(i).

"End Points" shall mean the end points of the MSR Trackage Rights Agreement.

"EOTs" shall have the meaning given to that term in Section 2(b)(ii).

"Equipment" shall mean and be confined to hi-rail vehicles, track inspection equipment and other non-revenue vehicles and machinery (other than locomotives) capable of being operated on railroad tracks that, at the time of an occurrence, are (i) being operated on the trackage upon which such occurrence takes place, or (ii) are on the trackage upon which such occurrence takes place, or on the adjoining right-of-way, for the purpose of maintenance or repair thereof or the clearing of wrecks thereon.

REDACTED

"Exercise Notice" shall have the meaning given that term in Section 6(l)(iii).

"Governmental Entity" shall mean any federal, state, local or foreign court, administrative agency or commission or other governmental or regulatory authority or commission or any arbitration tribunal.

"Haulage Services" shall have the meaning given that term in Section 2(a)(i).

"Jackson Flyover" shall have the meaning given to that term in the Recitals.

"Jackson Trackage Rights Segment" shall have the meaning given the term in the Recitals.

"JOC" shall have the meaning given to that term in Section 6(i).

"KCS" shall have the meaning given that term in the Recitals.

"KCSR" shall have the meaning given that term in the introductory paragraph.

"Master KCSR-MSLLC Interchange Agreement" shall have the meaning given that term in the Recitals.

"MSLLC" shall have the meaning given that term in the Recitals.

"MSR Trackage Rights Agreement" shall have the meaning given that term in the Recitals.

"NSR" shall have the meaning given to that term in the introductory paragraph.

"NSR Cars" shall mean Cars and Equipment in the revenue and/or car hire account of NSR.

"NSR Haulage Cars" shall mean NSR Cars being transported pursuant to NSR Haulage Rights.

"Parties" shall have the meaning given that term in the introductory paragraph.

"Party" shall have the meaning given that term in the introductory paragraph.

"STB" shall mean the Surface Transportation Board or successor agency.

"Subject Trackage" shall have the meaning given that term in the Recitals.

"Term" shall have the meaning given that term in Section 6(f)(ii).

"Transaction Agreement" shall have the meaning given to that term in the Recitals.

"Unified Liability Agreement" shall mean that contract of even date herewith entered into among NSR, KCSR and MSLLC governing the apportionment of liability and other matters.

"Waiver Notice" shall have the meaning given that term in Section 6(m)(v).

(c) Successor Laws.

A reference to any particular statute or regulation shall include a reference to any successor statute or regulation.

SECTION 2. GRANT OF HAULAGE SERVICES

(a) Haulage Services Generally.

(i) The haulage services to be provided by KCSR to NSR shall consist of, as applicable, the following (collectively, the rights granted herein are the "Haulage Services"):

(A) the transportation by KCSR of NSR Haulage Cars over the Jackson Trackage Rights Segment;

(B) the movement of bad order NSR Haulage Cars and NSR locomotives to or from repair tracks, provided, that NSR will be billed separately for repairs to such equipment performed by KCSR pursuant to Section 2(b)(v) of this Agreement;

(C) such mechanical or other inspection of NSR Haulage Cars and Locomotives as may be prescribed by regulation or KCSR's operating practices; and

(D) provision of supervision as required.

(ii) Nothing in this Section 2(a) shall be interpreted as requiring NSR to pay for any service not used.

(iii) NSR Haulage Cars shall at all times remain in the revenue waybill and car hire accounts of NSR while moving in Haulage Service on the Jackson Trackage Rights Segment. KCSR shall not be entitled to any line haul revenue for the handling of NSR Haulage Cars, nor shall KCSR participate in the routing of, nor appear in tariffs, waybills or other shipping documents as a participating carrier in connection with, the movement of NSR Haulage Cars. As between NSR and KCSR, NSR shall be responsible for all mileage and car hire charges accruing on NSR Haulage Cars, and NSR shall report and pay, or arrange to have reported and paid, all appropriate allowances and charges directly to the owner(s) of such cars.

(b) Conduct Of Operations.

(i) NSR shall deliver and receive, or shall cause MSLLC to deliver and receive, NSR Haulage Cars to and from KCSR at the endpoints of the Jackson Trackage Rights Segment pursuant to applicable interchange terms and conditions as may from

time to time govern, in the case of delivery by NSR, or pursuant to the Master KCSR-MSLLC Interchange Agreement, in the case of delivery by MSLLC.

(ii) NSR shall make available, or shall cause MSLLC to make available, via EDI transmission (or by such other means as may be mutually agreed by said parties), information necessary for the further handling and movement of NSR Haulage Cars. Such information shall include, for each car:

(A) Car initial and number.

(B) Loaded or empty.

(C) All required hazardous materials information.

(D) Such other information as the parties may agree to be necessary or convenient for the safe and efficient exchange and further movement of such Cars.

(iii) The Parties continue to be bound by the Supplemental Agreement dated May 11, 2000, to the Master Locomotive Run Through Agreement of November 29, 1994, attached hereto as Appendix B and the Amendment No. 1 to the Haulage Agreement dated February 1, 2002. KCSR shall not be responsible for providing any equipment (locomotives, cars, end of train units ("EOTs"), etc.), or fuel for the trains providing the Haulage Services.

(iv) Subject to Canadian National's management of the Jackson Trackage Rights Segment, as between NSR and KCSR, KCSR shall have exclusive management and control over the movement of trains containing NSR Haulage Cars while on the Jackson Trackage Rights Segment.

(v) NSR may operate trains pursuant to Section 2(a) or Section 2(b) in either direction over the Subject Trackage.

(vi) KCSR shall have no right to fill out any trains carrying NSR Haulage Cars with any Cars or Equipment while on the Jackson Trackage Rights Segment.

(vii) KCSR may arrange for such repairs to NSR Haulage Cars, and adjustments to or transfers of lading from bad ordered, defective or overloaded NSR Haulage Cars, as in KCSR's judgment may be necessary to move such NSR Haulage Cars safely. NSR shall reimburse KCSR for the cost of such work at rates prescribed in, and submitted pursuant to, the Field and Office Manuals of the Interchange Rules of the Association of American Railroads ("AAR").

(viii) NSR shall have the right to tender all dimensional loads and excess clearance Cars for handling by KCSR over the Jackson Trackage Rights Segment, subject to a clearance file (the "Clearance File") applicable to traffic of all Parties maintained by KCSR. KCSR shall promptly inform NSR of any changes made to the Clearance File.

(ix) NSR may use the haulage rights granted hereunder solely for the purpose of bridging traffic between the End Points of the Jackson Trackage Rights Segment, and such rights do not include the right of ingress and egress to any tracks, switches, turnouts, or other track classifications that connect to any point along the Subject Trackage except the End Points.

(x) NSR may not, pursuant to this Agreement, grant haulage rights, trackage rights, or other operating rights of any nature on or over the Jackson Trackage Rights Segment.

(c) Service Standards.

(i) It is the intent of the Parties that KCSR shall generally accord NSR Haulage Cars the same level of service as KCSR provides to all other traffic of the same type moving over the Jackson Trackage Rights Segment.

(ii) NSR shall provide KCSR with reasonable notice of the schedules for regularly scheduled haulage trains operating over the Jackson Trackage Rights Segment and KCSR shall attempt to accommodate such schedules but does not guarantees that it will do so.

(iii) Nothing herein shall be interpreted as prohibiting KCSR from transporting NSR Haulage Cars in a continuous movement operating over both the haulage routes covered by: (i) this Agreement and, as Designated Operator for MSLLC under the Operating Agreement, (ii) the NSR Joint Use Agreement.

SECTION 3. INFRASTRUCTURE MAINTENANCE

(a) KCSR does not guarantee the condition of the Jackson Trackage Rights Segment or that operations thereover will not be interrupted. KCSR shall take reasonable steps to ensure that any interruptions will be kept to a minimum and shall use commercially reasonable efforts to avoid such interruptions.

(b) Existing connections or facilities, which are jointly used by the Parties hereto under existing agreements, shall continue to be maintained, repaired, and renewed by and at the expense of the Party or Parties responsible for such maintenance, repair, and renewal under such agreements.

SECTION 4. MANAGEMENT OF THE JACKSON TRACKAGE RIGHTS SEGMENT

(a) Control And Dispatching

(i) Subject to Canadian National's management of the Jackson Trackage Rights Segment, as between KCSR and NSR, KCSR shall have exclusive control of the management and operation (excluding dispatching) of the Jackson Trackage Rights Segment. Operation and control of the Jackson Trackage Rights Segment shall be conducted in a manner as to afford each of the Parties, and any other present or future

user of the Jackson Trackage Rights Segment (or any portion thereof) the most economical and efficient movement of its traffic.

(ii) The maximum length of NSR Trains (including locomotives and other motive power units) operating pursuant to this Agreement shall be the greater of: (a) 7,500 feet or (b) the maximum train length as may be permitted from time to time for any other train regularly operated over the Jackson Trackage Rights Segment.

(b) Capacity

Notwithstanding any other provisions of this Agreement, the Parties acknowledge that there may be capacity constraints from time to time for traffic covered under this Agreement. Further, the Parties acknowledge that NSR is allocated certain overhead train starts pursuant to the NSR Joint Use Agreement. Whenever capacity of the Jackson Trackage Rights Segment is insufficient to handle the total traffic demands of users of the same, the capacity allocation rules in the NSR Joint Use Agreement will apply with equal force over the Jackson Trackage Rights Segment, subject to Canadian National's management of the Jackson Trackage Rights Segment. Nothing in this Section 4(b) shall be interpreted as requiring NSR to pay for any service not used.

(c) Loss of Use of the Jackson Trackage Rights Segment.

(i) Other than as specifically set forth in this Agreement, NSR shall not have, pursuant to this Agreement, any claim against KCSR for liability on account of loss or damage of any kind in the event the use of the Jackson Trackage Rights Segment by NSR Haulage Cars is interrupted or delayed at any time from any cause.

(ii) If the Jackson Trackage Rights Segment is unavailable for service due to a derailment, line outage or other interruption of service, then KCSR shall cooperate and consult with NSR in order to address any resulting backlog of trains over a period of time following the resolution of such derailment or other interruption as may be required to reduce such backlog of NSR Traffic or NSR Trains.

SECTION 5. ASSIGNMENT

The terms and provisions of this Agreement contemplate that the MSR Trackage Rights Agreement have not been assigned by KCSR to MSLLC. If the MSR Trackage Rights Agreement is lawfully assigned from KCSR to MSLLC as contemplated by the Transaction Agreement, or should the Jackson Flyover be constructed and become operational, then this Agreement shall terminate, except that any liability accruing while this Agreement is in effect shall not be extinguished or diminished by such termination.

SECTION 6. GENERALLY APPLICABLE PROVISIONS

(a) Compliance with Applicable Law and Rules.

(i) Each Party hereto shall comply with all applicable and lawful federal, state and local laws, rules, regulations and orders promulgated by any government or

governmental agency that relate to the operations contemplated hereunder. If any fine, penalty, cost, or charge is imposed or assessed on or against either Party hereto by reason of the other Party's non-compliance with any such laws, rules, regulations or orders, liability will be allocated in accordance with the Unified Liability Agreement.

(ii) Without affecting the generality of the foregoing Section 6(a)(i), the Parties shall comply with the provisions of the Federal Locomotive Inspection Act and the Federal Safety Appliance Act, as amended, and any other lawful federal and state and local laws, regulations and rules respecting the operation, condition, inspection and safety of its trains, locomotives, cars and Equipment while such trains, locomotives, cars, and Equipment are being operated over the Subject Trackage. Liability for a violation of this section shall be determined in accordance with Unified Liability Agreement.

(b) Compensation.

The compensation payable by NSR to KCSR for the services provided hereunder shall be [ ].

(c) Liability.

As between the Parties hereto, responsibility for any loss or destruction of, or damage to, any property whatsoever, and any injury to or death of any person or persons whomever (including employees of NSR or KCSR), resulting from, arising out of, incidental to or occurring in connection with this Agreement shall be allocated as is set forth in the Unified Liability Agreement.

(d) Rerailing, Wrecking, Bad Orders and Repairs.

(i) Whenever NSR Haulage Cars require rerailing, wrecking service or wrecking train service, KCSR shall arrange for the provision of such service, including the repair and restoration of roadbed, the Jackson Trackage Rights Segment and structures. KCSR shall promptly inform NSR of its intent to proceed with wrecking service or wrecking train service, and shall permit a NSR representative to be present on the scene, to work in concert with KCSR's employees to manage such wrecking service or wrecking train service. The cost, liability and expense of the foregoing, including without limitation loss of, damage to, or destruction of any property whatsoever and injury to and death of any person or persons whomsoever or any damage to or destruction of the environment whatsoever, including without limitation land, air, water, wildlife, and vegetation, resulting therefrom shall be apportioned in accordance with the provisions of Section 6(c) hereof. All Locomotives, Cars, Equipment and salvage from the same so picked up and removed which is owned by or under the management and control of or used by NSR at the time of such wreck, shall be promptly delivered to it.

(ii) If any NSR Haulage Cars or NSR locomotives are bad ordered en route on the Jackson Trackage Rights Segment and it is necessary that they be set out, those Cars or locomotives shall, after being repaired, be transported by KCSR to be picked up by NSR. KCSR may, upon request of NSR and at the expense of NSR, unless otherwise

provided for in the Field and Office Manuals of the Interchange Rules of the AAR, furnish required labor and material to perform light repairs required to make such bad ordered cars or locomotives safe and lawful for movement, and billing for this work shall be at rates prescribed in, and submitted pursuant to, the Field and Office Manuals of the Interchange Rules of the AAR.

(e) Force Majeure.

The obligations, other than payment obligations, of the Parties to this Agreement shall be subject to force majeure (including flood, earthquake, hurricane, tornado, or other such severe weather or climatic condition, riot, accident, wreck, derailment, washout, explosion, Acts of God, act of terrorism and public enemy, war, blockage, insurrection, vandalism or sabotage, fire, strike, lockout or labor dispute, embargoes or AAR service orders, or governmental laws, orders or regulations, and other causes or circumstances beyond the control of the Party invoking such force majeure as an excuse for nonperformance), but only as long as, and to the extent that, such force majeure shall reasonably prevent performance of such obligations by the affected Party. In the event that an event of force majeure impairs either Party's ability to fulfill its obligations to the other Party under this Agreement, said Party shall take all commercially reasonable measures to restore performance of its obligations in a timely manner.

(f) Term and Termination.

(i) This Agreement shall become effective following the latest date of: (a) the date first written above; (b) receipt of any required regulatory approvals or exemptions; and (c) the expiration of any time periods required by the issuance of labor notices by NSR and/or KCSR, should such labor notices be required ("Effective Date"). The Parties shall determine the Effective Date through an exchange of written correspondence.

(ii) This Agreement shall commence on the Effective Date, and, except as provided in Section 5, shall continue until terminated in writing jointly by the Parties (the "Term").

(iii) Termination of this Agreement shall not relieve or release any Party hereto from any obligations assumed or from any liability which may have arisen or been incurred by such Party under the terms of this Agreement prior to termination.

(g) Successors and Assigns.

(i) This Agreement shall inure to the benefit of and be binding upon each of the Parties and their respective successors and permitted assigns.

(ii) Except as otherwise specifically provided hereinafter, neither Party may assign this Agreement, or any of its rights, interests or obligations hereunder, including by operation of law, without the prior consent in writing of the other Party, which consent may be withheld at the discretion of such other Party.

(iii) In the event of a sale of substantially all of the assets or business of NSR, or the merger or consolidation of NSR into or with a firm or corporation not controlled by NSC, NSR may, without the prior consent of KCSR, assign this Agreement to such firm or corporation acquiring substantially all of the assets or business of NSR, or merging or consolidating with NSR; provided, however, that such assignment shall not transfer or extinguish any liability or obligation of NSR under this Agreement that existed prior to such assignment.

(iv) In the event of any of the following, KCSR shall, without the prior consent of NSR, assign this Agreement to such firm or corporation acquiring substantially all of the assets or business of KCSR, or merging or consolidating with KCSR: (A) a sale of substantially all of the assets or business of KCSR; or (B) the merger or consolidation of KCSR; provided, however, that such assignment shall not transfer or extinguish any liability or obligation of KCSR under this Agreement that existed prior to such assignment.

(h) Notice.

Any notice required or permitted to be given by one Party to the other Party under this Agreement shall be deemed given on the date sent by certified mail, or by such other means as the Parties may mutually agree, and shall be addressed as follows:

(i) If to KCSR:

Chief Operating Officer
The Kansas City Southern Railway Company
P.O. Box 219335
Kansas City, MO 64121-9335

with a copy to:

Senior Vice President and General Counsel
The Kansas City Southern Railway Company
P.O. Box 219335
Kansas City, MO 64121-9335

(ii) If to NSR:

Executive Vice President Operations
Norfolk Southern Corporation
Three Commercial Place
Norfolk, Virginia 23510-2191

with a copy to:

Senior Director – Joint Facilities
Norfolk Southern Corporation

1200 Peachtree Street, N.E., Box 158
Atlanta, Georgia 30309

Either Party may provide notice of changes in the above addressees to the other Party by personal service or certified mail.

(i) Arbitration.

Any dispute arising between the Parties with respect to an alleged breach of this Agreement shall be referred to the Joint Operating Committee ("JOC"), as defined in the NSR Joint Use Agreement, for resolution, and if the JOC is unable to resolve the dispute, it shall be referred to the Management Committee, provided however, that any Member (as defined in the LLC Agreement) may submit the dispute for binding arbitration by a panel of three independent arbitrators before the American Arbitration Association under the Commercial Arbitration Rules, who shall render a written decision on the controversy. The written decision of the arbitrators, acting by reached upon majority vote, shall be final and conclusive upon the Parties. Each Party to the arbitration shall pay the compensation, costs, fees, and expenses of its own witnesses, experts, and counsel. The compensation, costs, and expenses of the three arbitrators, if any, shall be borne by NSR and KCSR, with each paying 50 percent of such compensation, costs, and expenses. The arbitrators shall not have the power to award consequential or punitive damages or to determine violations of criminal or antitrust laws. Pending the written decision of the arbitrators, there shall be no interruption in the transaction of business under this Agreement, and all payments in respect thereto shall be made in the same manner as prior to the arising of the dispute until the matter in dispute shall have been fully determined by arbitration, and thereupon such payment or restitution shall be made as required by the written decision of the arbitrators.

(j) Confidentiality.

(i) Except as provided by law or by rule, order, or regulation of any Governmental Entity or the New York Stock Exchange, or in connection with an audit by the Internal Revenue Service or other taxing authority, or as may be necessary or appropriate for a Party hereto to enforce its rights under this Agreement, during the Term, and for a period of three (3) years after termination of this Agreement, the terms and provisions of this Agreement and all information to which access is provided or which is obtained hereunder will be kept confidential and will not be disclosed by either Party to any person other than members, officers, employees, independent auditors, and attorneys, without the prior written approval of the other Party.

(ii) Notwithstanding the foregoing Section 6(j)(i), the Parties acknowledge and agree that in any STB proceeding, the Parties may be required to submit this Agreement into the record. The Parties will seek a protective order to protect the payment provisions of this Agreement. Following issuance of a protective order, a copy (with certain confidential provisions redacted) may be entered into the public STB record and a highly confidential unredacted copy of this Agreement may be entered into the STB record subject to the provisions of the applicable protective order.

(k) Breach of this Agreement.

(i) Each Party acknowledges and agrees that the other Party would be irreparably damaged in the event any of the provisions of this Agreement were not performed by it in accordance with their specific terms or were otherwise breached. It is accordingly agreed that each Party shall be entitled to an injunction or injunctions to prevent further breaches of such provisions and to specifically enforce such provisions, in addition to any other remedy to which such entity may be entitled, at law or in equity.

(ii) In no event shall either or KCSR or NSR (including, in each case, their affiliates) be liable to the other for any consequential, indirect, incidental, punitive or other similar damages including, but not limited to, lost profits for any breaches or defaults, or any act or omission arising out of or in any way relating to this Agreement, under any form or theory of action whatsoever, whether in contract, tort or otherwise.

(l) Claims.

The Parties shall agree between themselves on the most fair, practical, and efficient arrangements for handling and administering freight loss and damage claims. Such arrangements, and the allocation of responsibility for such claims, shall be subject to the provisions of the Unified Liability Agreement.

(m) Discontinuance of Operations.

(i) KCSR shall have the right, subject to securing any necessary regulatory approval or exemption, to discontinue operations over the Jackson Trackage Rights Segment or any portion thereof during the term of this Agreement. For any portion of the Jackson Trackage Rights Segment that requires regulatory authority for the discontinuance of operations ("Discontinuance Segment"), KCSR shall provide NSR no less than ninety (90) days prior notice ("Discontinuance Notice Period") of its intention to seek regulatory authority to discontinue operations over any Discontinuance Segment.

(ii) If KCSR elects to discontinue operations over the Jackson Trackage Rights Segment (or any portion thereof) pursuant to this Agreement, the provisions of this Agreement shall continue to apply in all respects to any remaining portion of the Jackson Trackage Rights Segment not discontinued by KCSR.

(iii) KCSR shall, not less than 90 days prior to any submission to the Surface Transportation Board (or successor agency having jurisdiction over said discontinuance) of an application or exemption for authority to discontinue operations over any Discontinuance Segment(s), offer to assign this Agreement to NSR without charge, and KCSR shall use all commercially reasonable efforts to effect an assignment of the MSR Trackage Rights Agreement to NSR if NSR shall so elect. NSR shall give KCSR written notice ("Exercise Notice") of its decision to accept the assignment of this Agreement and the MSR Trackage Rights Agreement within the Discontinuance Notice Period.

(iv) The Parties shall consummate the assignment contemplated by this Section 6(m) within forty-five (45) days of the latest of: (a) the delivery of the Exercise

Notice; and (b) the grant of authority, or exemption from the need to obtain a grant of authority, from any regulatory body having jurisdiction over the same.

(v) If NSR elects not to take an assignment of this Agreement, it shall so advise KCSR within the Discontinuance Notice Period by delivering to KCSR a notice of waiver of right to take the assignment ("Waiver Notice"). Failure of NSR to provide KCSR with either an Exercise Notice or a Waiver Notice within the Discontinuance Notice Period shall constitute a Waiver Notice.

(vi) In the event of a Waiver Notice, KCSR shall promptly file such application, petition or exemption notice as may then be required to obtain regulatory authority or exemption for the discontinuance of its operations over the Jackson Trackage Rights Segment.

(n) Miscellaneous Provisions.

(i) This Agreement and each and every provision hereof is for the exclusive benefit of the Parties hereto and not for the benefit of any third party. Nothing herein contained shall be taken as creating or increasing any right of any third party to recover by way of damages or otherwise against any of the Parties hereto.

(ii) This Agreement contains the entire understanding of the Parties hereto with respect to the subject matter hereof and supersedes any and all oral understandings between the Parties.

(iii) No term or provision of this Agreement may be changed, waived, discharged or terminated except by an instrument in writing and signed by all Parties.

(iv) The division of this Agreement into articles, sections and subsections and the insertion of headings and references are for convenience of reference only, and shall not affect the construction or interpretation of this Agreement. Unless the context otherwise requires, all references to articles, sections or subsections are to articles, sections or subsections of this Agreement.

(v) This Agreement is the result of mutual negotiations between the Parties hereto, neither of whom shall be considered the drafter for purposes of contract construction.

(vi) No consent or waiver, expressed or implied, by a Party of any breach or default by the other Party in the performance by such other Party of its obligations hereunder shall be deemed or construed to be a consent to or waiver of any other breach or default in the performance hereunder by such other Party. Failure on the part of a Party to complain of any act or failure of the other Party or to declare the other Party in default, irrespective of how long such failure continues, shall not constitute a waiver by such first mentioned Party of its rights hereunder.

(vii) If any provision of this Agreement or the application thereof to any Party hereto or to any circumstance shall be determined by a court of competent jurisdiction to

be invalid or unenforceable to any extent or for any reason, the remainder of this Agreement or the application of the provisions thereof to such Party or circumstance, other than those determined to be invalid or unenforceable, shall not be affected thereby and shall be enforced to the fullest extent permitted by law, and the Parties shall promptly enter into such other agreement(s) as their respective legal counsel may deem appropriate in order to replace such invalid or unenforceable provisions in a manner that produces a result which is substantially equivalent to the terms of this Agreement in all material respects.

(viii) Nothing herein shall be interpreted as creating an association, partnership, joint venture or other joint undertaking between KCSR and NSR.

(ix) This Agreement shall be governed and interpreted in accordance with the laws of the State of Delaware, without regard to application of the choice of law principles thereof.

(x) This Agreement may be executed in any number of counterparts, each of which shall be deemed to be an original, but all such separate counterparts shall together constitute but one and the same instrument.

REDACTED

IN WITNESS WHEREOF, the Parties hereto have caused this Agreement to be duly executed as of the date first above written.

CREATE Overview

The CREATE Program is a public-private partnership that has worked since 2003 to improve the way passengers and goods move over rail. We are making Chicago's railroad network safer, more efficient and better able to accommodate growth in freight and passenger traffic.

One of every four U.S. freight trains passes through Chicago. That's about 500 freight trains and 800 passenger and commuter trains every day. The U.S. rail network depends on our region, and growth is on the horizon. The CREATE Program is stepping up to modernize our rail network to better handle our region's freight and passenger needs, both today and in the future.

We are focusing on efficiency, safety and communities while untangling North America's busiest rail hub, making the CREATE Program a project of both national and regional significance.

Along four rail corridors throughout our region, we are investing $4.6 billion in 70 projects to:

- Increase capacity and efficiency and reduce travel times for freight and passenger trains
- Eliminate or reduce railroad crossing delays for motorists and emergency vehicles
- Benefit the local communities in which CREATE projects are located
- Reduce train idling, emissions and horn noise

Arielle Giordano
Canadian Pacific Railway
1341 G St NW, Suite 100
Washington, DC 20005

May 24, 2022

Dear Ms. Giordano:

By your letter dated April 1, 2022, Canadian Pacific Railway, on behalf of itself and its affiliates (CP), submitted a written version of the oral settlement offer CP made to the communities making up the Coalition to Stop CPKC during our meeting on March 28, 2022. Pursuant to the offer, as set forth in your letter, CP would make a "voluntary community investment" of a total of $10 million to the eight Coalition member community members, in exchange for the Coalition's agreement to not seek any mitigation conditions before the STB in Docket No. FD 36500, and to not otherwise oppose the proposed merger of CP and Kansas City Southern Railway.

Considering that the estimated total cost of the mitigation conditions the Coalition believes will be required to attempt to protect their communities from the harm CPKC will inflict on them post-merger is over $9 billion, CP's offer to pay the coalition members a lump sum of merely $10 million is clearly not a serious attempt to reach a mutually acceptable settlement. This letter therefore officially rejects CP's offer.

The health, safety and wellbeing of our residents, businesses, and property owners is our number one priority. Our Metra stations connect our commuters to the City of Chicago and bring them home to the quality of life they enjoy. The CPKC merger as proposed would destroy that quality of life and drastically make our citizens less safe.

Despite this very discouraging start, we are receptive to serious negotiations aimed at adequately addressing the significant adverse impacts your proposed merger would cause. In the meantime, the Coalition will continue to oppose the merger as proposed and we are gaining support daily from community organizations and concerned citizens.

Sincerely,

Carie Anne Ergo
Chairperson, Coalition to Stop CPKC
Village Administrator, Itasca, IL

HYNES V.S. EXHIBIT 87

CANADIAN PACIFIC, CP'S COMMITMENT TO FIGHT CLIMATE CHANGE, CP SUSTAINABLY DRIVEN (2020)

REDACTED PUBLIC RECORD VERSION

CP's Commitment to Fight Climate Change

A changing climate is the challenge of our generation and, if left unabated, will increasingly disrupt the environment and our society. Canadian Pacific (CP) is already confronting this challenge as we experience more frequent disruptions across our network and CP is committed to further rise to this challenge by adapting our business and operations going forward. Since industrialization, our planet has seen a dramatic rise in greenhouse gas (GHG) emissions, which over the next 30 years may significantly increase global temperatures to unsustainable levels. Over the next decade, we believe climate change represents a fundamental threat to the planet and provides potential opportunities for our business. For nearly 140 years, CP has embodied strategic, long-term thinking and, as we look ahead to turning 150 in 2031, we remain committed to planning for the long term and confronting the challenges created by climate change. We are committed to serving North America and the world through efficient and sustainable rail transportation for the next 150 years, and beyond.

Our Stance

The transportation sector is a major source of GHG emissions in North America, accounting for 28 percent of Canadian and U.S. emissions in 2018[1,2]. While transport by rail represents only 2.2 percent of GHG emissions from the transportation sector, the rail industry plays a major role in helping reduce overall transportation-related GHG emissions. Railways represent the most energy-efficient method of moving freight over land. A single-unit train keeps more than 300 trucks off of public roads and is four times more fuel efficient than highway transport, helping our customers further reduce greenhouse gas emissions. At CP, we have improved our fuel efficiency by more than 40 percent since 1990 (currently 13.8 percent better than the North American Class 1 freight railway average). As CP continues to strategically grow its business, we must continue to curtail our own emissions, while supporting further emissions reductions across the broader transportation sector.

We acknowledge that fuel efficiency improvements alone are not enough and we are looking to emerging technologies, renewable fuels, partnerships and innovative ways of running our business. Not only must we take steps to mitigate the risks of climate change, it is critical that we adapt our business and operations to changing conditions in order to avoid the worst of escalating major disruptions.

A SINGLE-UNIT TRAIN KEEPS MORE THAN

300

TRUCKS OFF OF PUBLIC ROADS

4x

MORE FUEL-EFFICIENT

75%

LESS GHG EMISSIONS

Our Vision

We believe transportation of freight by rail will continue to play an integral role in the low-carbon future for North America and CP is transitioning to be a leader in this transformation. We accept and welcome this responsibility and will continue to create long-term sustainable value for our shareholders and the broader economy. From transporting goods and materials that will drive the energy transition to continuously optimizing our operational and energy efficiency, CP will continue to build on our legacy of innovation, leadership and precision scheduled railroading to provide the highest standard of transportation solutions to rise to the serious challenge of climate change. We are proud to be embarking on this challenge and to take a leading role as our industry moves toward decarbonization.

Alignment

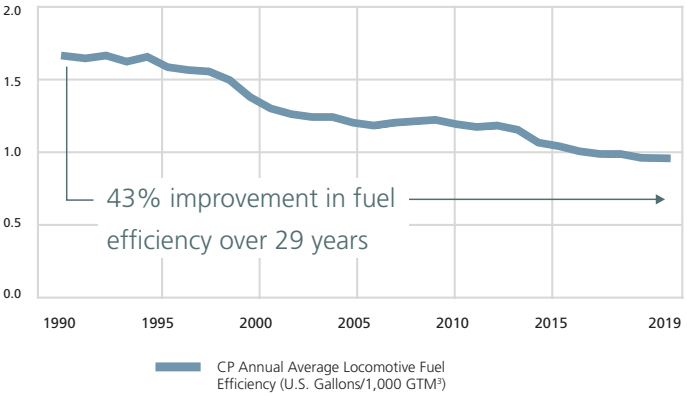
Climate change transcends our business, our industry and our continent. In recognition of the global nature of the fight against climate change, CP continually aims to align with recognized initiatives that bring governments, sectors and companies together, such as the Pan-Canadian Framework on Clean Growth and Climate Change and the resulting *Greenhouse Gas Pollution Pricing Act* (Canada), to the extent that they apply to CP's operations, as well as the Task Force on Climate-related Financial Disclosures (TCFD). This includes a commitment to leverage our leadership role within the rail industry to support the goals laid out in the Paris Agreement and emerging best practices to limit global temperature rise to well below 2°C. CP will also strengthen its resilience and adaptive capacity through cooperative approaches. CP will continue to support public policy aimed at reporting and reducing emissions and lowering the impact of the freight rail sector on the environment. Since 1995, we have actively engaged with industry peers and government agencies to pursue voluntary emissions reductions in the railway sector. We remain committed to promoting positive change both within CP and beyond.

Read CP's Commitment to Fight Climate Change online here

"At CP, we have achieved significant emissions reductions through efficient operations and investments in technology and innovation. We recognize that long-term sustainable growth requires an ambitious vision. As we look towards the next stages of our growth, we are building on our culture of innovation to adapt our business and continue to work together with all stakeholders, to position CP for a Sustainably Driven future."

Keith Creel, President and CEO

13.8%



In 2019, CP's fuel efficiency was 13.8% lower than the North American Class 1 freight railway average

Our Commitment

We know that ambitious goals require diligent action, and we are engaging in a number of strategies to understand climate risk and drive significant emissions reductions. CP is committed to set a science-based target within the next year to reduce our emissions in line with the Paris Agreement. To further mitigate climate risks and embrace opportunities, CP is conducting scenario analysis to understand the full range of possible impacts from climate change as they relate to our business. Through this process, we plan to formalize the integration of climate-related risks into our enterprise risk-management mechanisms and develop strategies for mitigation of risk and pursuit of opportunity.

These strategies will necessitate actions that require regular assessment and further planning, and CP commits to continually explore available tools to drive this transition. We believe the only way to be a leader in smart and sustainable climate action—while continuing to deliver high-quality transportation solutions that connect Canada and the United States to the world—is to understand the full scope of limitations and the opportunities we can seize as part of our low-carbon transition.

CP Locomotive Fuel Efficiency (U.S. Gallons/1,000 GTM[3])[4]

[3] Gross ton-mile (GTM) is the movement of one toan of train weight per mile. GTMs are calculated by multiplying total train weight by the distance the train moved. Total train weight comprises the weight of the freight cars, their contents and any inactive locomotives.

[4] Certain statistical highlights and safety indicators figures have been updated to reflect new information or have been revised to conform with current presentation.

Central to this transition is the need for ambitious progress in innovation, development of new business practices and deployment of emerging transportation technologies. To support and guide this work across our organization, CP will implement internal carbon pricing mechanisms to help meet our climate-related objectives. Carbon pricing analysis will occur over time.

Operational Excellence and Innovation

CP's locomotive operations consume more than 92 percent of the energy needed to run our operations. While CP regularly outperforms industry averages for fuel efficiency, we are committed to further improving the carbon footprint of our locomotives. Whether through our fleet modernization program or technology upgrades such as installing trip optimizers on 85 percent of our high-powered line locomotives by 2025, CP is committed to evaluating and piloting new technologies, as they emerge. This commitment extends across our business and has resulted in energy saving initiatives beyond our locomotive fleet, including upgrades CP has done to lighting fixtures to save millions of kilowatt-hours of electricity and reduce carbon emissions, as well as many more innovative solutions and efficiency projects to reduce energy consumption across our network, yards, facilities and operating equipment.

Climate Leadership and Influence

Given the magnitude and complexity of combatting climate change, we know that greater leaps in fuel alternatives and technology development are needed to help us reach our goals. CP is committed to take a leading role in working collaboratively with regulators, suppliers, trade associations and other partners to push for greater deployment as emerging low carbon transportation solutions become available.

CP recognizes that our ability to influence GHG emission reductions extends beyond our own operations. We must also advocate and partner across our network of suppliers and value chain in ways that drive for positive change outside the CP network.

Our commitment to address climate change is a journey and we intend to be a leader in transforming both CP and the transportation sector to meet this challenge.

NOTE ON FORWARD-LOOKING INFORMATION

This climate statement contains certain forward-looking information within the meaning of applicable securities laws relating to Canadian Pacific's operations, priorities and plans for the establishment and achievement of certain environmental and sustainability targets for reductions in GHG emissions. Forward-looking information is indicated by words such as "commitment", "anticipate", "believe", "expect", "plan", "will", "must", "target", "should" or similar words suggesting future outcomes. Forward-looking information also includes, but is not limited to, statements concerning expectations, beliefs, plans, goals, objectives, assumptions and statements about possible future events, conditions, and results of operations or performance. Undue reliance should not be placed on forward-looking information as actual results may differ materially from the forward-looking information. Forward-looking information is not a guarantee of future performance.

By its nature, the forward-looking information in this climate statement involves numerous assumptions, inherent risks and uncertainties that could cause actual results to differ materially from those expressed or implied by the forward-looking information, including but not limited to the fuel efficiency of railways and CP's operations, CP's ability to implement certain initiatives, including emissions targets, scenario analyses, risk mitigation strategies, changes to enterprise risk management and internal carbon pricing mechanisms, future investments in and the availability of carbon emissions-reduction tools and technologies including through CP's fleet modernization program and technology upgrades, the impacts of existing and planned capital investments, and CP's ability to work with governments and third parties to mitigate the impacts of climate change, as well as additional factors detailed from time to time in reports filed by CP with securities regulators in Canada and the United States. Reference should be made to "Management's Discussion and Analysis of Financial Condition and Results of Operations" in CP's annual and quarterly reports filed on Form 10-K and 10-Q, respectively, including CP's annual report filed on Form 10-K for the period ended December 31, 2019 and quarterly report filed on Form 10-Q for the period ended June 30, 2020.

Forward-looking information is based on current expectations, estimates and projections and it is possible that predictions, forecasts, projections, and other forms of forward-looking information will not be achieved by CP. Except as required by law, CP undertakes no obligation to update publicly or otherwise revise any forward-looking information, whether as a result of new information, future events or otherwise.

Note on Forward-Looking Information

This climate statement contains certain forward-looking information and forward-looking statements (collectively, "forward-looking information") within the meaning of applicable securities laws. Forward-looking information includes, but is not limited to, statements concerning expectations, beliefs, plans, goals, objectives, assumptions and statements about possible future events, conditions, results of operations or performance. Forward-looking information may contain statements with words or headings such as "commitment", "anticipate", "believe", "expect", "plan", "will", "must", "target", "should" or similar words suggesting future outcomes.

This climate statement contains forward-looking information relating, but not limited, to Canadian Pacific's operations, priorities and plans for the establishment and achievement of certain environmental and sustainability targets for reductions in GHG emissions and related matters.

By its nature, the forward-looking information in this climate strategy involves numerous assumptions, inherent risks and uncertainties that could cause actual results to differ materially from those expressed or implied by the forward-looking information, including but not limited to the fuel efficiency of railways and CP's operations, CP's ability to implement certain initiatives, including emissions targets, scenario analyses, risk mitigation strategies, changes to enterprise risk management and internal carbon pricing mechanisms, future investments in and the availability of carbon emissions-reduction tools and technologies including through CP's fleet modernization program and technology upgrades, the impacts of existing and planned capital investments, and CP's ability to work with governments and third parties to mitigate the impacts of climate change, as well as additional factors detailed from time to time in reports filed by CP with securities regulators in Canada and the United States. Reference should be made to "Management's Discussion and Analysis of Financial Condition and Results of Operations" in CP's annual and quarterly reports filed on Form 10-K and 10-Q.

Forward-looking information is based on current expectations, estimates and projections and it is possible that predictions, forecasts, projections, and other forms of forward-looking information will not be achieved by CP. The forward-looking information contained in this climate statement are made as of the date hereof. Except as required by law, CP undertakes no obligation to update publicly or otherwise revise any forward-looking information, whether as a result of new information, future events or otherwise.

STATEMENT FROM THE CEO

The transition to a low-carbon economy is already underway and Canadian Pacific (CP) is proud to be taking a leadership role in our industry. At CP, we believe this transition presents significant opportunities for our company and the industry as a whole. We accept the challenge and the responsibility of finding new ways of doing things that will position us for a sustainably driven future, and have already taken steps to drive positive impact. For example, we installed a large solar field at CP's Calgary campus, which generates more than enough electricity to power our headquarters building. We are also working on a globally significant project that involves converting a diesel locomotive to a zero-carbon emissions propulsion system powered by hydrogen fuel cells.

As we envision our future, we recognize that the transportation sector represents nearly 30 percent of North America's greenhouse gas (GHG) emissions.[1,2,3] Transitioning the sector to low-carbon alternatives is a critical part of the global effort needed to reduce GHG emissions and address the challenges of climate change. Railways account for approximately two percent of GHG emissions from the transportation sector. As the rail industry is a relatively efficient mode of freight transport, it is therefore an essential part of the effort to meet the goals of the Paris Agreement. Freight railways have already improved fuel efficiency by more than 40 percent in the U.S.[4] and Canada[5] since 1990, but there is much we can do as an industry to advance new technology and energy sources to support further decarbonization.

Issued in July 2020, CP's Climate Statement clearly outlines our intention to lead and our commitment to take action. To support these objectives, CP has been investing in robust accounting and reporting of GHG emissions, identifying and effectively managing risks and opportunities over time, and evaluating emerging technologies such as hydrogen-powered locomotives that will support the decarbonization of our business.

CP's Climate Strategy builds on our existing climate commitments and will help drive innovation, collaboration and thought leadership across our business both now and in years to come. It is informed by research, science and an appreciation of where we can make the greatest impact. CP completed a comprehensive, quantitative climate scenario analysis to support our understanding of potential physical impacts to our operations posed by a changing climate, as well as the risks and opportunities associated with the global transition to a low-carbon economy. These insights help us understand how the future may unfold so we can plan accordingly and position CP for success in a low-carbon economy. Building on this information, our science-based targets provide a clear marker against which we can measure our progress as we work toward longer term and more significant decarbonization. Achieving these ambitions will require a variety of actions to reduce our carbon footprint, and we recognize that further technology advancement, business integration and purposeful engagement with our stakeholders will be required.

CP's Climate Strategy is ambitious, but we feel this appropriately reflects the urgency of the fight against climate change. We also look forward to collaborating with government, industry and research partners to find and test new solutions. CP has been in business for more than 140 years, and I am proud to see the company adapt and continue to demonstrate strong leadership for a sustainable future.

Sincerely,

Keith Creel

Keith Creel, President and CEO

REDACTED PUBLIC RECORD VERSION

STATEMENT FROM THE BOARD CHAIR

In 2020, the World Business Council for Sustainable Development stressed the urgency for a global transition to a low-carbon economy and highlighted the role of businesses in driving this change.[6] As a responsible business, CP is committed to creating long-term sustainable value for our shareholders and other stakeholders, including our employees, customers and suppliers and the communities in which we operate. We recognize the need to accelerate the transition to a low-carbon future and are well-positioned to be an essential part of the solution. On behalf of CP's Board of Directors, we are pleased to join other leading businesses from around the world in developing a comprehensive Climate Strategy to guide our climate ambitions.

We view CP's commitment to responsibly address its GHG emissions, respond to transition and physical risks from climate change, and invest in research, development, communications, and organizational change as fundamental for near-term success and a resilient future. We are confident that the direction set by this Climate Strategy will help CP strengthen our resolve and position us as a forward-focused transportation solutions provider. Starting in 2022, CP will annually report to shareholders on updates and progress towards our climate strategy. Our shareholders are encouraged to provide feedback on our efforts through an advisory vote at our annual general meeting.

As a responsible business that is committed to creating long-term sustainable value for its shareholders and other stakeholders, CP recognizes the need to accelerate the transition to a low-carbon future and is well-positioned to be part of the solution.

Although the freight rail sector already provides one of the most fuel-efficient means of freight transport, systemic and technological advances will be required to decarbonize the industry effectively. The Board is actively engaged in and supports CP's leadership on this front, and looks forward to providing oversight of the company's meaningful and measurable progress toward its climate-related objectives.

Sincerely,

Isabelle Courville, Chair of the Board

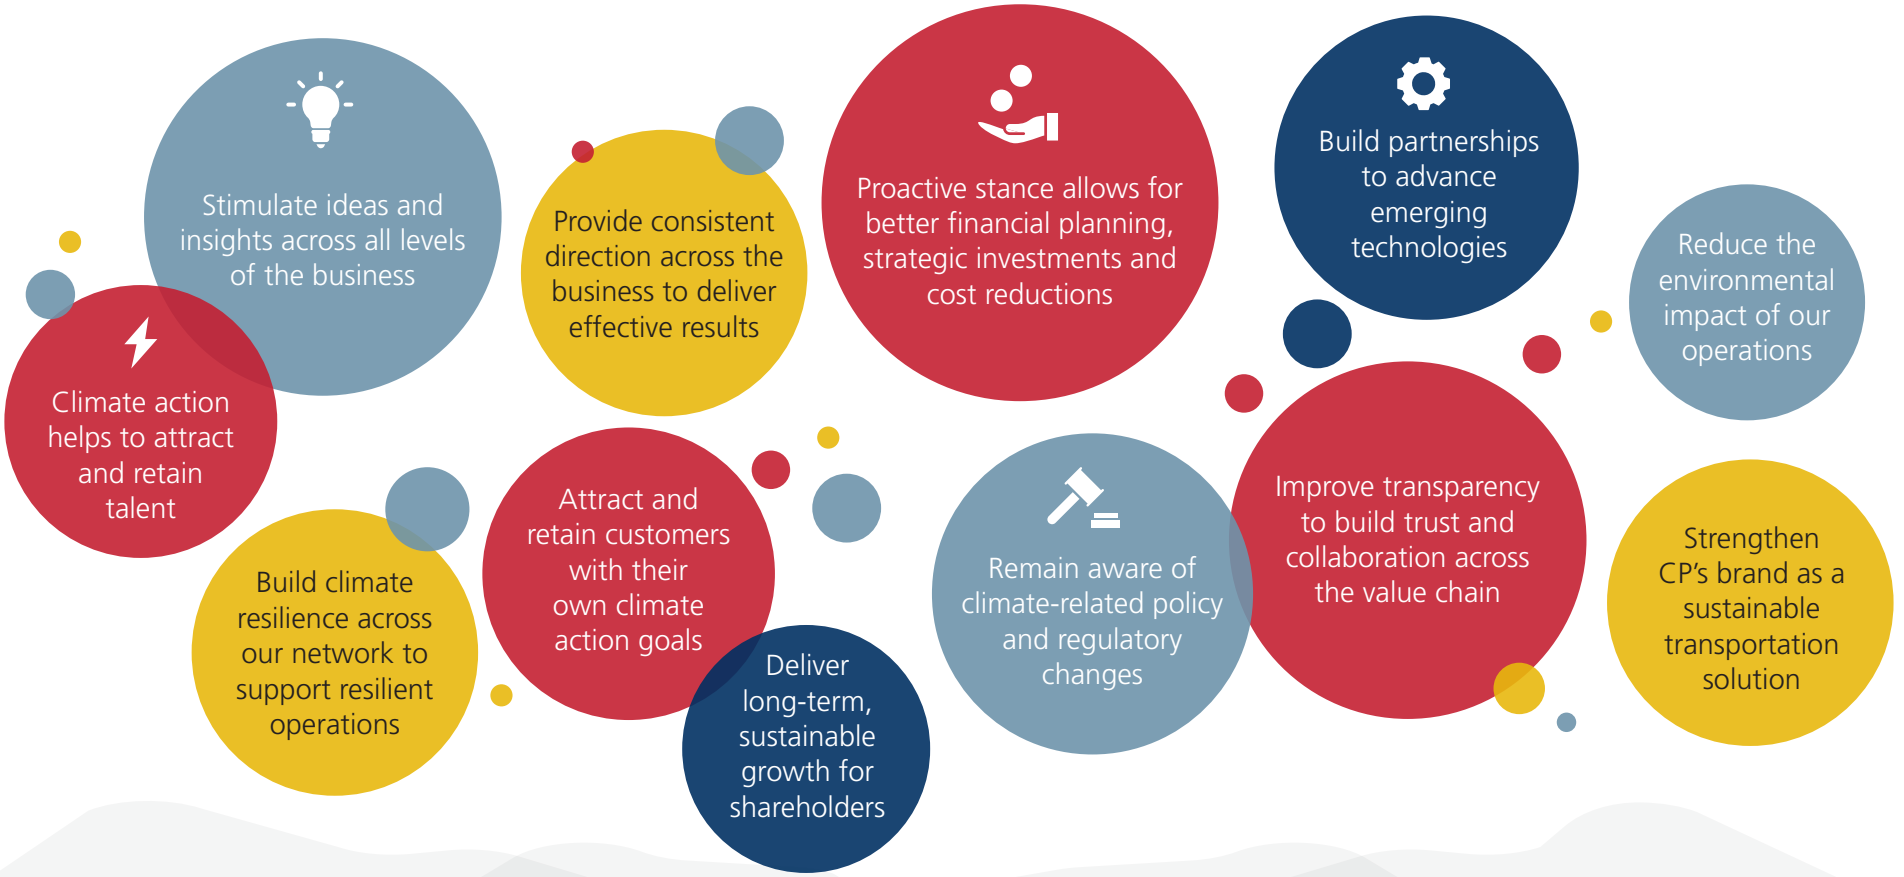
[6] SOS 1.5: The road to a resilient, net-zero carbon future. World Business Council for Sustainable Development, 2020.

INTRODUCTION

Climate change is the challenge of our generation, and it presents both risks and opportunities to CP and the global supply chain. Physical risks, including heavy precipitation, flooding, temperature extremes and powerful storm events have the potential to disrupt CP's network, and are expected to intensify due to climate change. Meanwhile, market fluctuations, emerging regulations, and technological changes driven by stakeholder expectations for lower carbon goods and services present both risks and opportunities to CP's global supply chains. Mitigating climate risks while capitalizing on emerging low-carbon opportunities will require strategic and decisive action as businesses rise to the challenge.

This Climate Strategy builds on CP's Climate Statement and outlines our approach to manage potential climate-related impacts across the business. The objective of this Climate Strategy is to position CP as a leader as the transportation sector transitions to a low-carbon future. We recognize that a changing climate and related economic impacts can have significant ramifications for our business. To be proactive, we need to understand possible implications, identify market opportunities and build climate mitigation and adaptation investment measures into our planning processes.

"We believe transportation of freight by rail will continue to play an integral role in the low-carbon future for North America and CP is transitioning to be a leader in this transformation. We accept and welcome this responsibility and will continue to create long-term sustainable value for our shareholders and the broader economy."



CP RAIL CLIMATE STATEMENT

CP's business and this Climate Strategy are built on the belief that we are Sustainably Driven. In other words, we are committed to embedding sustainability priorities across all parts of our business: to ensure the safety of all stakeholders, maintain operational excellence throughout our network and manage the social impact of our work. We understand that climate leadership within the rail industry will require a diverse range of actions and expertise, from alternative fuels and emerging technologies to customer engagement, business integration and improved resilience of our physical assets. By sharing our Climate Strategy, we look forward to engaging with our stakeholders and providing updates on our progress during the coming years.

REDACTED PUBLIC RECORD VERSION

Why is a Climate Strategy Important to CP?

OUR APPROACH

Scope and Alignment

CP's Climate Strategy encompasses and applies to all of its business operations in Canada and the United States, and where relevant, contemplates collaboration and engagement with a number of stakeholders within and outside of our value chain. It addresses CP's carbon footprint, in terms of both direct and indirect GHG emissions (Scope 1 and Scope 2 emissions, respectively), as well as the emissions in our value chain (Scope 3) to the degree we can influence them.

The main source of CP's GHG emissions is associated with the operation of the diesel-powered fleet of locomotives that drive our business. CP has long focused on locomotive fuel efficiency as a means to lower operating costs and reduce the environmental impact of our operations. Since 1990, the fuel efficiency and associated GHG emissions intensity of our locomotive operations has improved by more than 40 percent. This has been accomplished through an ongoing commitment to best practices for operations and maintenance, regular locomotive upgrades, the deployment of leading fuel-efficient technologies, and rail network enhancements. The need for a substantial reduction of locomotive GHG emissions, as outlined in this Climate Strategy, will require new and emerging approaches. Innovative solutions and technological advancements are needed to support the availability and reliability of low-carbon and alternative fuel options, and advanced propulsion systems for locomotives. This cannot be achieved by CP alone. Rather, it will require significant collaboration and concerted effort beyond CP's direct operations and broader value chain.

To ensure relevance and comparability within and outside of our sector, our Climate Strategy has been developed to align with internationally recognized frameworks, including the Task Force on Climate-related Financial Disclosures (TCFD); the Paris Agreement (within the United Nations Framework Convention on Climate Change) on climate change mitigation, adaptation and finance, and the Pan-Canadian Framework on Clean Growth and Climate Change.

Managing Our Impact

REDACTED PUBLIC RECORD VERSION

Timeframe

The challenges presented by climate change require immediate and sustained action during the coming decades. To align our approach with leading scientific and policy guidance, this Climate Strategy establishes a science-based emissions reduction target to guide our activities until 2030. CP also acknowledges the importance of the 2050 time horizon in the response to climate change, and will continue its leadership in the pursuit of technology and other means that have the potential to deliver more significant decarbonization beyond our 2030 target.

THE FIRST HORIZON

2030

The Intergovernmental Panel on Climate Change (IPCC) has projected an almost 3°C rise in temperature by the end of the century, should global GHG emissions remain at current levels. Scientists have identified the need for substantial curtailment of GHG emissions by 2030 to stave off the worst effects of climate change. Leading organizations, corporations and national governments are setting science-based targets to rapidly decarbonize all sectors of the economy.

Leading up to the 2030 horizon, CP will focus on the efficient use of existing technology and market-ready renewable fuels, while evaluating alternative propulsion technologies — particularly hydrogen-based solutions — that are necessary to longer-term reductions in GHG emissions from the freight rail industry.

CP recognizes the importance of the 2030 horizon and has established science-based targets to align our climate ambitions with a well-below 2°C pathway.

THE SECOND HORIZON

2050

Climate experts agree that global emissions need to continue to fall beyond 2030, reach net-zero by 2050, and become carbon negative thereafter. CP recognizes that collective action to decarbonize must continue without pause during the coming decades.

As a leader in the North American transportation industry, CP will continue its efforts to decarbonize beyond 2030 and after achieving its science-based target. We realize that more significant decarbonization beyond 2030 will require a focused effort by CP and other stakeholders, and is dependent on emerging technologies and other solutions.

As a company, we will continue our leadership to support and facilitate the collaborative efforts needed to drive technological advancements. We will also continue to build resiliency across our operations to address the anticipated physical impacts of climate change.

Reducing carbon and improving infrastructure resiliency requires long term strategic planning. To support this work, CP has completed a thorough climate scenario analysis, providing insight into transitional and physical risks and opportunities through 2050. Measures to increase CP's resiliency to these risks and to pursue the opportunities of a low-carbon economy are described in this Climate Strategy.

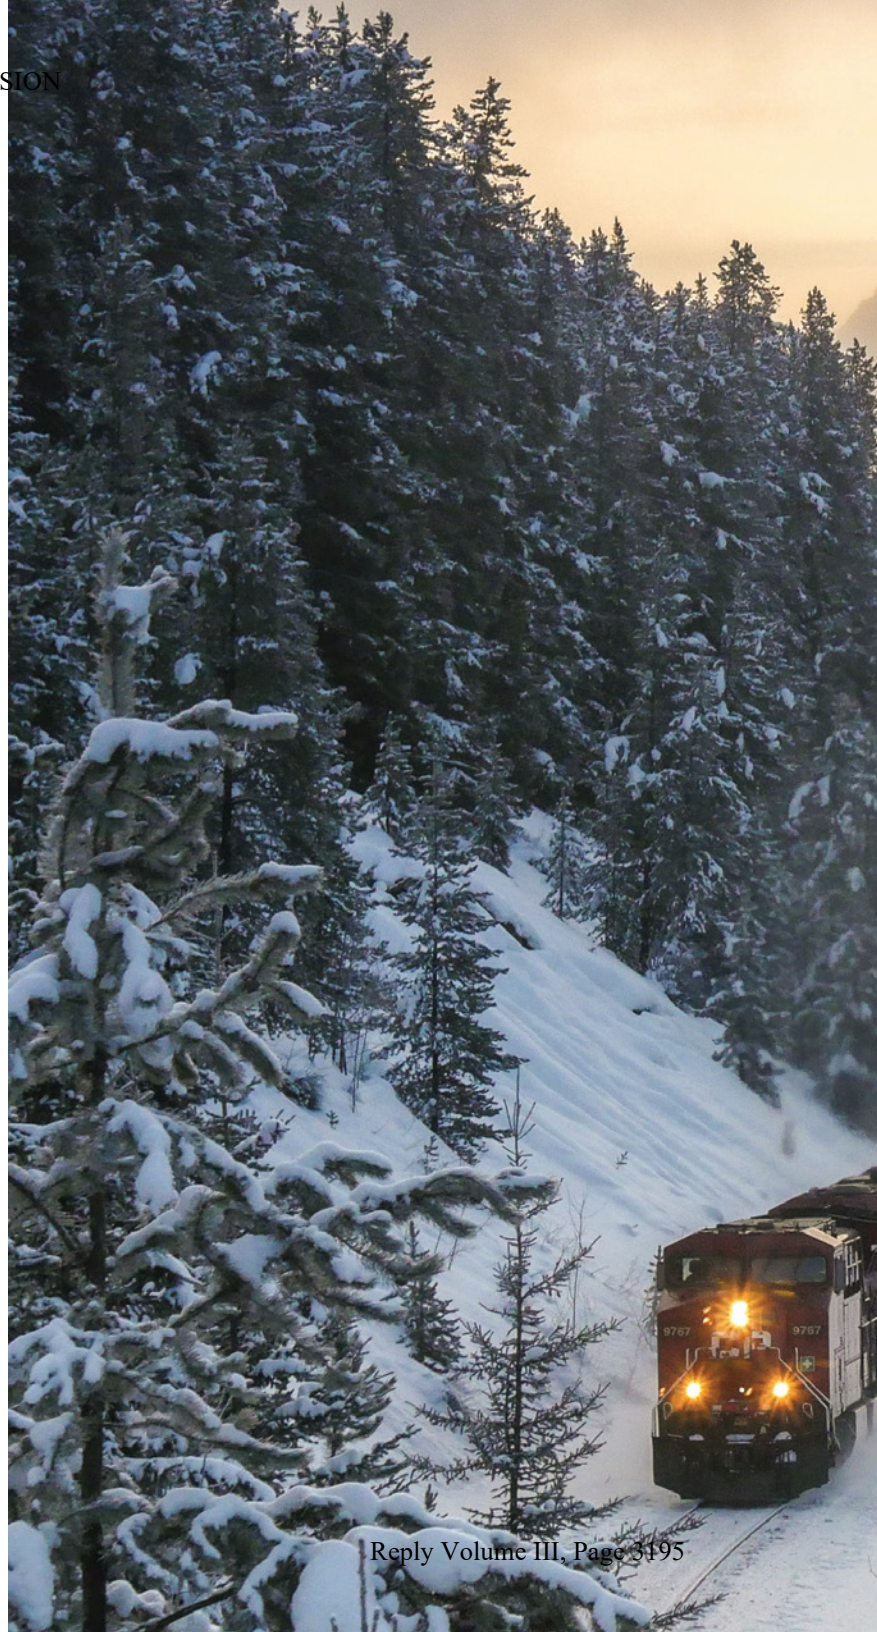
Strategic Pillars

To respond to the risks and opportunities posed by climate change, and meet our decarbonization commitments, our Climate Strategy includes actions across five strategic pillars.

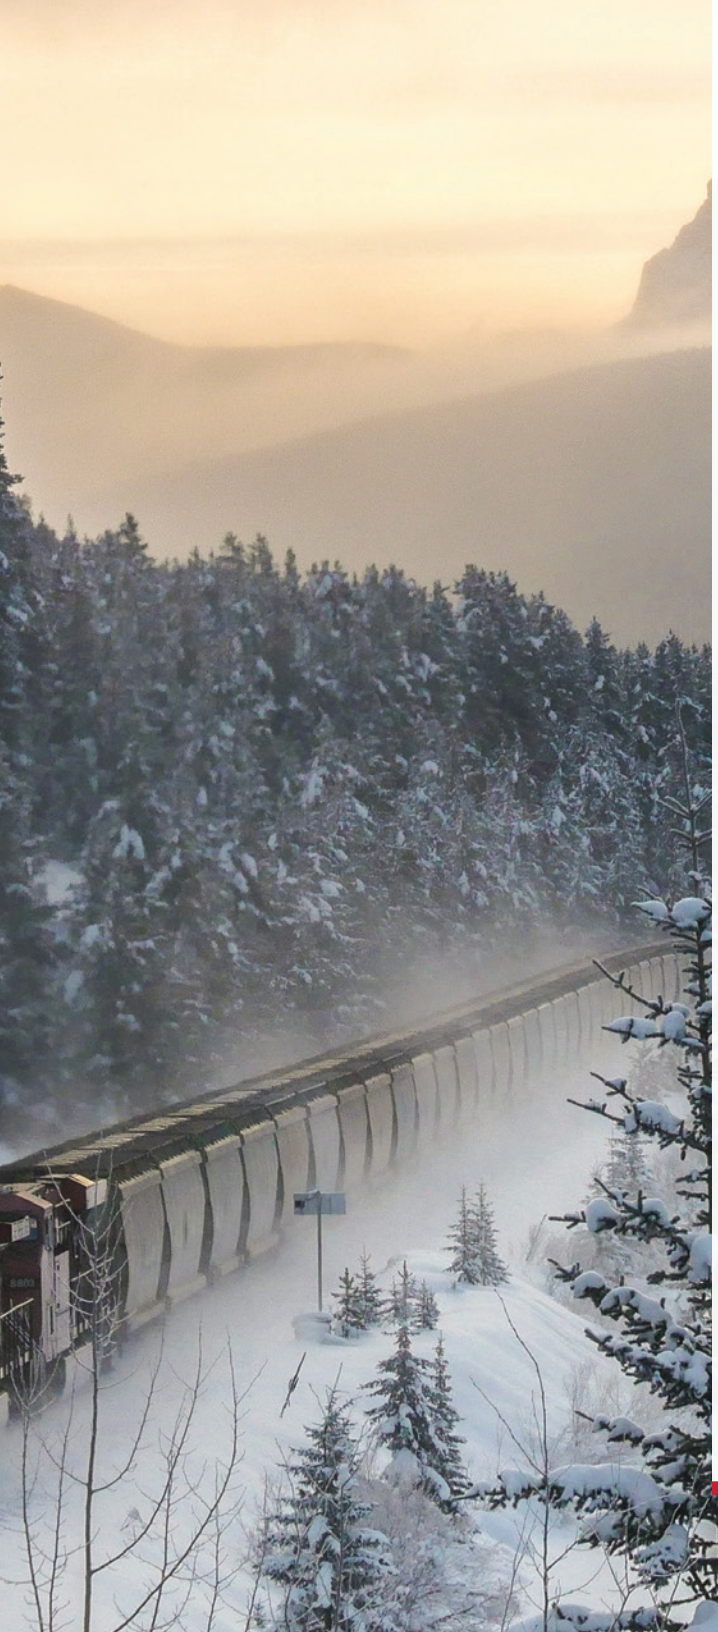
REDACTED PUBLIC RECORD VERSION

OUR STRATEGY

Understanding Our Climate-Related Risks and Opportunities



A clear understanding of the risks and opportunities related to climate change and our business is fundamental to effectively managing potential impacts. CP's awareness of these issues, and measures to mitigate climate risks, is subject to increasing focus by the financial community and other stakeholders. To support this understanding, we undertook our first in-depth climate scenario analysis in 2020.



Climate scenario analysis is a core recommendation of the TCFD and provides a rigorous and quantitative assessment of the climate-related risks and opportunities the company may face in the future under a range of potential climate scenarios. CP's analysis integrated a number of factors to represent plausible future pathways based on credible science, developed by experts at the International Energy Agency (IEA) and other reputable organizations. These scenarios reflect combinations of potential policy changes, technological advancements, market shifts and changes in consumer behaviours. For CP, each scenario represents a trajectory under which the climate, economy and rail industry may change during the coming decades.

The results of CP's scenario analysis are intended to inform our understanding of our business' material climate-related risk and opportunities, and will support planning and investment decisions. Through this analysis, we sought to answer the following questions:

How will climate-related risks and opportunities affect our business?

Where can we best invest to counter climate change risks and capture opportunities?

CP's Priority Climate Impacts

Through engagements with a wide range of cross-functional stakeholders (alongside expert assessment and literature review, and with reference to the priorities of our suppliers and customers) we identified eight priority climate impacts for further exploration and detailed financial modelling. These potential risks and opportunities were more generally characterized as impacts in recognition that some may be a risk under one scenario and an opportunity under another. These eight potential impacts are also aligned with the TCFD's categories of policy, technology, market and physical risks.[7]

Policy

Carbon Pricing
New or additional carbon pricing could lead to increased costs to CP, which may impact CP's advantage over competitors.

Fuel Efficiency
Rail's inherent efficiency advantage over trucking may be amplified by regulations such as carbon pricing.

Technology

Fuel Switching
Considering electrification as a proxy for alternative locomotive fuels, fuel switching has the potential to provide medium and long term fuel and carbon cost savings.

Trucking Competition
Technology leading to decarbonization of trucking may make it more cost effective to operate these vehicles over long distances and lead to increased competition from trucking in North America.

Market

Coal Markets
CP's revenue may be impacted by a decrease in thermal coal demand and an increase in metallurgical coal demand.

Energy Markets
Changes in demand for different energy products (petroleum products, crude oil, biofuels, and wind) may increase or decrease revenues from those sectors.

Freight Rail Demand
A focus on decarbonization of the broader transport sector may increase demand for lower carbon transport options, expanding freight rail and increasing revenue.

Physical Impact

Physical Impacts
Changing physical conditions, such as higher temperatures, intense rainfall, and more extreme storms, may increase (or decrease in some cases) costs to CP due to delays, disruptions, derailments and other events.

[7] For more information surrounding climate-related governance, risks, opportunities and financial disclosures, please see CP's TCFD Index.

REDACTED PUBLIC RECORD VERSION

Climate Change Scenario Analysis

As part of a robust scenario analysis, the TCFD recommends including a scenario aligned with a 2°C future in order to stress-test the business and assess its resilience in a low-carbon economy — a future scenario that looks very different from the world today. Under the well-below 2°C scenario that CP assessed (IEA's Sustainable Development Scenario), the world embraces climate action and pushes for changes in regulations, markets and technologies to transition to a more decarbonized global system. Under this scenario, our business could see several significant financial impacts by 2030, including both risks and opportunities.

Although the well-below 2°C scenario represents a high degree of change, it is also important to understand how this future may differ from other potential scenarios. Our climate scenario analysis also considered how policy, market, technology and physical impacts may manifest under a more modest degree of change (aligned with IEA's Stated Policies Scenario), where climate action is slow and warming amounts to 3 to 3.5°C and a business as usual scenario where no (or limited) action is taken and warming reaches 5 to 6°C. Together, the comparison of these scenarios supports our understanding of where risks and opportunities exist and how they may materialize based on broader social, economic and political changes.

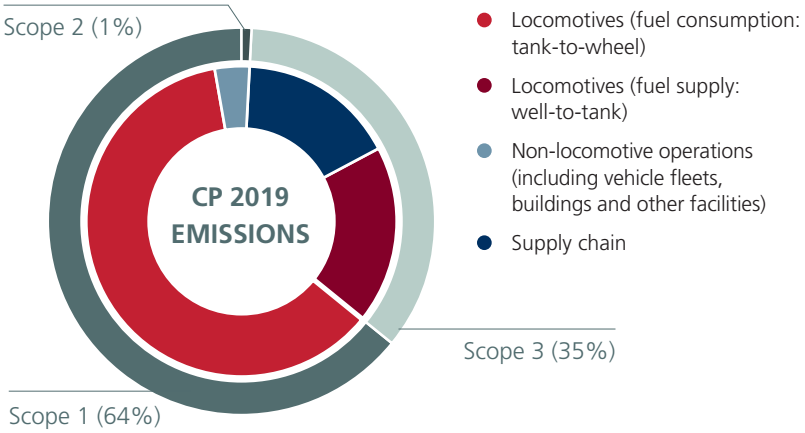
Whether CP is benefitting as a low-carbon freight transport provider under a well-below 2°C scenario driving faster decarbonization, or experiencing physical impacts associated with shifting temperatures under a business as usual scenario, the company needs to consider the impacts of a changing climate as part of business planning and decision-making over the long term. In understanding the potential future changes depicted in our scenario analysis, we are working to pursue opportunities and mitigate risks with an informed view of potential future developments. These findings will help CP prioritize climate-related impacts against other business risks and opportunities, ultimately supporting integration of climate risks and opportunities within existing business processes and cross-functional decision-making structures.

In a well-below 2°C scenario, where the world transitions to a lower-carbon economy:

Key risks include:

- Technological advances aimed at reducing emissions associated with road freight (truck transport) could displace business for CP.
- Rising carbon pricing could increase CP's operating costs for locomotive fuels.
- Changing energy markets, including decreased demand for oil and coal products CP transports, could result in decreased freight revenue.

Key opportunities include:



- CP's fuel efficiency advantage across other modes of transport, including truck transport, could provide a competitive advantage as fuel costs rise.
- Use of lower-carbon fuels could provide for significant cost savings.
- New and emerging markets for low-carbon products, such as biofuels and wind infrastructure, provide new or expanded opportunities for freight revenue.
- An overall increase in freight rail demand as a low-carbon transportation solution could increase CP's overall revenues and deliver reputational benefits.

Reducing Our Carbon Footprint

Baseline Carbon Footprint

Locomotives represent CP's greatest source of GHG emissions. In 2019 (our baseline year), emissions from locomotives comprised 96% of our Scope 1 emissions and 80% of our combined Scope 1, 2 and 3 emissions.

CP's GHG Emissions Footprint

How are CP's emissions classified?

- Scope 1 emissions are from CP's direct combustion of fuel, including fuel that powers our locomotives and company vehicles and facilities.
- Scope 2 emissions are associated with the electricity we purchase across our extensive Canada and U.S. network.
- Scope 3 emissions are associated with other parts of our value chain, such as purchased goods and services, other fuel- and energy-related activities, business travel, and employee commuting.

Science Based Targets

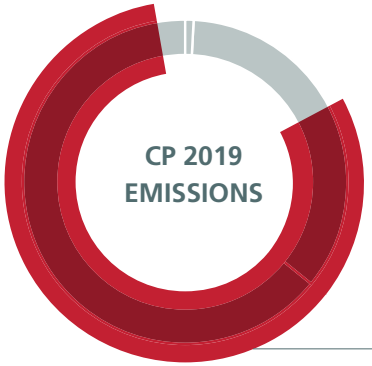
Setting clear, ambitious and science-based targets is vital to reducing our carbon footprint and delivering on this Climate Strategy. CP has set two science-based emissions reduction targets, including an ambitious target to reduce our locomotive emissions, complemented by a non-locomotive target to address other parts of our business. Our targets are aligned with a well-below 2°C scenario and provide a vision for our company's future intended to drive innovation and spur the adoption of new technologies and operational practices.

What is a science-based target?

Science-based targets are used by many companies to establish a pathway for GHG emissions reduction across their organizations. Emissions reduction targets are considered science-based if they align with both current climate science and the objectives of the Paris Agreement. Science-based targets aim to limit global warming to well-below 2°C above pre-industrial levels.

For companies like CP, there is a strong business case for setting a science-based emission reduction target. Science-based targets demonstrate a company's commitment to sustainability. They boost investor confidence, spur innovation, provide resilience against changing regulations, and generate long-term savings. The Science Based Targets initiative (SBTi) works with the private sector to set and validate science-based emissions targets, and align corporate ambitions with global goals and investor expectations for business resilience in a net-zero economy. The SBTi has developed standardized tools, resources and sector-specific methodologies to support company-specific emissions reduction targets.

The SBTi is a partnership of the World Resources Institute, CDP, United Nations Global Compact, and the World Wildlife Fund for Nature.



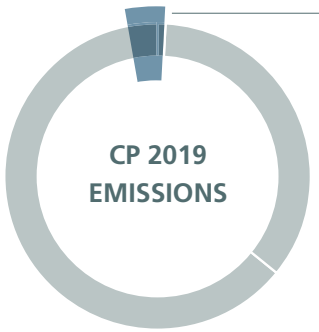
REDACTED PUBLIC RECORD VERSION

Our science-based targets address **100% of our Scope 1 and Scope 2 emissions, and more than half of our Scope 3 emissions.** These targets are based on the most current approach available to the transportation sector through the SBTi.[8]

Locomotive Target

We will reduce our well-to-wheel GHG emissions intensity (grams per revenue ton-mile[10]) from locomotive operations by **38.3%** by 2030.

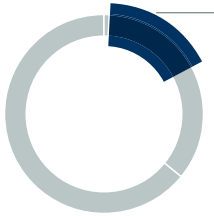
Locomotives represent CP's greatest source of emissions. Recognizing the magnitude of this target for our operations, we have worked with the SBTi to validate our approach and calculations.



80% of CP's **TOTAL GHG EMISSIONS** are addressed through our Locomotive Target, **INCLUDING 96%** of our Scope 1 emissions **PLUS 53%** of our Scope 3 emissions.

Non-locomotive Target

We will reduce our absolute Scope 1 and 2 GHG emissions from non-locomotive operations (including emissions associated with our buildings and facilities) by **27.5%** by 2030.



This target is directed at a relatively small but critical proportion of our GHG footprint. While this target has not been submitted to the SBTi for validation, CP followed a similarly robust and science-based methodology to calculate this target.

3.4% of CP's **TOTAL GHG EMISSIONS** are captured by this target, **INCLUDING 100%** of our Scope 2 and 4% of our Scope 1 emissions.

An emissions reduction target that supports business growth

CP's locomotive target establishes a GHG-intensity objective for well-to-wheel[9] emissions per revenue tonne-kilometer by 2030. By following an intensity-based approach for our target-setting pathway, CP can confidently accommodate future business growth. As a low-carbon mode of freight transport, the volume of goods transported by the rail sector, and by CP, is expected to grow in the years to come. The growth of freight transportation by rail is an essential component of the broader decarbonization and modal optimization within the transportation sector.

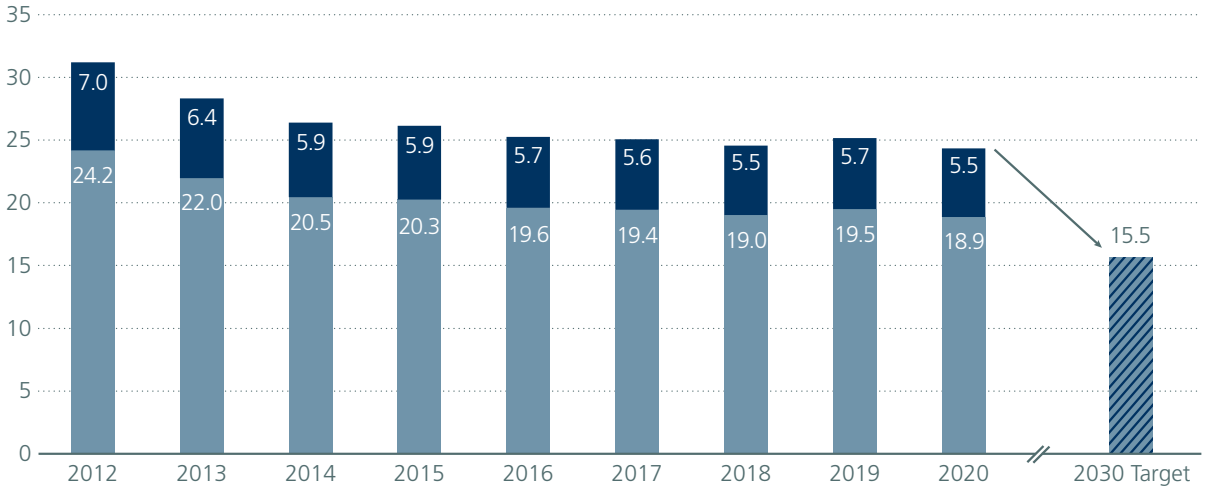
Beyond these targets, we are working with our supply chain to further improve our Scope 3 impact and reduce the GHG emissions of our suppliers and contractors.

Engaging With Our Stakeholders provides more information about how we will work with suppliers and other stakeholders to support this strategy.

[8] All targets are calculated with reference to base year emissions for 2019.
[9] Well-to-wheel emissions include all emissions related to fuel production, processing, distribution and use including (where applicable) Scope 1, 2, and 3 emissions. This metric effectively captures the entire energy process, from mining of the fuel source to powering our locomotives.
[10] Revenue Ton-Miles (RTMs) refers to the movement of one revenue-producing ton of freight over a distance of one mile. RTMs measure the relative weight and distance of rail freight moved by the Company.

Greenhouse Gas Reduction Levers

For CP to meet our science-based target for 2030, and continue further decarbonization toward mid-century, we recognize we must evaluate a wide variety of levers, including commercially ready and emerging options. New approaches are necessary, including systematic ways to:

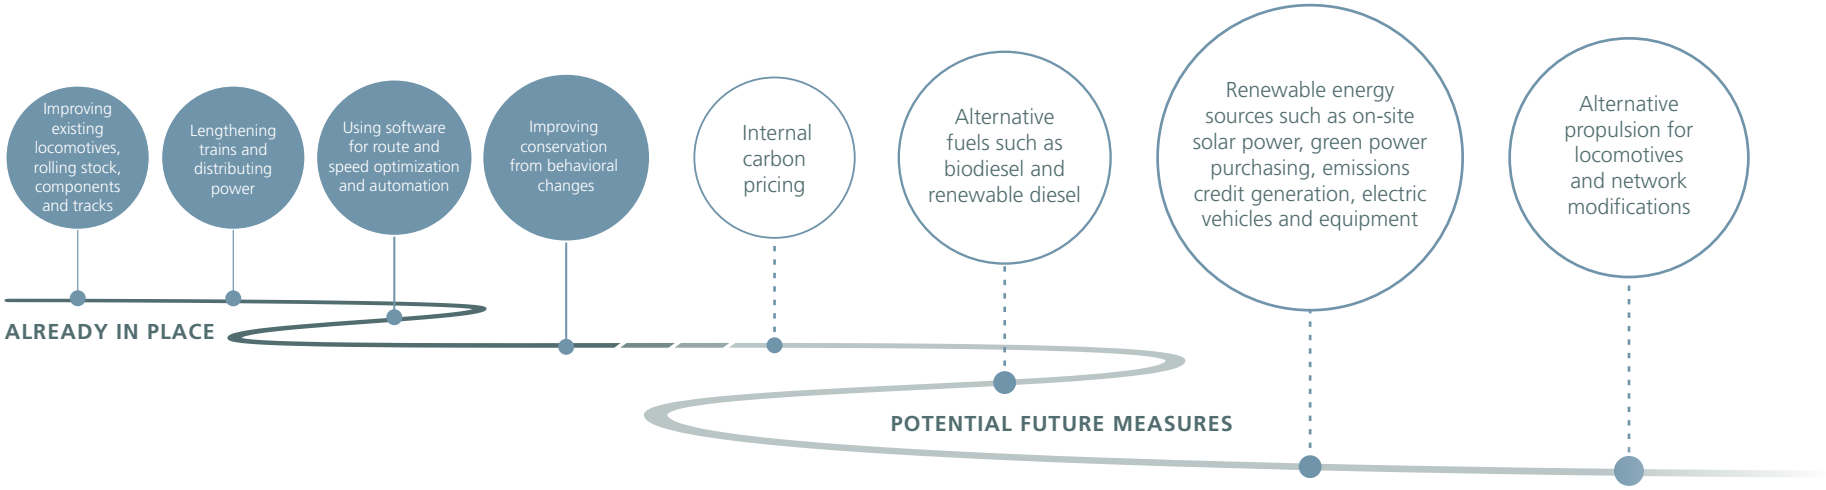


- Identify potential carbon-reduction levers
- Rigorously assess new levers in terms of carbon reduction potential, feasibility for the rail sector and costs to CP
- Conduct bench-scale and pilot testing
- Successfully deploy promising alternative fuels and propulsion methods
- Engage and collaborate with others to progress this work

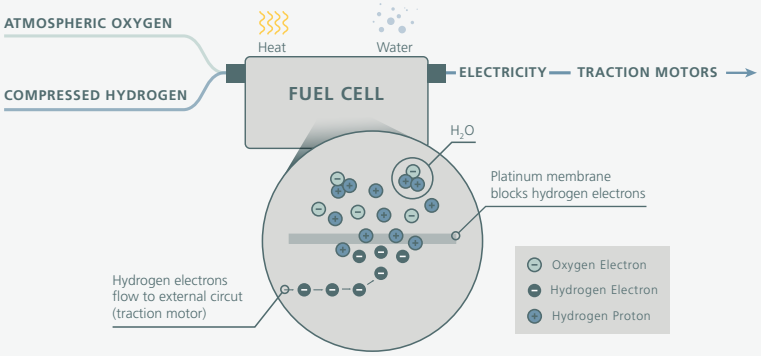
In pursuing these goals, we will foster an enterprise-wide innovation mindset that encourages creative thinking and collaborative problem-solving to lower or potentially eliminate carbon emissions associated with the operation of CP's assets, facilities and rolling stock. In recent years, CP has made impressive strides to increase fuel efficiency (and reduce GHG emissions) by improving existing locomotives, rolling stock, components, and tracks; optimizing train configuration; using software for route and speed optimization and automation; improving fuel conservation from behavioral changes; and several other initiatives. We will continue our focus on fuel efficiency efforts in the near-term as we support the advancement of alternative fuels and emerging technologies, as these will require further validation and development before being deployed across our business.

Moving forward, we plan to establish a Carbon Reduction Task Force to lead our internal focus on decarbonization. CP's industry-leading engineers and operations experts will evaluate potential levers that could reduce our GHG emissions. Levers may involve factors such as internal carbon pricing, alternative fuels, renewable energy sources (such as on-site solar power, green power purchasing), use of electric vehicles and equipment, network modifications, and alternative propulsion for locomotives. CP will also consider other means to drive research and development, and we are committed to attracting and developing the best and brightest talent to work on these challenges.

The benefits that can be gained from CP's GHG reduction levers, including emerging low-carbon technologies, extend beyond CP. Many of our customers have their own climate action goals, and care about the changes we make as part of their value chains. Our decarbonization efforts provide an opportunity to build long-lasting and effective partnerships with technology providers in an emerging marketplace. This collaboration is essential to support the development and field testing of new technologies under the challenging conditions Class 1 railways face generally, through daily operations, but also across CP's extensive North American network. These and other opportunities are explored further in the stakeholder engagement pillar of this Climate Strategy.



CP Locomotive GHG Emissions Intensity (g CO_2e/RTM) Performance and Target Projection[11]



[11] Scope 3 emissions for 2012 to 2018 have been proportionally estimated based on fuel consumption data for these years. The 2030 target value reflects Scope 1, 2 and 3 emissions.

REDACTED PUBLIC RECORD VERSION

Actions to Reduce Emissions

Spotlight on Hydrogen Power

Hydrogen fuel cell/battery hybrid propulsion technology is being tested worldwide as a viable alternative fuel for the transportation sector with particular promise for long-haul heavy freight transportation systems including rail. This technology may be capable of eliminating GHG emissions for railway locomotives. In addition to zero-GHG emissions, hydrogen power may offer other benefits, such as reducing operational noise and vibration generated by diesel-electric engines.

CP has initiated a program to convert three different types of diesel-electric locomotives into zero-emissions hydrogen-powered locomotives using fuel cells and batteries to power electric traction motors. Supported by a $15 Million grant from Emissions Reduction Alberta, the project will include installing hydrogen production and fueling facilities at two CP rail yards in Alberta. This program will demonstrate and evaluate the technical performance of hydrogen-powered locomotives and fueling infrastructure in real-world rail operations and is, thus, expected to generate critical industry knowledge and experience to inform potential commercialization and future development.

Responding to Physical Risks from Climate Change

A changing climate presents both chronic and acute physical risks to CP's network and assets. Throughout our 140-year history, CP has been challenged by remarkable changes in operating practices, technology advancements, transportation policy, and transformation across the industries we serve. We believe that our continued success necessitates being well-equipped to meet the multifaceted challenges of climate change. CP's success is founded on our proven ability to adapt and innovate, including the recent expansion of our network and ongoing improvements to our infrastructure and operating practices. We actively manage our network to ensure continuity in our operations, and invest in hardening our assets to ensure our infrastructure is resilient to future change.

To support the resilience of our business, we are aligning our technical expertise and network management systems with leading climate science. Using current climate models under a range of future scenarios, with analysis tailored to CP's business, we have reviewed the potential physical risks of climate change at a strategic level. We have also identified areas where new or different data are required to support additional predictive studies. This will help us assess and understand potential risks and opportunities that may arise, strengthen data collection, monitor changes and prioritize our mitigation efforts.

Continually improving our physical risk identification and assessment mechanisms will inform CP's climate-related strategies and guide investments in our network and assets. Together, these activities support CP's resilience in the face of a range of potential climate outcomes.

Due to the vast distances and remote nature of CP's rail network, and the infrastructure required to operate the freight transport business, severe weather conditions can pose a risk to our business. Reputable climate models indicate that these weather events and associated risks are likely to increase. It will be important to be proactive, and we have been evaluating various ways to mitigate climate-related risks to our network through active monitoring and focused efforts to harden our infrastructure.

For example, in 2019 a major flood along the Mississippi River affected our rail network around Davenport, Iowa. In response, and to keep our trains operational during future flood events, CP raised approximately three miles of track by three feet at a cost of approximately $11 million (CAD). These measures have reduced the potential impact on rail operations from future flooding events at this key location.

SLOW SPEED AHEAD: A CP freight train passes over newly raised tracks in downtown Davenport, Iowa, on April 3, 2019. CP has elevated signal bungalows in downtown Davenport to keep wiring and circuitry dry during flood events.

REDACTED PUBLIC RECORD VERSION

Integrating Climate Factors Across Our Business

The implementation of this Climate Strategy will require leadership and coordination to cascade its commitments across CP's business and our value chain. Although this commitment comes from the top, successful execution requires a broad understanding of the risks and opportunities of climate change and the company's commitment to climate action. Raising organizational awareness and fostering understanding of climate risks and opportunities is essential to ensure climate factors are integrated into planning and decision-making processes across our business.

CP recognizes the need for incorporating climate change risks and opportunities into business planning, and we are enhancing our governance to drive effective management of our climate change commitments and actions. Our business integration plans are aligned with the practices recommended by the TCFD.

To support the execution of this Climate Strategy, we are strengthening roles and responsibilities for climate governance. The Risk and Sustainability Committee of our Board of Directors provides oversight and reviews climate-related risks and opportunities. We plan to integrate the climate-related risks and opportunities identified to date into relevant business processes, including (but not limited to) enterprise risk management, capital expenditures and strategic planning. Integrating climate factors could include the creation of specific low-carbon budgets and inclusion of a shadow price on carbon in our capital expenditures process. Integration will also involve building awareness and capacity related to the other pillars identified in this Climate Strategy.

Whether they are directly involved in testing emerging technologies (e.g., through our hydrogen locomotive program), developing more sustainable operating practices or finding other ways to contribute to our goals for GHG emissions reduction across the business, CP's Board of Directors, the Risk and Sustainability Committee, members of the senior leadership team and our employees are excited to be a part of this journey. We look forward to sharing and celebrating our progress with our workforce, at all levels of our organization.

Engaging With Our Stakeholders

Internal and external stakeholder engagement will be a key success factor as CP implements this Climate Strategy. CP will drive internal alignment while engaging suppliers, customers, rail transportation peers and policymakers to help lead industry-wide change.

The core components for our stakeholder climate engagement include education, partnerships, policy and disclosure. These efforts will support the preceding pillars, helping CP to better understand climate-related impacts, stay connected with emerging scientific and engineering advances that support emissions reductions and infrastructure hardening, and intentionally build capacity and awareness to integrate climate considerations across our business. Underpinning this, we recognize that sharing experiences and insights with our external stakeholders will also add value to CP's climate programs, supporting collaboration and learning from different perspectives.

Education

Building internal and external awareness of climate risks and opportunities associated with CP's value chain is essential to driving change. Internal education will promote an understanding of roles, challenges and the underlying value in executing CP's Climate Strategy, with the goal of ensuring commitments are supported throughout our organization. External to CP, dialogue will focus on opportunities for CP's climate ambitions to support our customers' climate objectives. Ongoing engagement with our investors and communities can demonstrate CP's leadership position as we stay informed of evolving expectations.

Partnerships

CP is well-positioned to pursue partnerships with industry associations, other railways, equipment manufacturers, communities and other stakeholders. Through strategic partnerships, there are opportunities for collaboration to drive innovation, advance and improve the accessibility of emerging technology and take action to decarbonize the rail sector. CP is currently working with the Railway Association of Canada, the Association of American Railroads and Transport Canada to promote climate resilience in the rail sector. As a leader in this field, we are open to new pathways for partnerships, including existing and prospective suppliers, academia, railway peers and other institutions.

Policy

Globally, climate-related legislation and regulations are emerging in response to growing scientific evidence and societal awareness of climate change. As one of seven Class 1 North American railroads, CP frequently engages on regulatory issues that impact our business and the rail transportation sector in Canada and the U.S. Our strategic engagements support our Climate Strategy, including topics related to cap-and-trade, carbon taxes, fuel efficiency standards, renewable fuel standards and emissions reporting programs.

Disclosure

CP benefits from strong sustainability disclosure through our Sustainably Driven website, which includes CP's Climate Statement, CDP responses and efforts to manage energy efficiency and emissions. With a keen interest in climate planning, action and disclosure, CP recognizes the importance of keeping the investment community informed as this Climate Strategy is implemented and advanced. In line with the recommendations of the TCFD, CP has conducted its scenario analysis and issued this Climate Strategy, and will further enhance its climate-related financial disclosures in 2021 and beyond. Starting in 2022, CP will annually report to shareholders on updates and progress towards our climate strategy. Our shareholders are encouraged to provide feedback on our efforts through an advisory vote at our annual general meeting.

REDACTED PUBLIC RECORD VERSION

INVESTMENT

In order to position CP as a leader in the transition to a low-carbon economy and fully execute this Climate Strategy, we recognize that new approaches will be required to deploy capital, operating budgets and people in the most efficient and effective ways possible. CP currently expends significant amounts of capital to maintain and upgrade our locomotive fleet and network, to improve overall efficiency and ensure system reliability. We anticipate that new approaches to deploy these resources will be necessary to assess and utilize the new data systems, technologies and fuels required to mitigate GHG emissions in the coming years.

Evaluating resource needs associated with each of the pillars in this Climate Strategy, as well as accessing low-cost capital, will be part of ensuring successful outcomes. Ultimately, we recognize that our most valuable asset is our people. To fully execute this Climate Strategy, our leadership is dedicated to our continued investment in attracting, retaining and developing the best talent and providing them with a work environment that supports diversity, inclusion, innovation and creativity. We believe that approach has already resulted in CP being a railroad industry leader and that it will continue to deliver strong results as CP executes this Climate Strategy.

List of Acronyms

GHG – greenhouse gas
TCFD – Task Force on Climate-related Financial Disclosures
IPCC – Intergovernmental Panel on Climate Change
IEA – International Energy Agency
SBTi – Science Based Targets initiative
RTM – revenue ton-mile

Subject: Comments on EP 711 (Sub-No. 1), Reciprocal Switching

Dear Ms. Brown:

As the Director of Supply Chain Americas, I oversee the operations and commercial aspects of rail transportation and logistics for Lyondell Chemical Company, Equistar Chemicals, LP, LyondellBasell Acetyls, LLC, and LyondellBasell Advanced Polymers Inc. (collectively, "LyondellBasell"). Competitive rail transportation services facilitate LyondellBasell's operations and allow LyondellBasell to compete for business in both the United States and global markets. LyondellBasell supports a broad implementation of competitive switching across the United States, and thanks the Surface Transportation Board for its attention to the matter and moving the long-standing EP 711 rulemaking forward.

These comments provide the Board with LyondellBasell's observations, based on its experience using reciprocal switching at multiple facilities in the United States, that reciprocal switching provides significant benefits without creating service issues. They also explain that LyondellBasell urgently needs access to reciprocal switching at other captive facilities where it is not available.

As a member of the American Chemistry Council, LyondellBasell also supports ACC's written testimony being filed contemporaneously with these comments and ACC's past comments in this proceeding.

Scope of LyondellBasell's North American Rail Operations

LyondellBasell has 19 rail-served manufacturing facilities located in Iowa, Illinois, Indiana, Louisiana, Tennessee, Texas, and Virginia. These facilities receive service from all 7 Class I railroads via either single-carrier access service, multi-carrier access service, or reciprocal switching. From these facilities, LyondellBasell originates approximately 70,000 rail shipments per year of polyolefins and liquid chemicals, including hazardous materials and toxic inhalation hazard (TIH) materials. To support this rail operation, LyondellBasell operates 18,000 private railcars comprising covered hopper cars and tank cars. And more than half of LyondellBasell's North America logistics expenses arise from rail logistics.

LyondellBasell's Multi-Carrier Access and Experience Relating to Reciprocal Switching

Eight LyondellBasell facilities spread across the U.S. Gulf Coast and Midwest have access to rail competition through reciprocal switching. Reciprocal switching at these facilities has not posed any special operational issues, likely because it generally awards the reciprocal-switch traffic under multi-year contracts that provide predictability to LyondellBasell and the railroads, the railroads establish and follow operating plans to serve the traffic, and the railroads coordinate as necessary, producing an efficient operation. Reciprocal switching has even proven less complex than the multi-carrier direct service[1] that LyondellBasell receives at another facility since reciprocal switching involves less coordination between the carriers and LyondellBasell. In sum, reciprocal switching has produced efficiencies for LyondellBasell without any operational dysfunction.

[1] Multi-carrier direct service involves two carriers directly accessing a facility over shared track. It is a close cousin of reciprocal switching insofar as it provides a facility with access to multiple rail carriers.

When awarding traffic that is open to reciprocal switching or multi-carrier direct service, LyondellBasell conducts a full cost-benefit analysis in which operational impacts play a significant role. This analysis includes consideration of at least the following factors:

- Operational impacts

    - Route efficiency: An origin-destination routing over the incumbent carrier may be significantly longer in distance or duration than the routing via a reciprocal switch. This often is the case for joint-line movements and increases LyondellBasell's private car fleet and supporting infrastructure needs, rail-network congestion, the potential for service disruptions, and the environmental footprint of shipments. LyondellBasell thus has a strong preference for efficient routing.

    - Gross rail weight limitations: Although railroads continue to make significant investments to upgrade gross rail weight across the network, bridge and track restrictions still exist and produce inefficiency. One carrier may be able to accommodate 286,000-pound gross rail weight shipments for certain traffic, while another only 263,000-pound gross rail weight shipments for the same traffic. LyondellBasell prefers routings with higher railcar gross weight limits because they reduce the number of railcars required to support a given volume of business and thus reduce rail congestion and LyondellBasell's private-car fleet and associated infrastructure needs.

    - Infrastructure support: Polyolefin producers, such as LyondellBasell, generally require significant storage-in-transit to manage inventory needs. Thus, when considering reciprocal switch options, LyondellBasell evaluates railroad and private storage options on each carrier's line. By using carriers who offer or have access to railcar storage facilities, LyondellBasell is able to reduce the risk of congesting local yards and incurring associated storage charges.

    - Reliability Risk: Reliable rail service is critical to LyondellBasell and its customers. It reduces the need for a safety buffer of railcars and inventory. It also reduces the risk of supply disruptions and, thus, the need to use premium truck transportation to cover delayed shipments, which typically involves four trucks for a single railcar. For these reasons, LyondellBasell favors routing traffic over the most reliable route.

- Commercial offers: Commercial offers from an incumbent and competing railroad typically are similar. But in some cases, LyondellBasell may realize a rate benefit in excess of 30%. These rates do not, however, translate to negative operational impacts since even a minor degradation in service or reliability typically places a high burden on LyondellBasell.

The benefits of reciprocal switching and rail competition are so significant that, over the past ten years, LyondellBasell has added more than 2,200 storage-in-transit car spots across four facilities to allow access to the reciprocal switching and multi-carrier service options available at those facilities. These investments reflect that the competition afforded by reciprocal switching and multi-carrier direct service provides a strong incentive for LyondellBasell to make rail-infrastructure investments. In many cases, these investments reduce the investments that carriers involved in a reciprocal switch or multi-carrier direct service would need to make to provide service to LyondellBasell's traffic.

Carriers also are investing in traffic that is open to reciprocal switching. For example, BNSF Railway built its Lacassine yard to serve traffic around Lake Charles, LA, which it accesses via reciprocal switching. Thus, reciprocal switching does not appear to have materially reduced carrier investment.

Further, reciprocal switching provides important flexibility to address rail-service disruptions, which arise often. Railroads may experience service disruptions from myriad issues, including the railroad's operational missteps and external forces, like extreme weather events. Where available, LyondellBasell has used reciprocal switching and multi-carrier direct service to change routing and move traffic to alleviate service disruptions. This helps reduce LyondellBasell's railcar fleet

requirements and avoid premium truck shipments, which would otherwise be necessary if a car was delayed.

LyondellBasell's Need for the Proposed Reciprocal Switching Rules

While LyondellBasell currently has multiple facilities open to reciprocal switching, it still has ten facilities that are captive to a single railroad and have a nearby interchange with a competing carrier, but are not open to reciprocal switching. Many of its customers' facilities are also captive and have a nearby interchange to a competitor. LyondellBasell's captive traffic involving these LyondellBasell and customer facilities is subject to operational inefficiencies and risks similar to those that reciprocal switching, where available, has helped LyondellBasell mitigate, as described above. Also, this traffic cannot be shifted around disruptions on the line of the carrier who holds it captive unless LyondellBasell uses truck shipments. Thus, even though LyondellBasell has several facilities open to reciprocal switching, it still has an urgent need for revised reciprocal switching rules.

Additional Reciprocal Switching Considerations

Reciprocal switching promises many benefits, but "paper barriers" (i.e., contractual provisions included with a sale or lease of a rail line that limit the incentive or the ability of the purchaser or tenant carrier to interchange traffic with rail carriers other than the seller or lessor railroad) may deprive many shippers of those benefits by imposing penalties on a railroad for engaging in a reciprocal switch. Also, in LyondellBasell's experience, paper barriers often lead to irrational or absurd results. For example, one current LyondellBasell facility can originate interstate traffic with two railroads via a reciprocal switch, but the same switch is unavailable for intrastate shipments. The Board thus should make clear that a reciprocal switching order supersedes any paper barrier involving the switch.

Closing Comments

LyondellBasell anticipates that shippers will realize significant benefits from reciprocal switching, and LyondellBasell's experience with reciprocal switching at its facilities demonstrates that railroads can implement reciprocal switching without adverse operational impacts. Further, rail competition from reciprocal switching will enable LyondellBasell and other rail shippers to remain competitive in the global marketplace. LyondellBasell thus asks the Board to immediately adopt its proposed reciprocal switching rules.

Sincerely,

/s/Scott Campbell

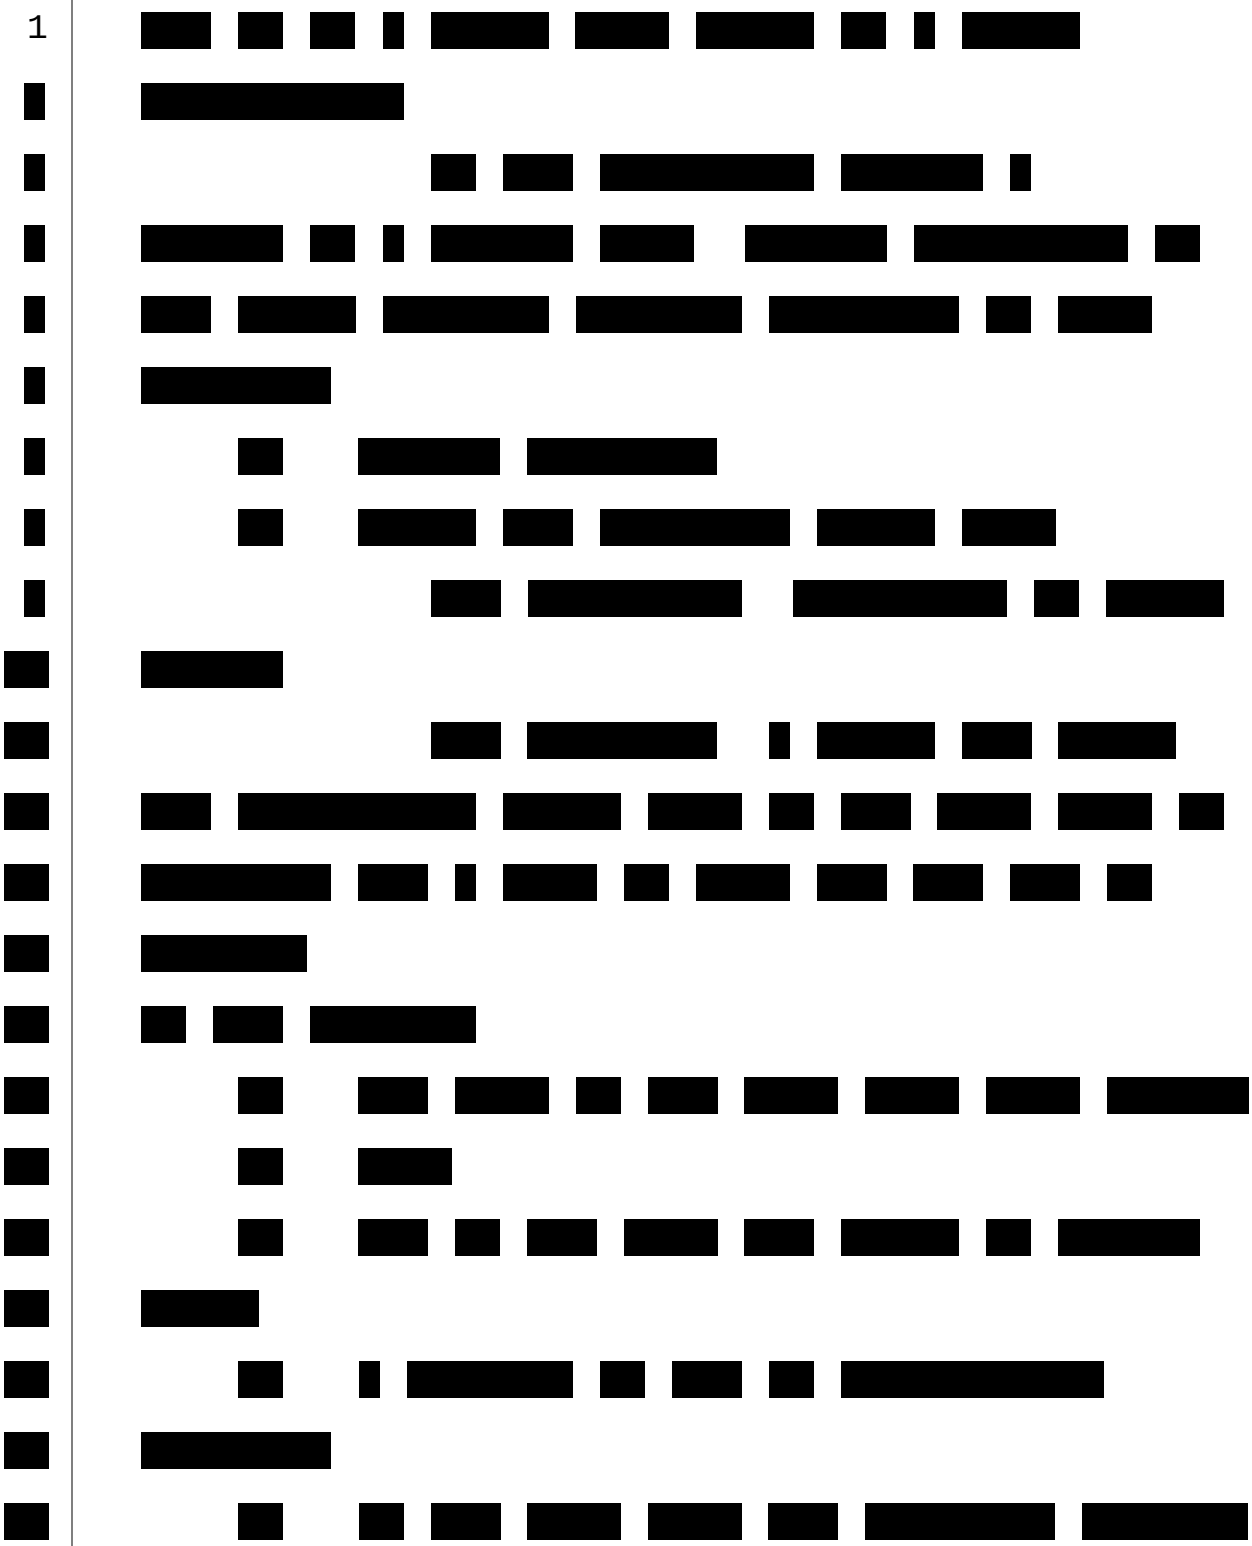
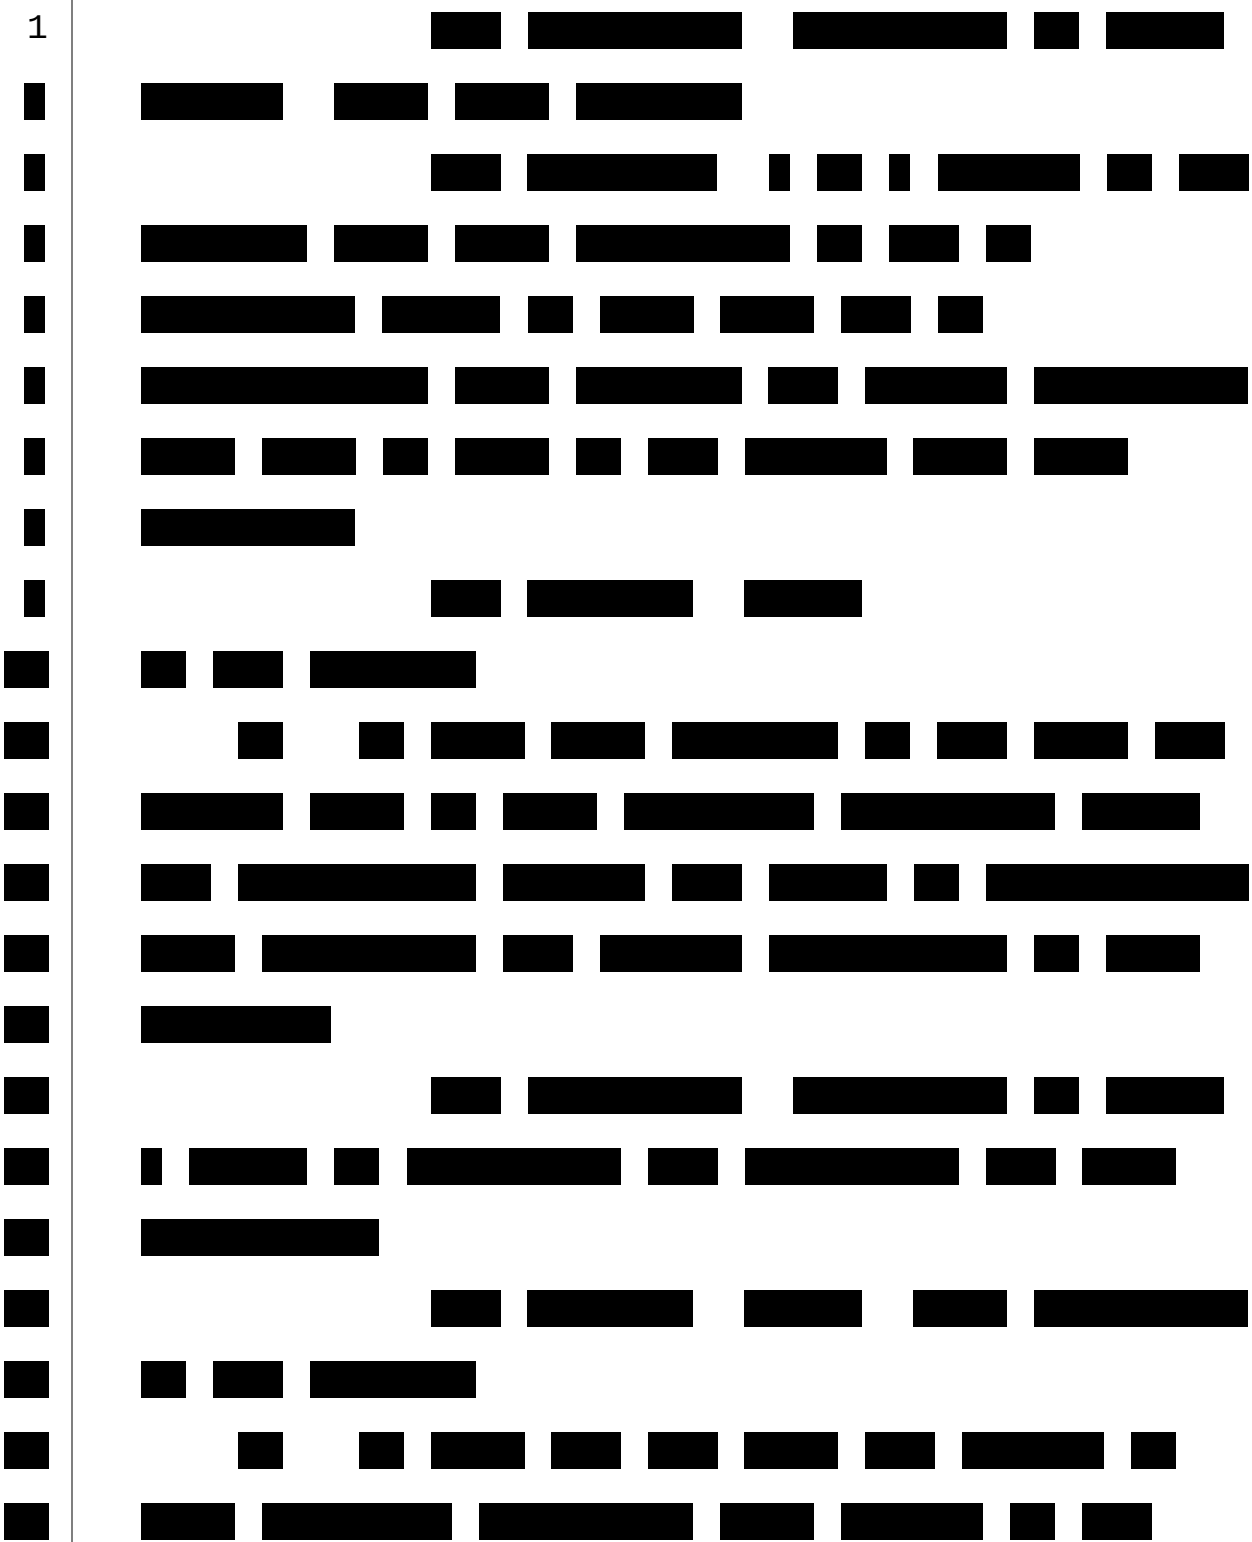
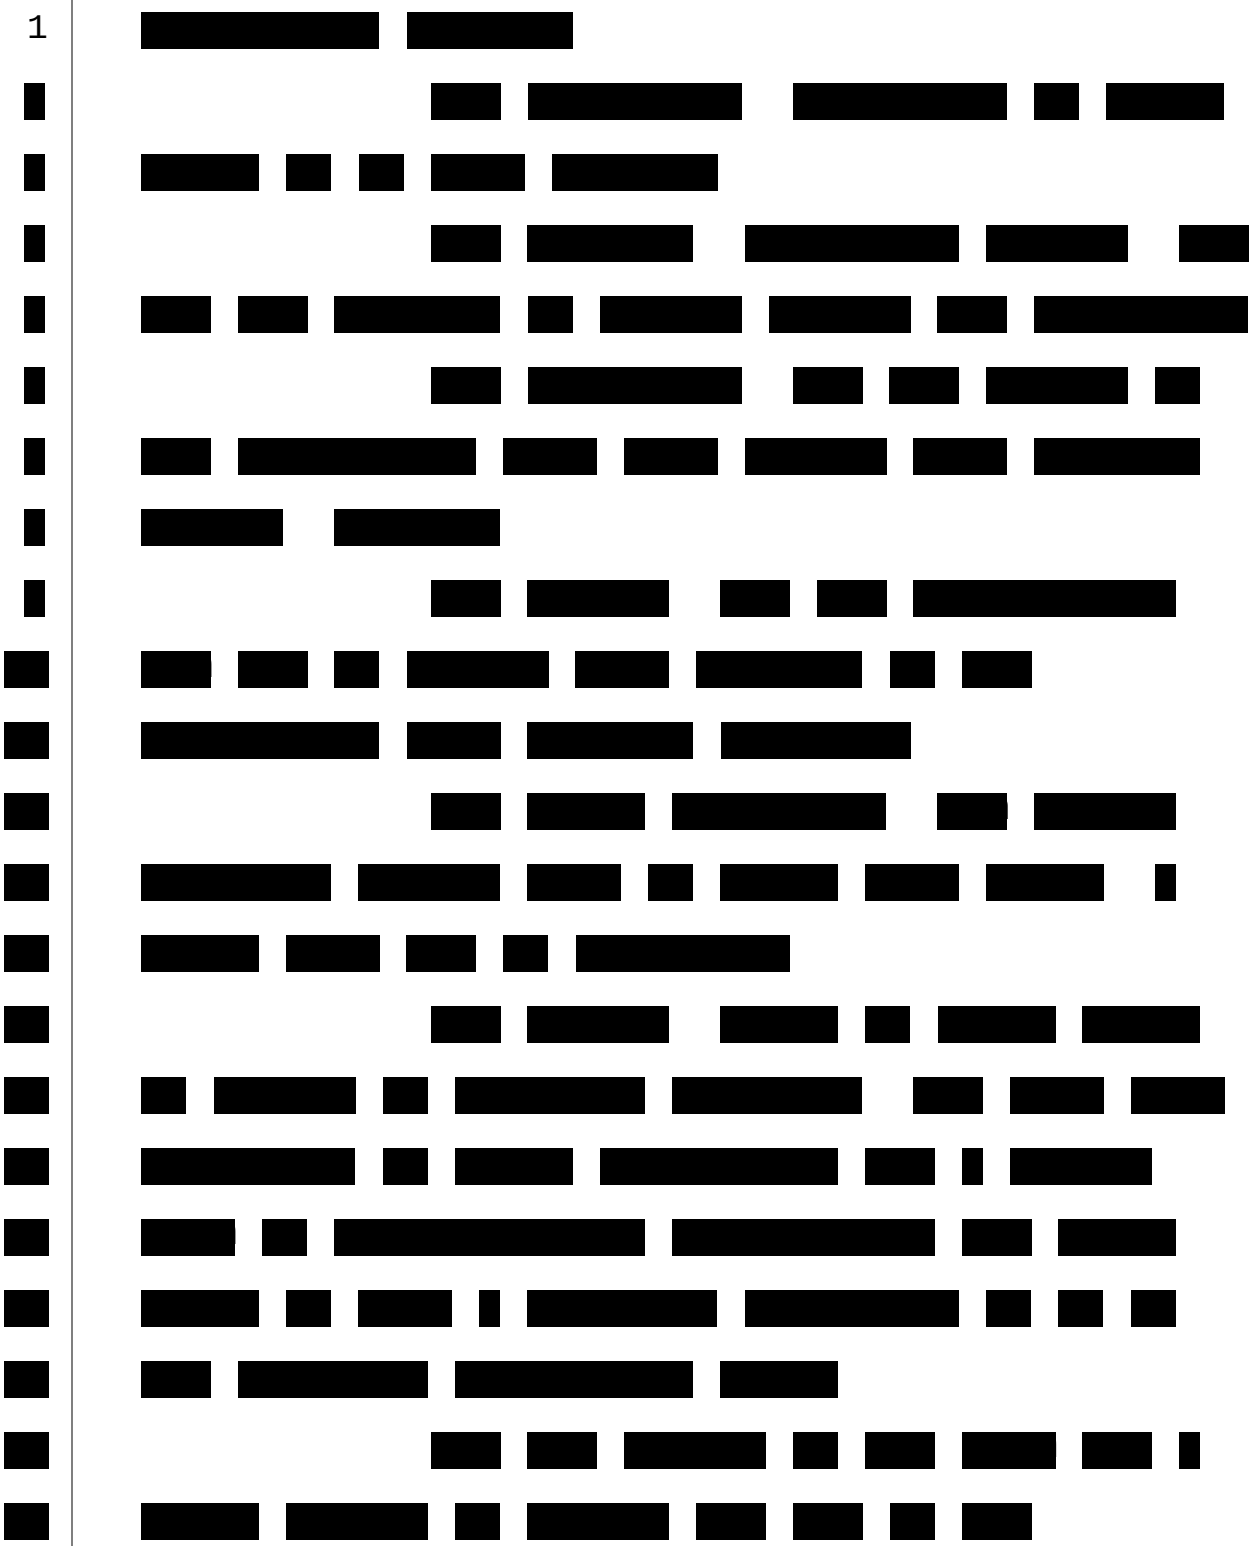
[redacted]



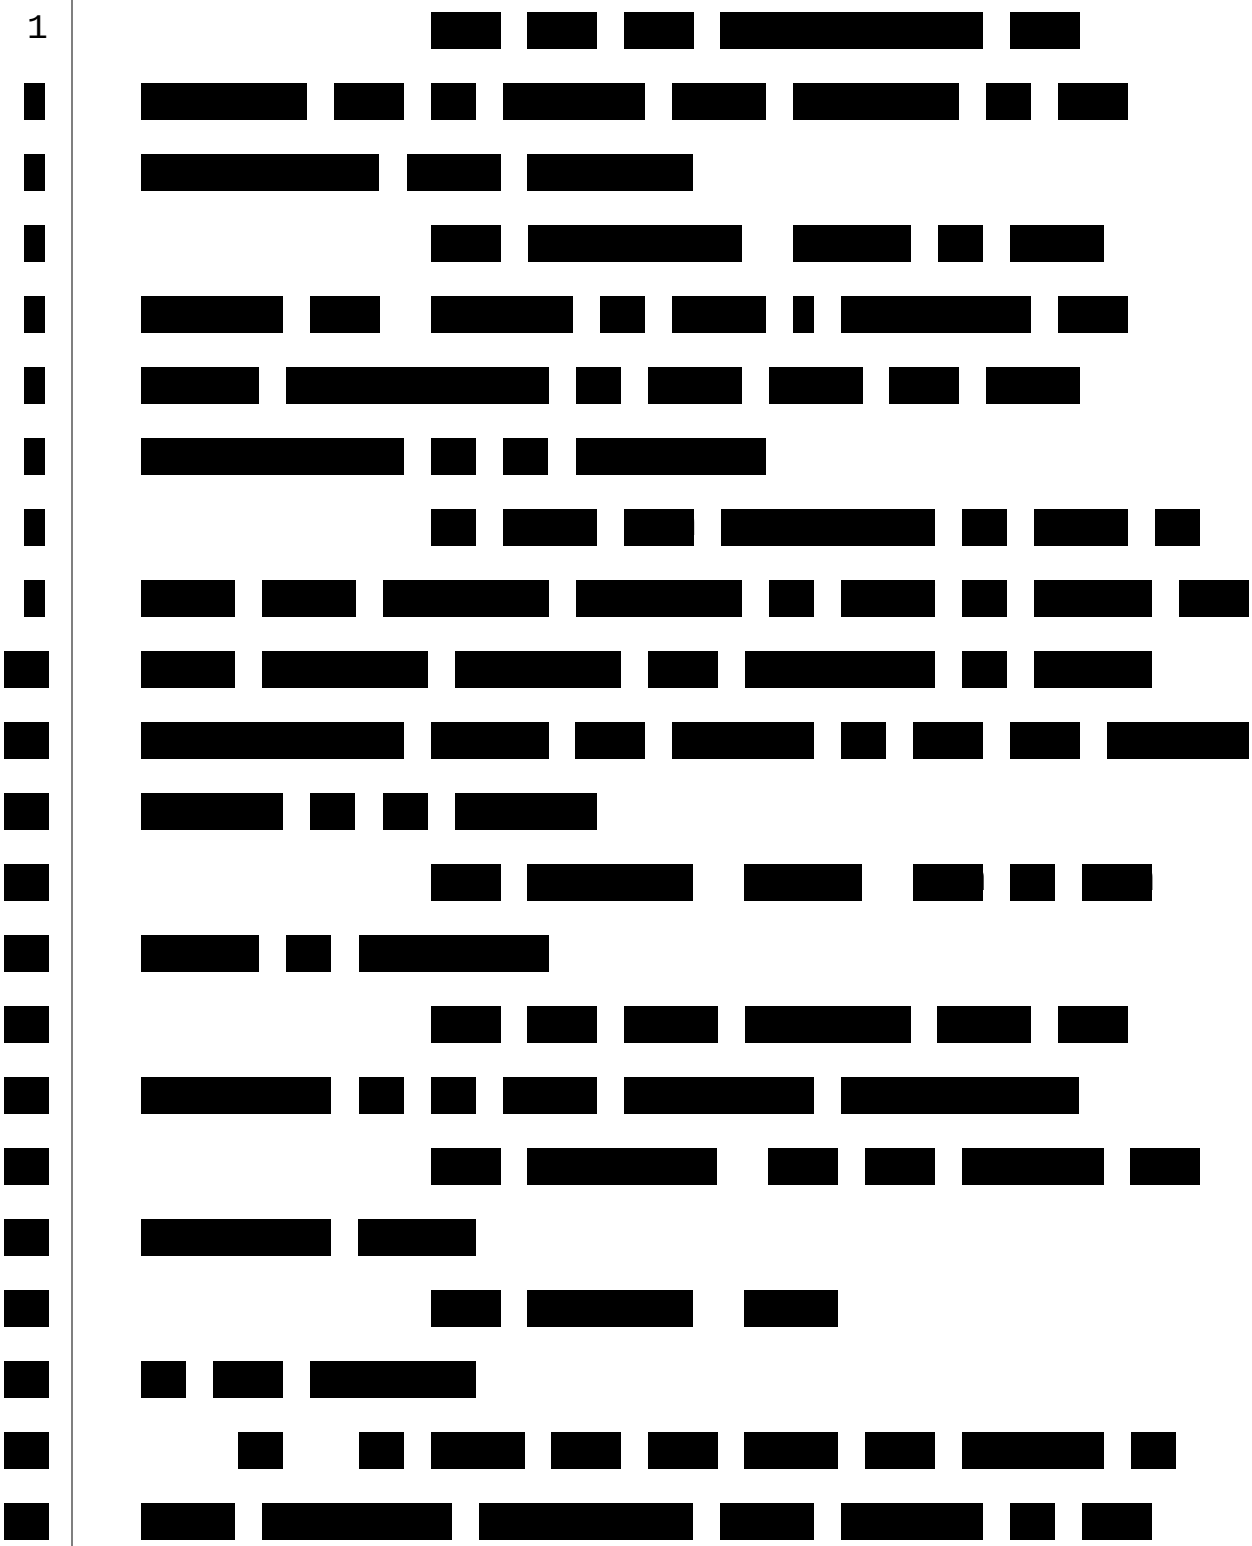
Q. This will be a quick digression, but can we look at Envelope J, Exhibit 2.

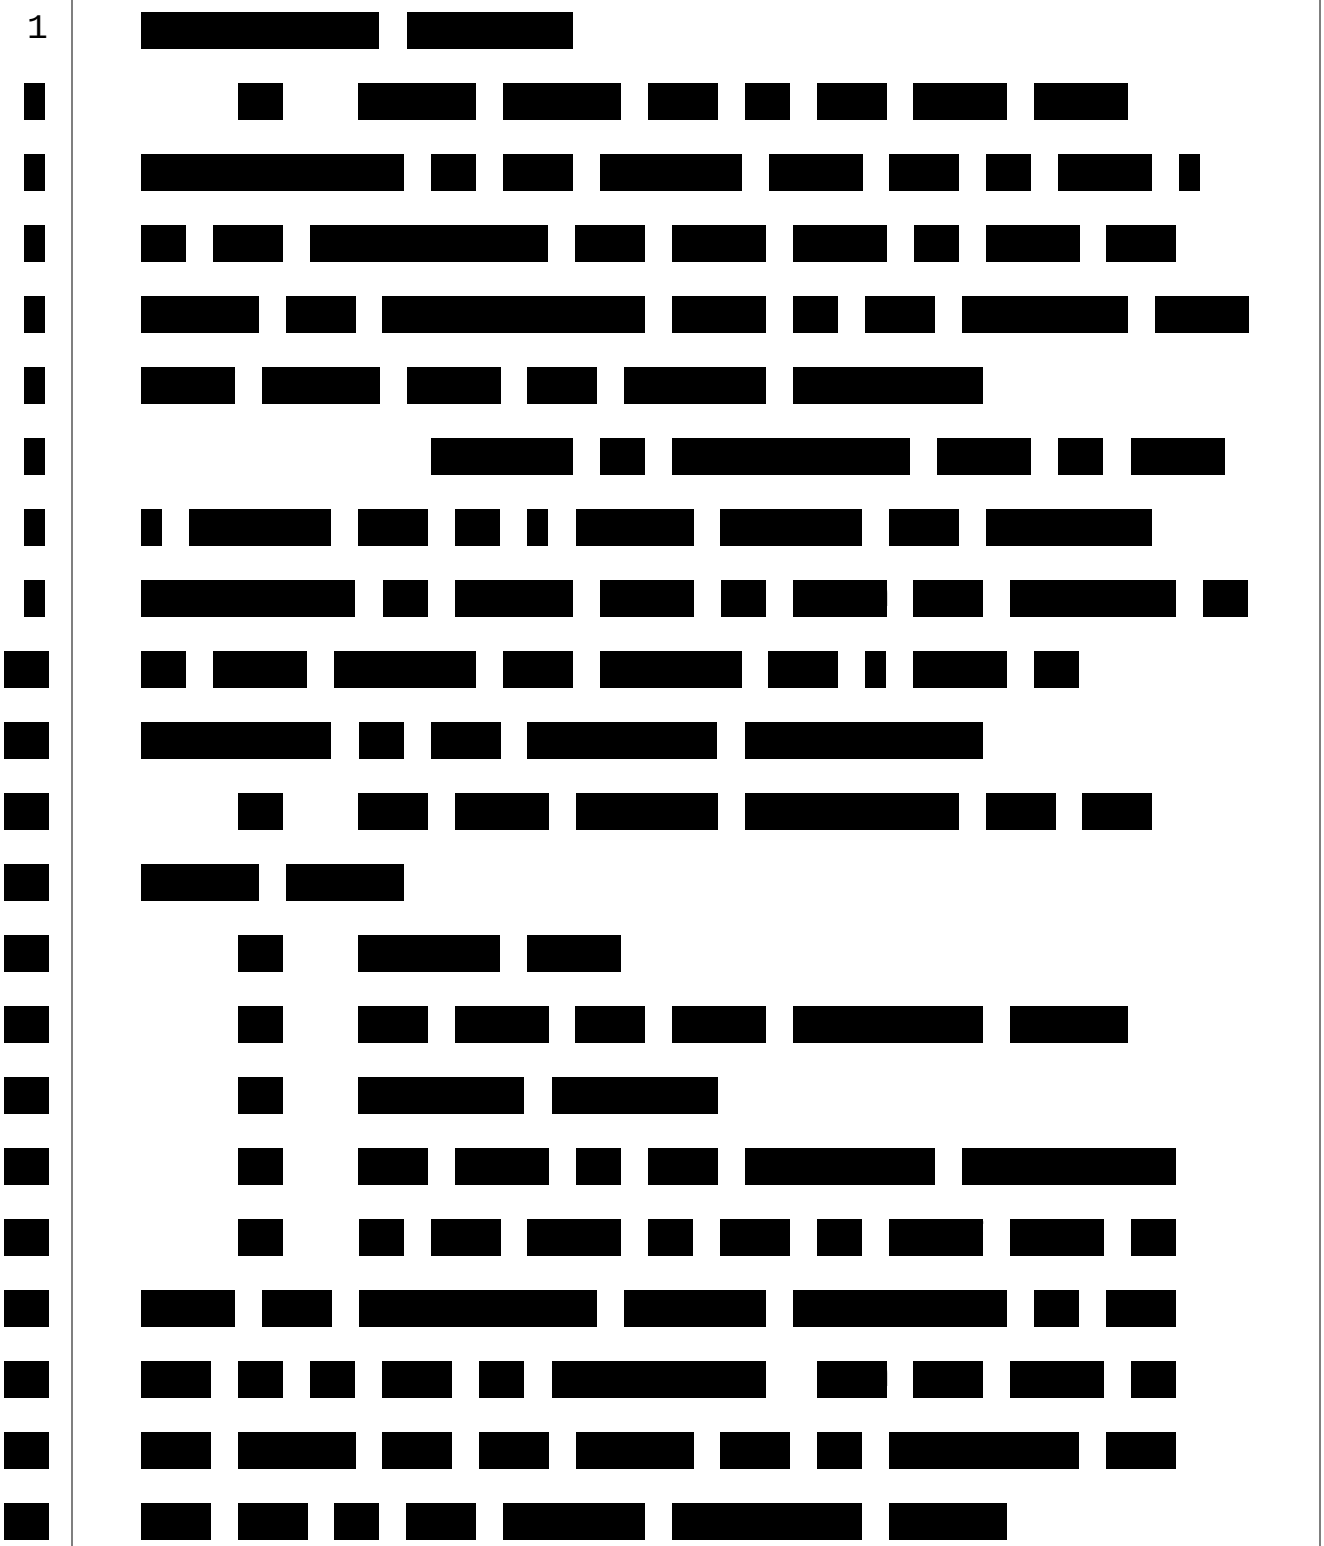


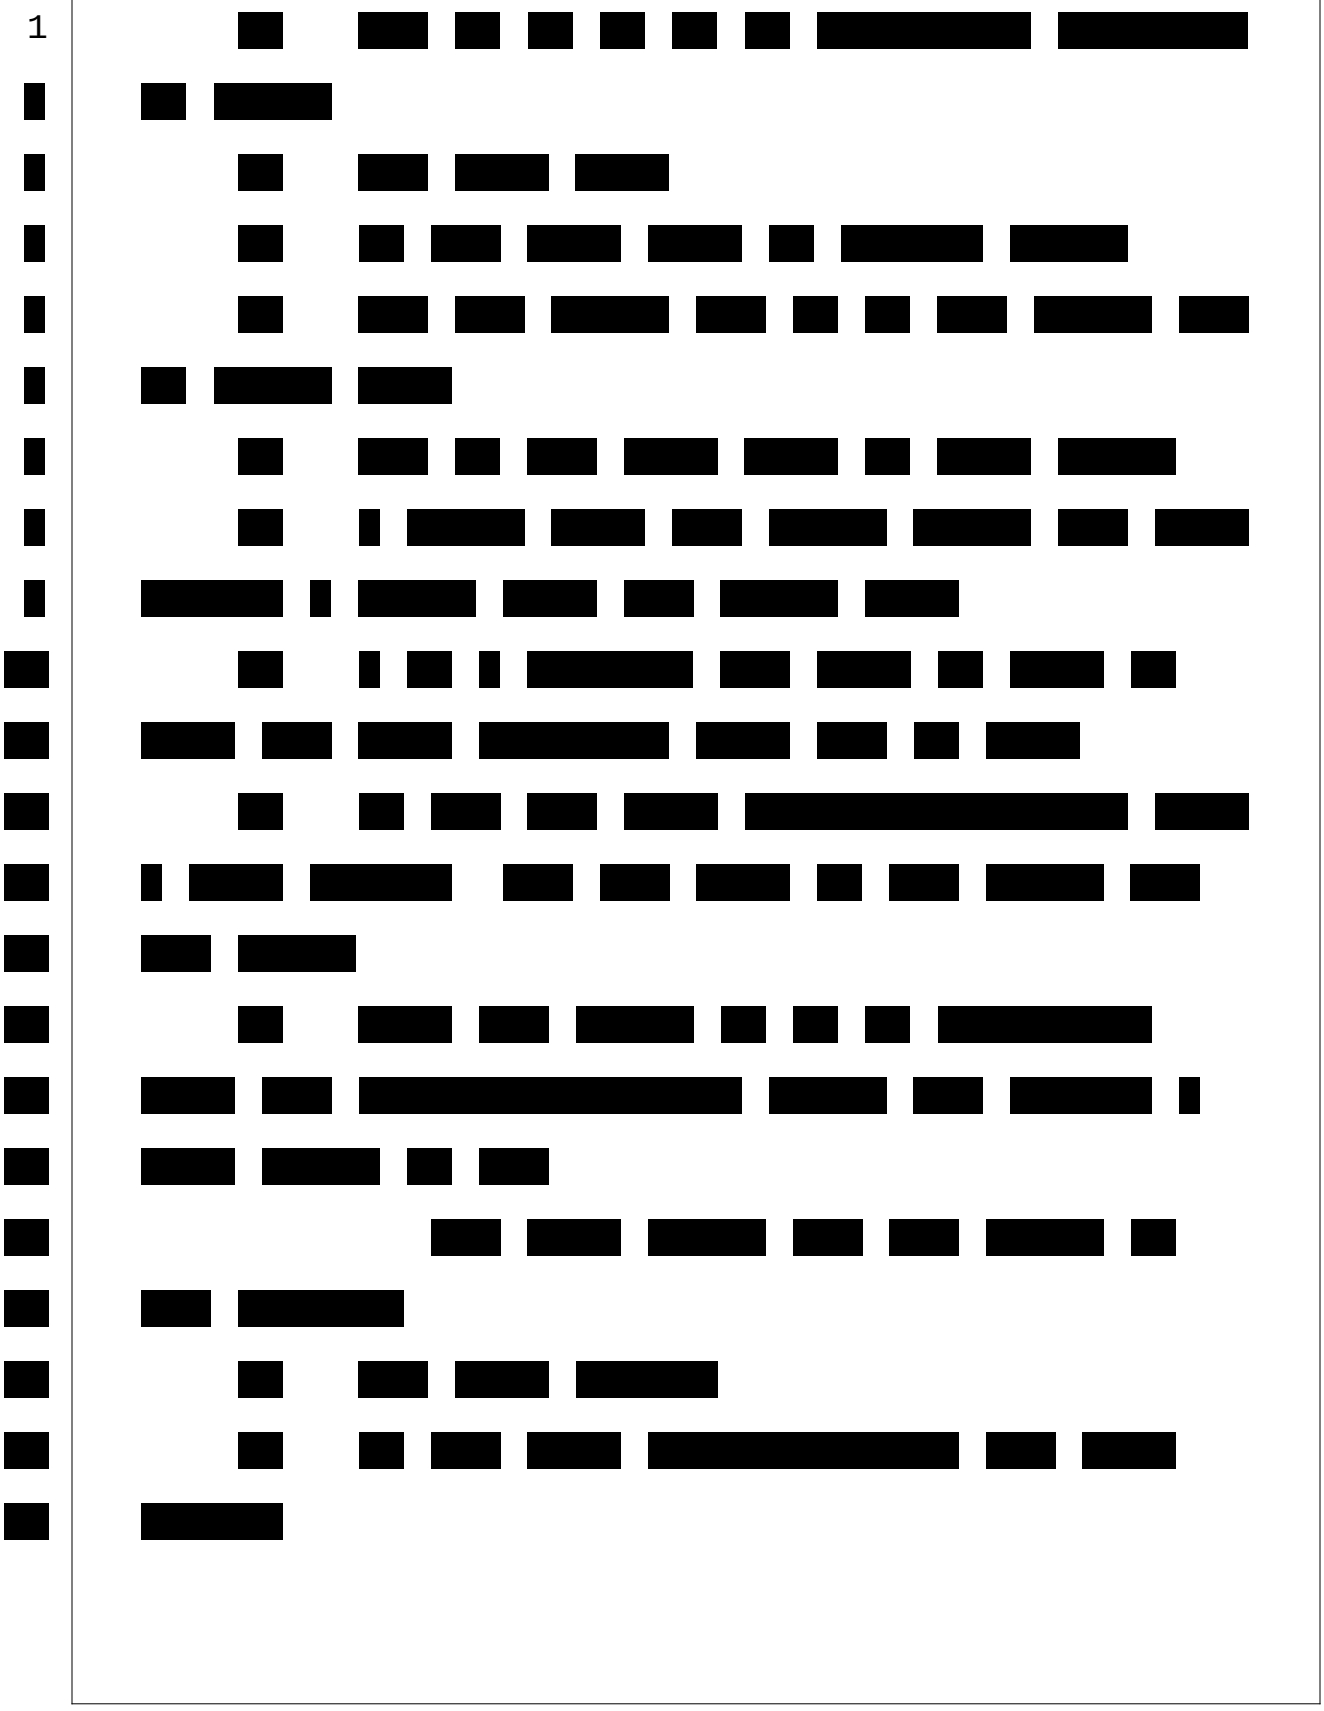
(Whereupon, a document was marked, for identification purposes, as Exhibit 0002.)

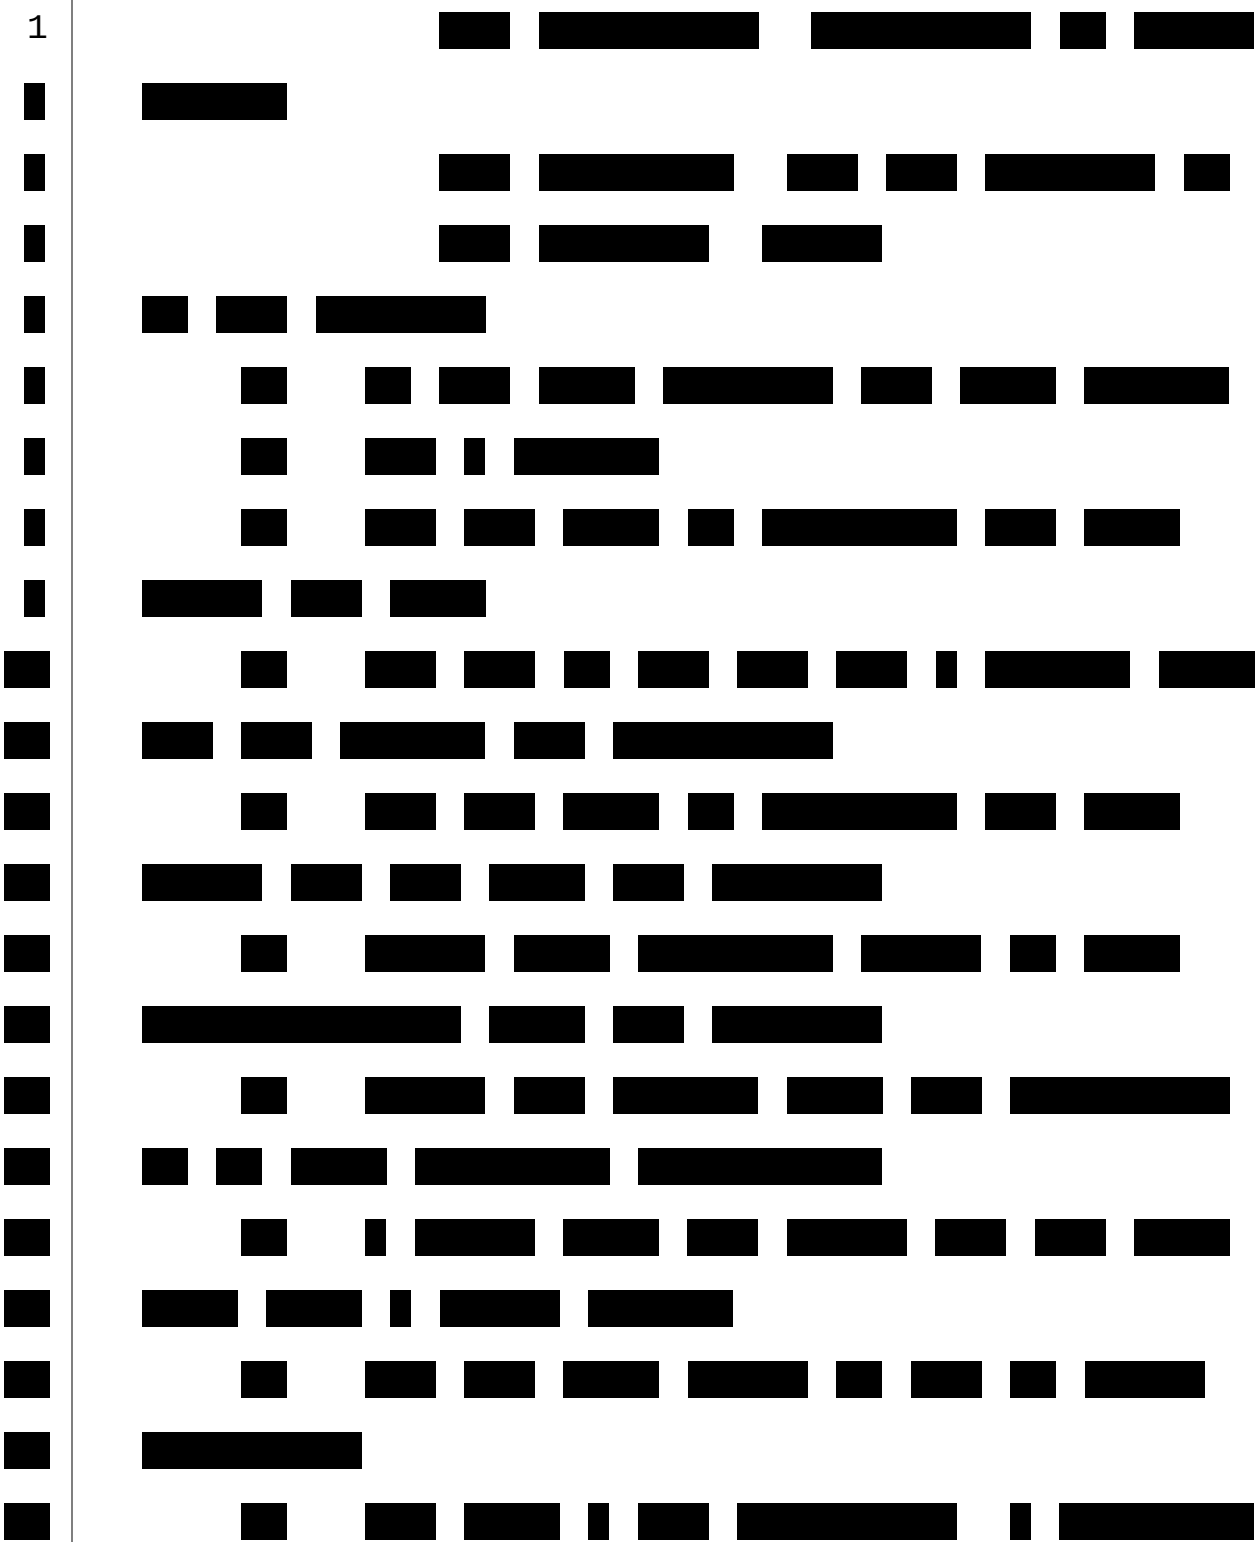


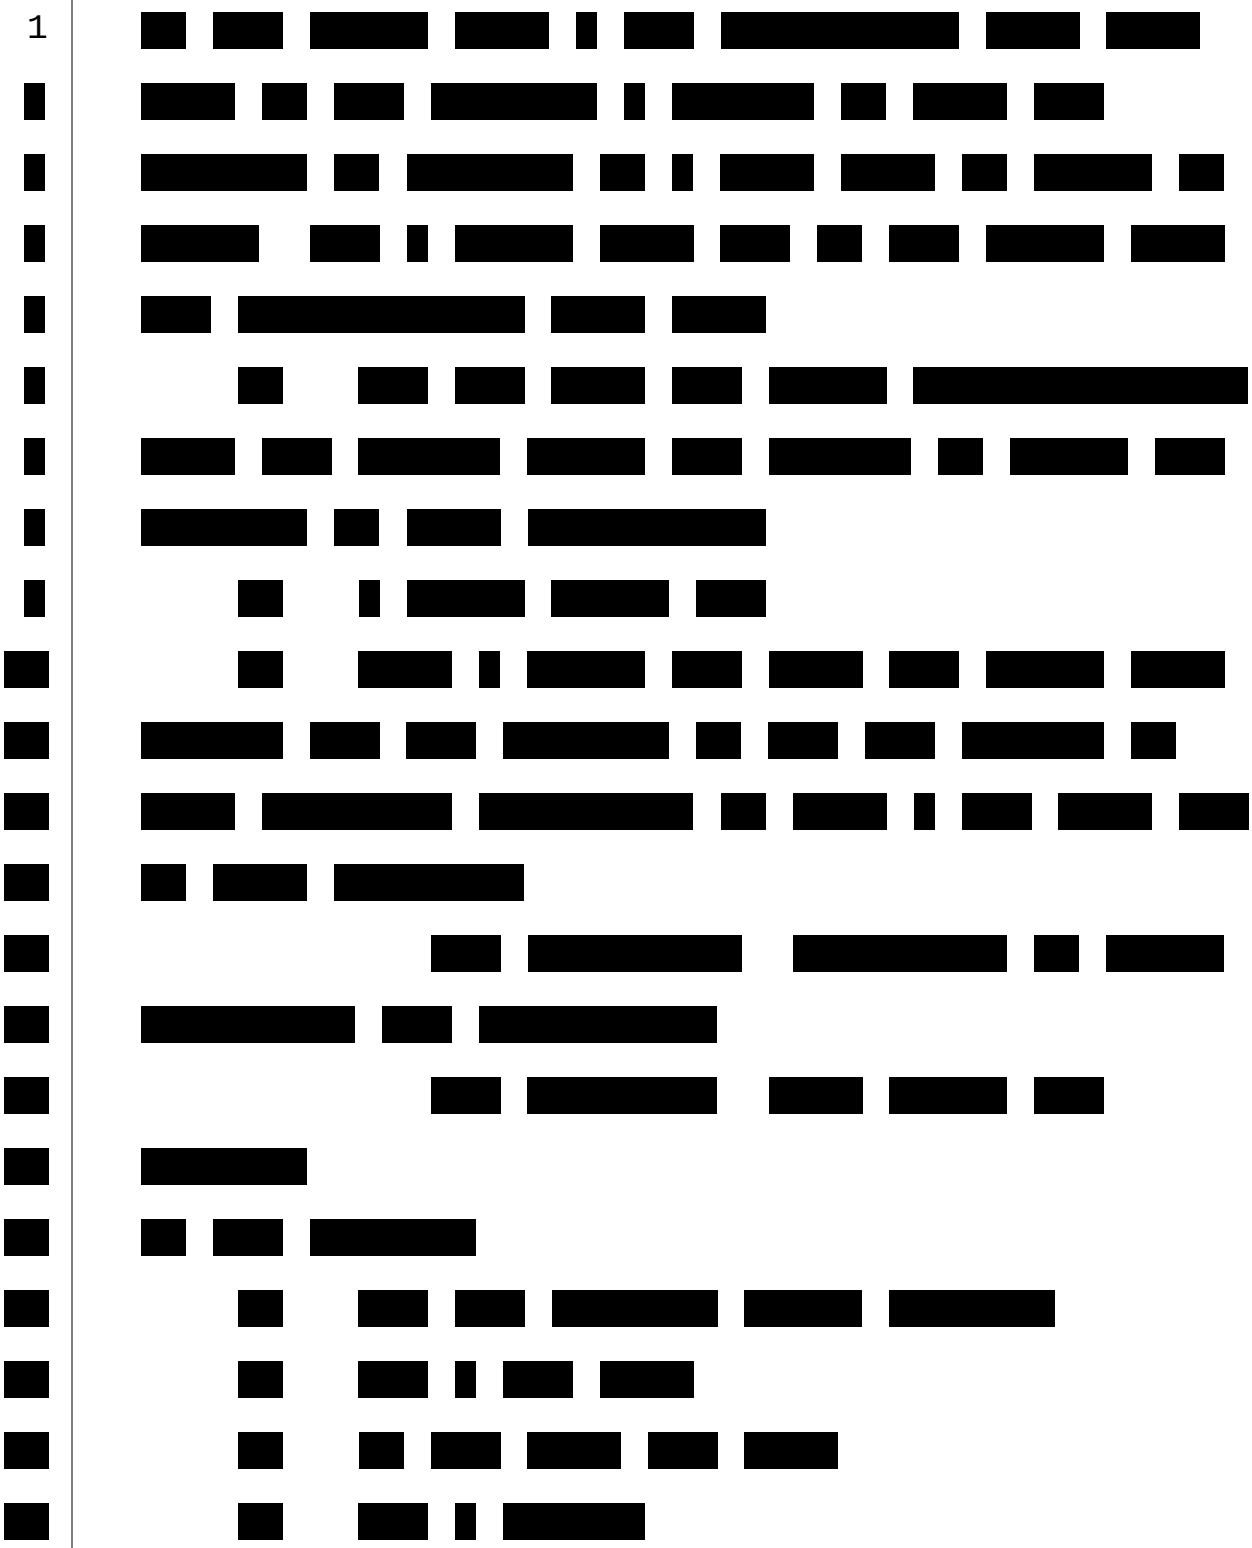
MR. HEFLIN: And Julia will introduce it in Exhibit Share.

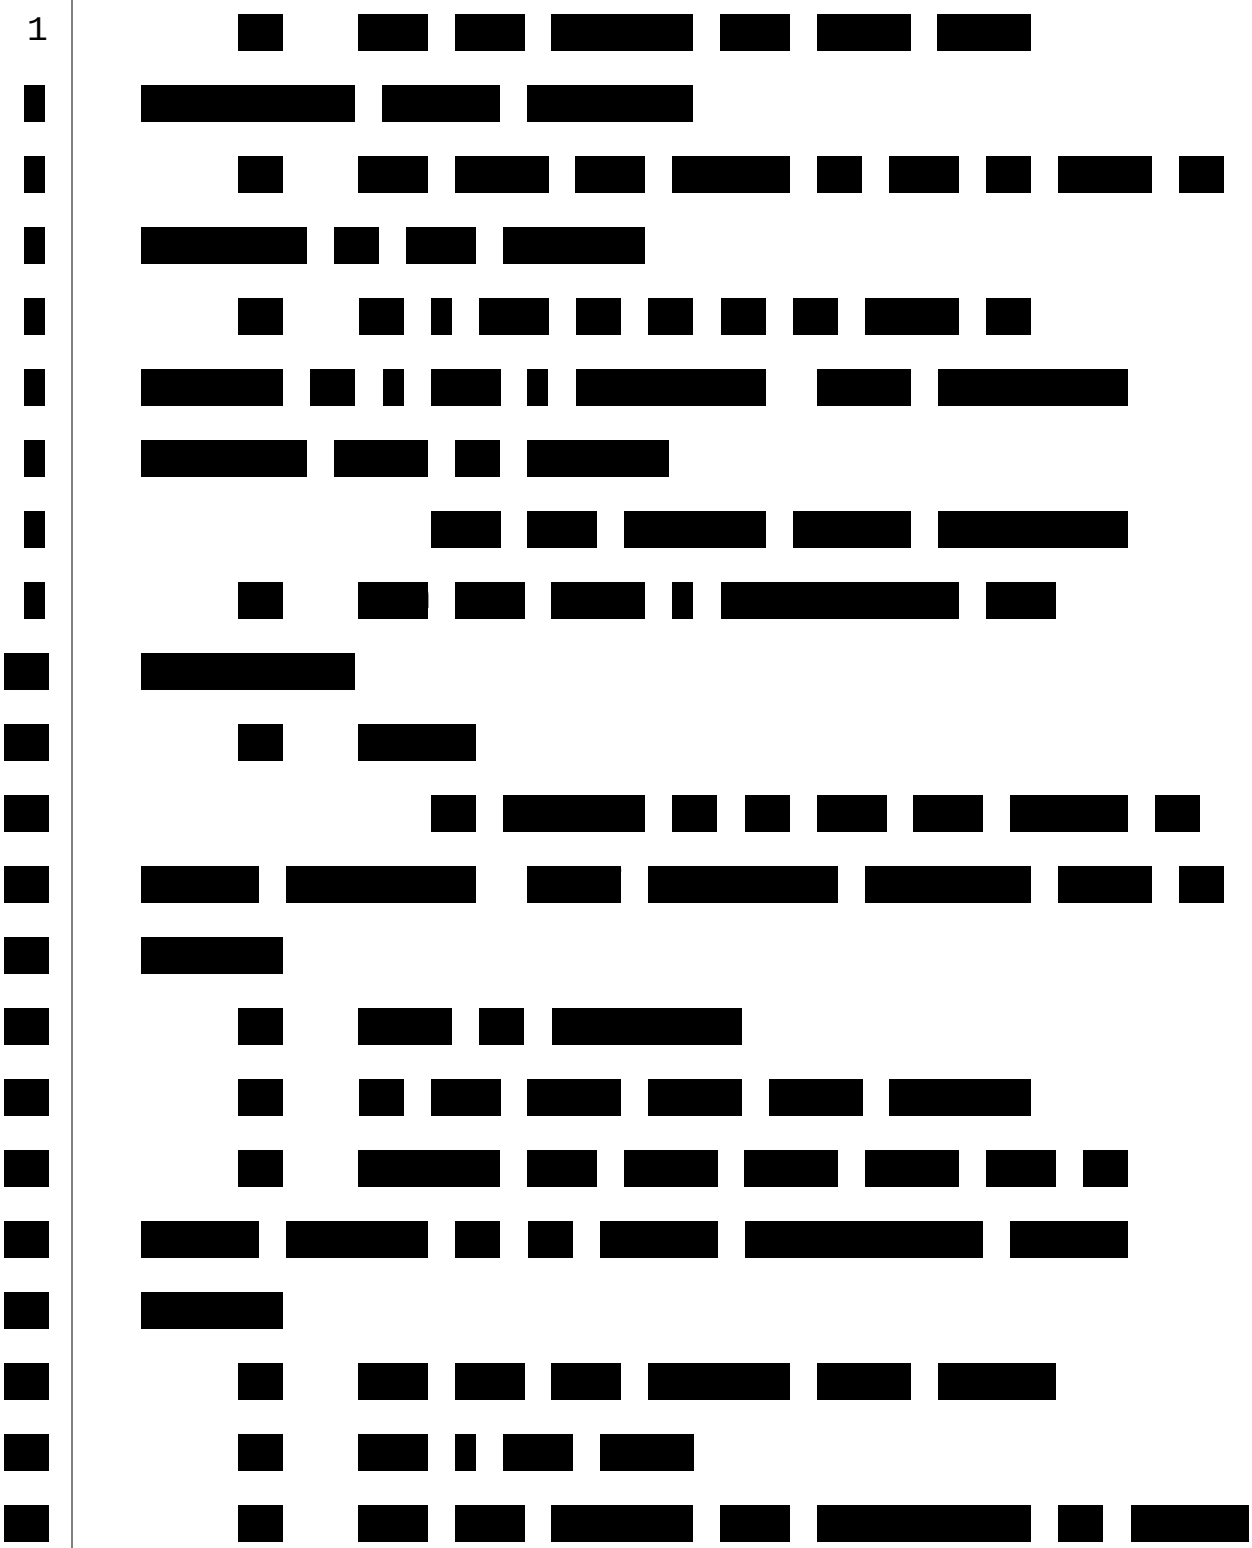


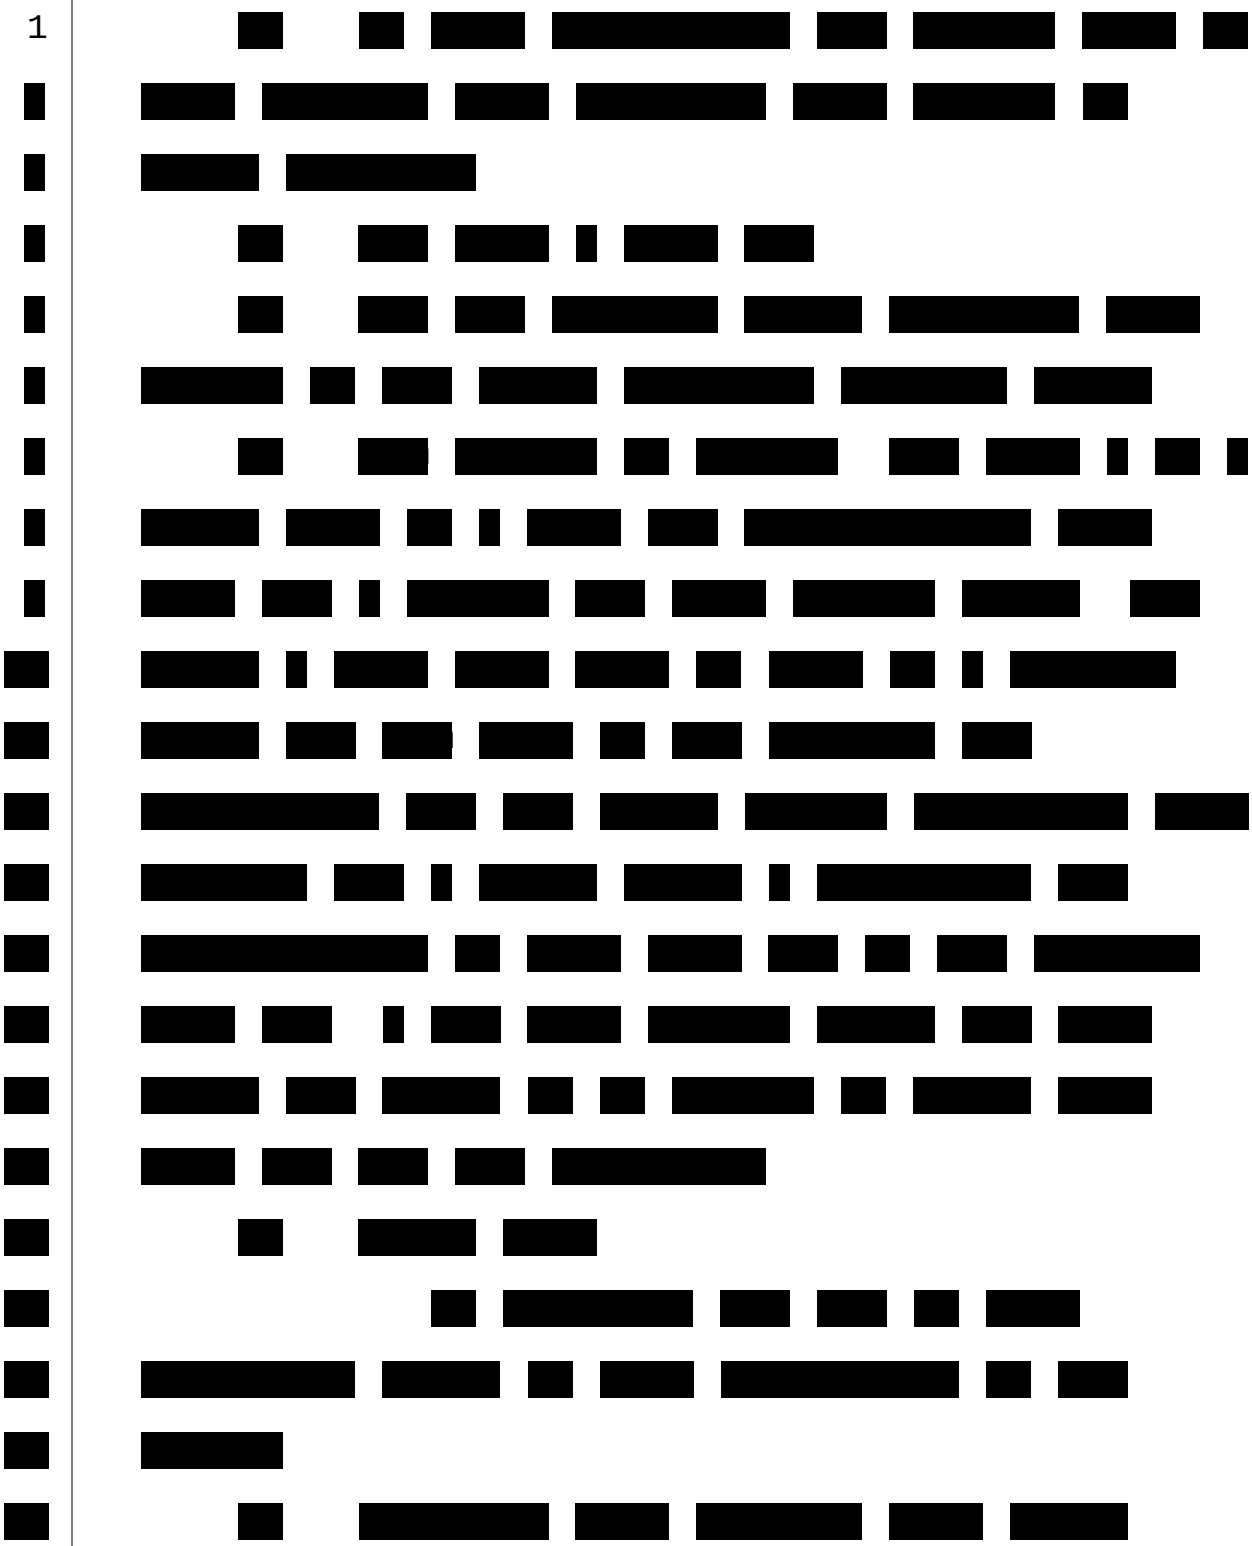








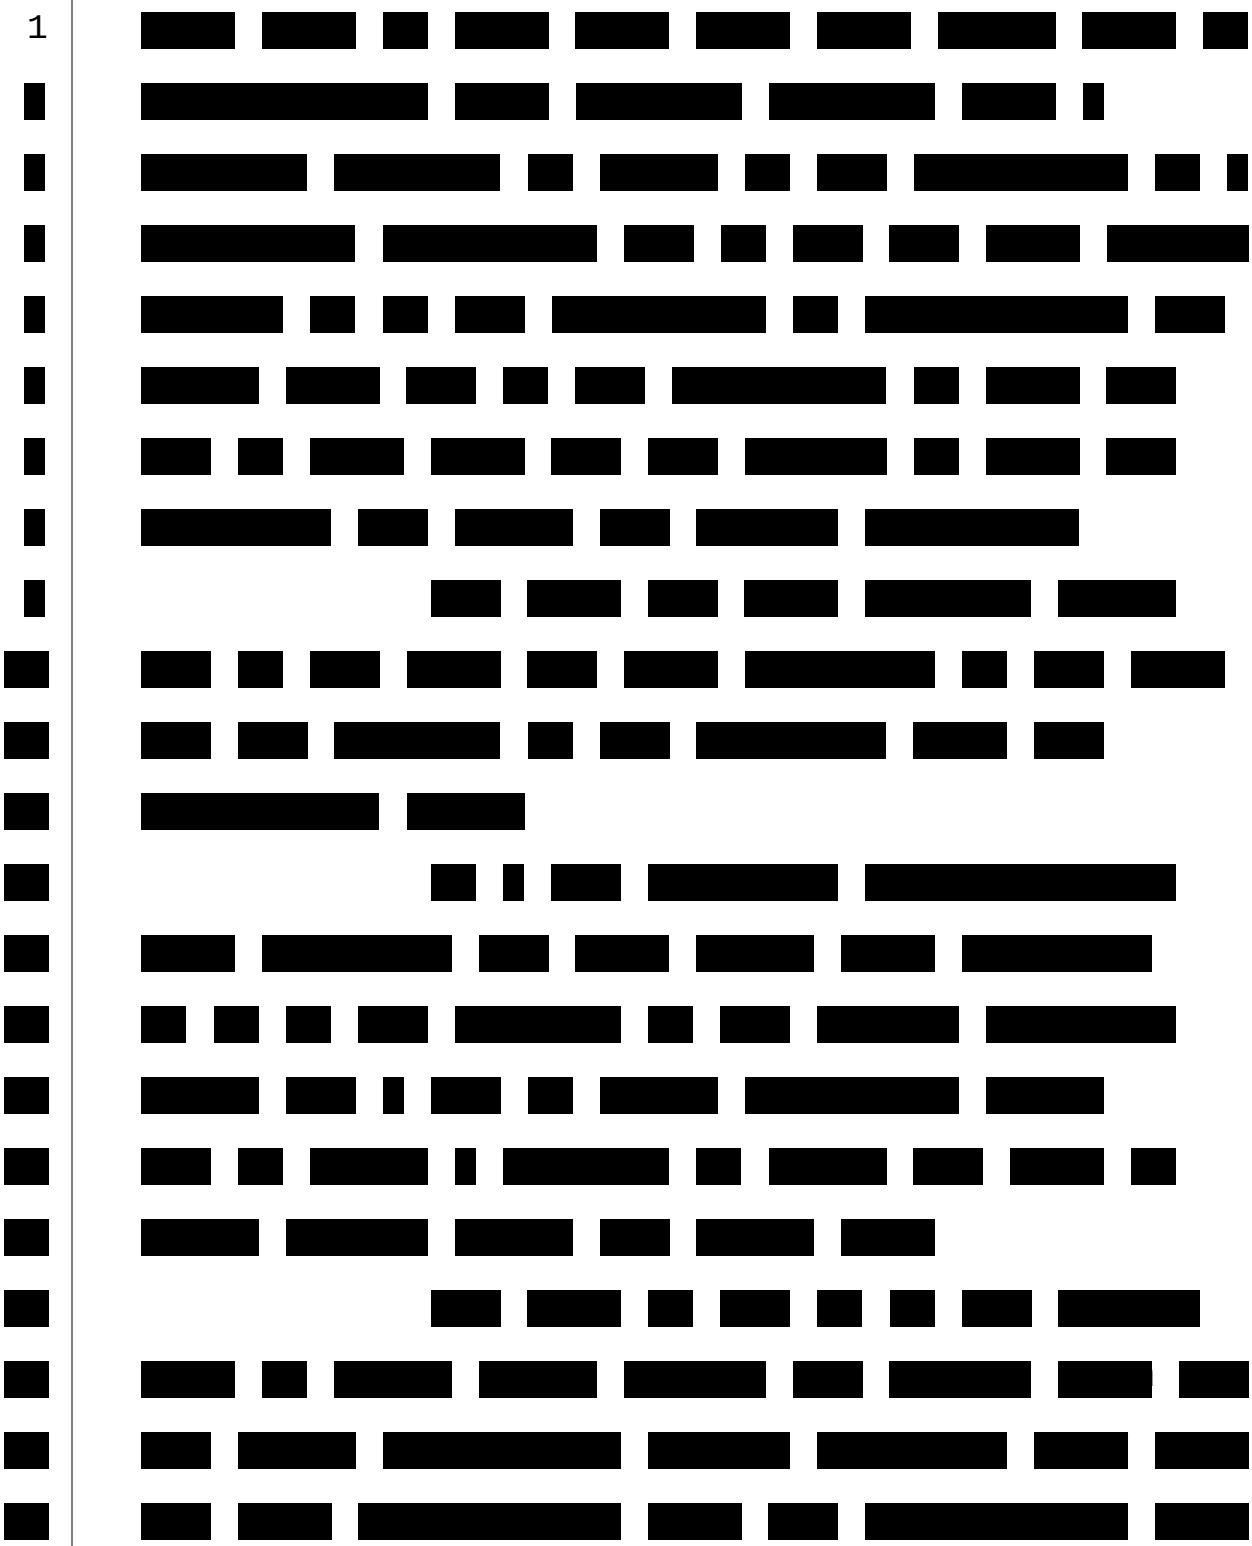




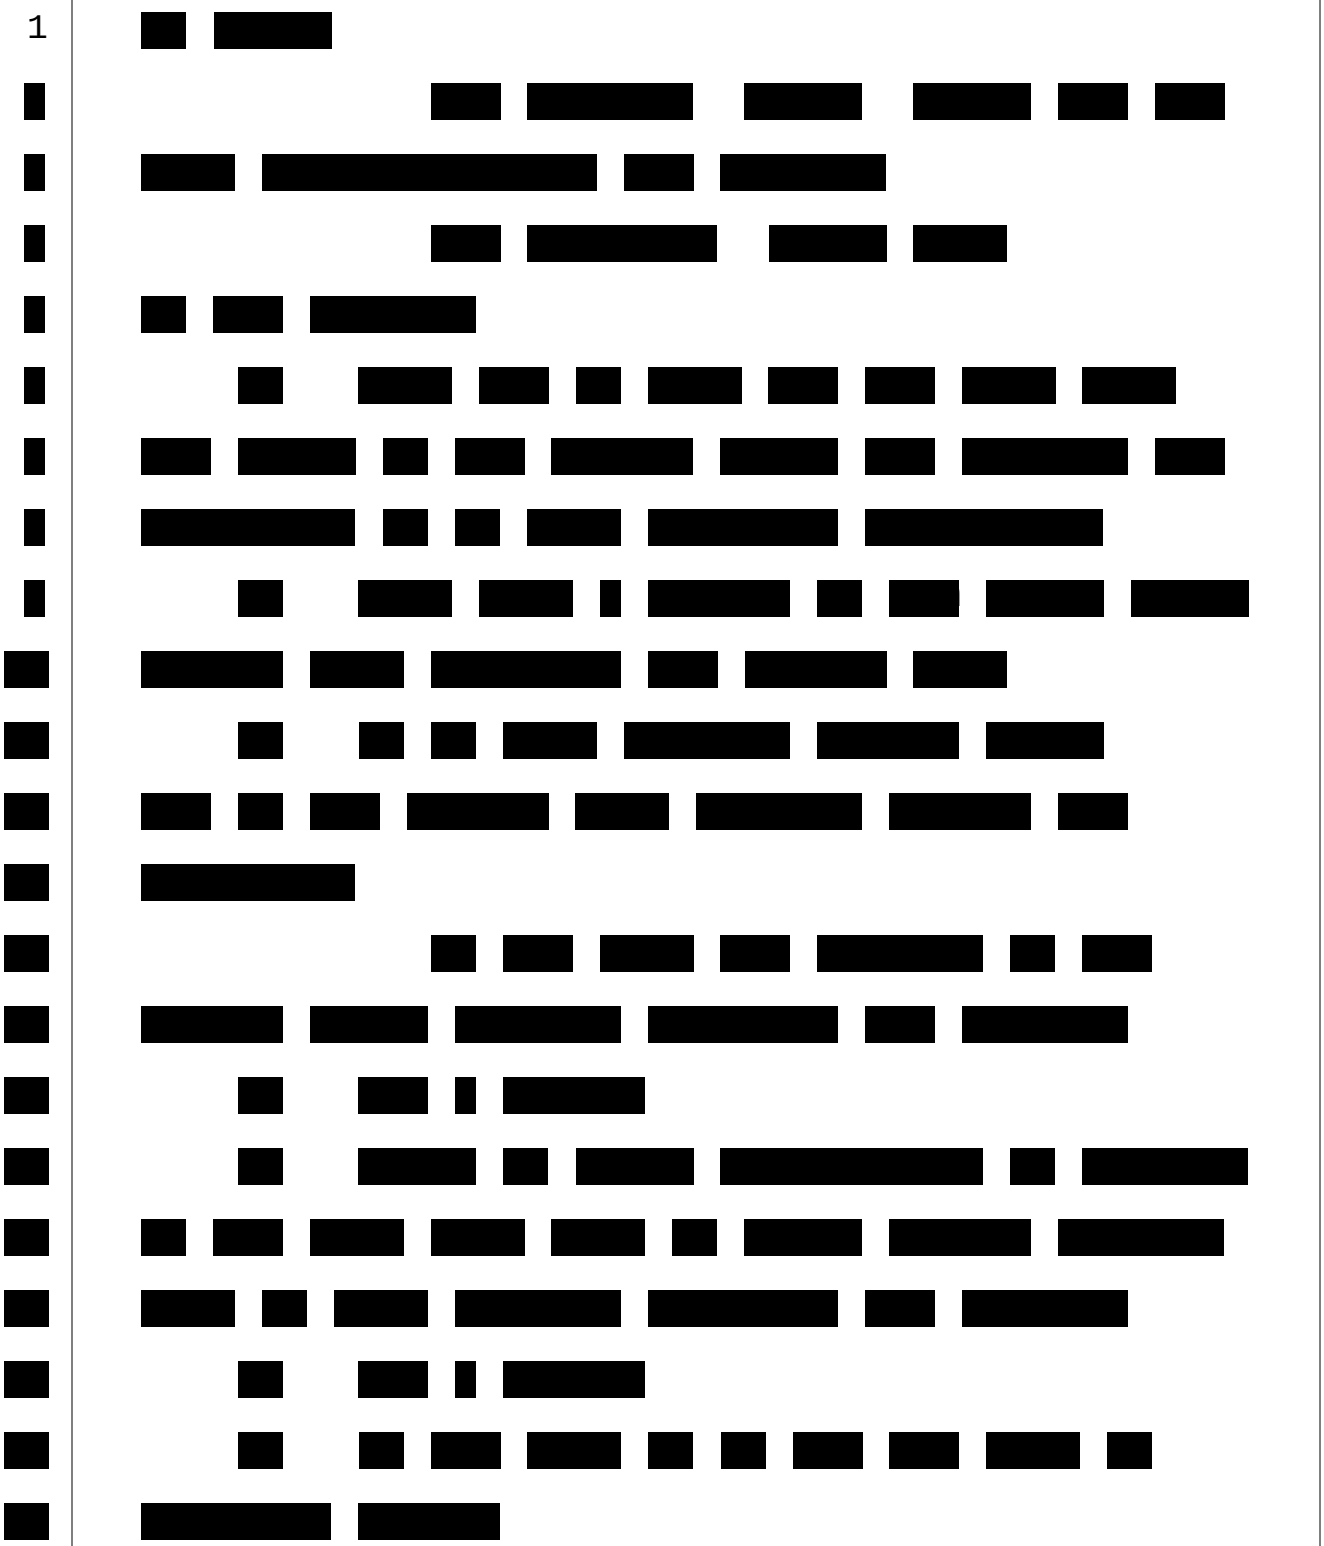
[redacted]

MR. HEFLIN: I think we've been going about an hour. Are you okay to keep moving forward or would you like a break?

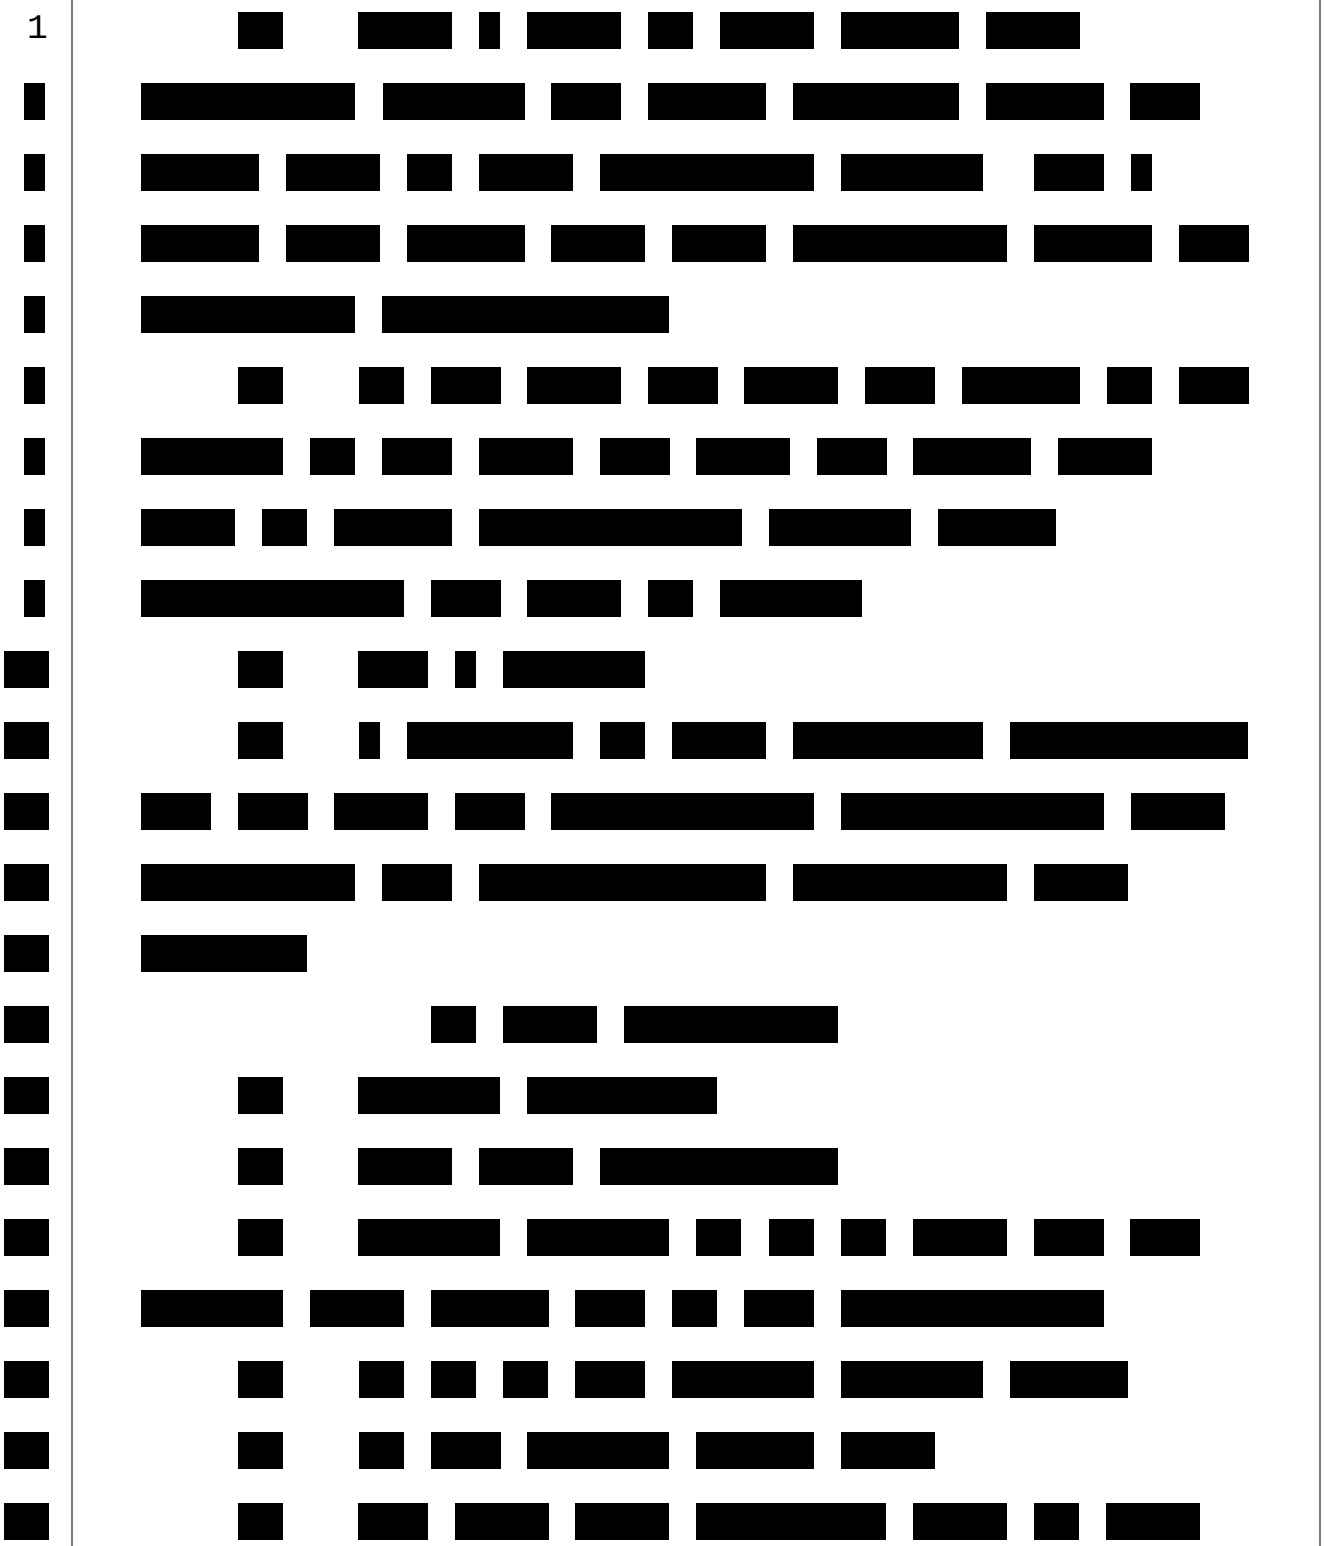
THE WITNESS: I'd rather have a quick break if we can.



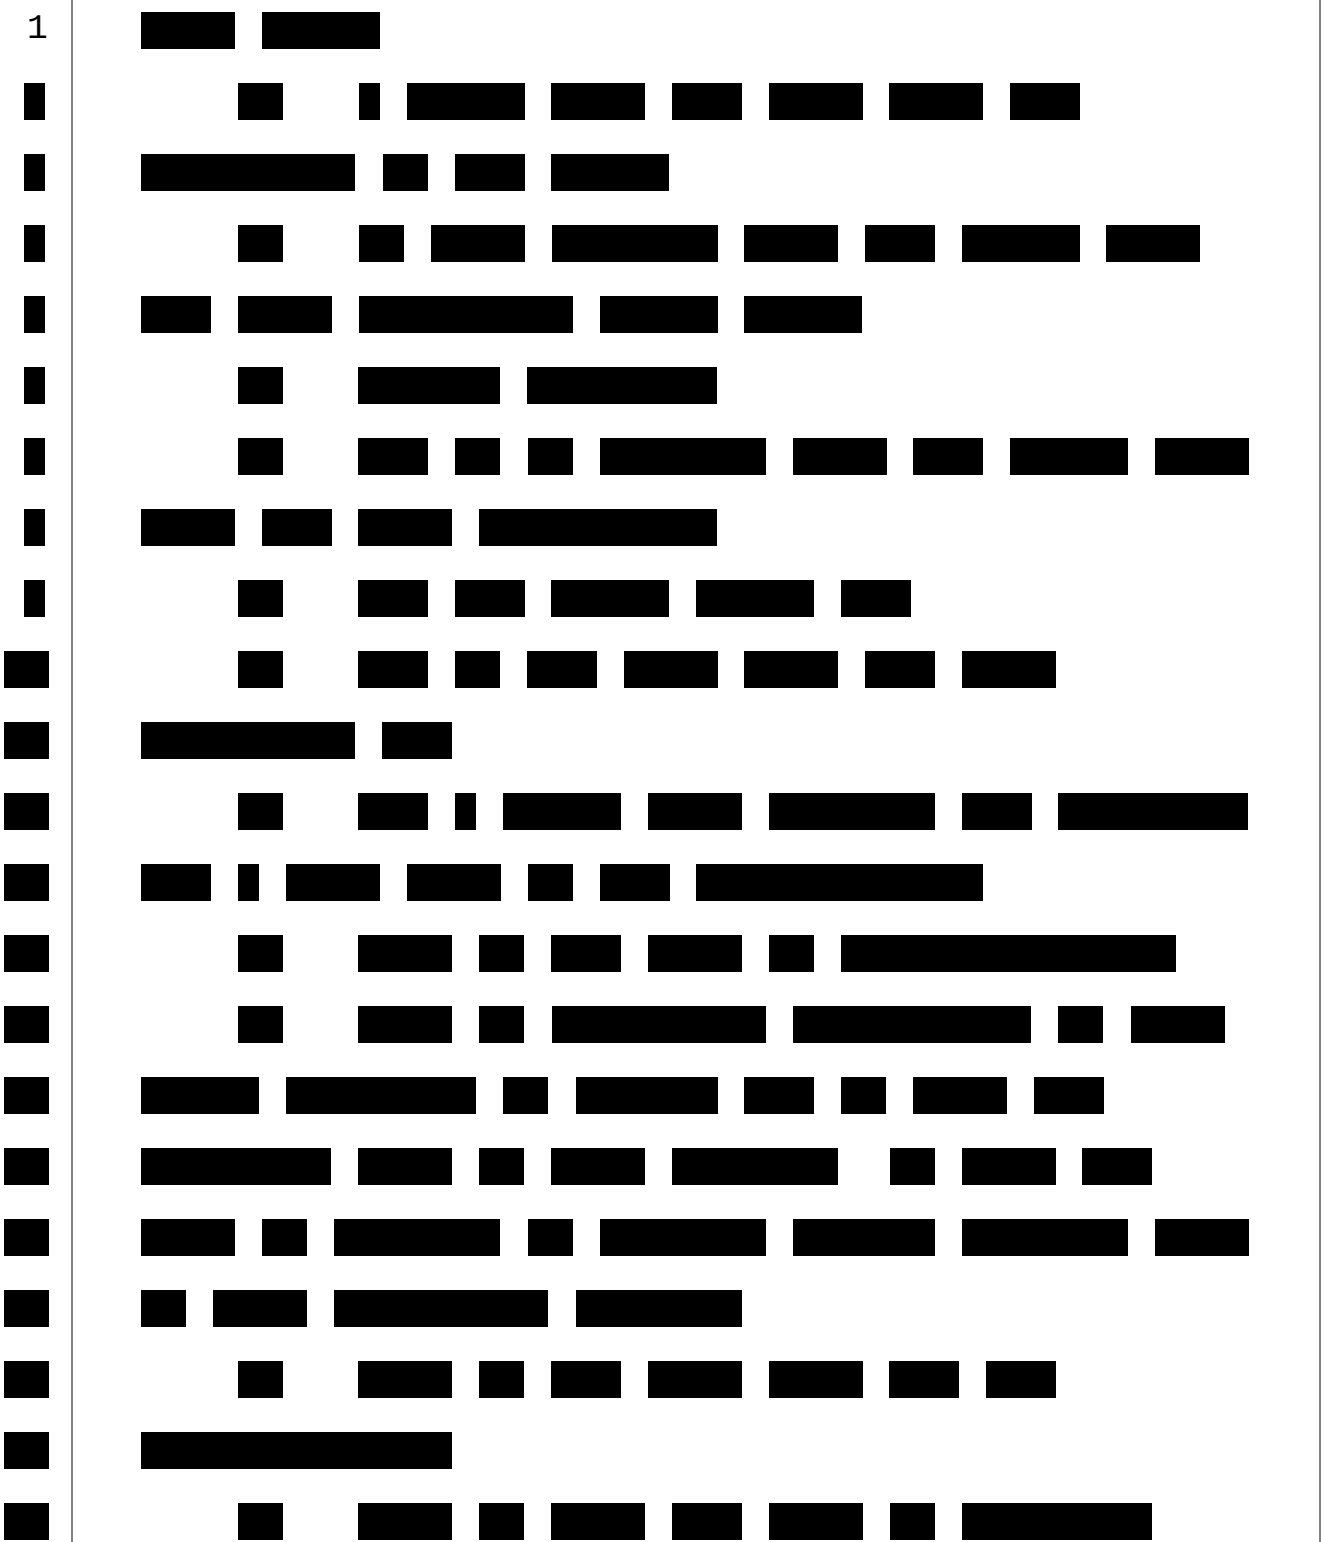
MR. HEFLIN: That's fine with me.



THE VIDEOGRAPHER: We're going off the record. The time is 10:18 a.m.

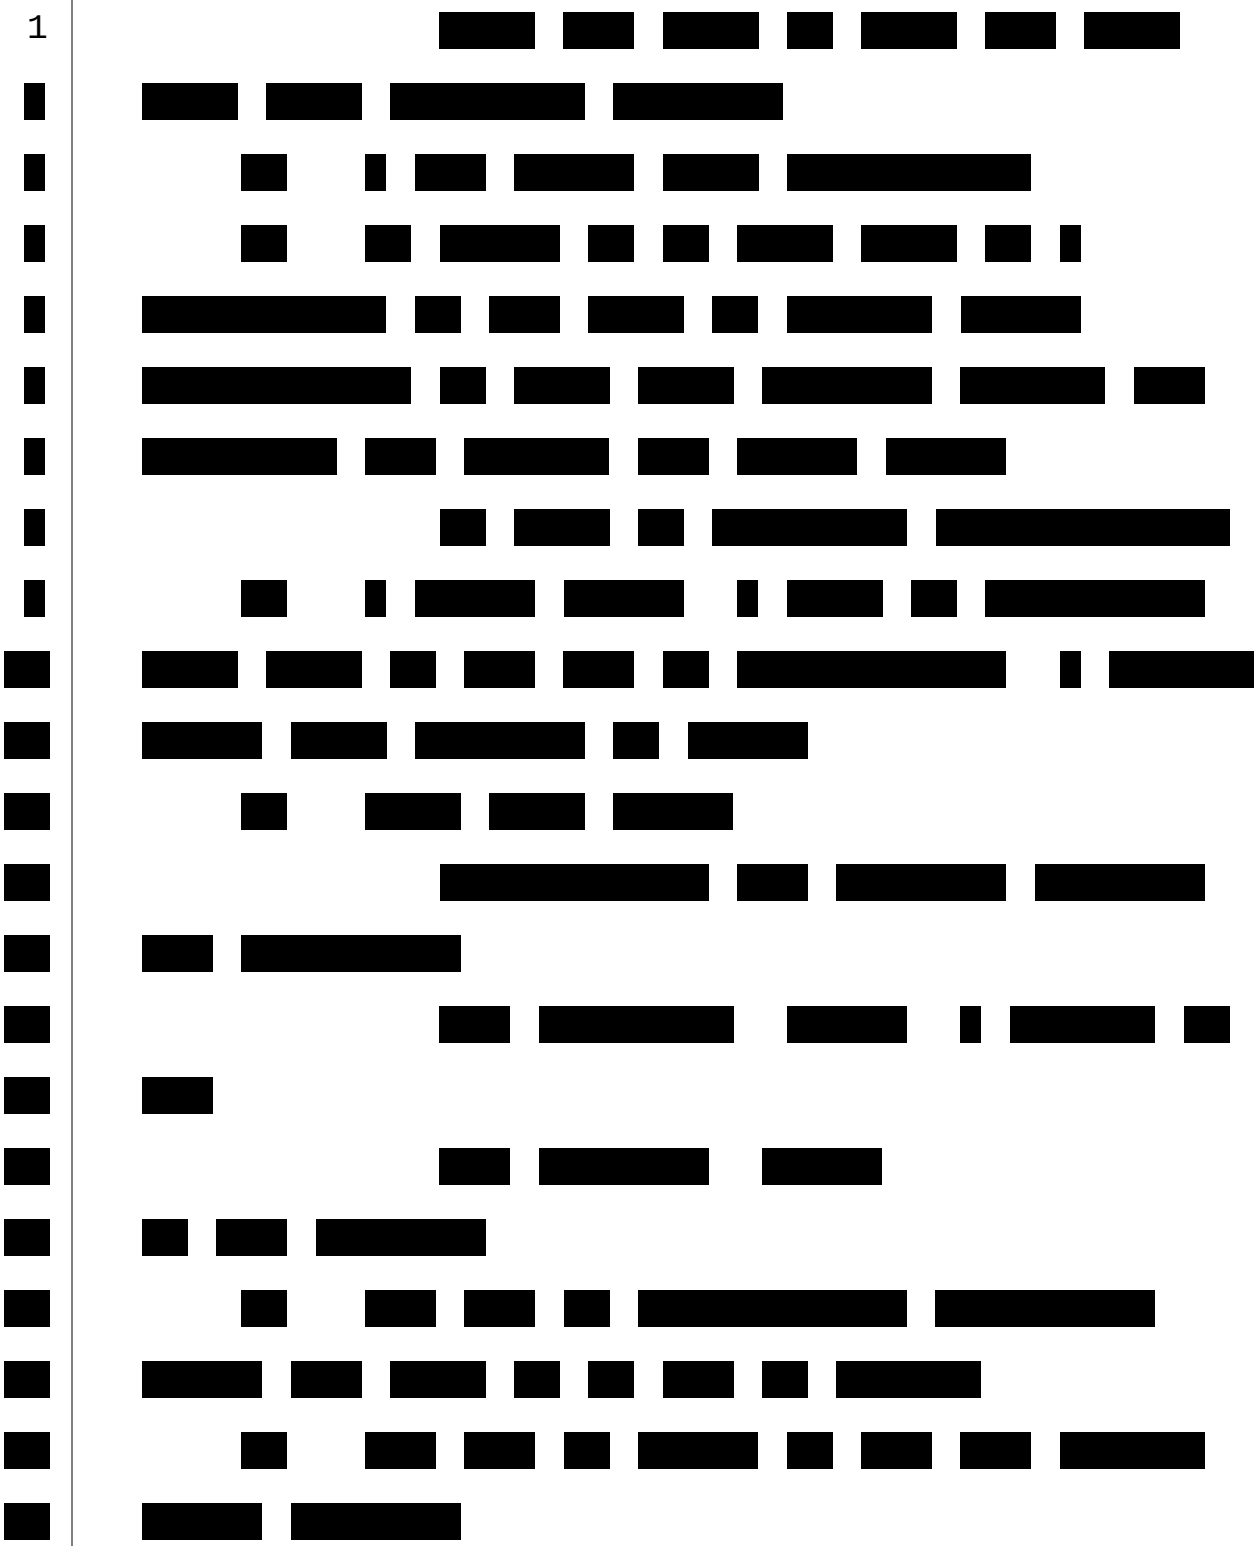


(Whereupon, a recess was taken at the above time.)

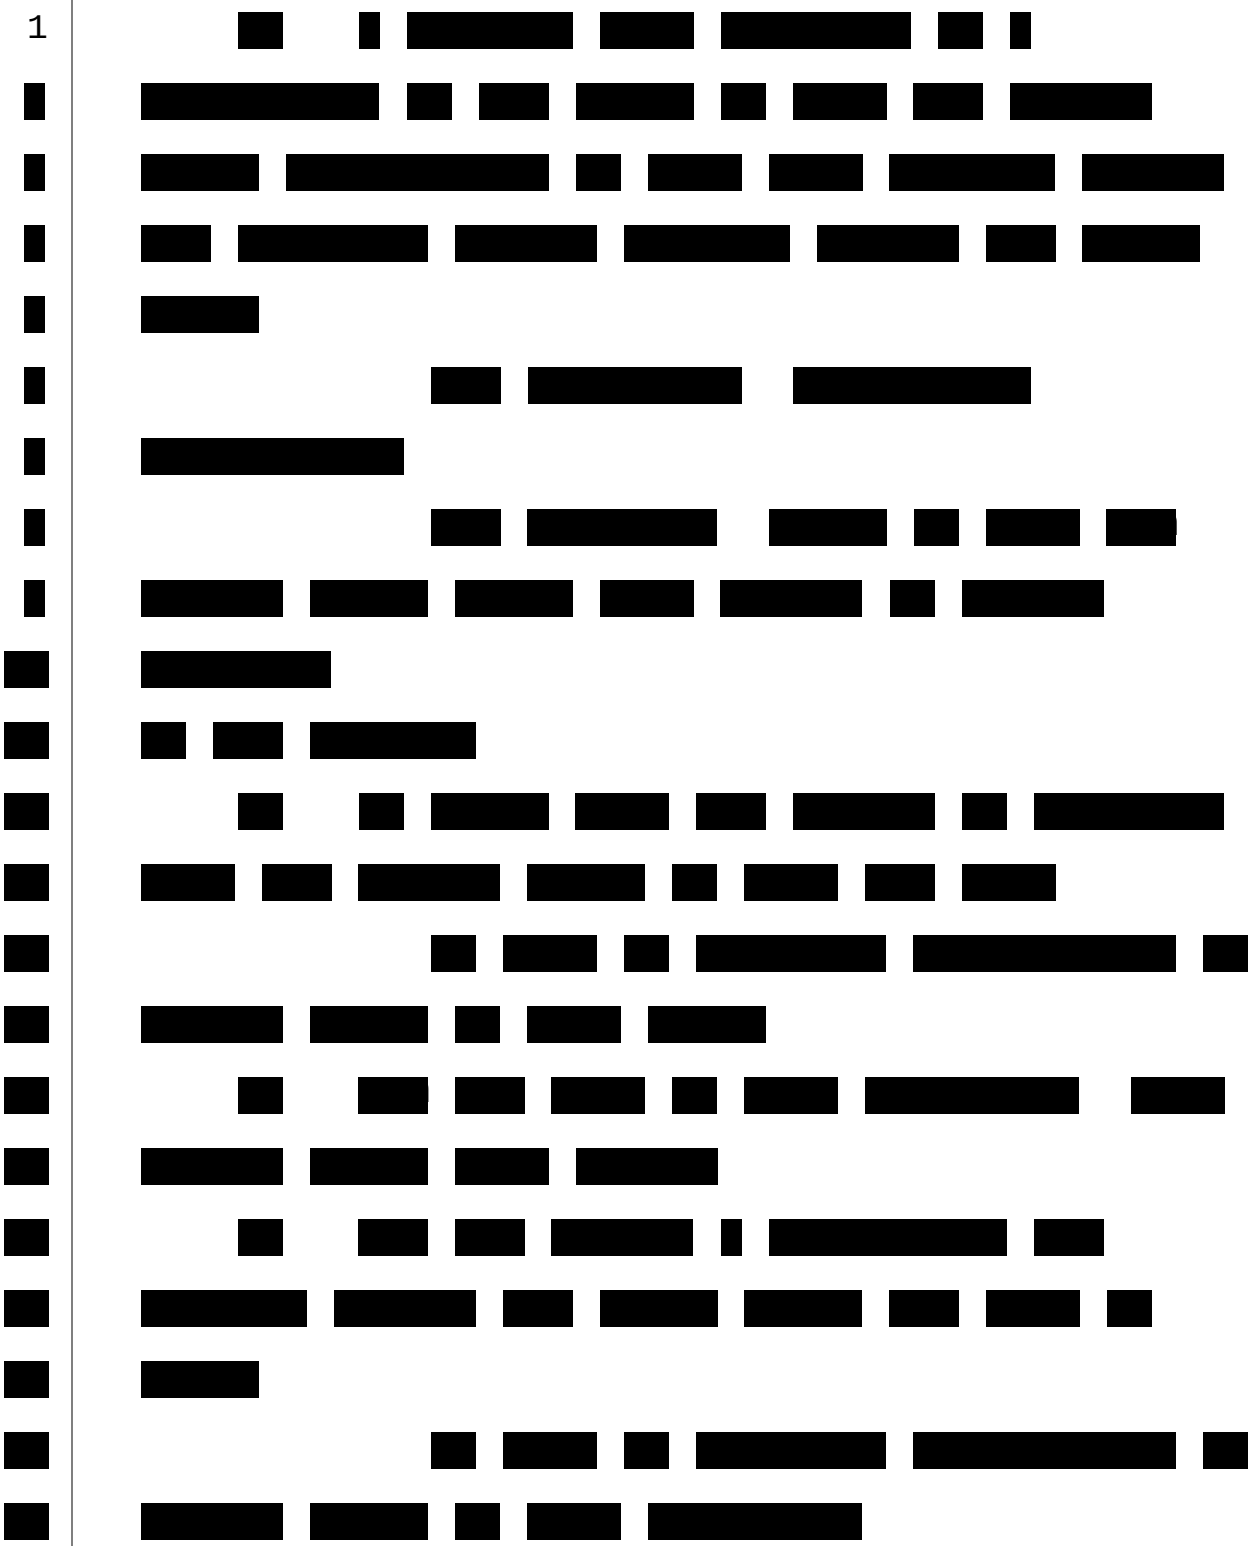


THE VIDEOGRAPHER: We are back on the record. The time is 10:30 a.m. Thank you.

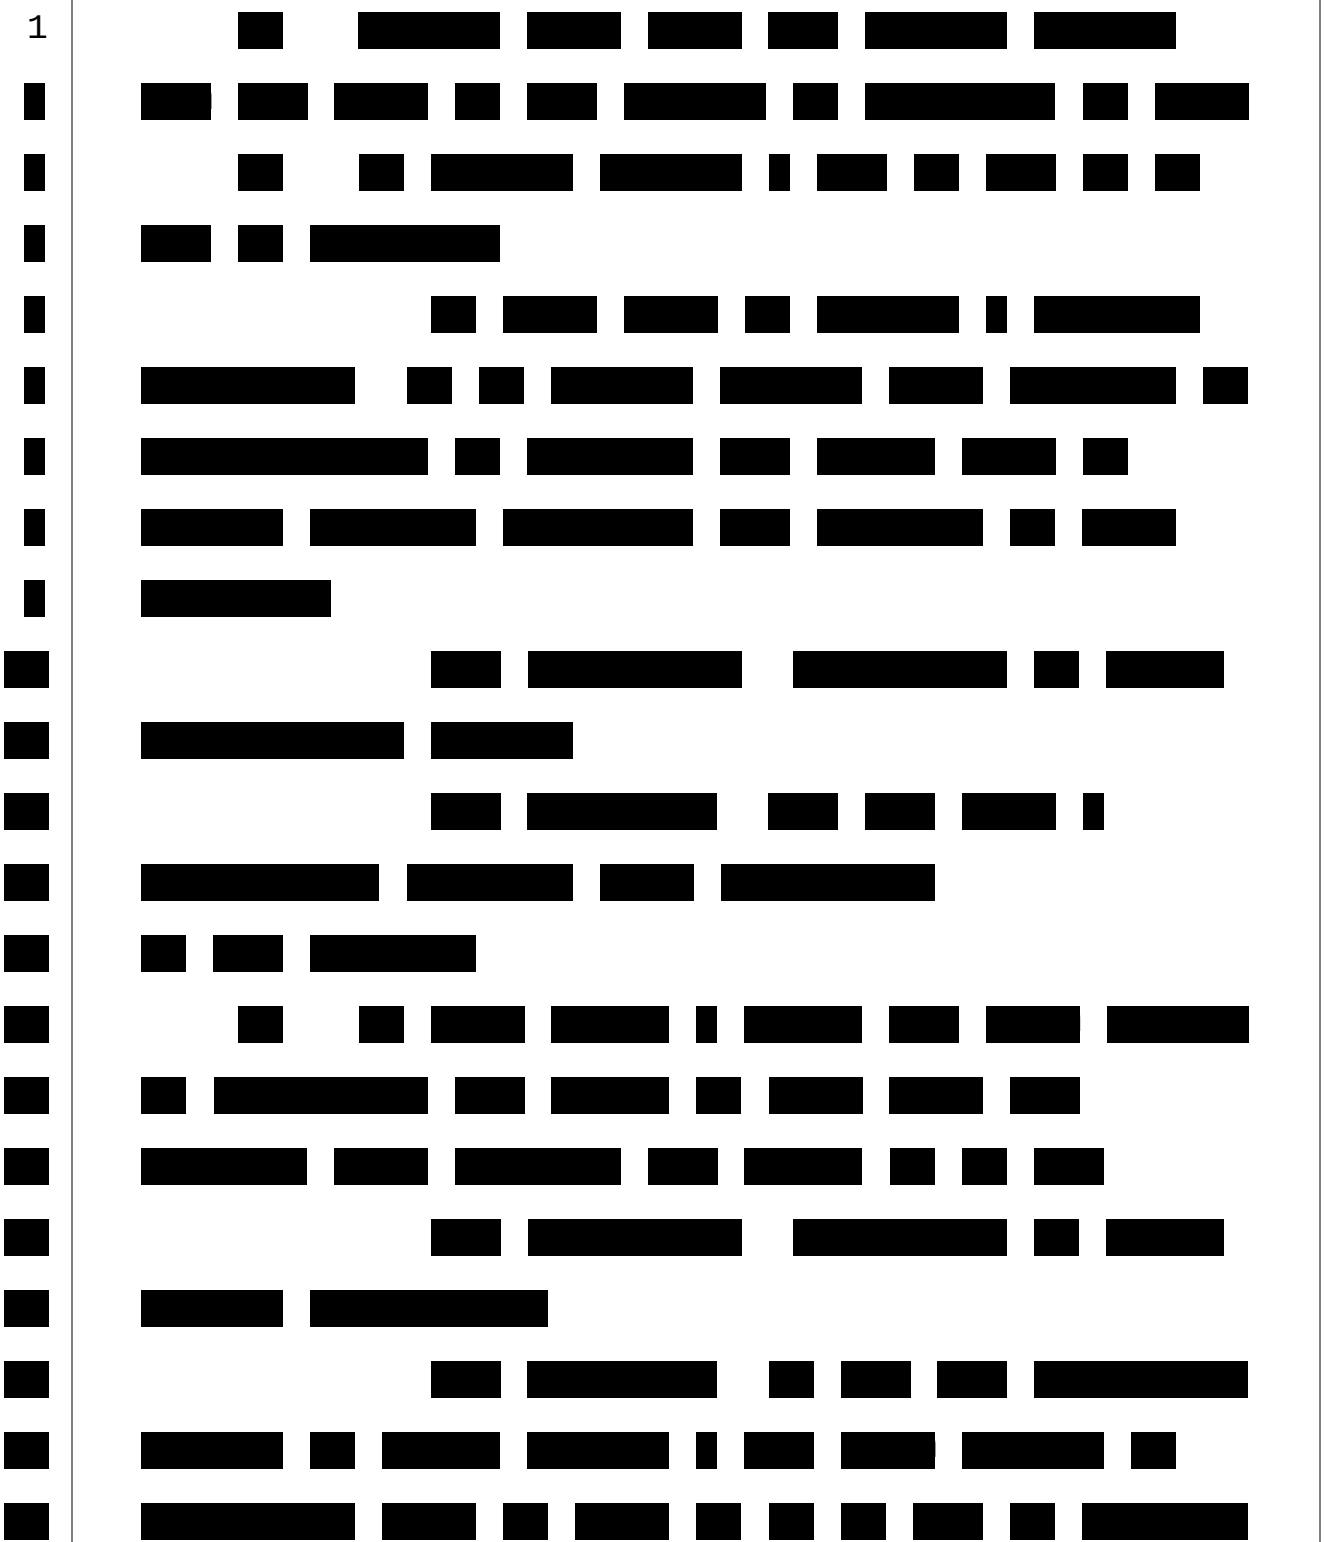
[redacted]



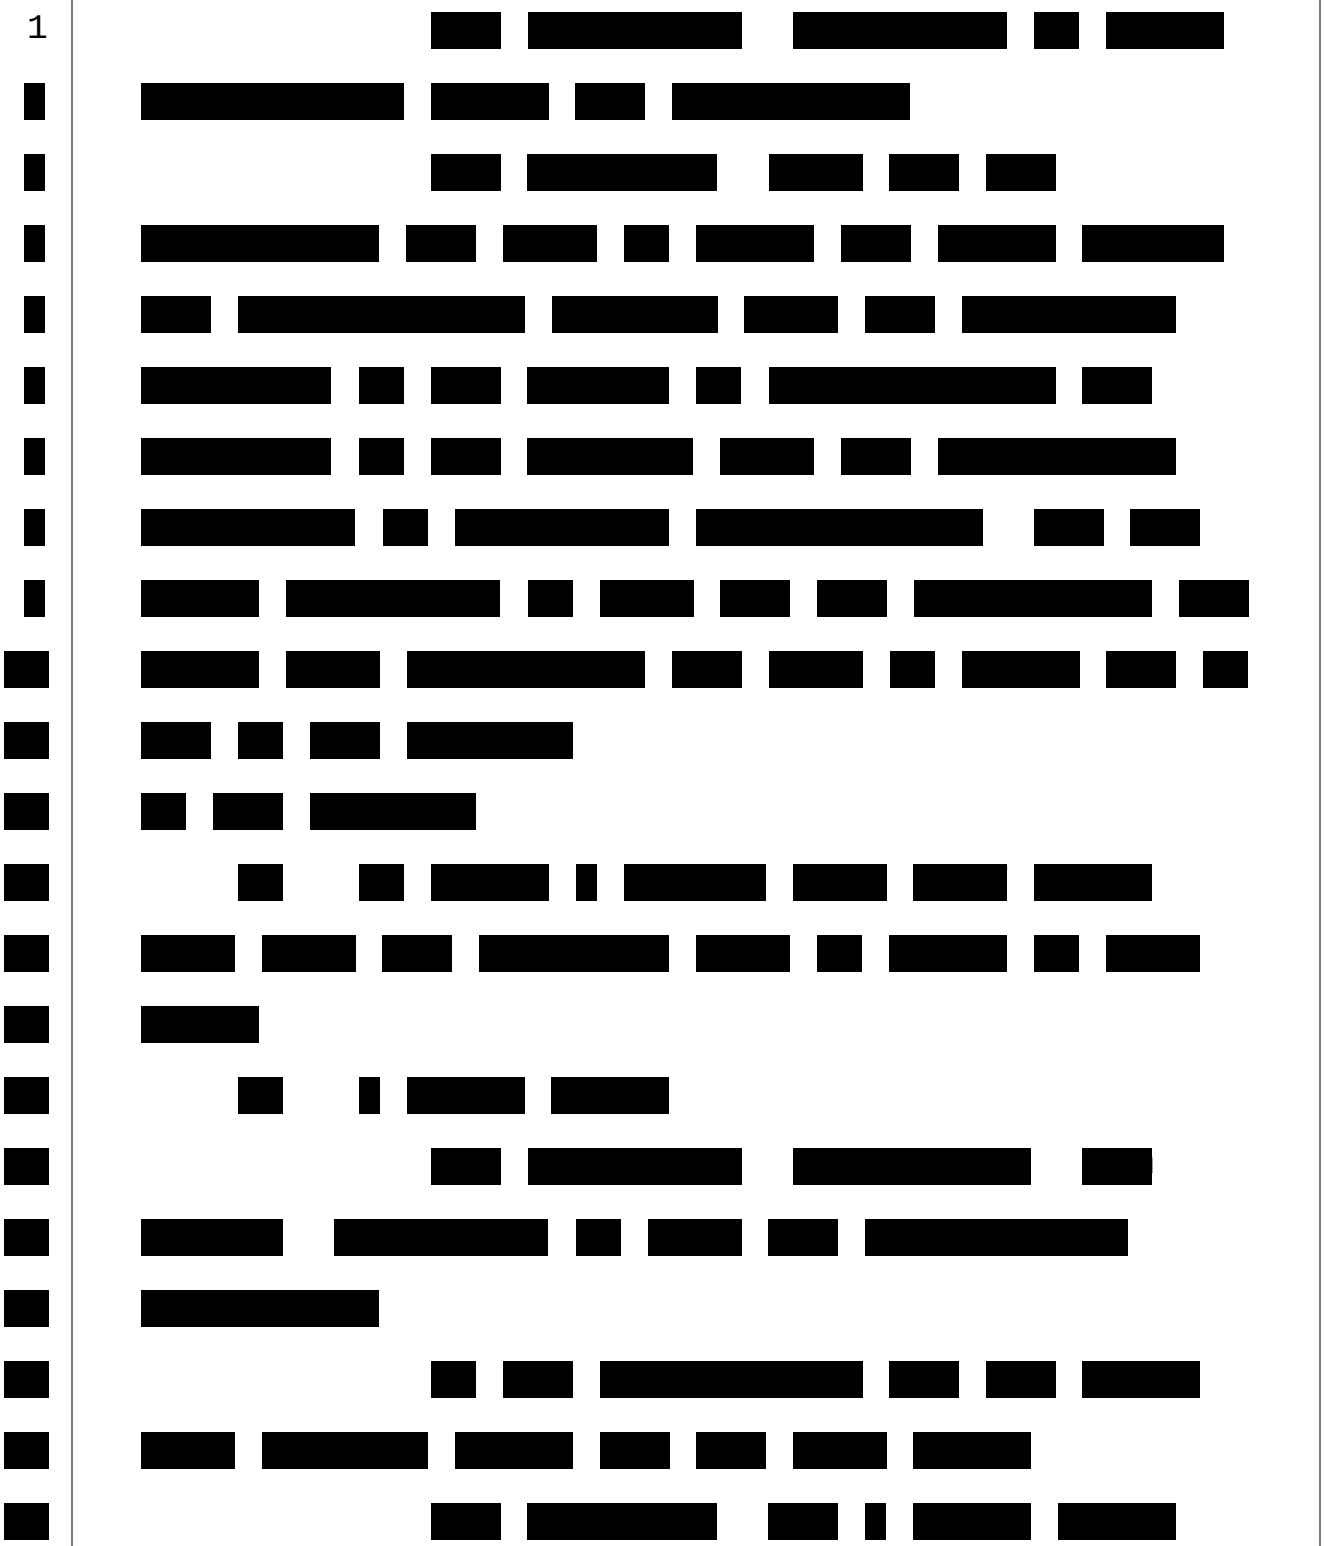
Q. I'd like to go to another document. This is one that you should have in Envelope G.



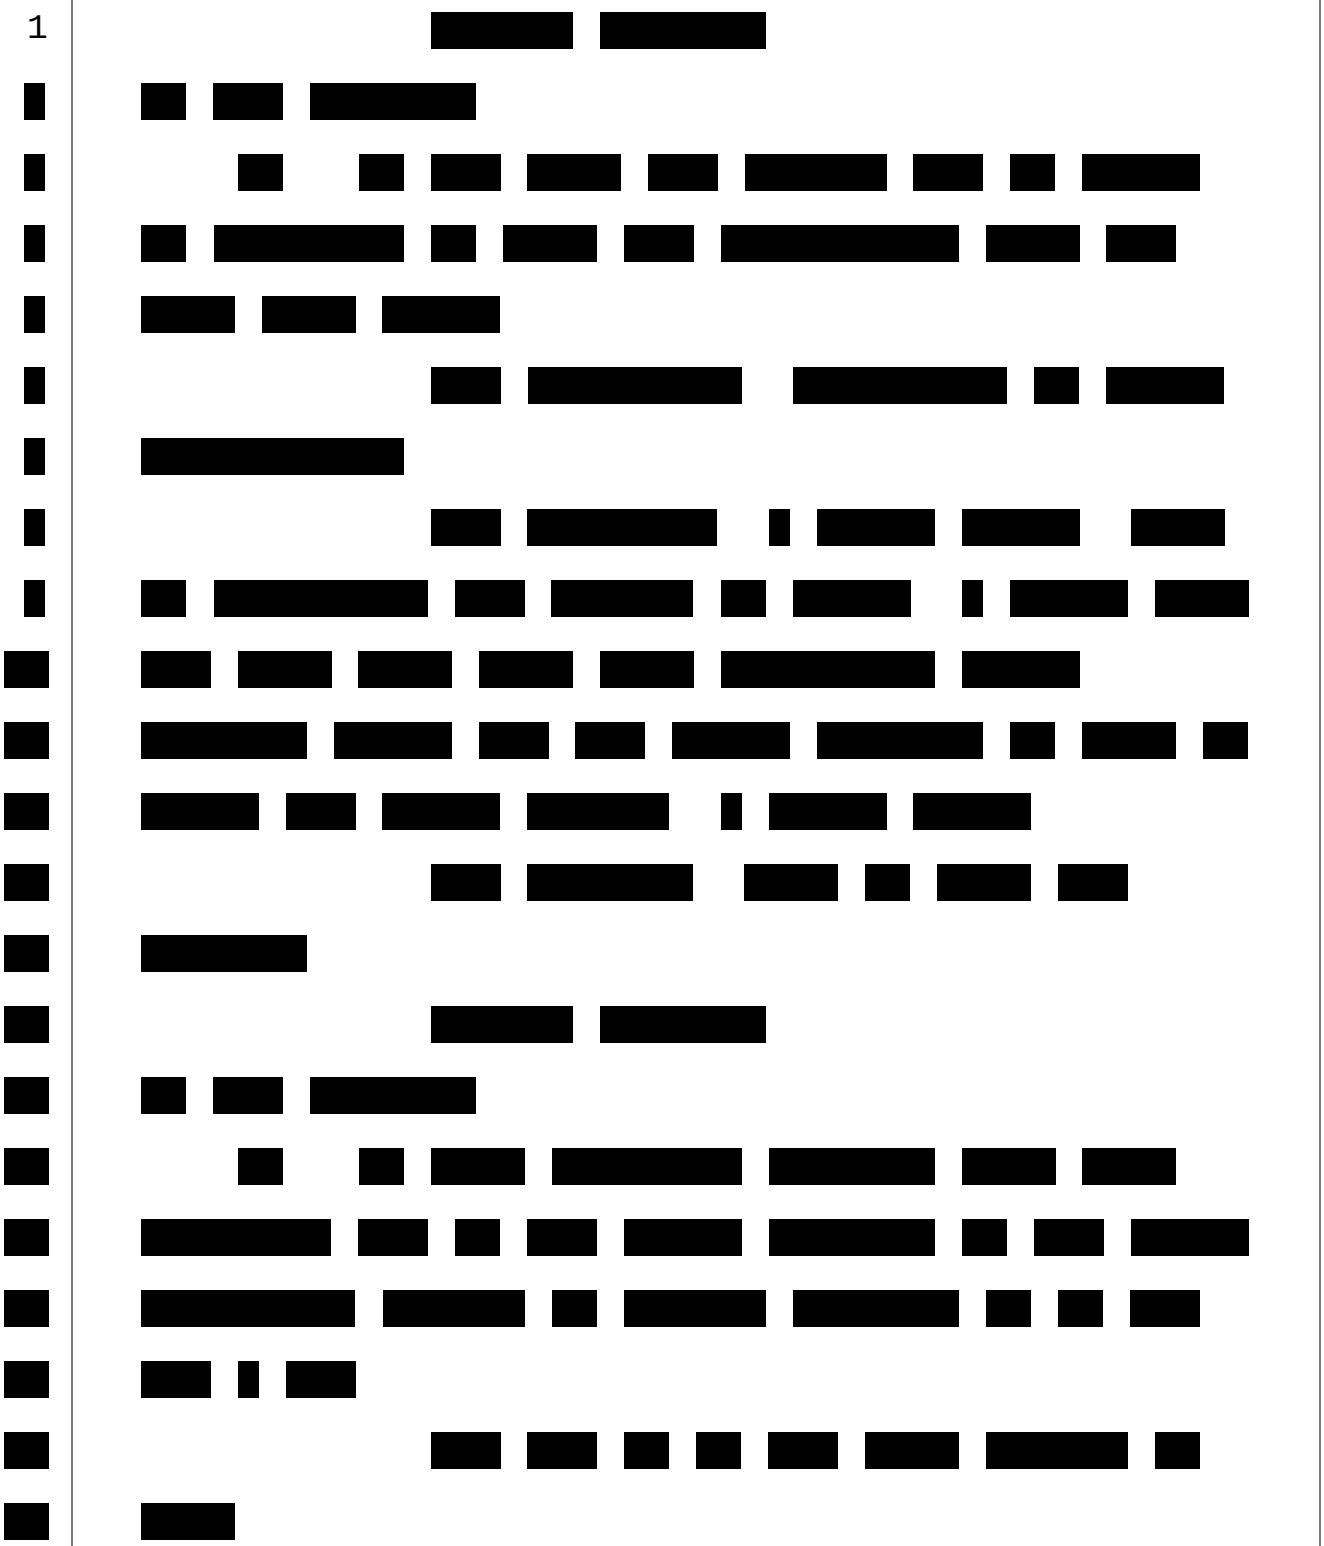
MR. HEFLIN: And, Julia, can you put that up on Exhibit Share, please.



(Whereupon, a document was marked, for identification purposes, as Exhibit 0003.)



MR. HEFLIN: Let me know when you have the document.



[redacted]

[redacted]

Q. Okay.

I'd like to look at another document. And this is one that we did not

receive until late Wednesday night, so you don't have a physical copy of this, but we're going to put it in Exhibit Share.

MR. HEFLIN: Julia, can you put up Bates ending 3021, please.

MR. KAVANAGH: I'm not getting the -- what do I have to do to cue up the exhibits?

THE WITNESS: You need to -- the ones that were marked again, I can show you.

MR. KAVANAGH: You're an expert on it.

THE WITNESS: I need to rotate.

MR. KAVANAGH: So do I have 3? There should be a fourth exhibit coming up?

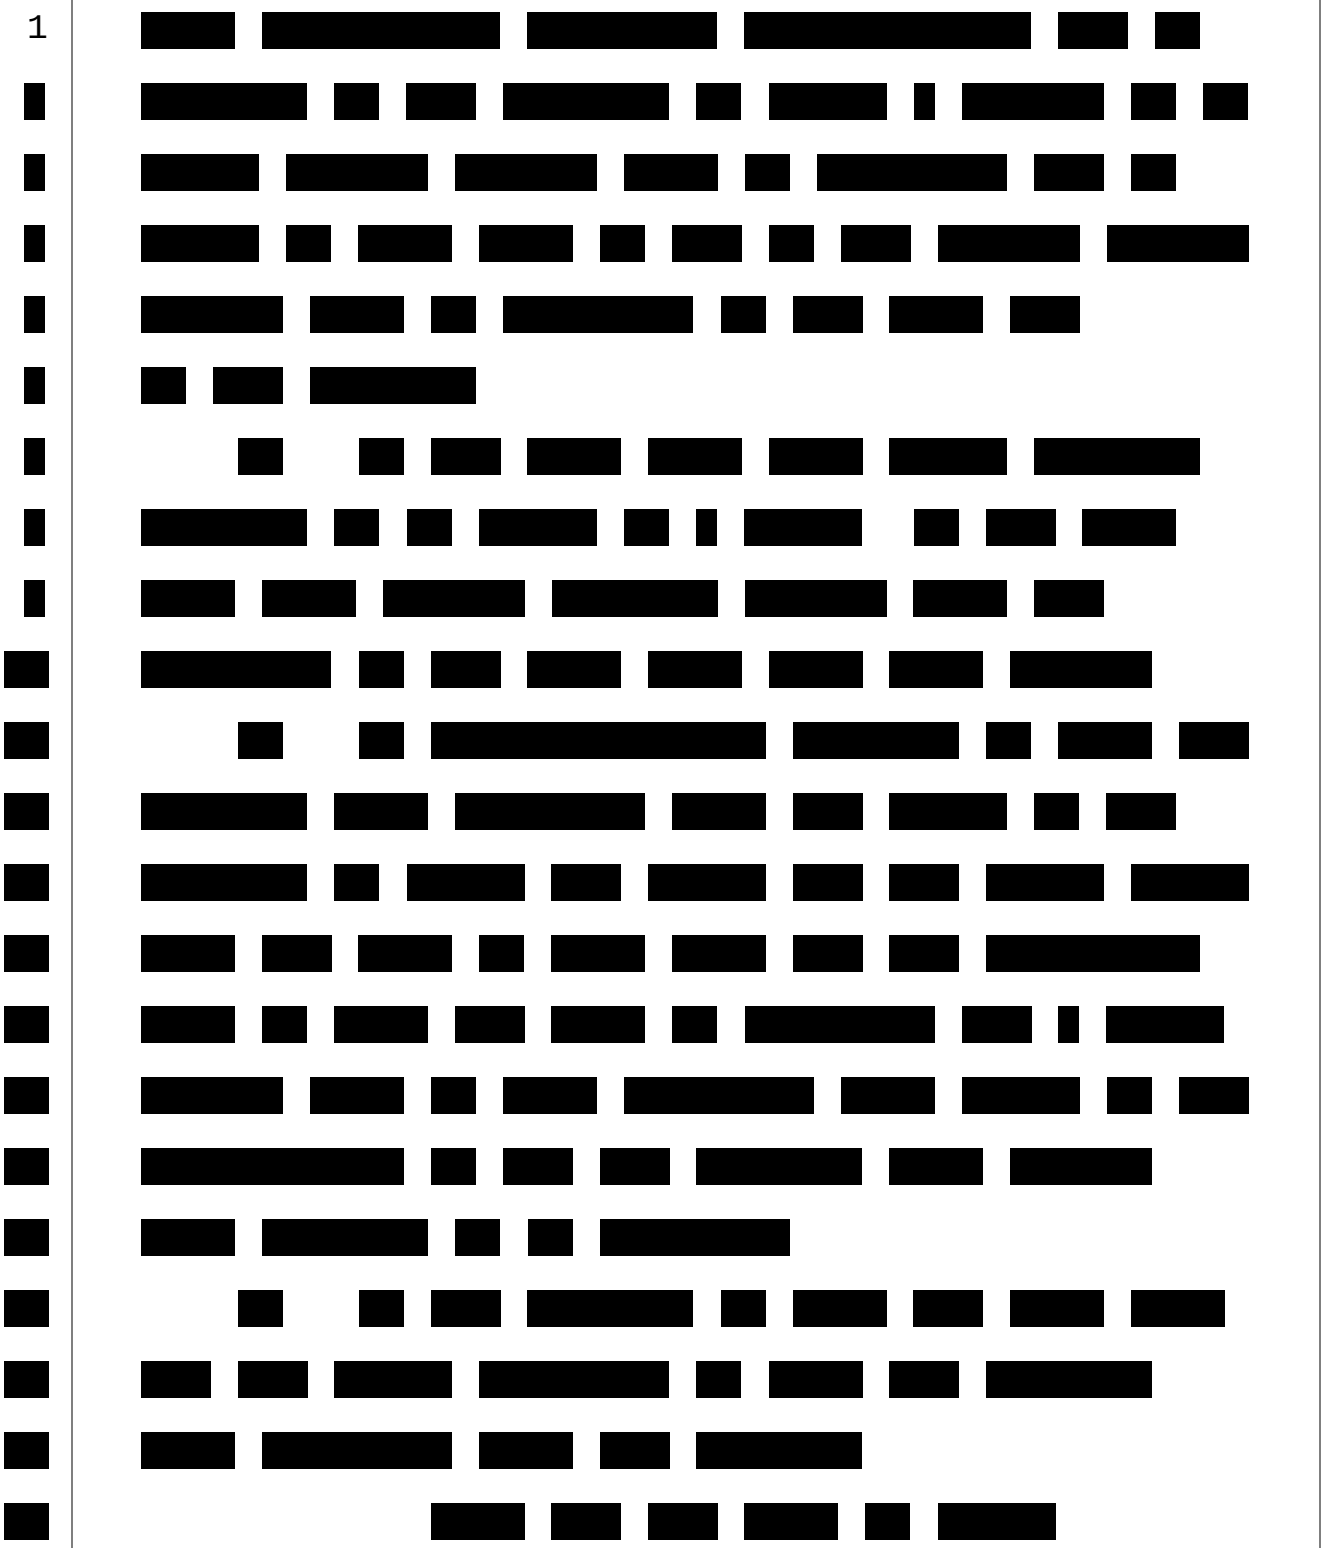
THE WITNESS: No, I think that's the last one.

MR. HEFLIN: There should be a fourth one coming up.

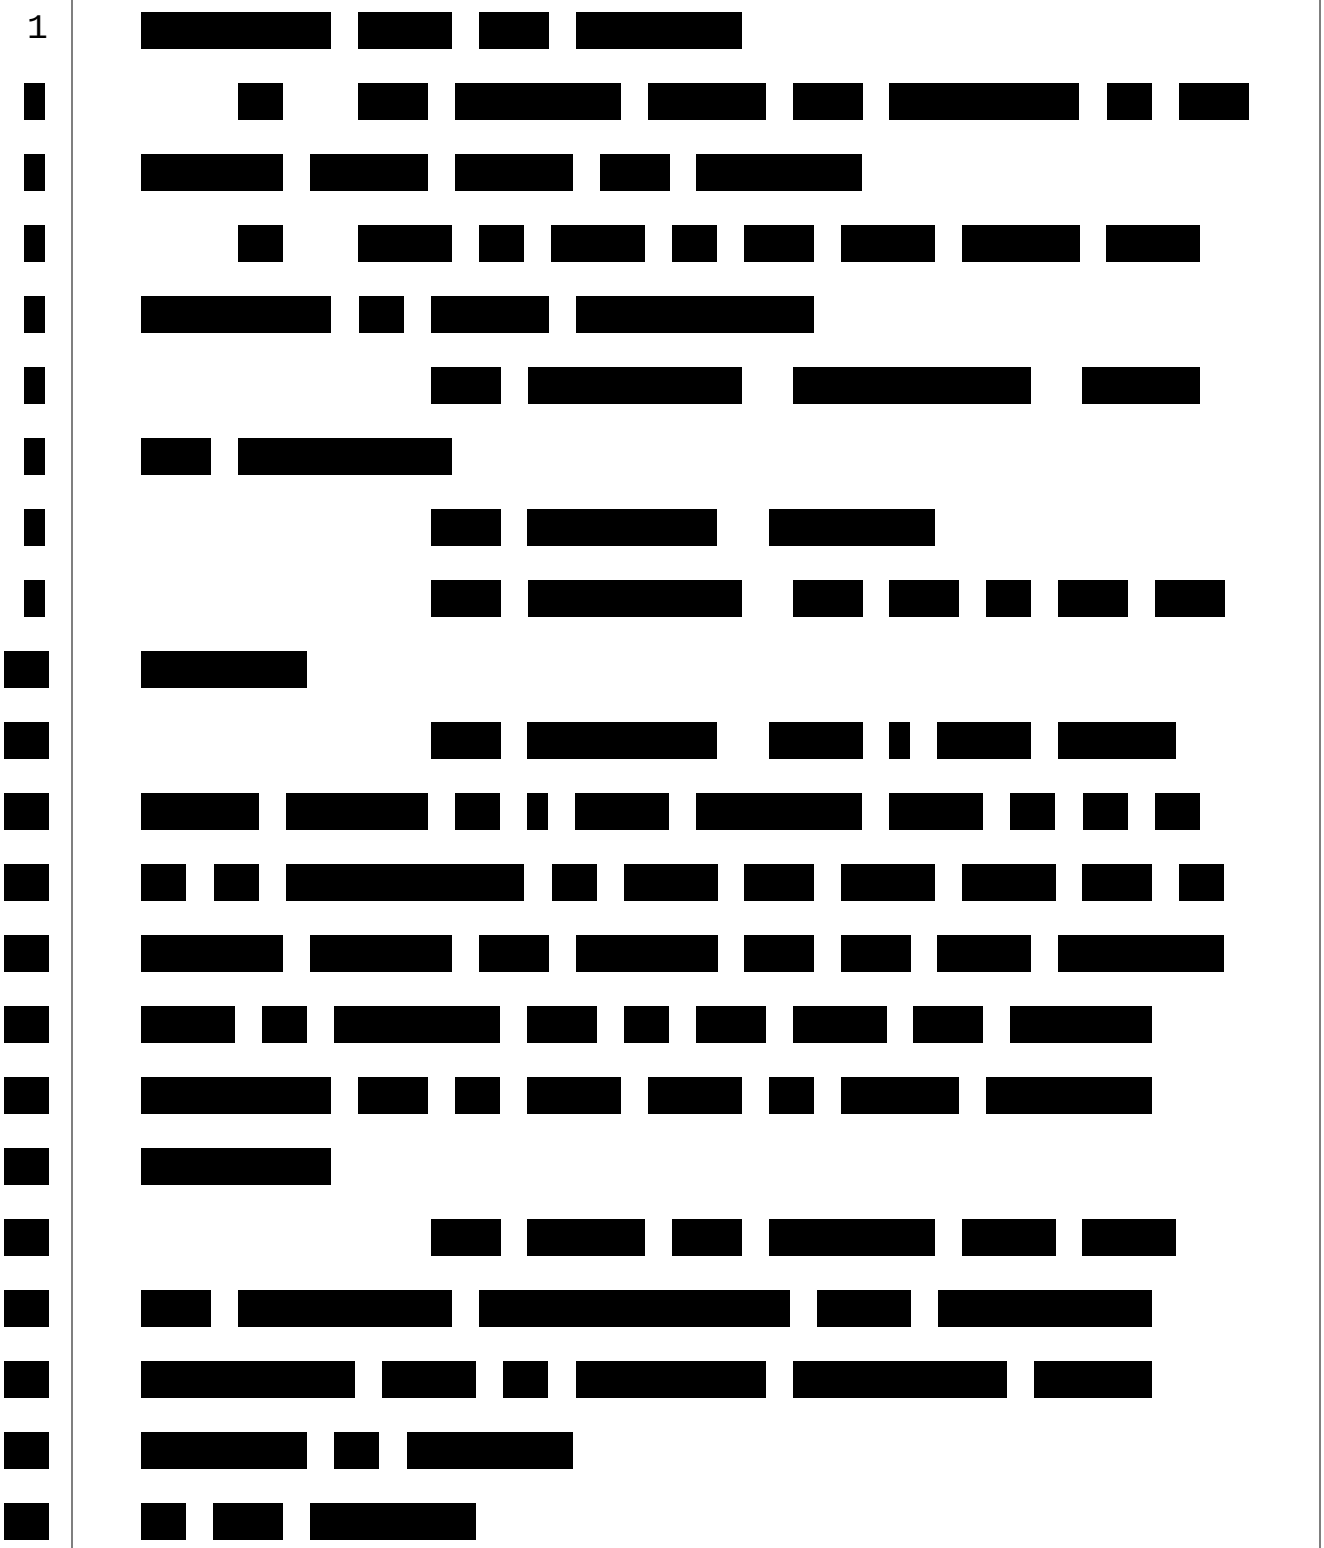
THE WITNESS: Okay. I'm on the wrong one then. Okay.

MR. KAVANAGH: Got it.

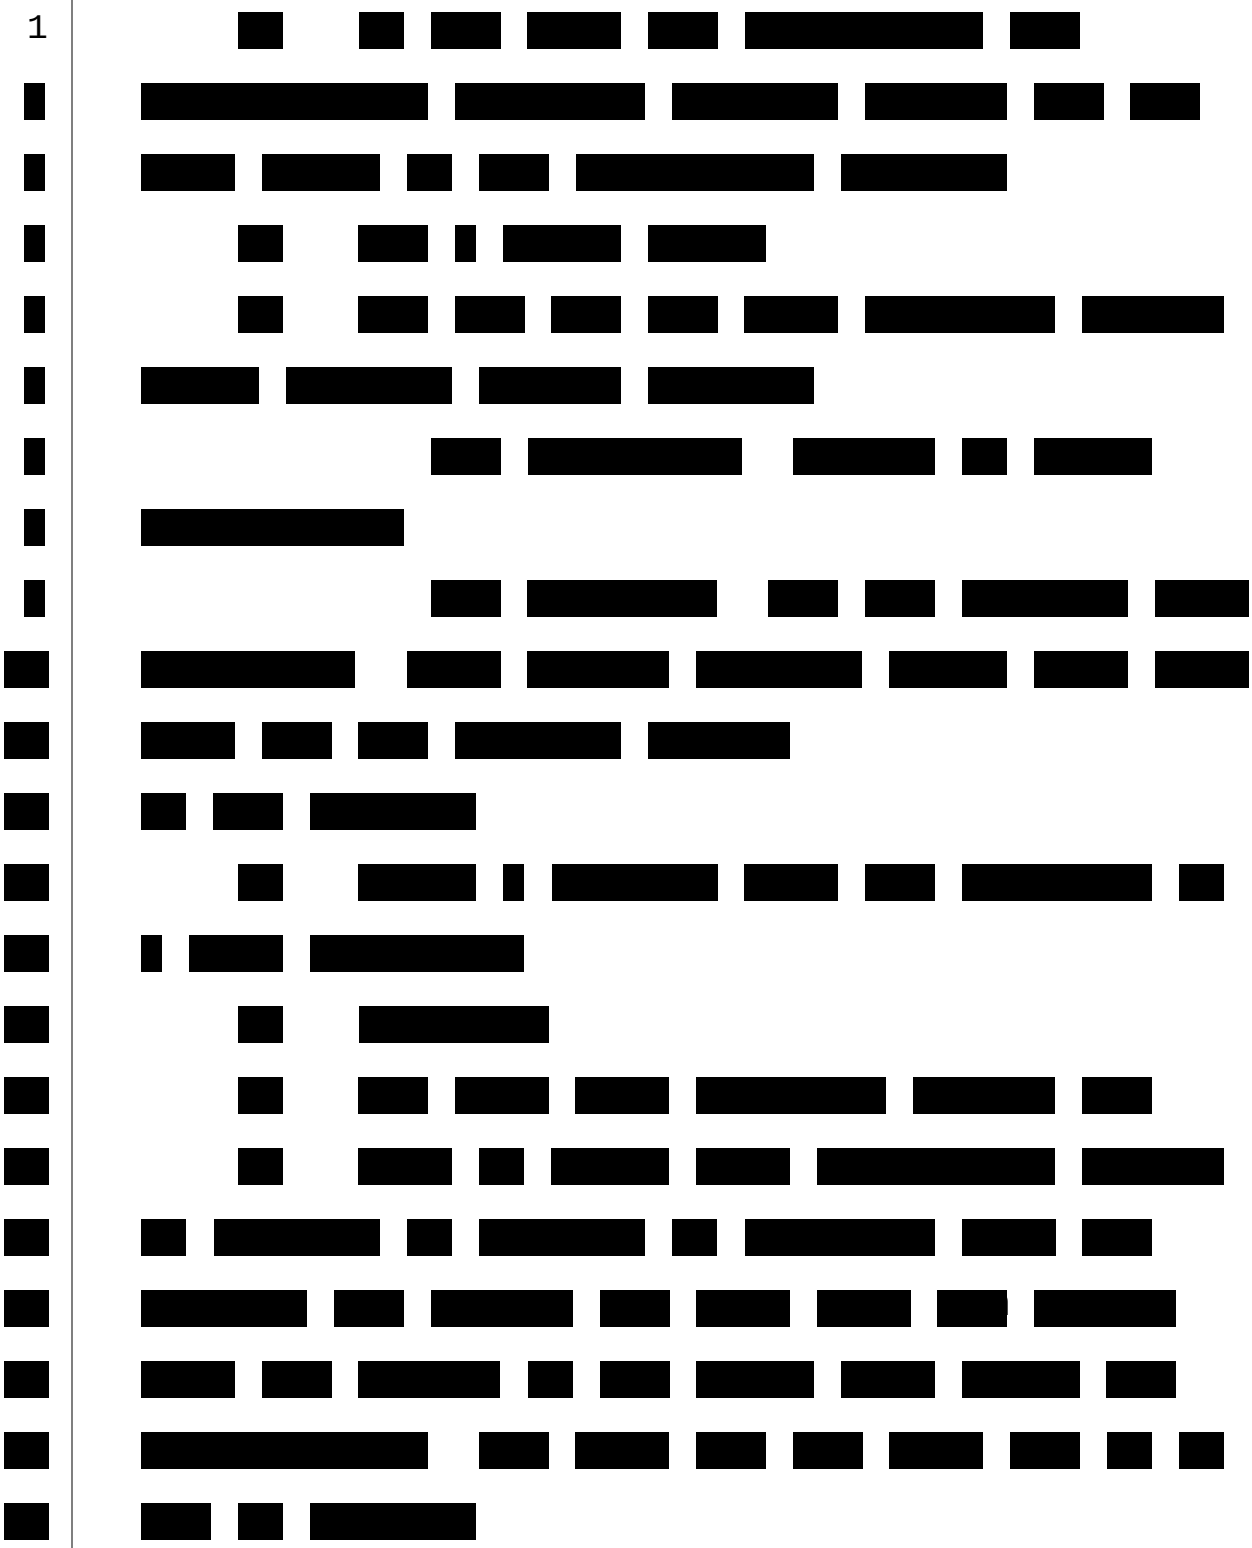
(Whereupon, a document was marked, for identification purposes, as Exhibit 0004.)



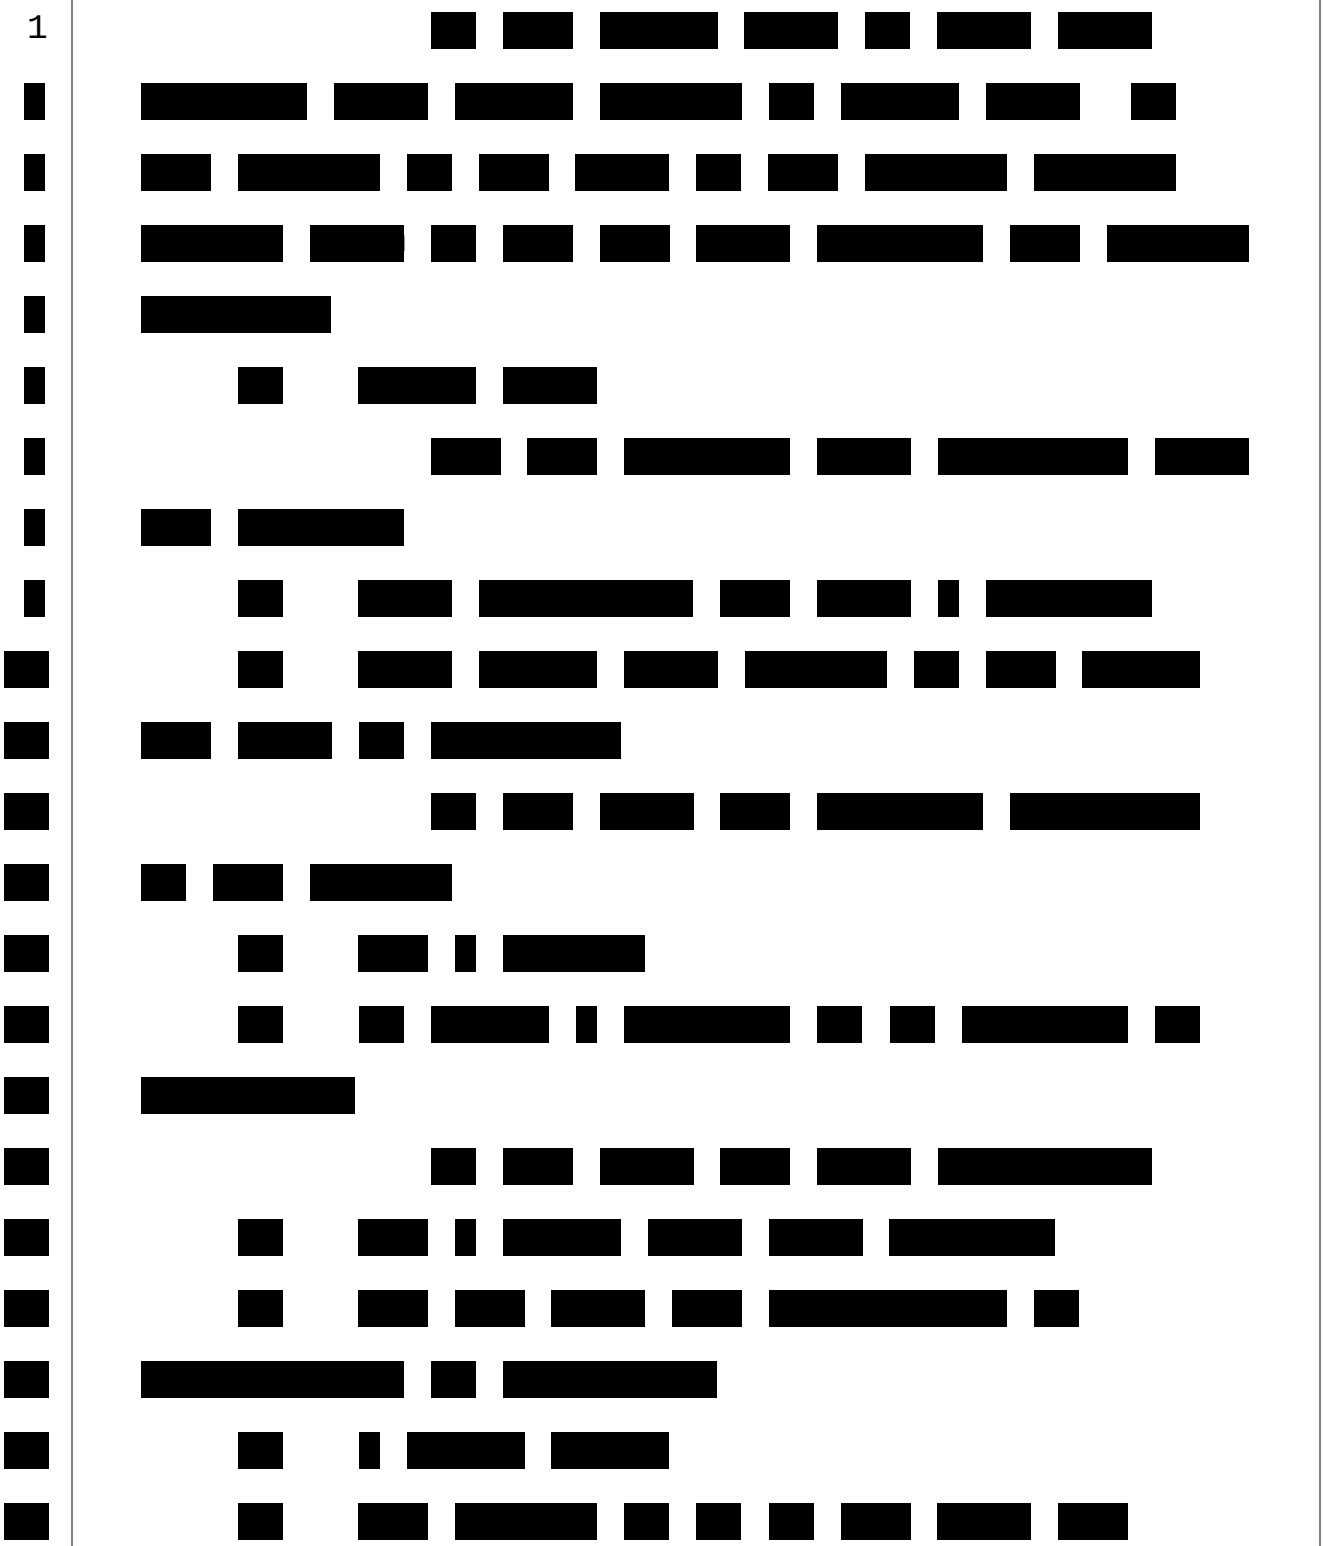
BY MR. HEFLIN:



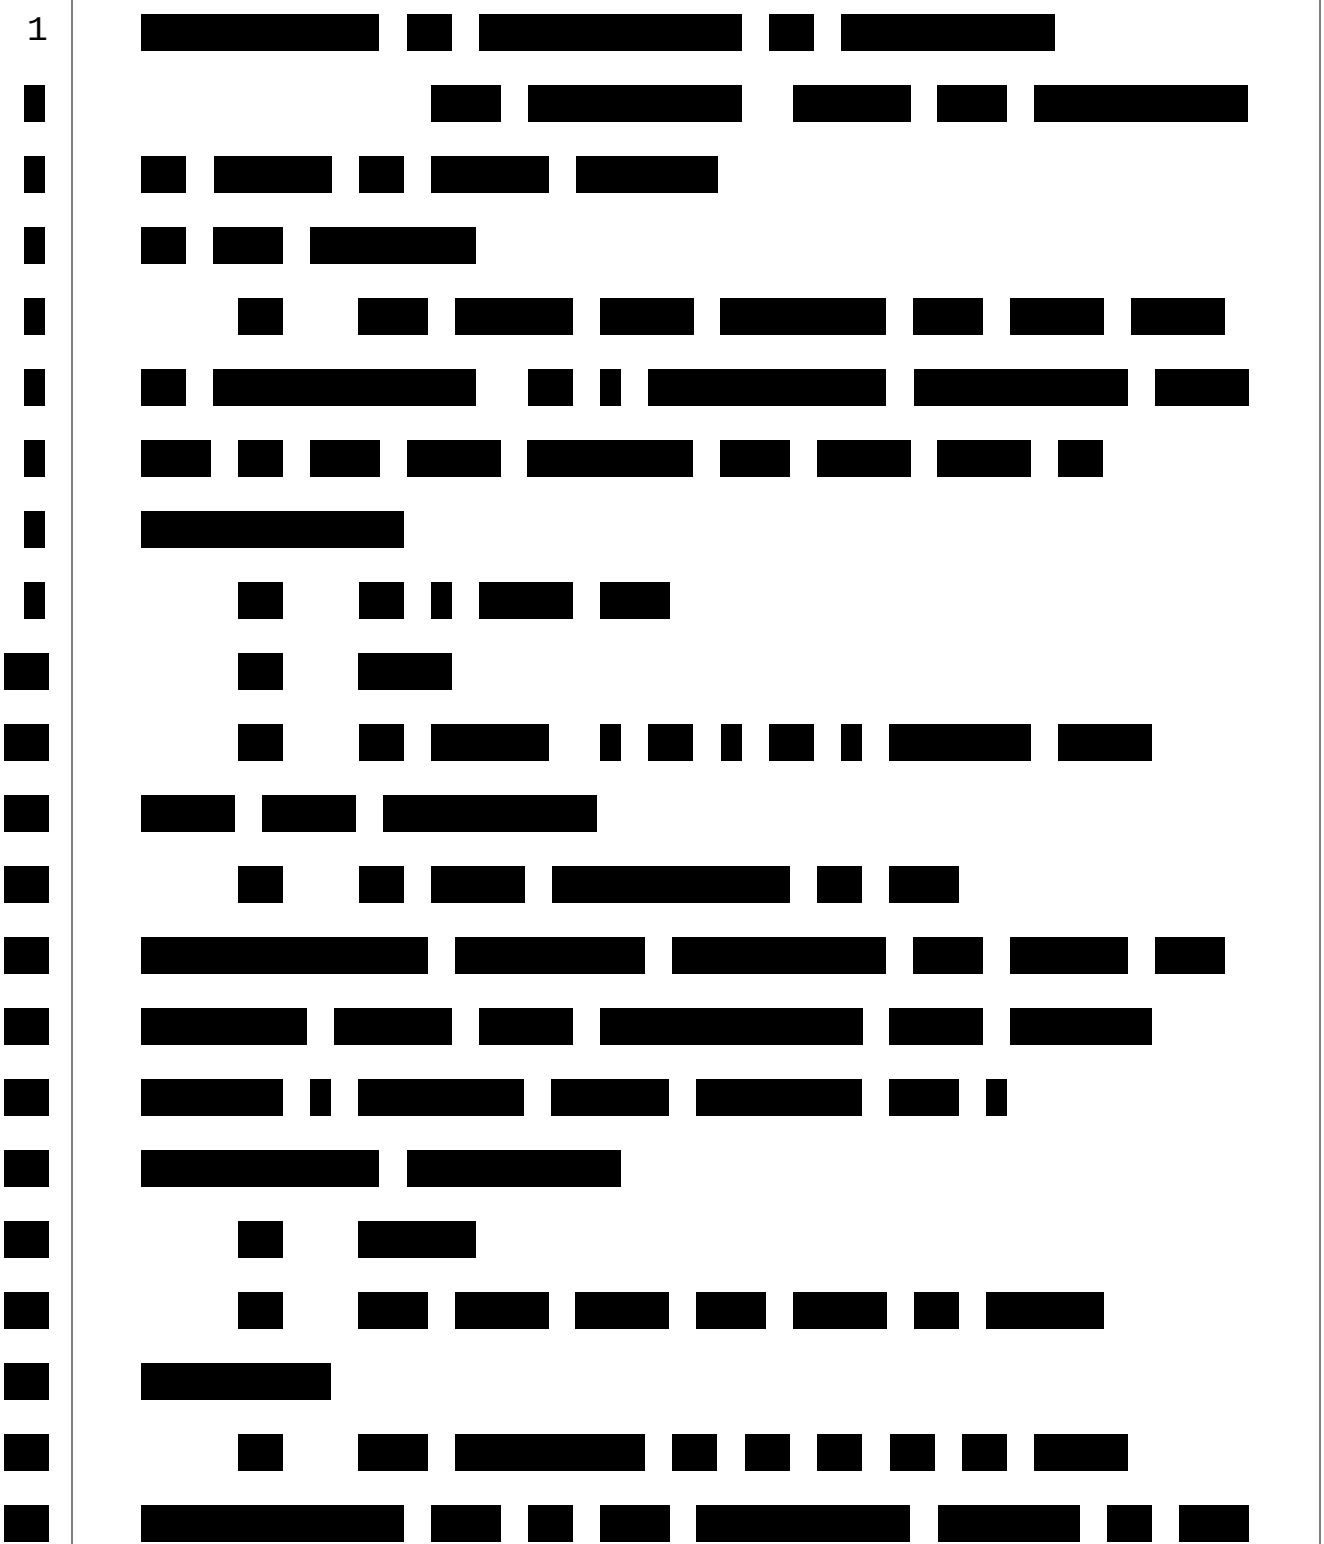
Q. Let me -- do you have the document?



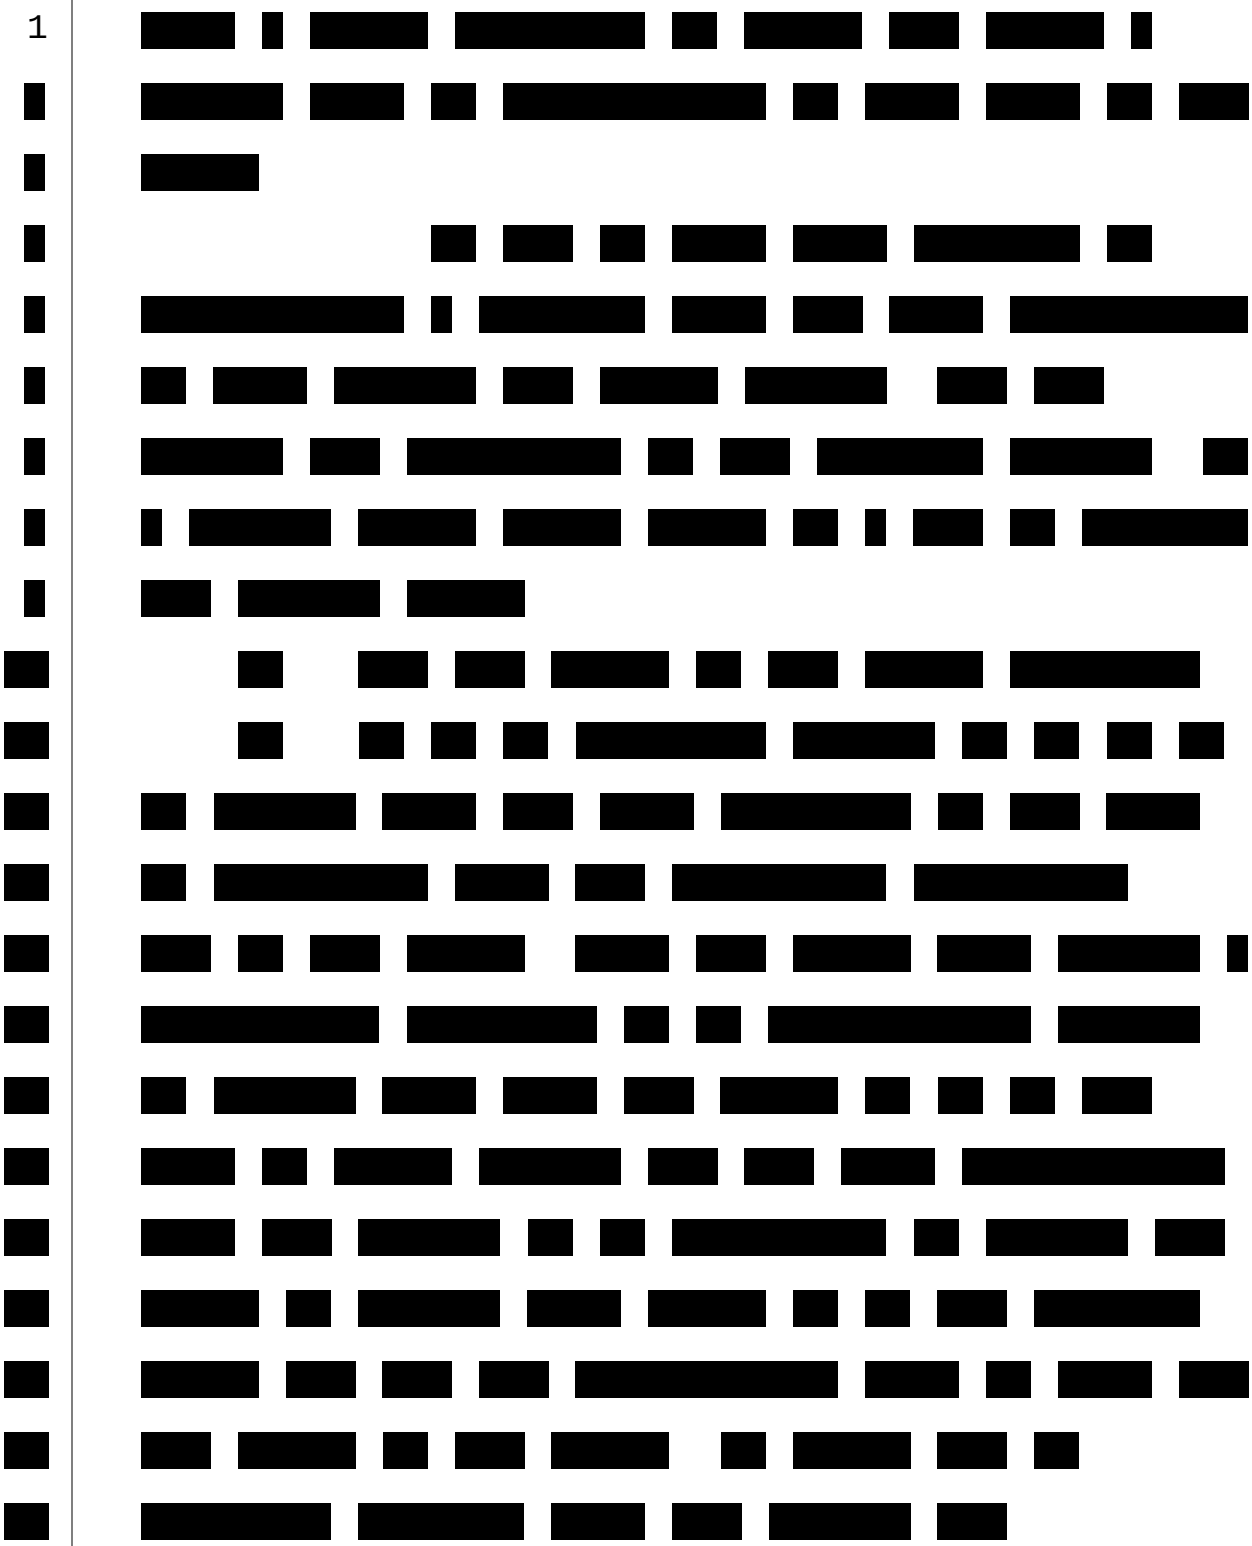
A. It's not coming in yet.

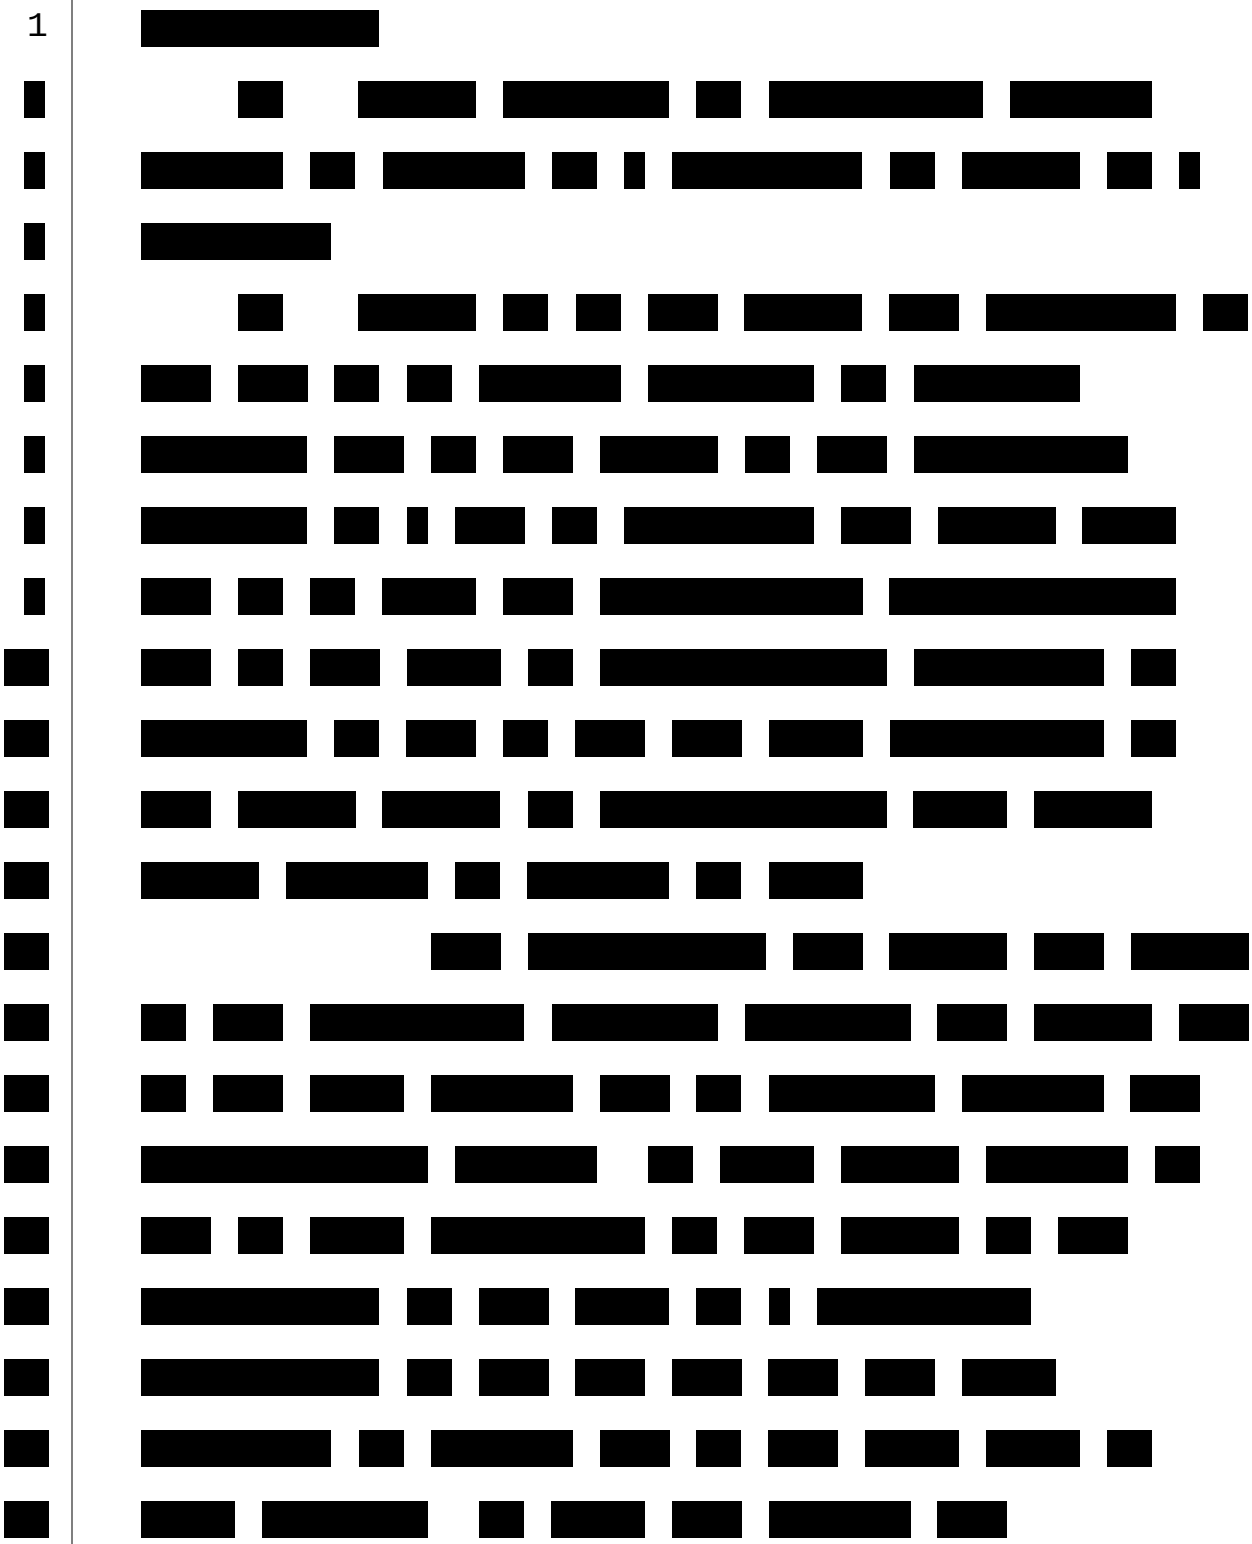


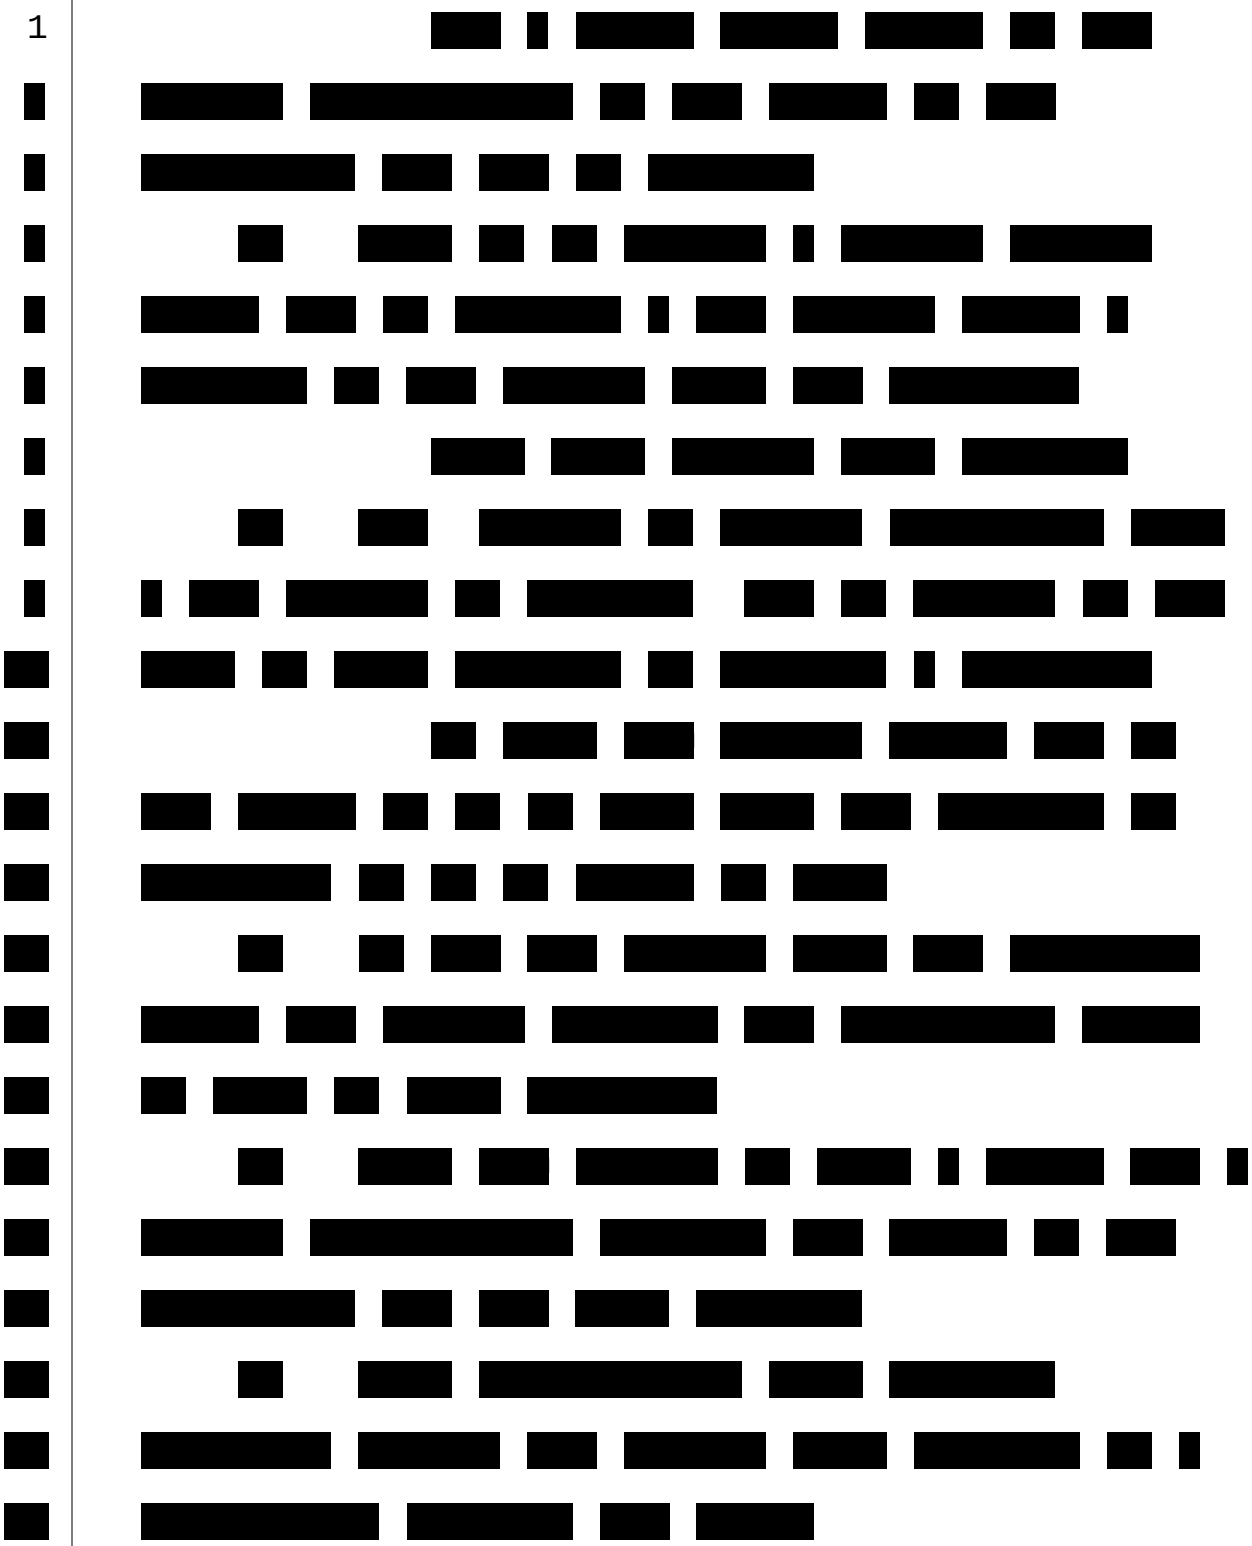
I have it now.

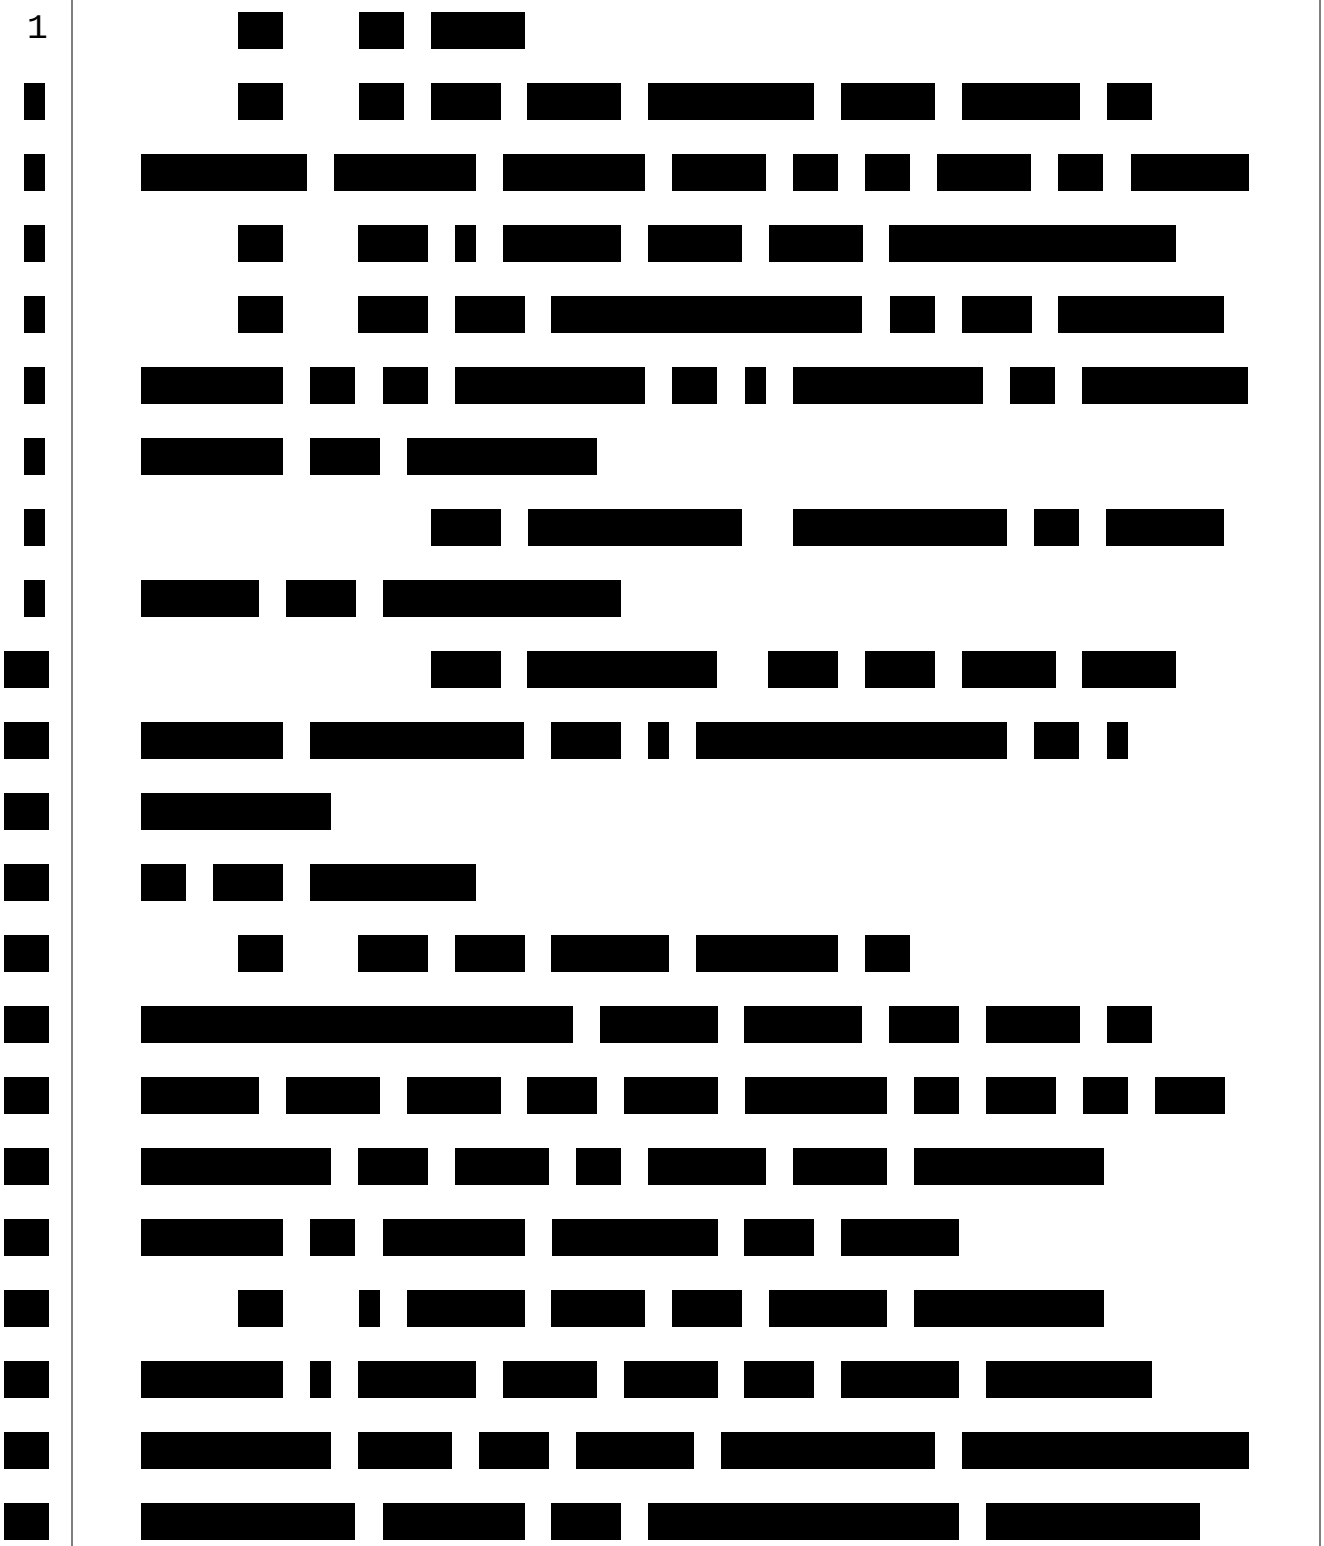


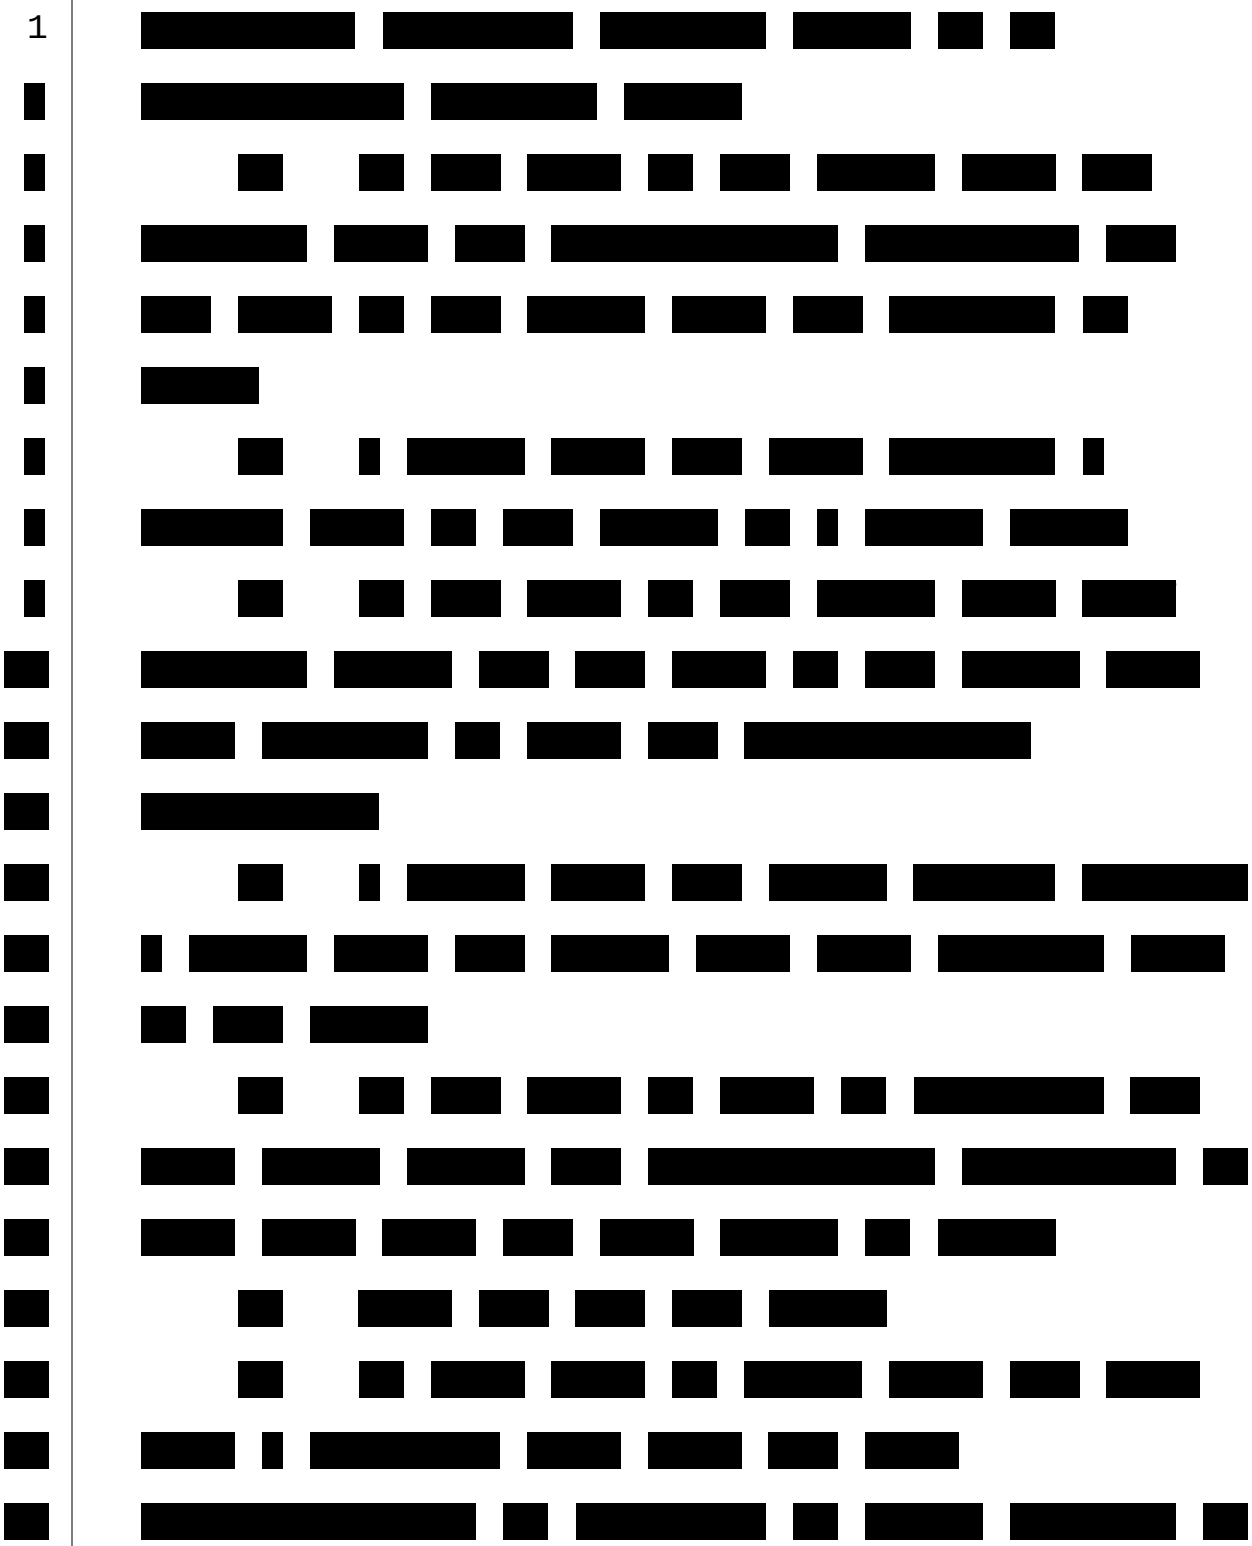
[redacted]

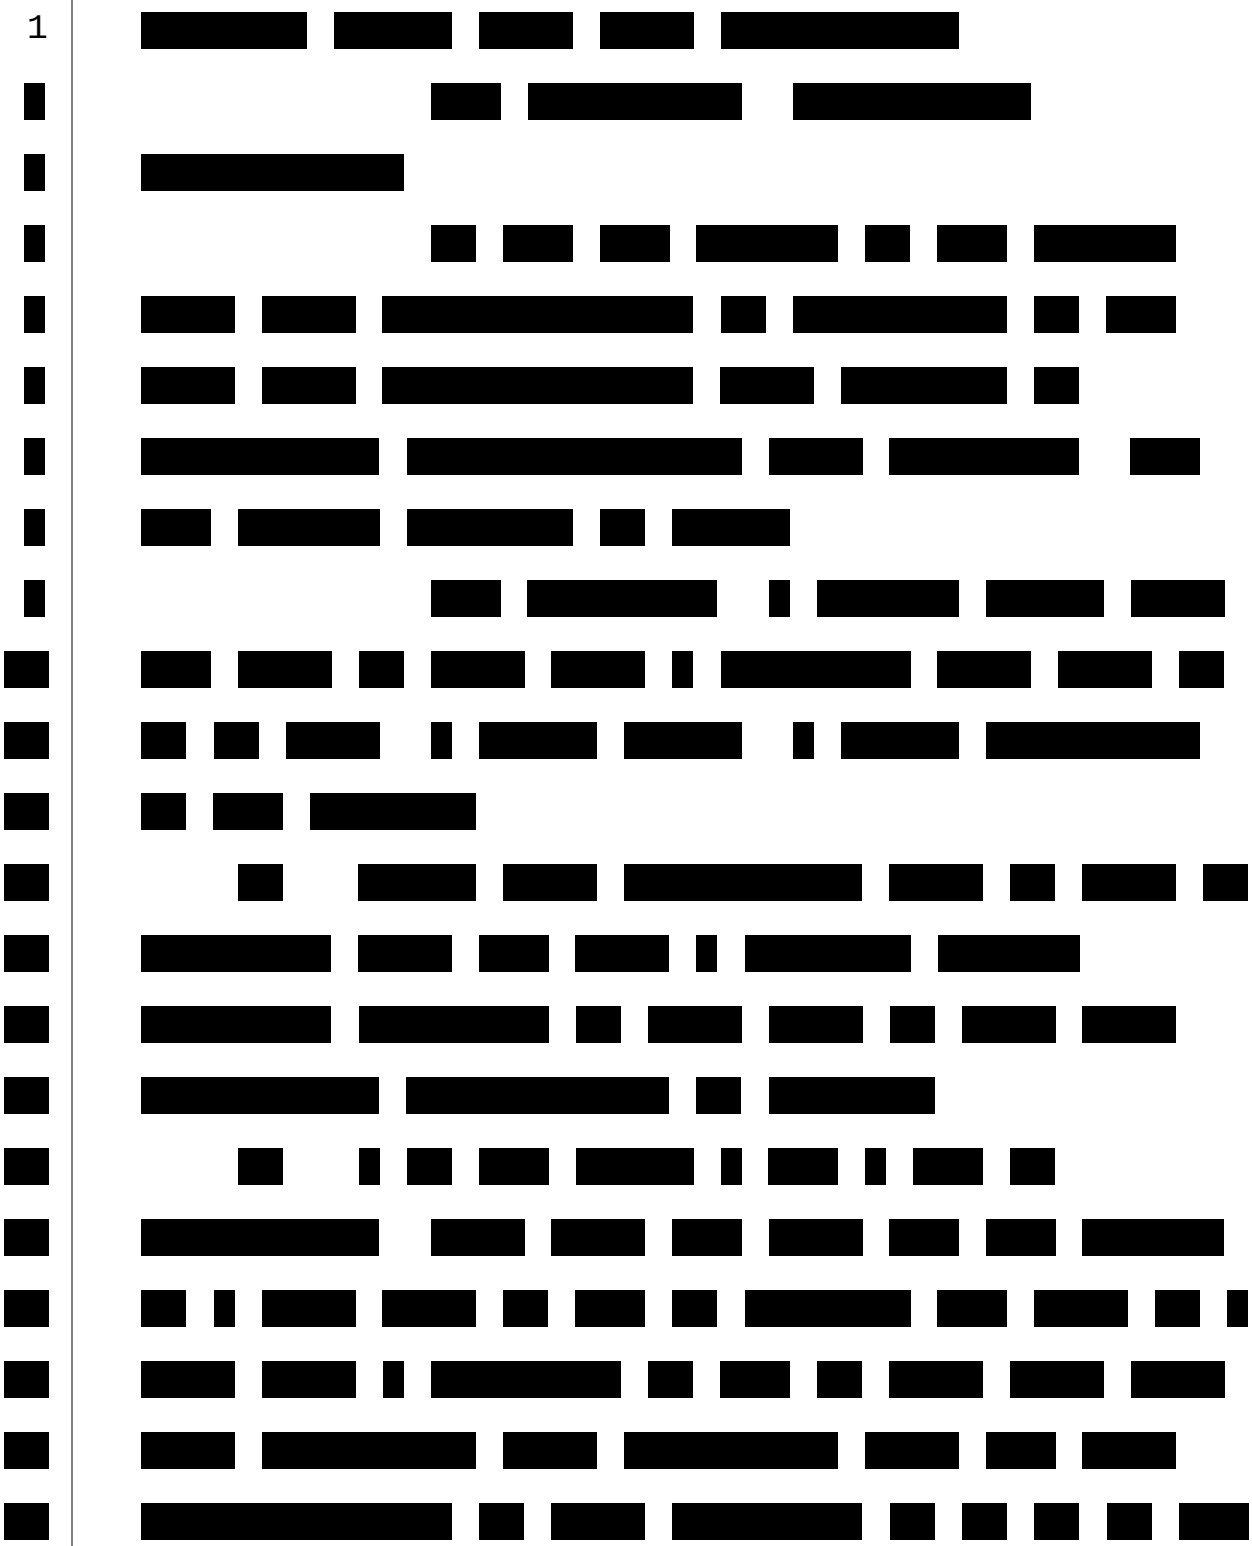


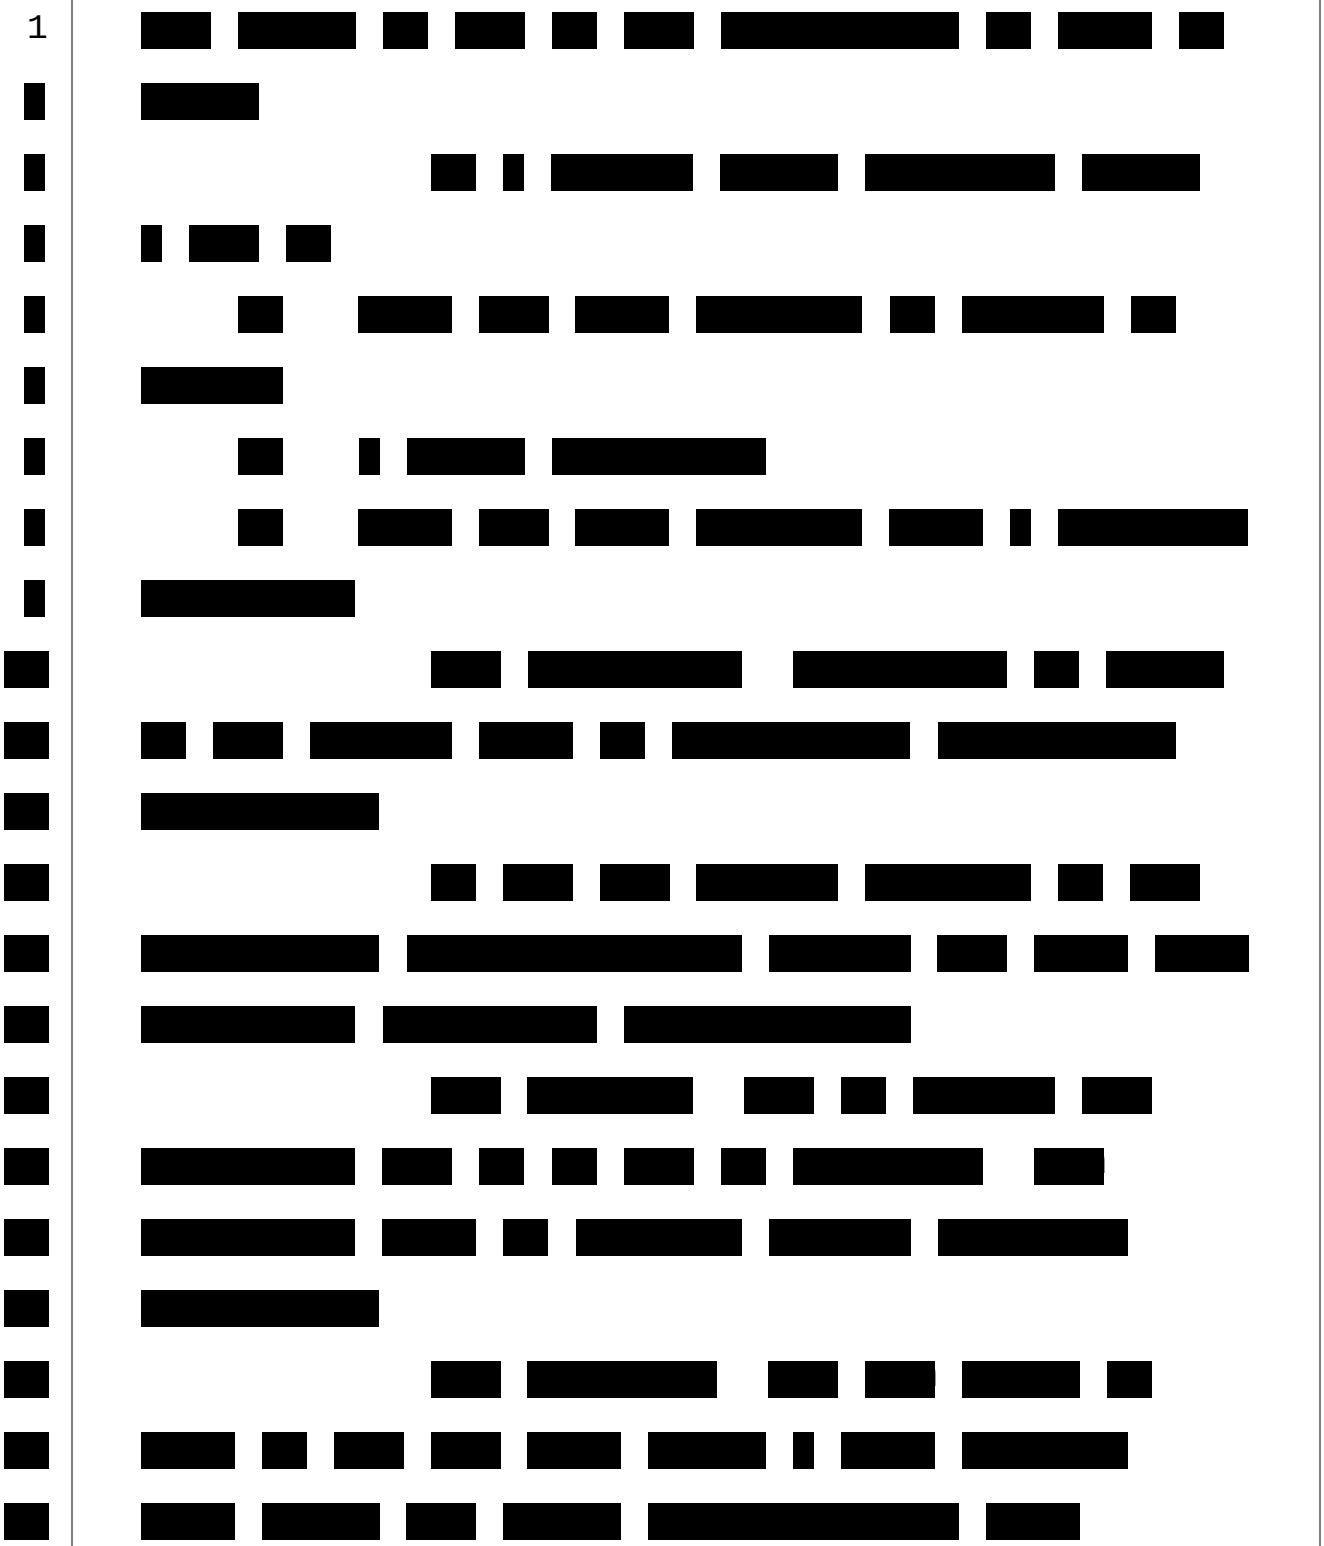












[redacted]

BY MR. HEFLIN:

Q. Let's go back to your Verified Statement just for a second. Do you still have that in front of you?

A. Yes, I do.

[redacted]

[redacted]

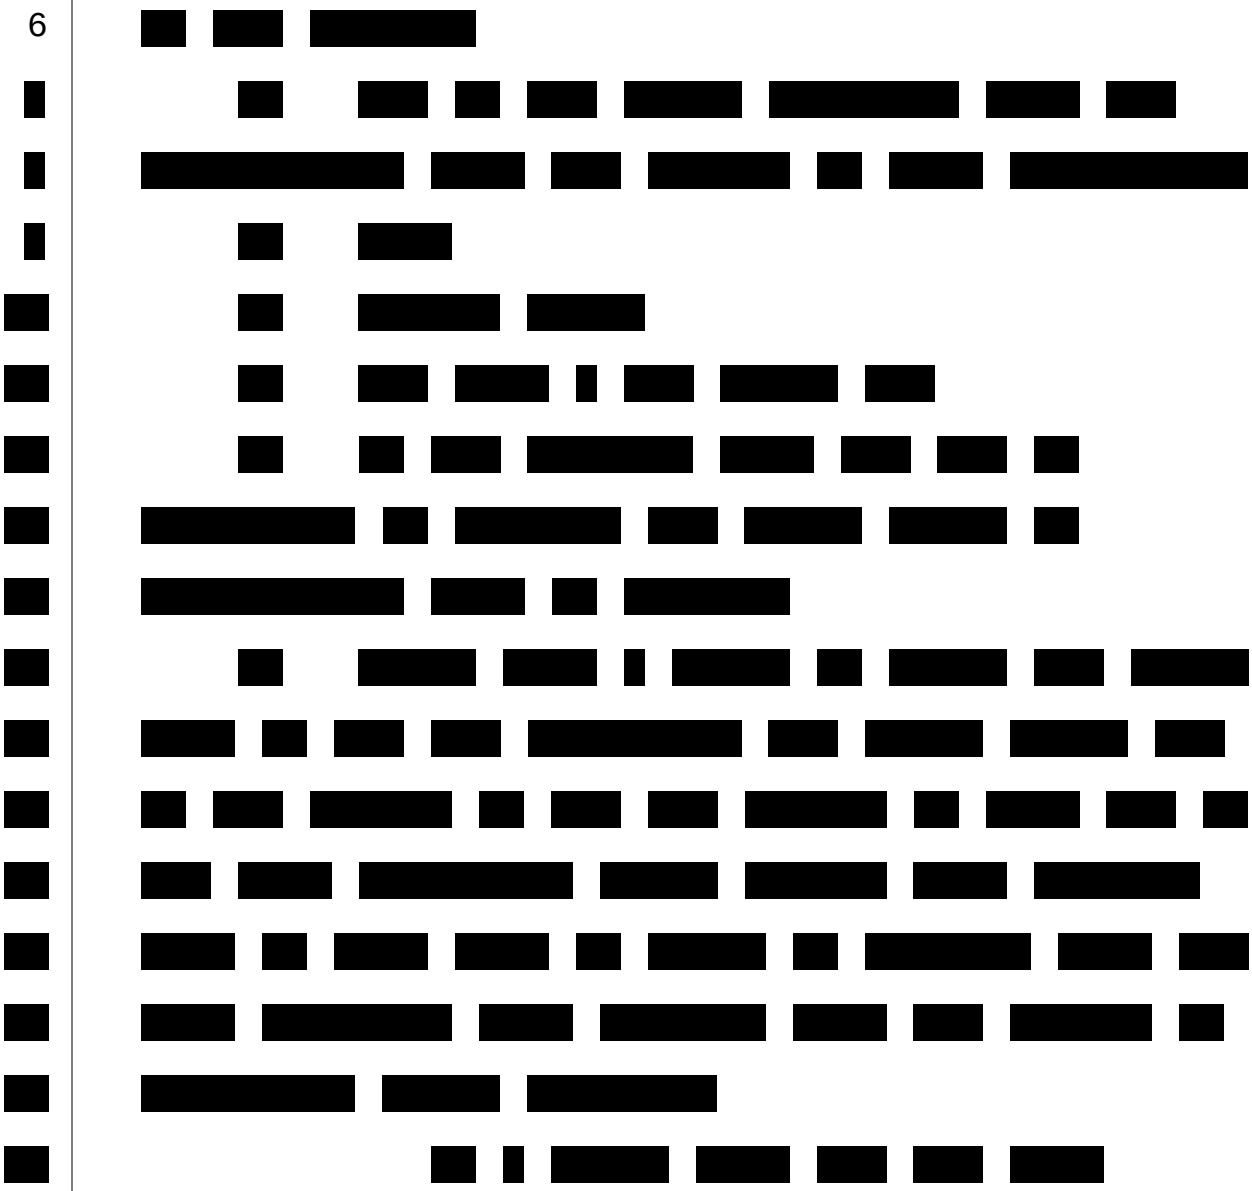
A. Someone -- yes, someone bringing lunch has opened the door and that's -- John is telling them where to go.

(Brief pause.)

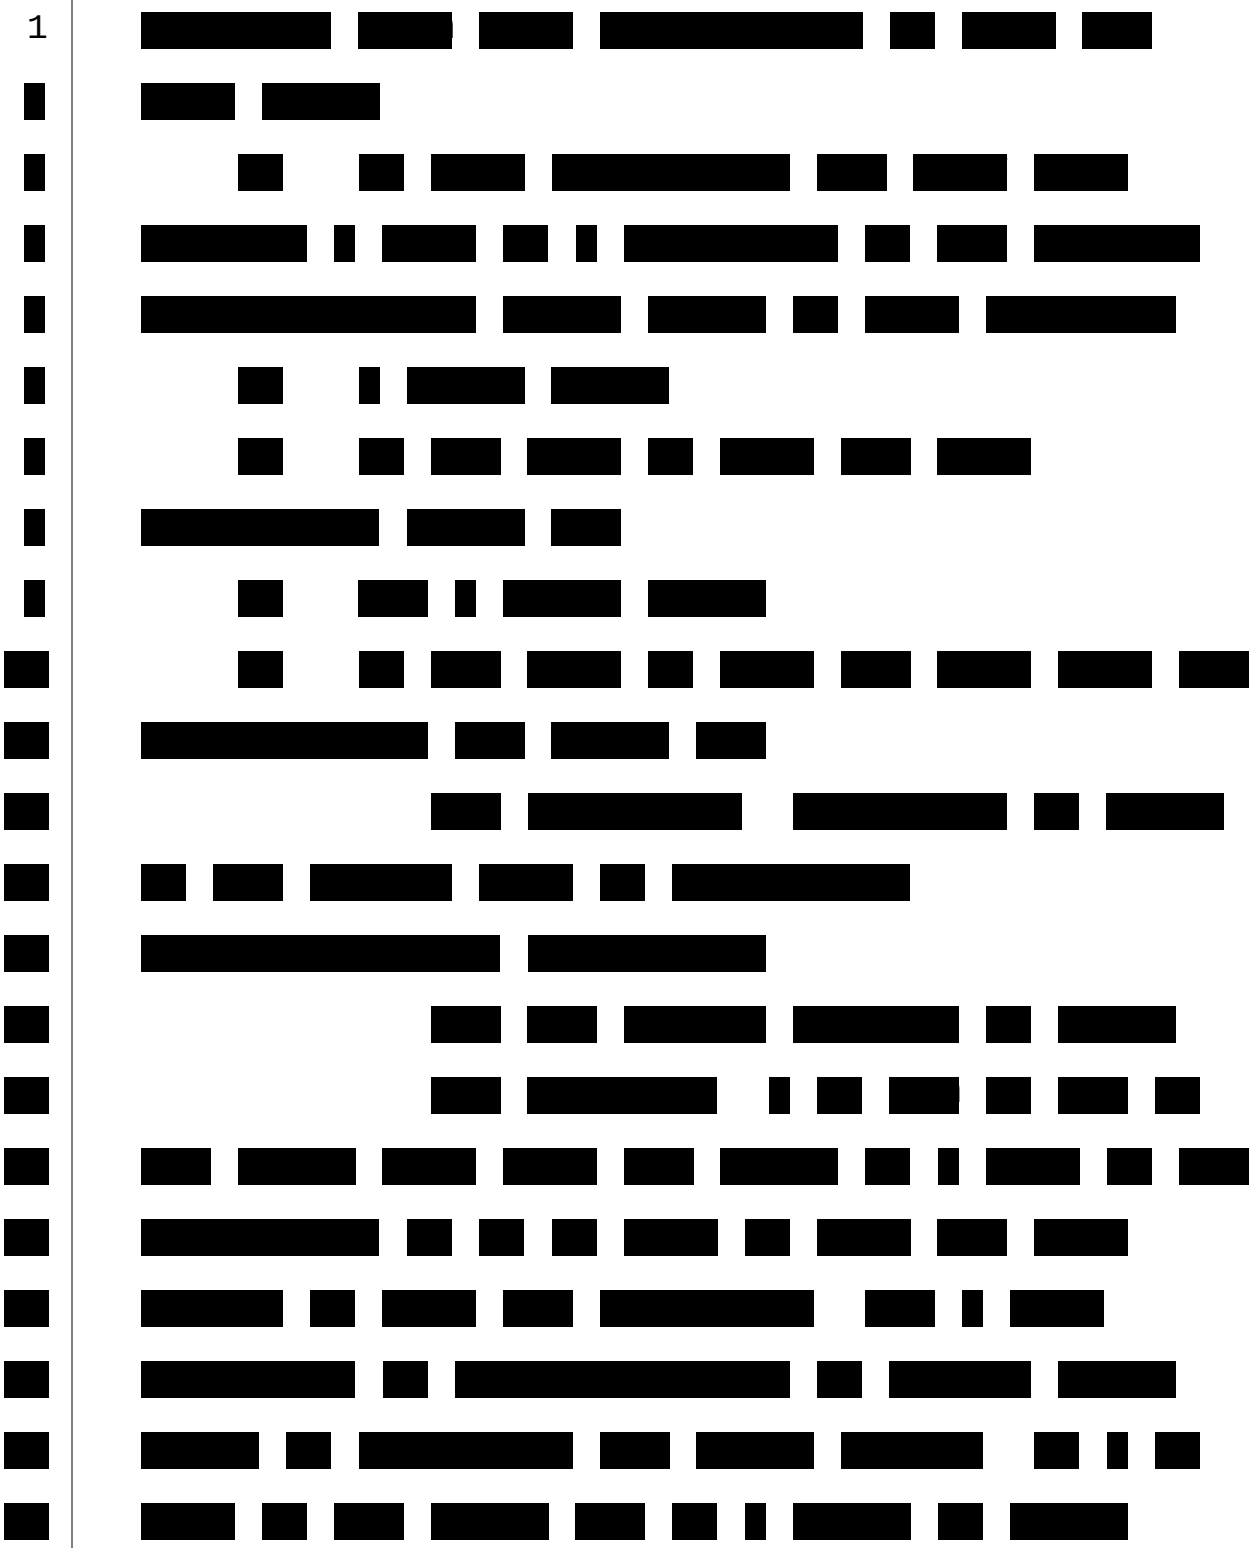
MR. HEFLIN: I don't know where we are on the video. We can take a lunch break when evaluating --

THE WITNESS: John is coming back.

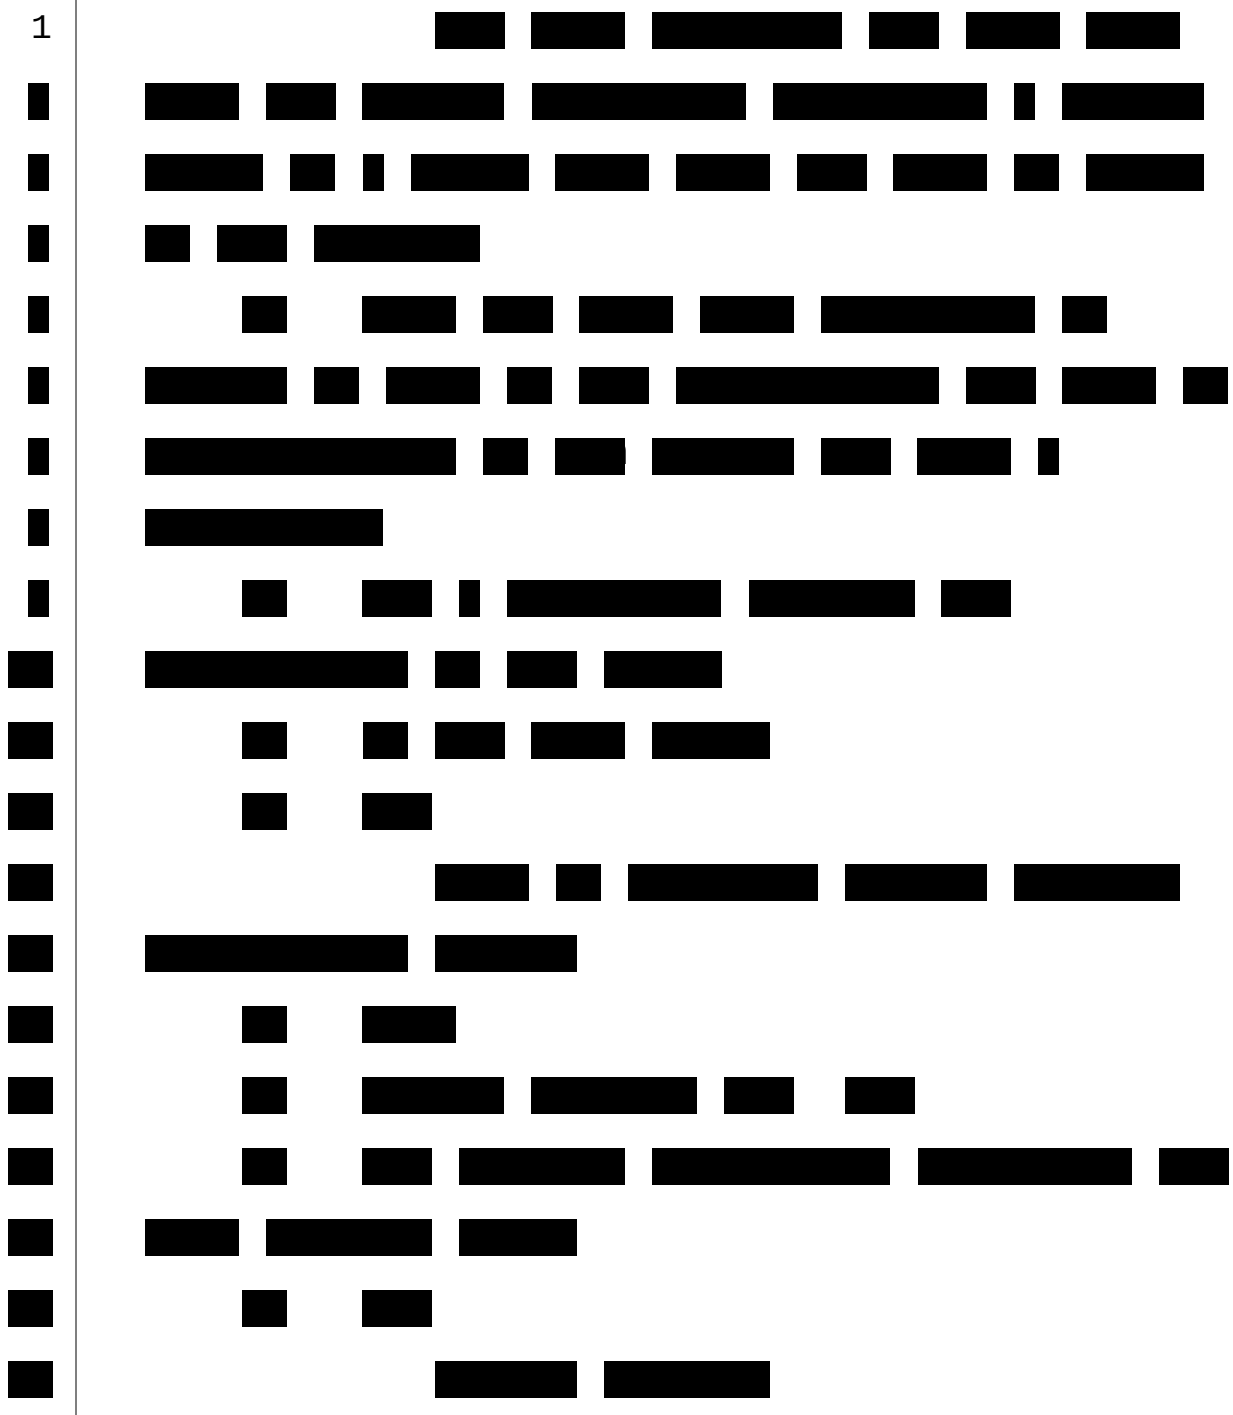
MR. HEFLIN: -- or we can power on.



MR. KAVANAGH: Sorry about that. Somebody marched in.

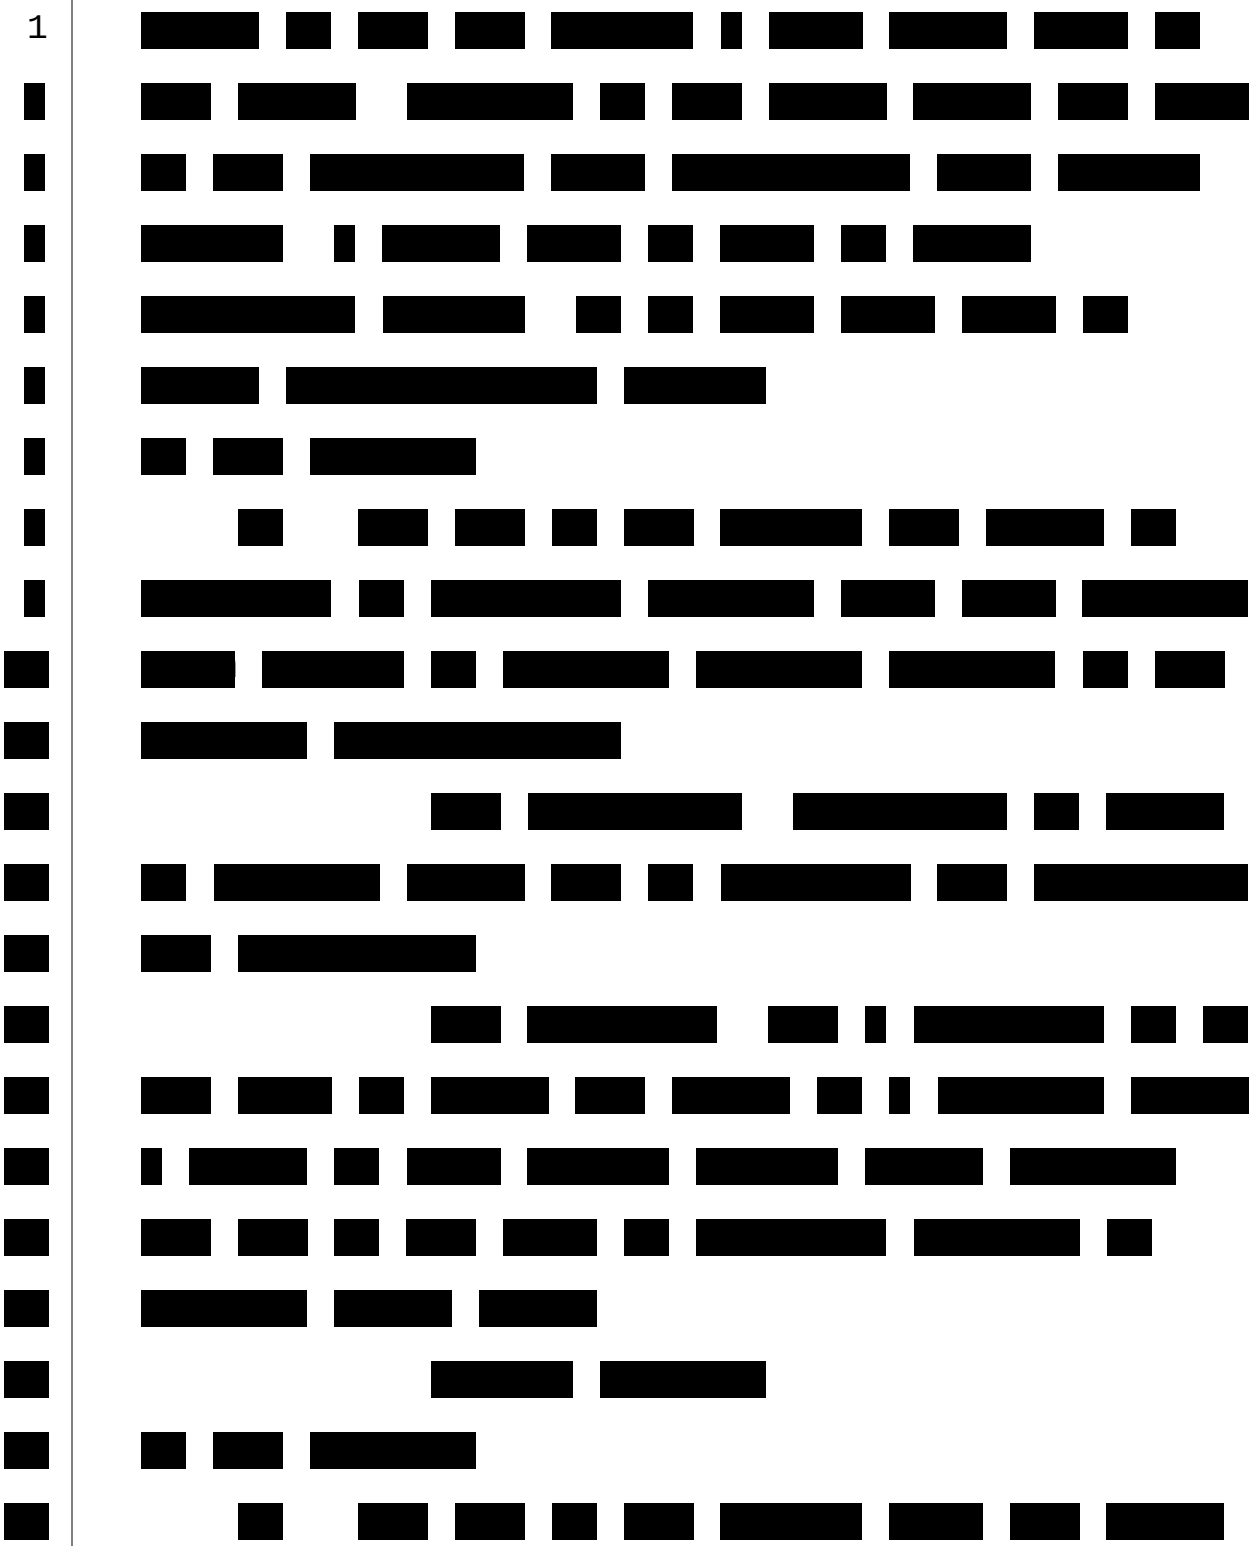


MR. HEFLIN: No worries. Shall we continue or do you want to take lunch now?

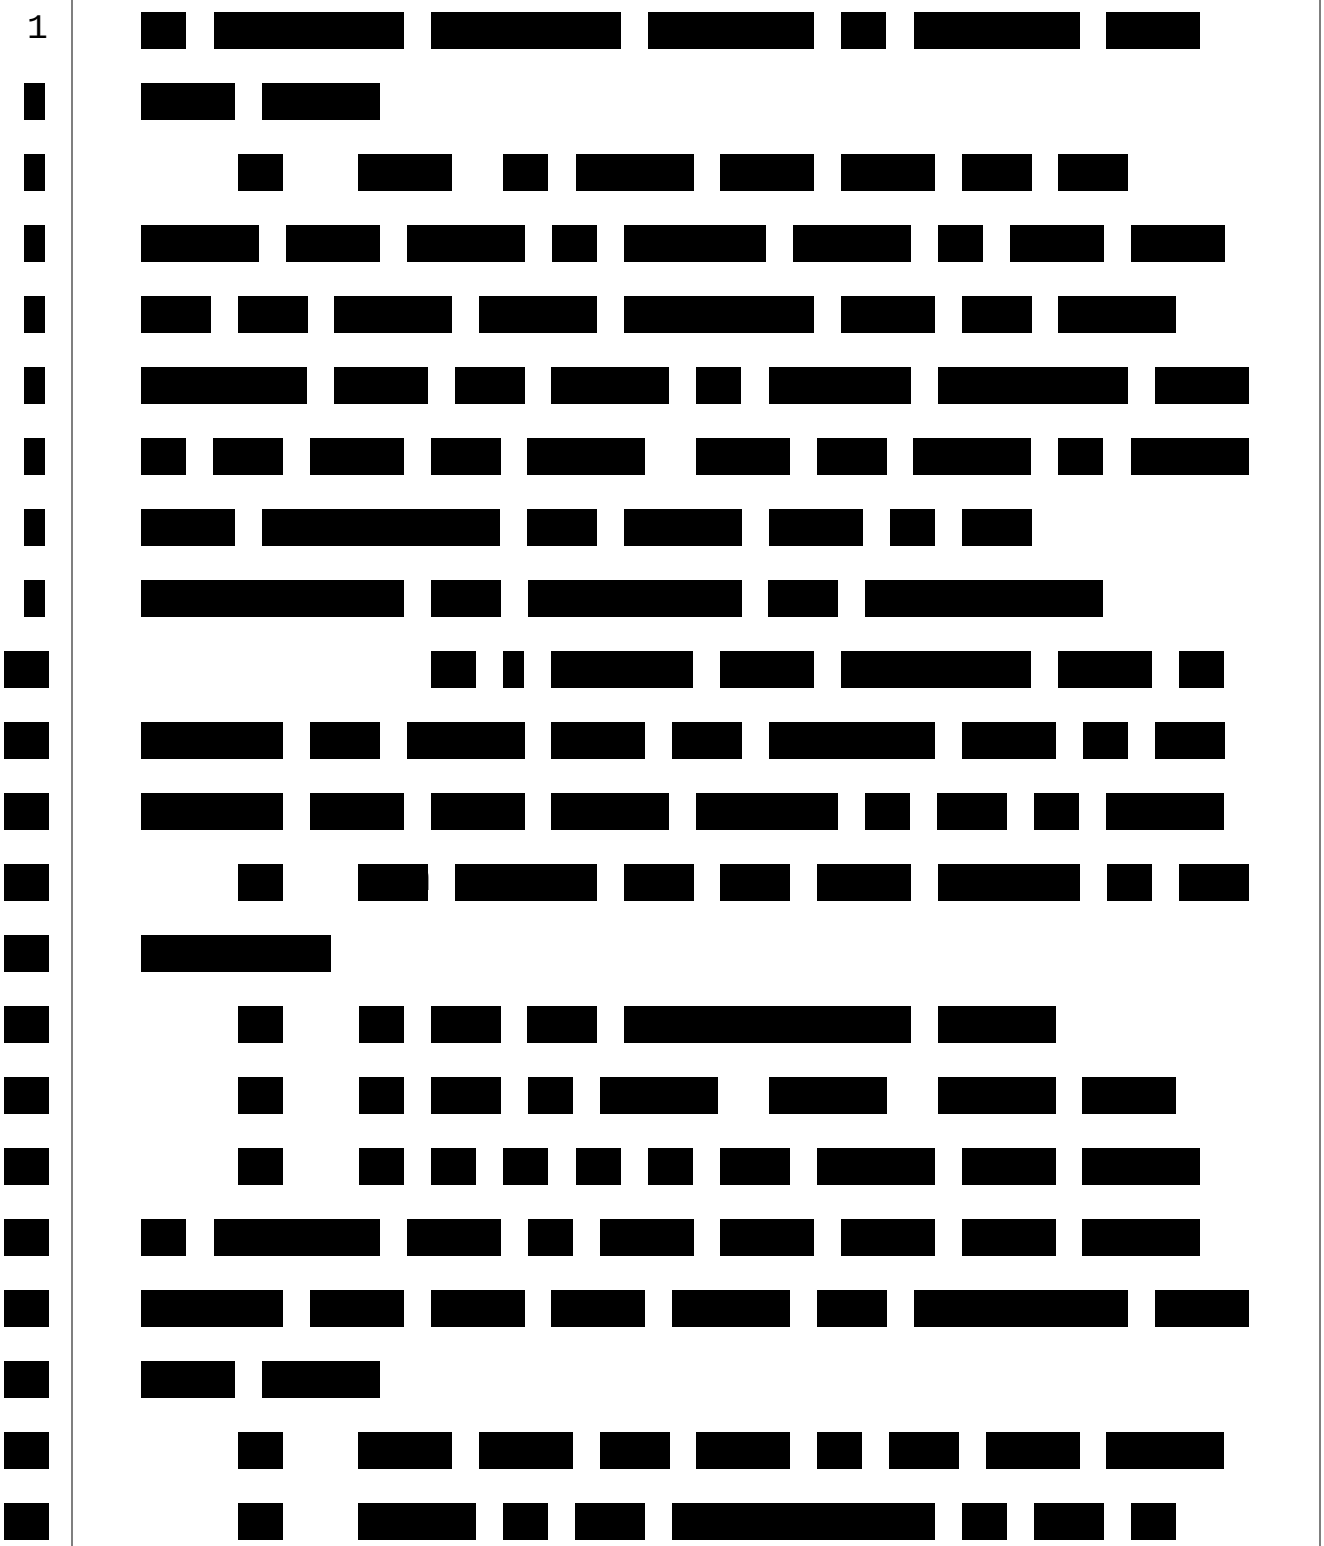


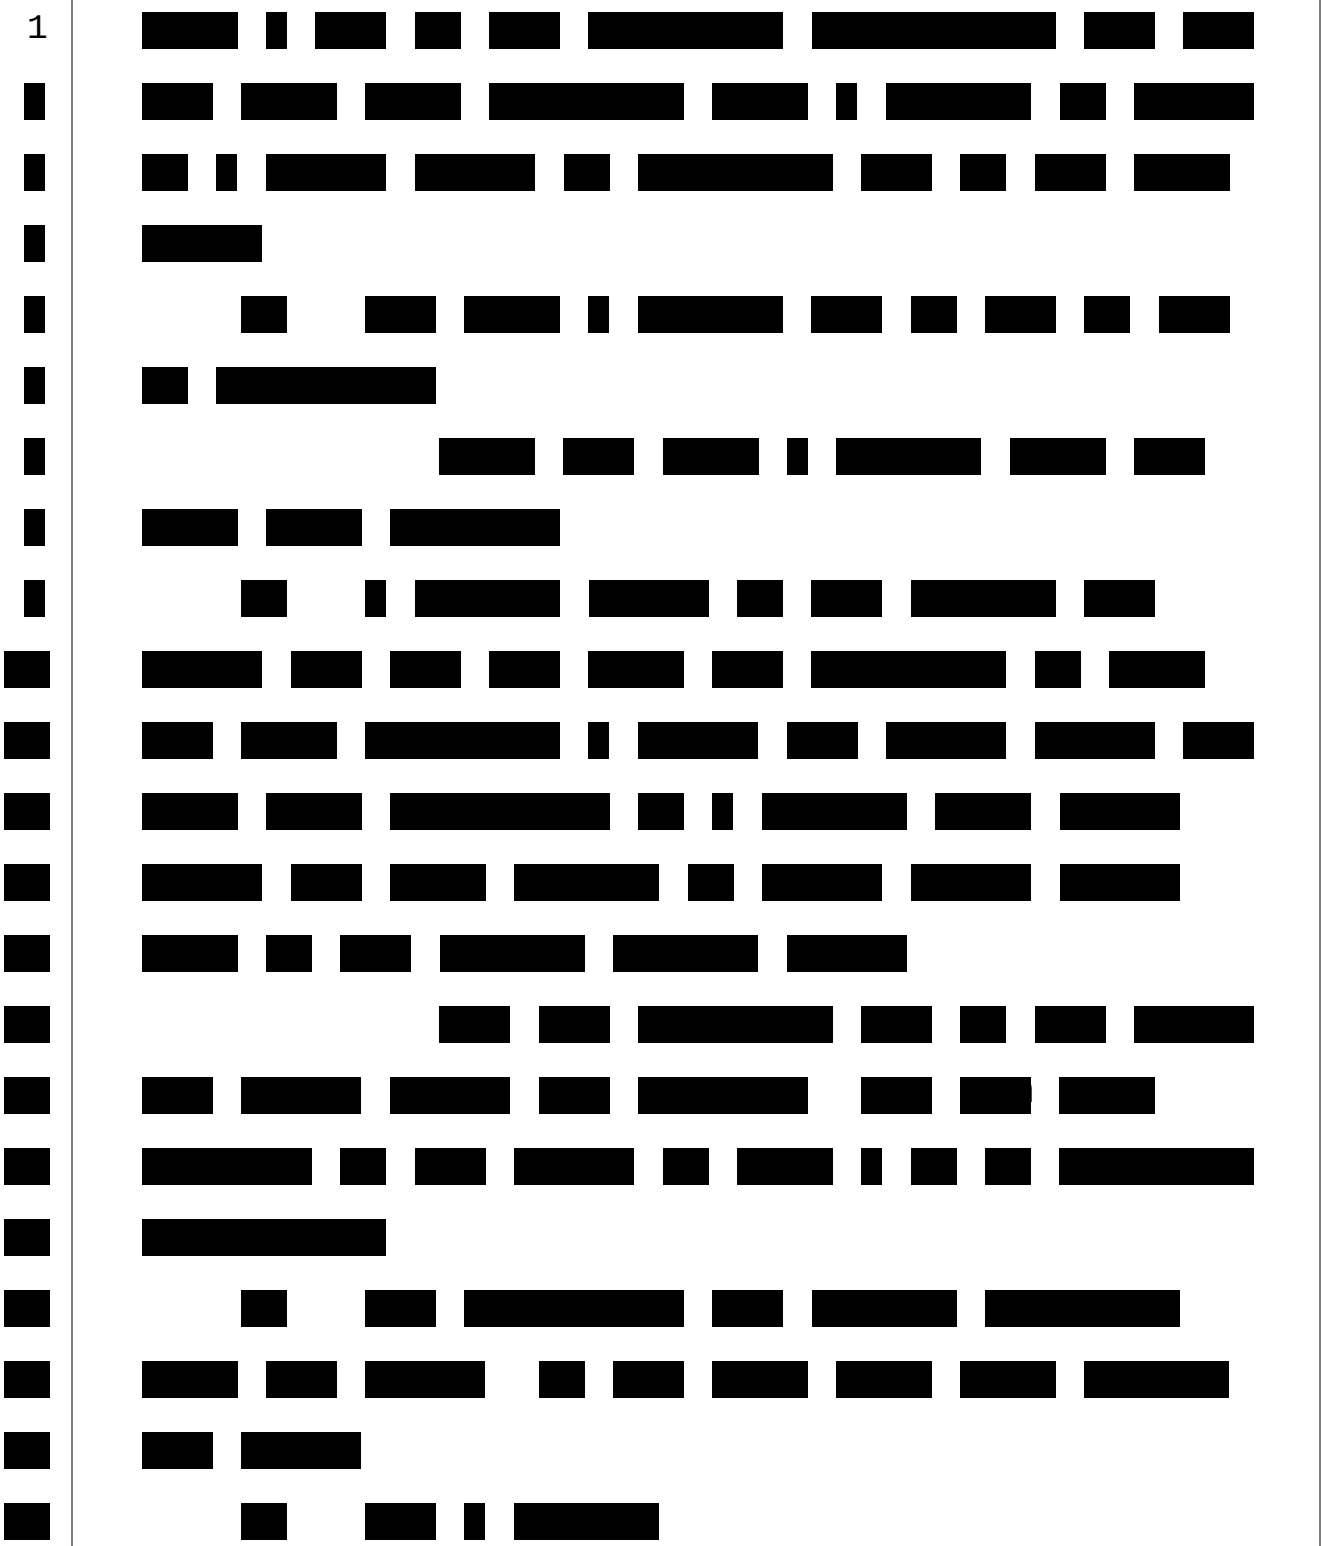
MR. KAVANAGH: Well, that was

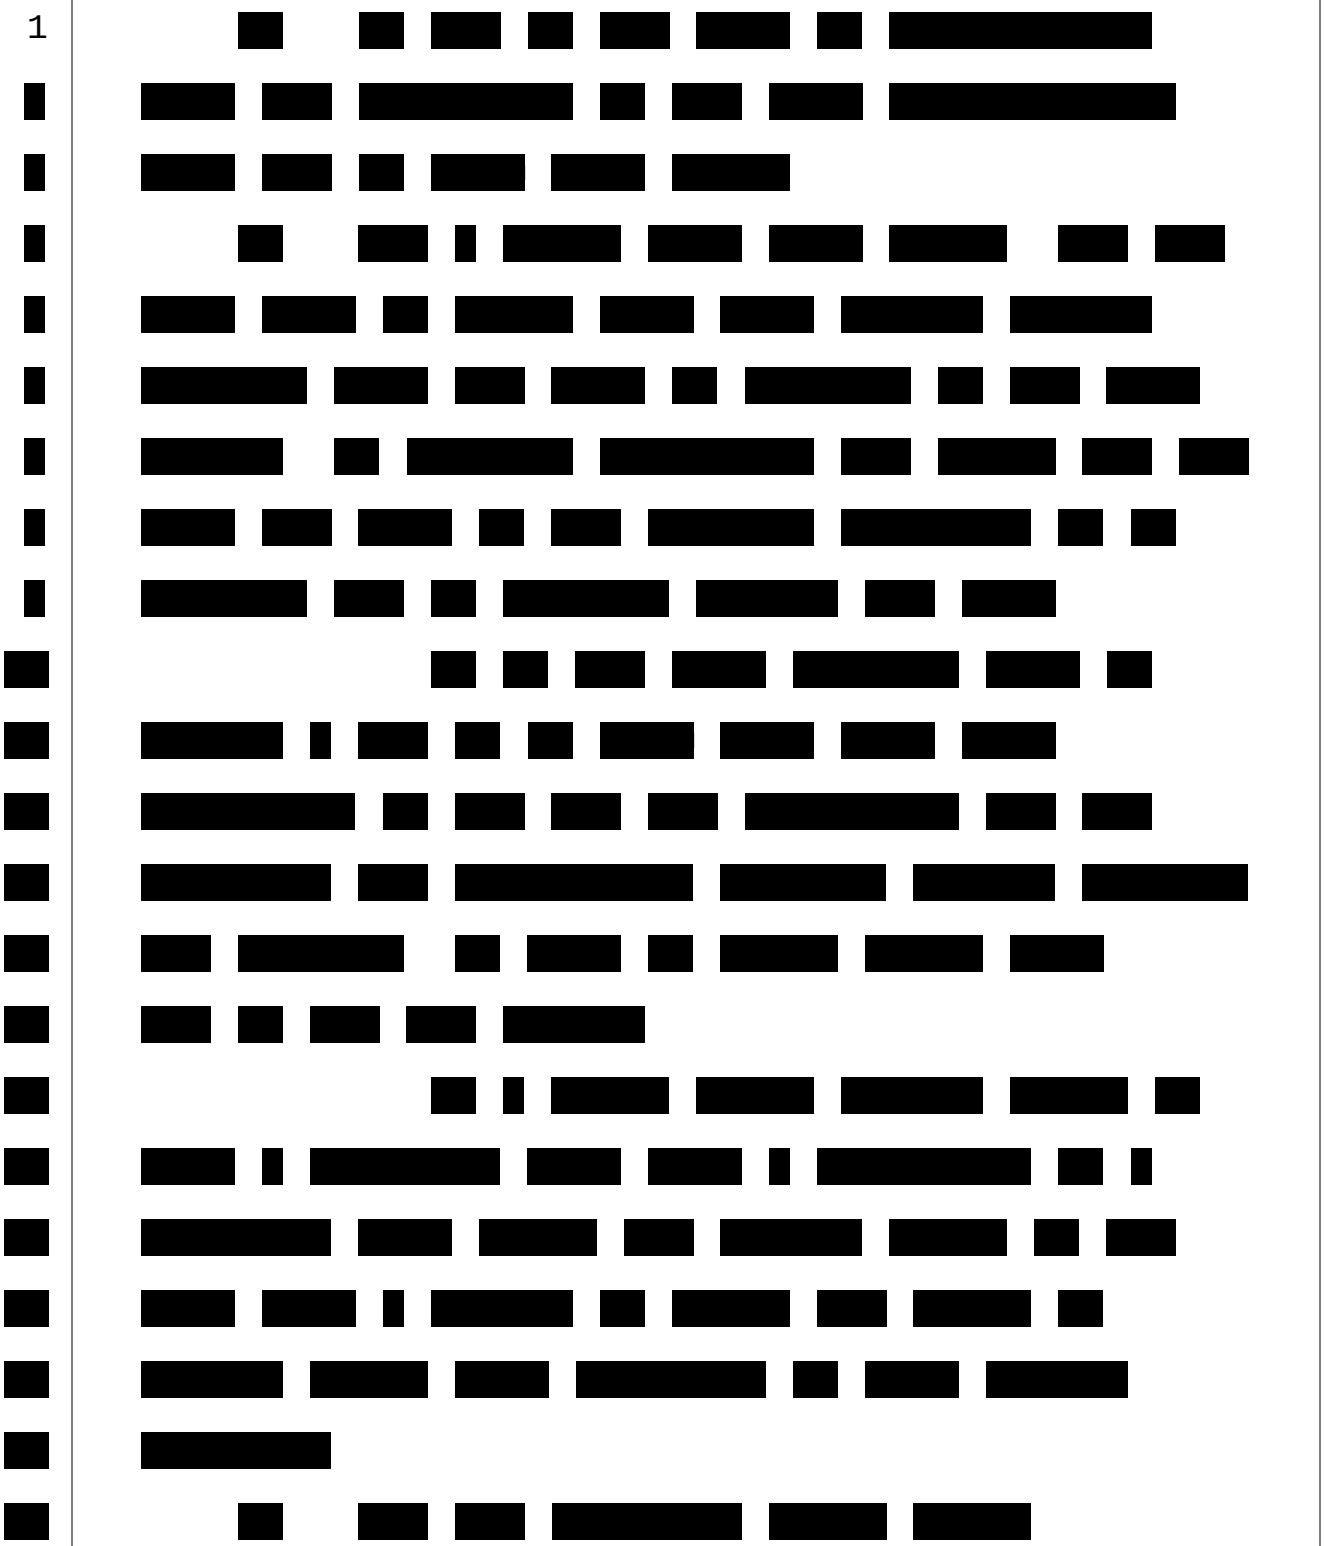
lunch, so we can go for another 15 minutes if you'd like.

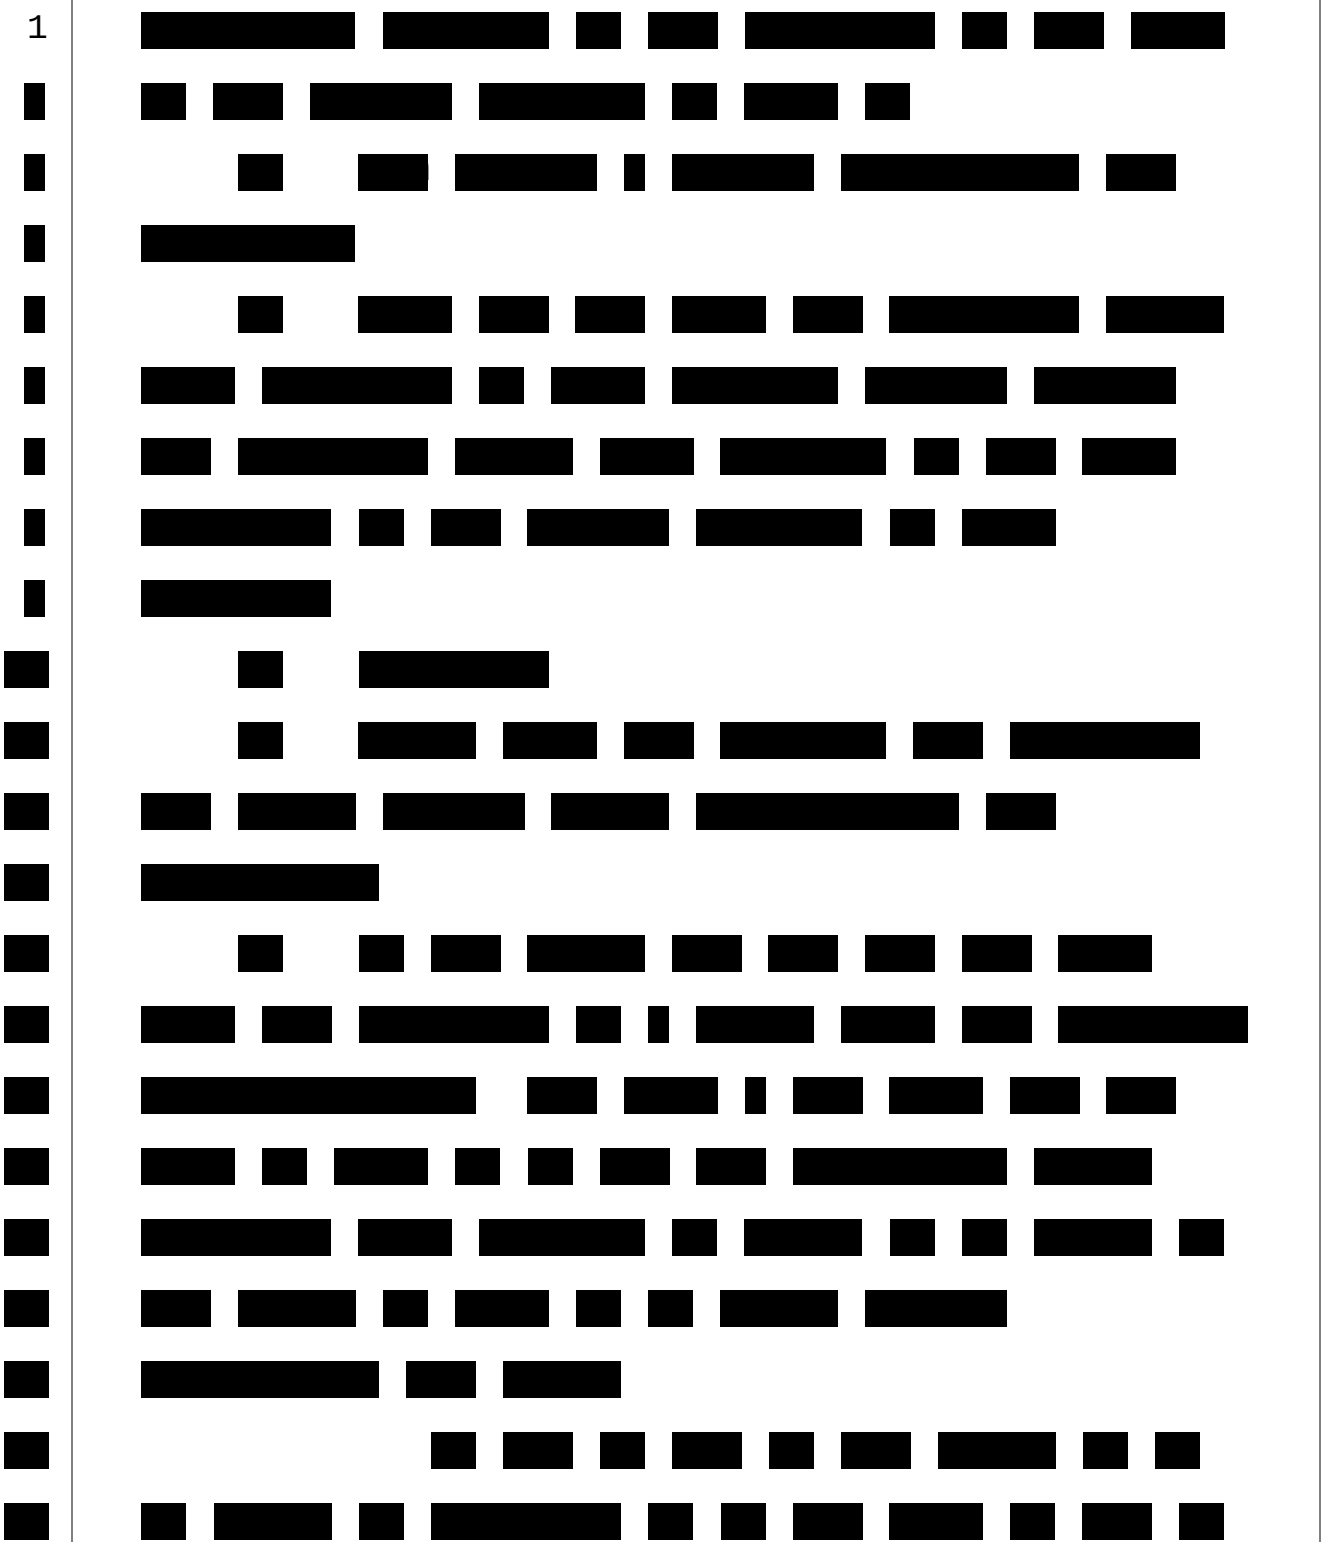


MR. HEFLIN: Sure, yeah. Let's talk for another 15 minutes and then we'll -- I believe we have burritos downstairs.

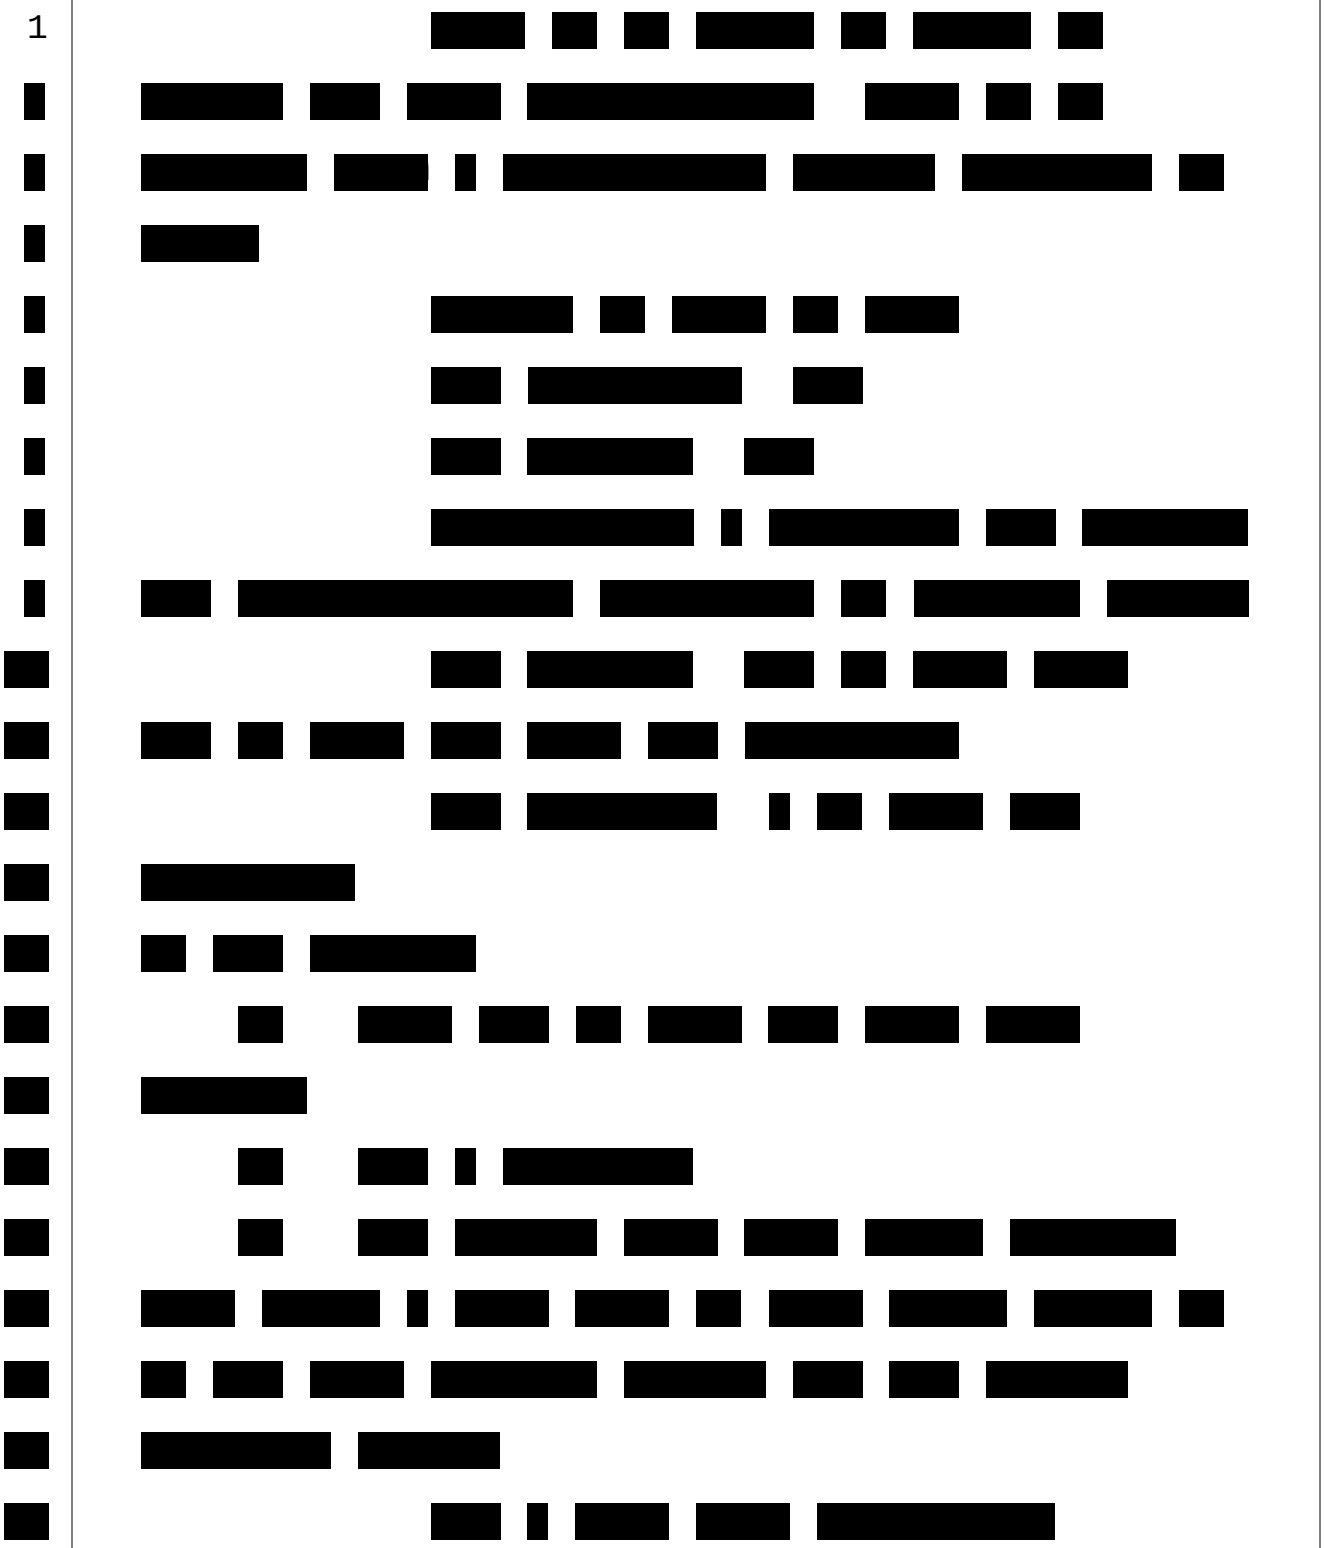


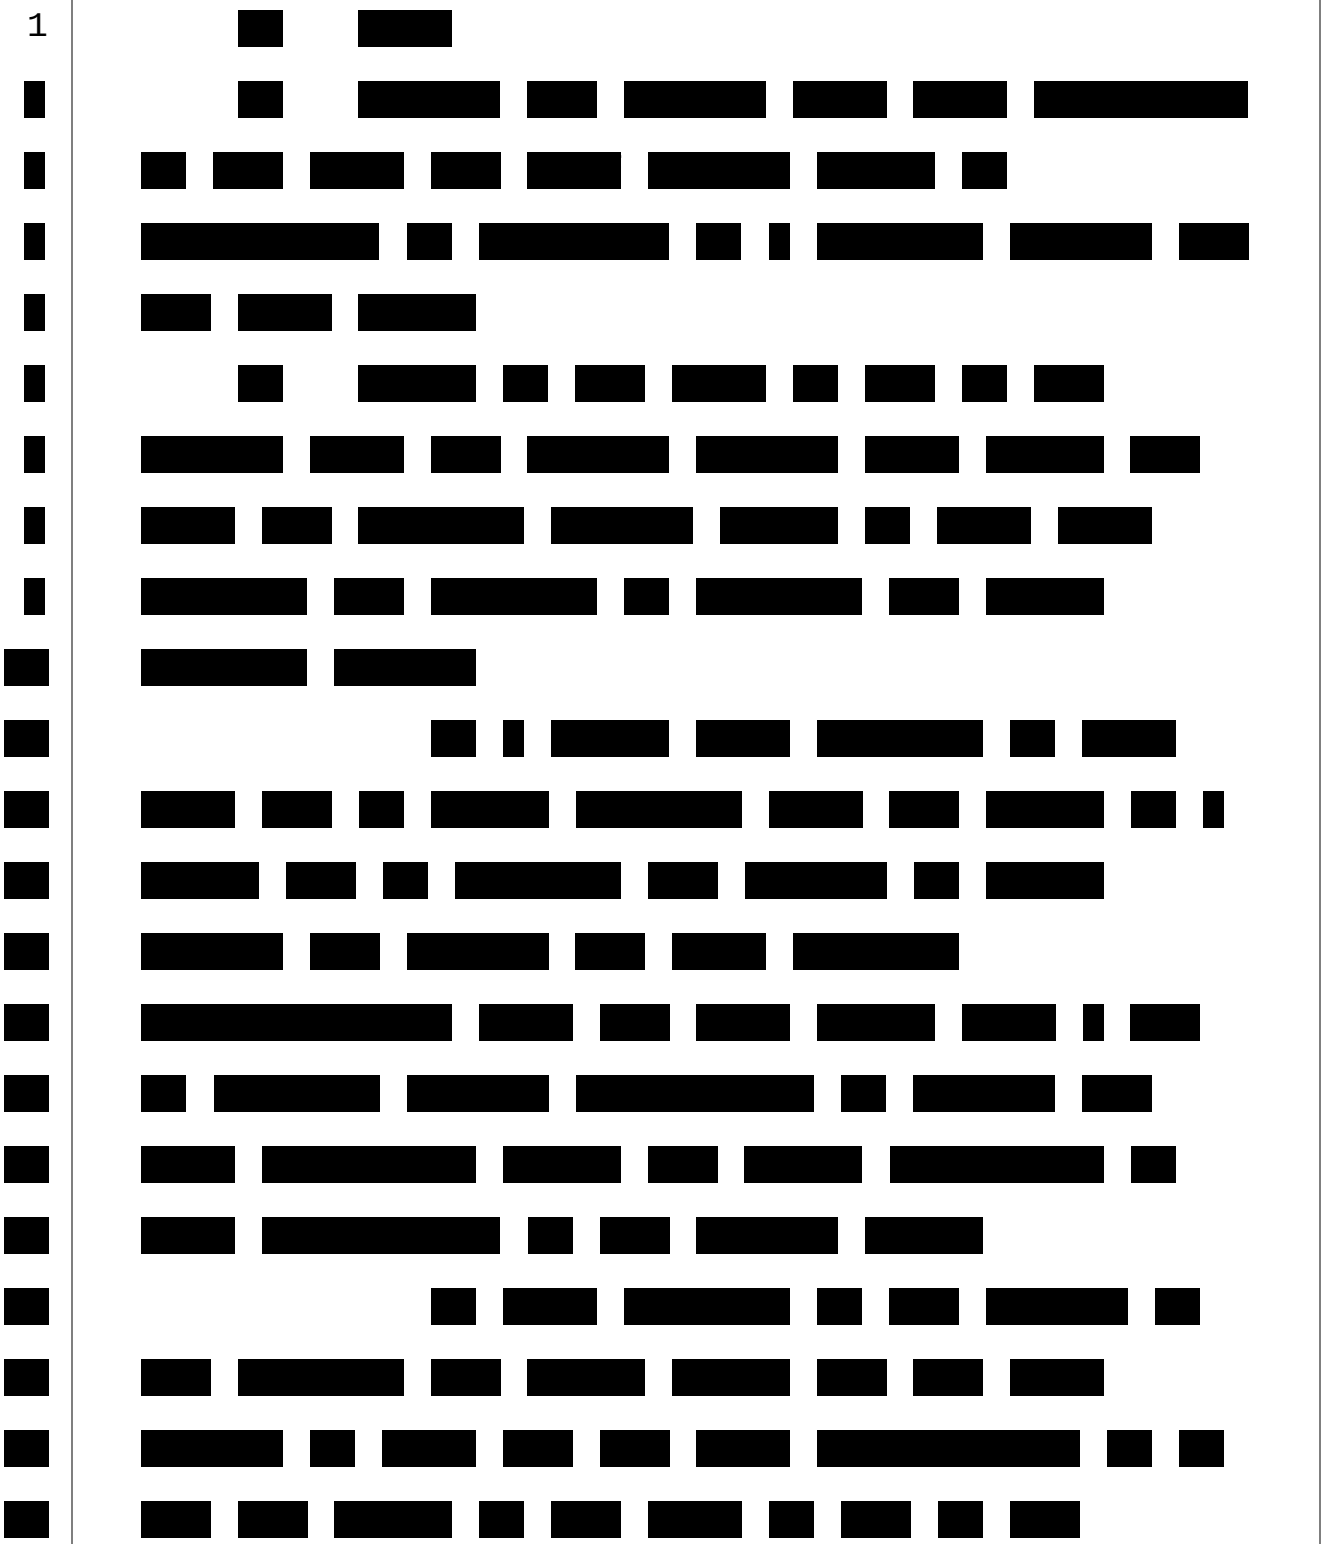






MR. HEFLIN: You know what, I think I'm going to shift topics, so is it okay





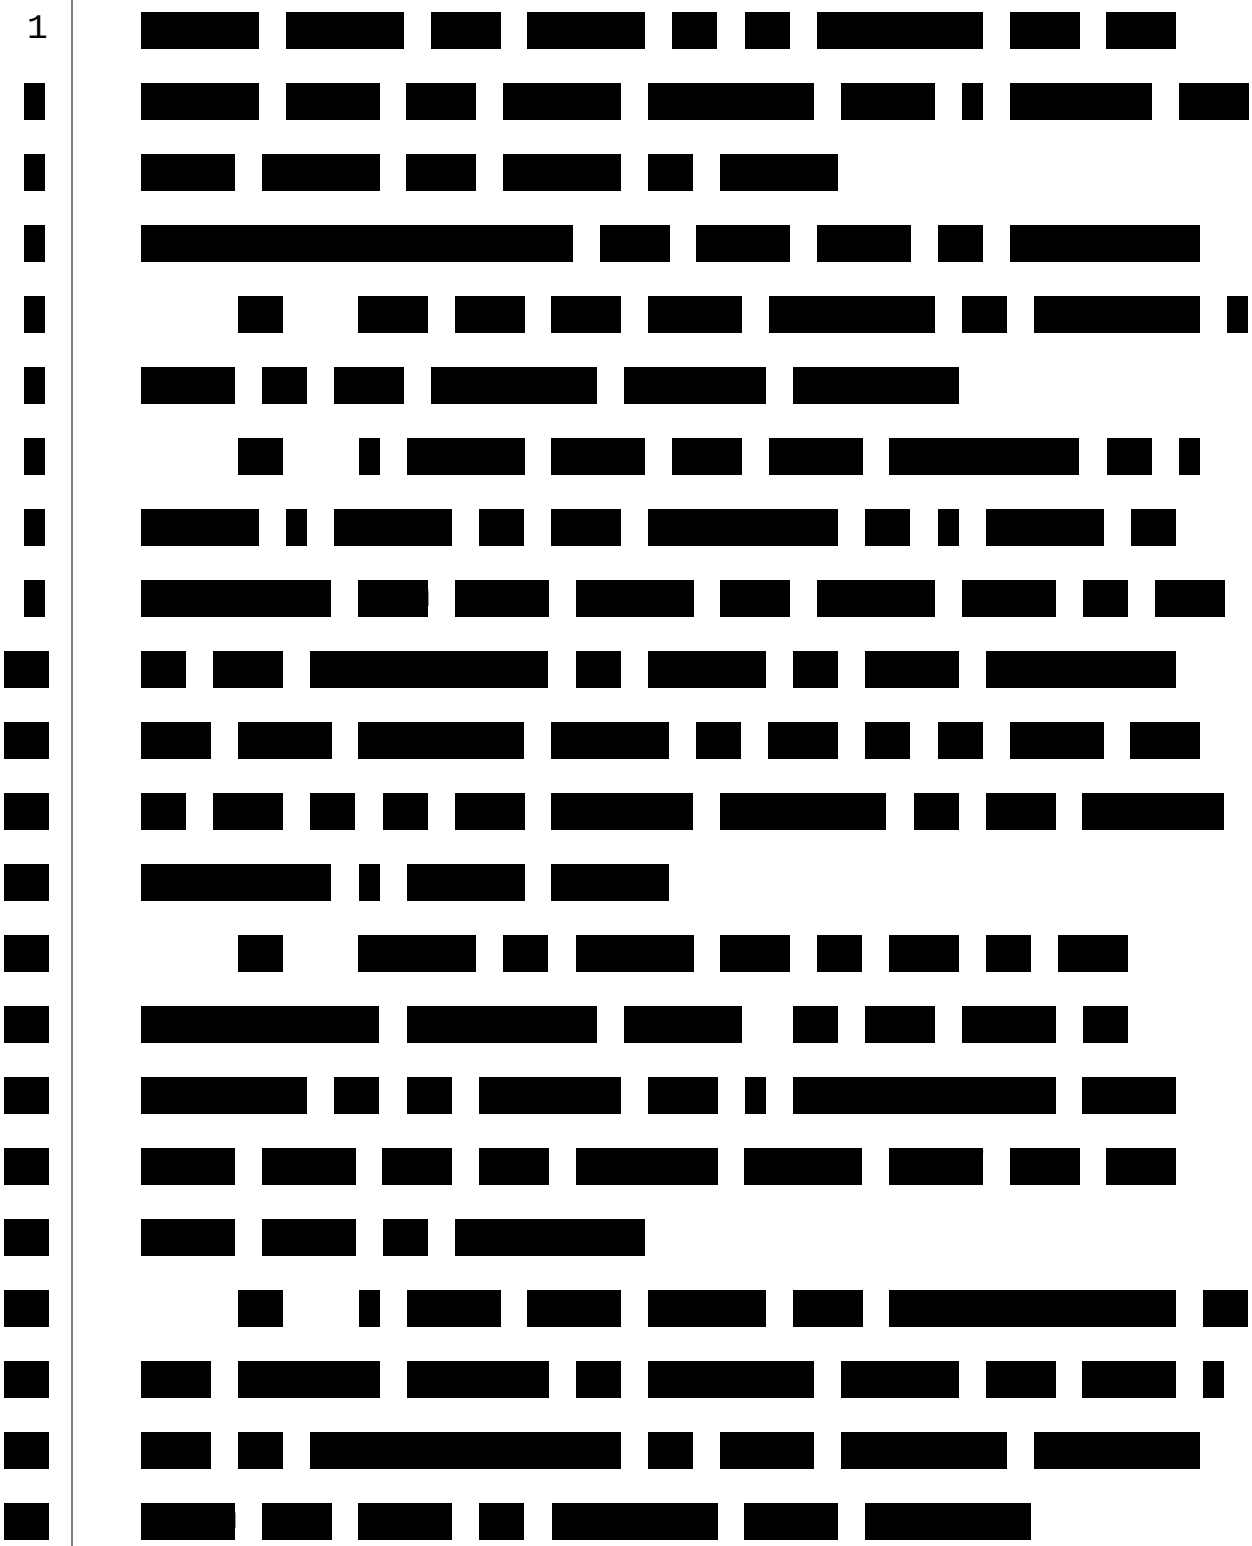
[redacted]

MR. HEFLIN: Okay. I think we can skip this one.

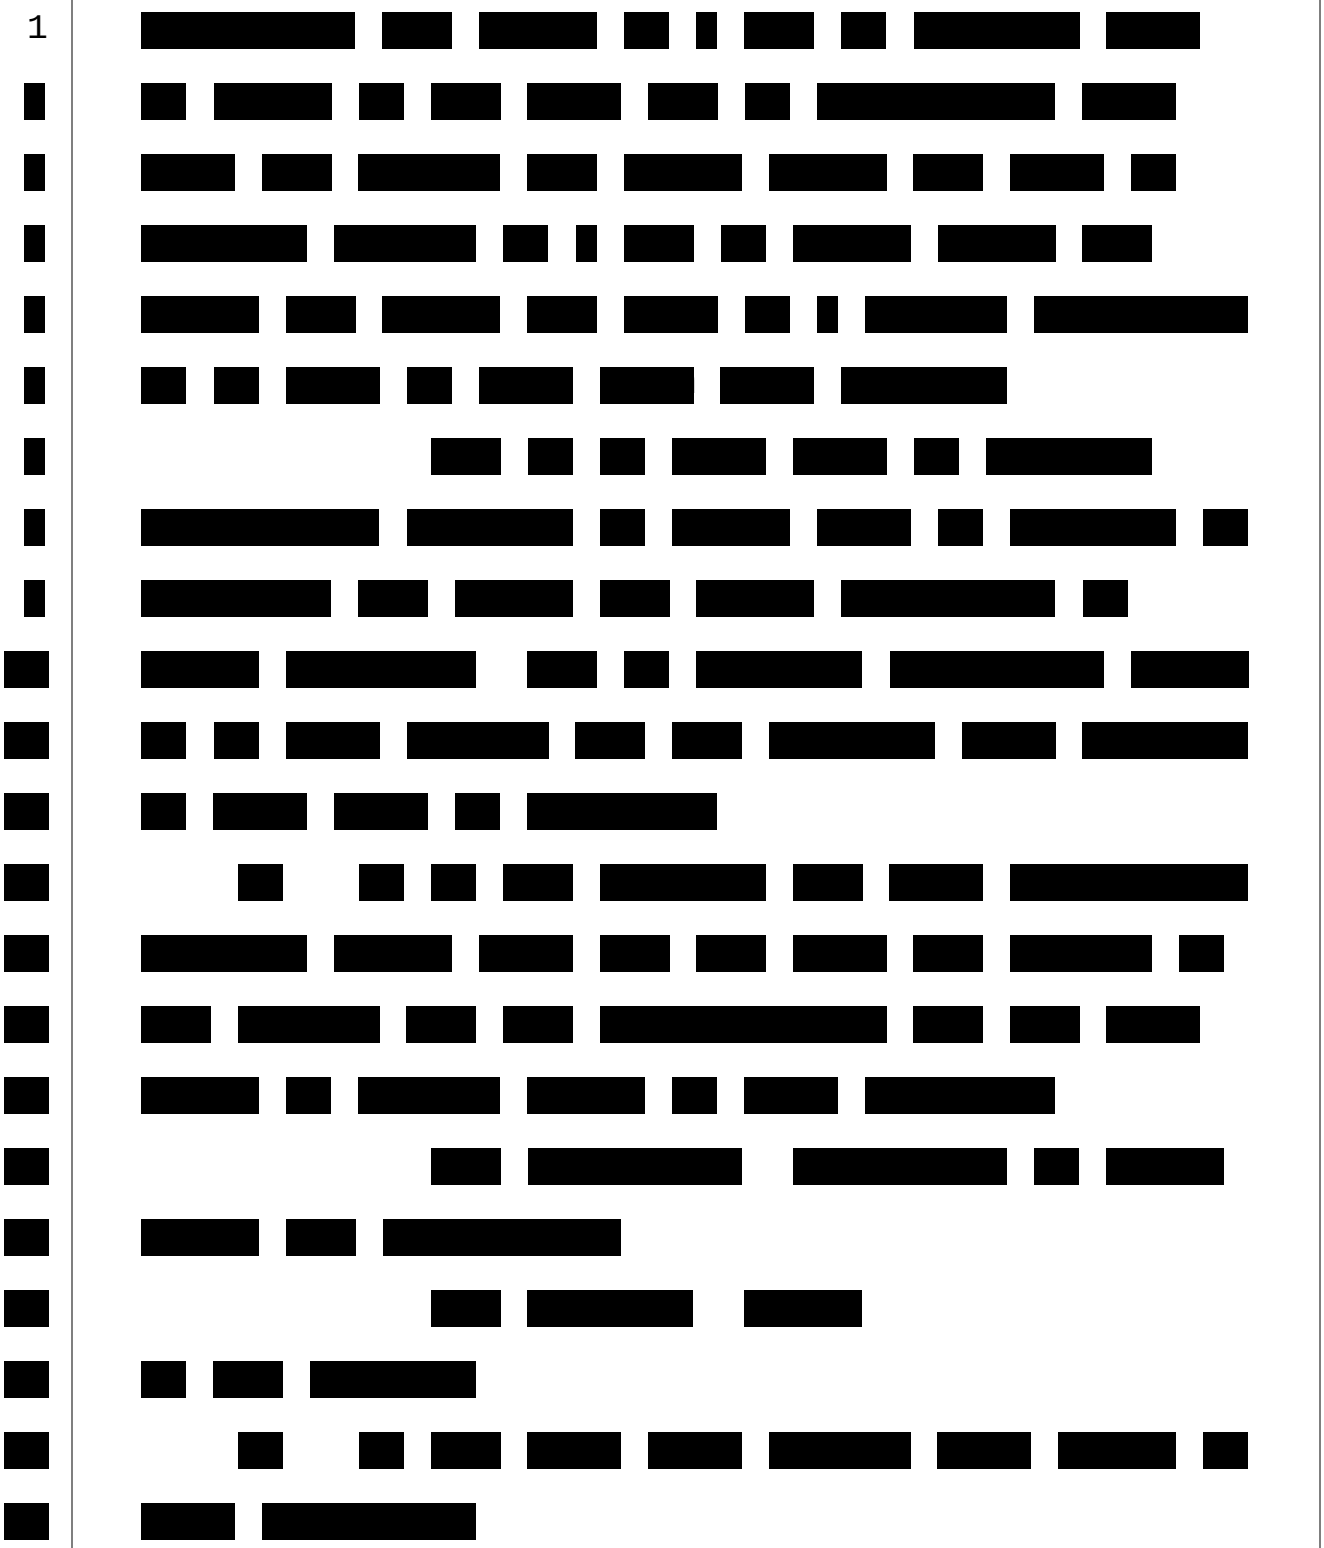
Let's look at Envelope M.

[redacted]

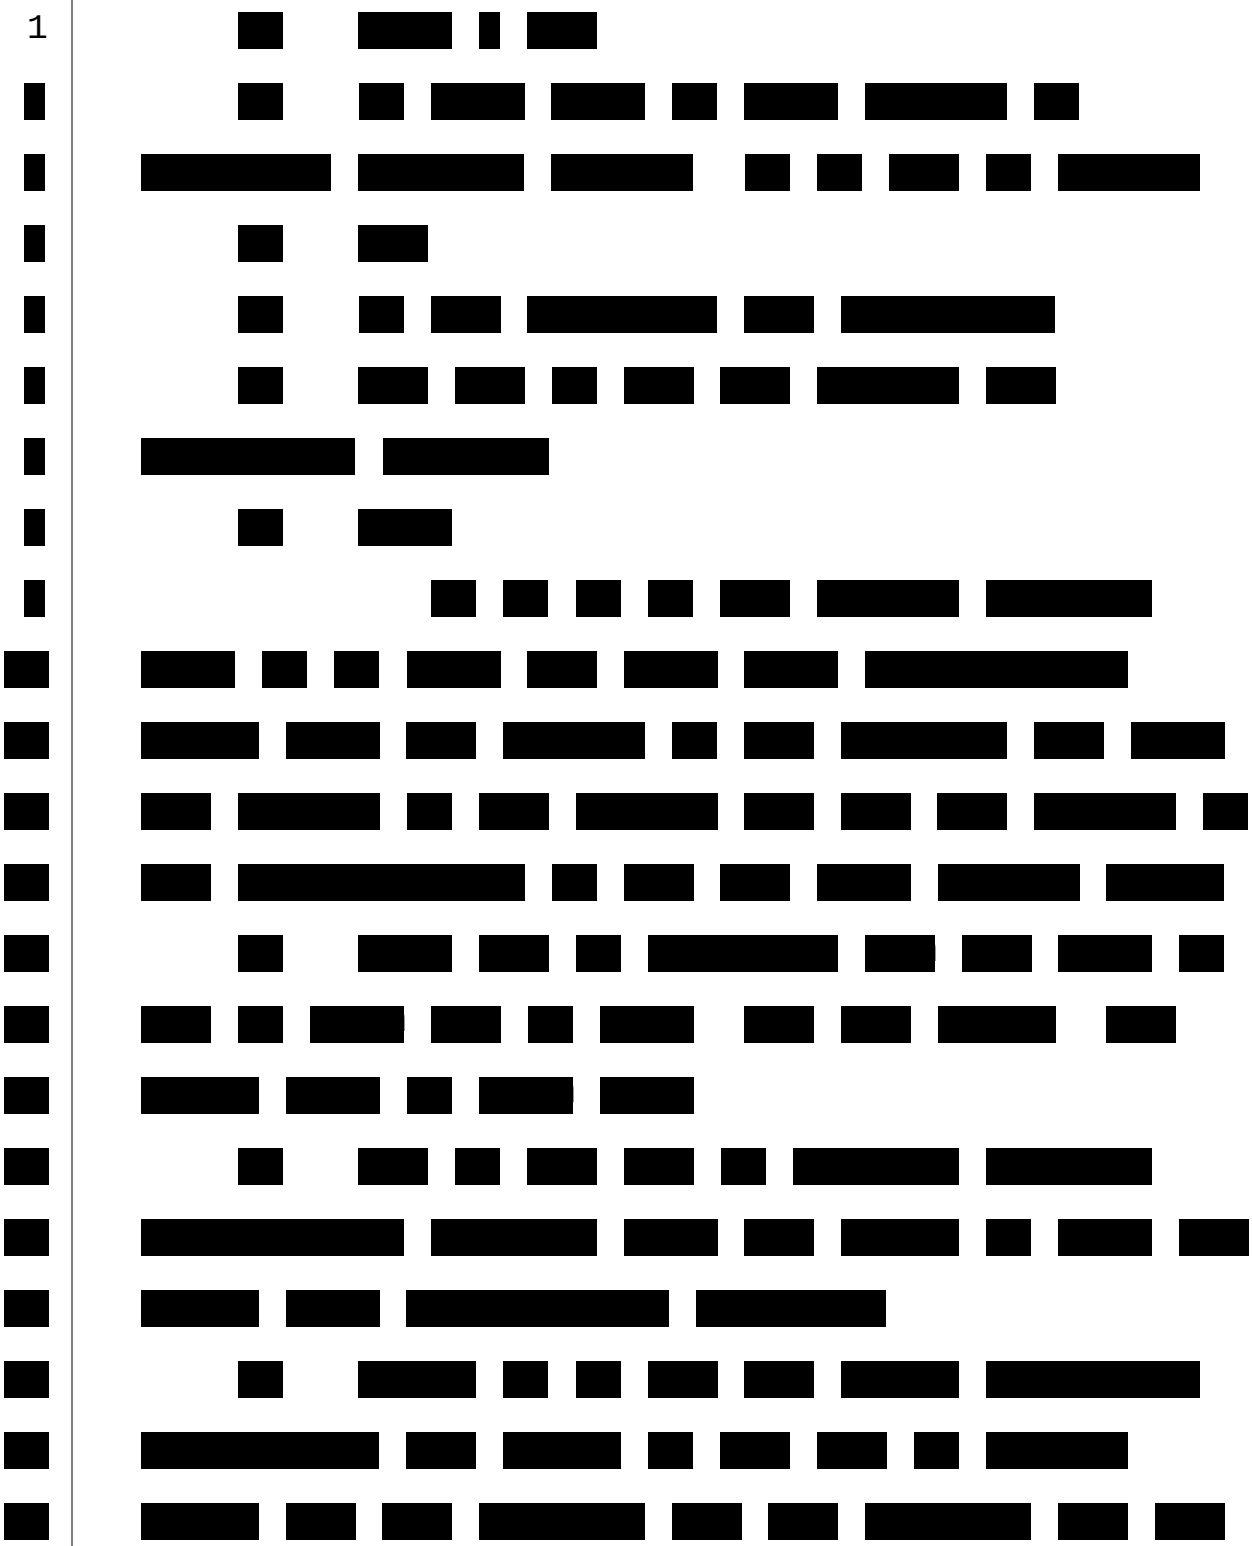
Okay. That's all I had with that exhibit. We can set that aside.



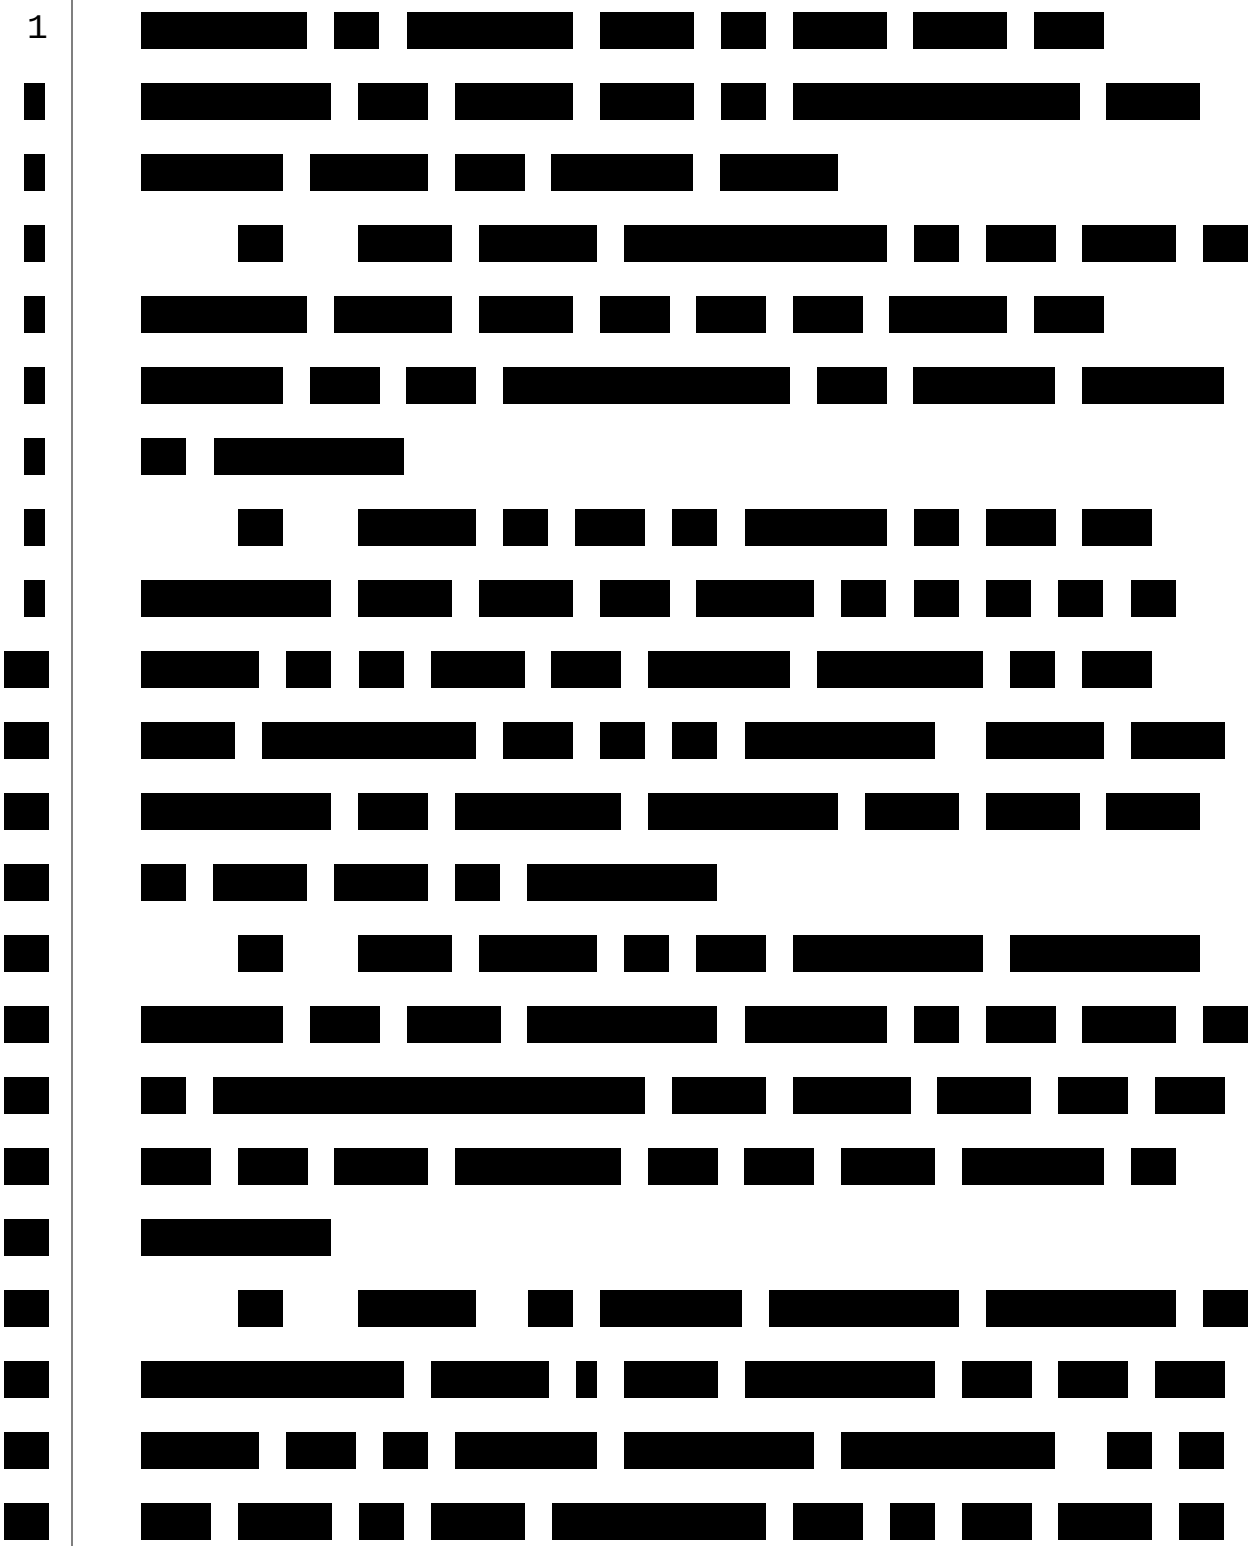
MR. KAVANAGH: Can we take a break?



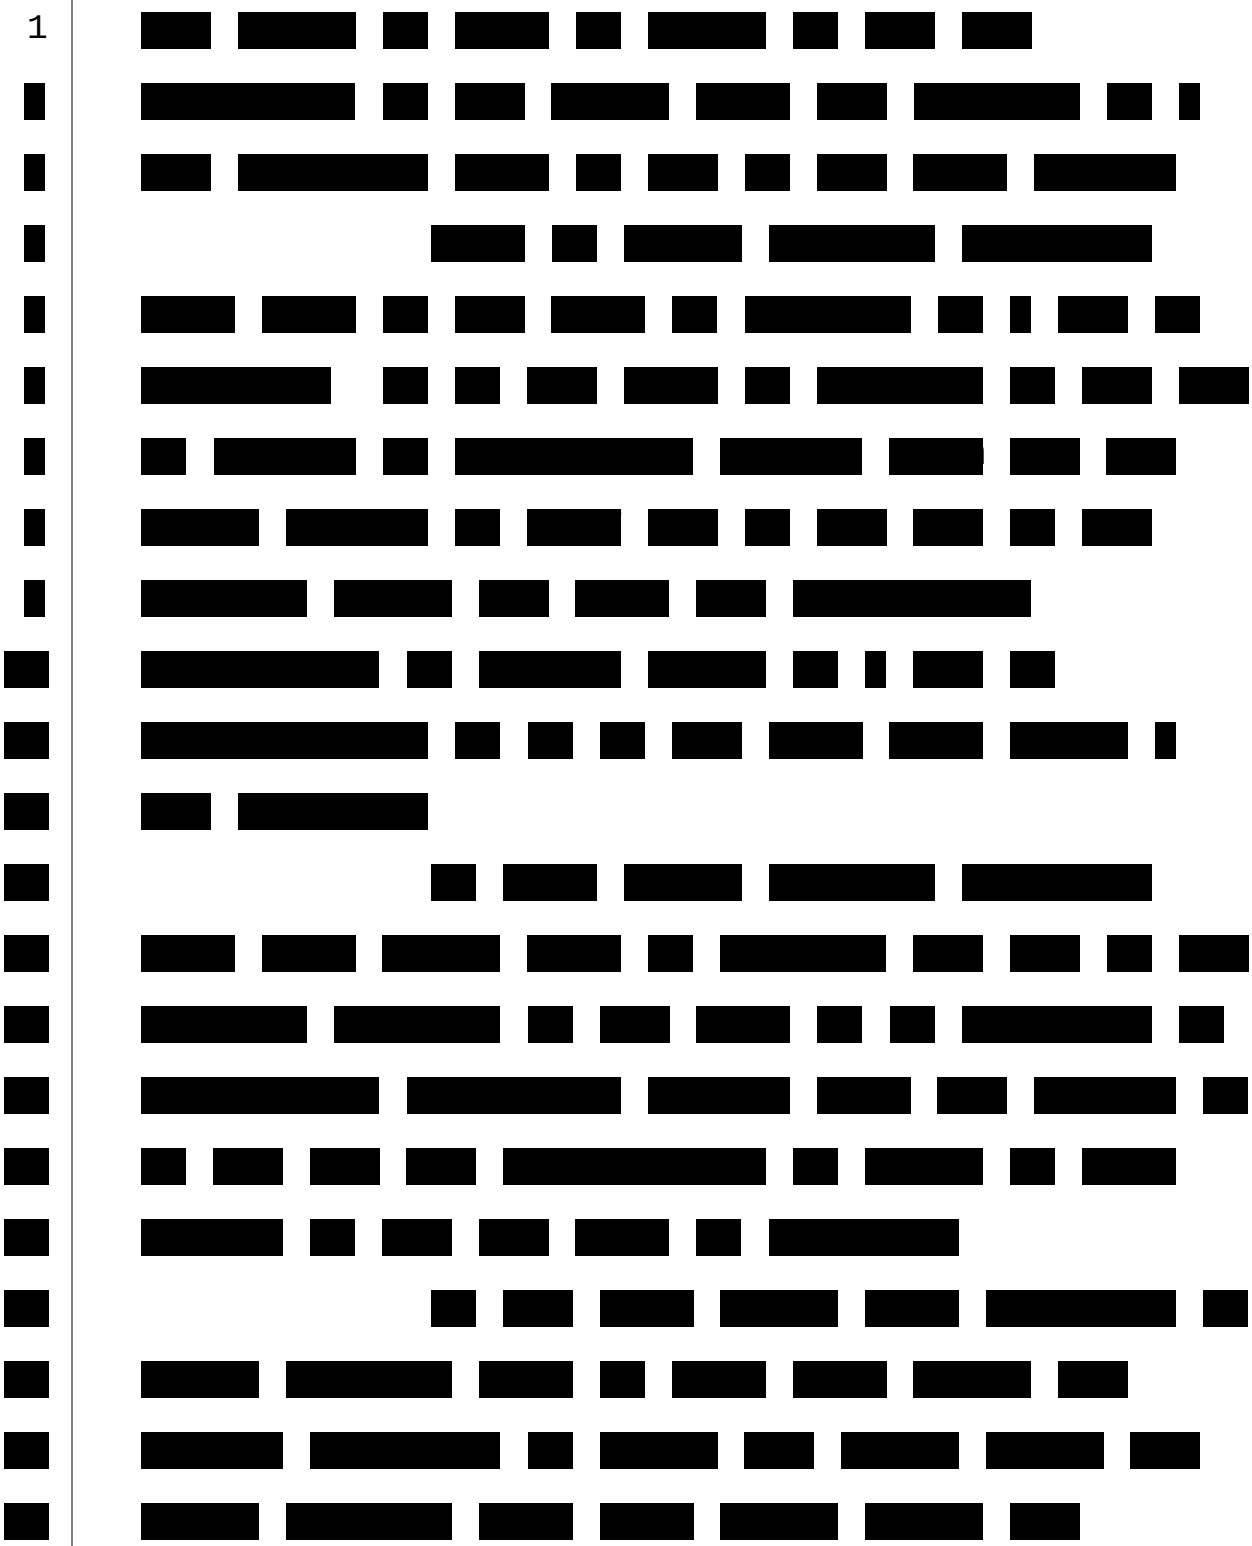
MR. HEFLIN: Sure. How long?



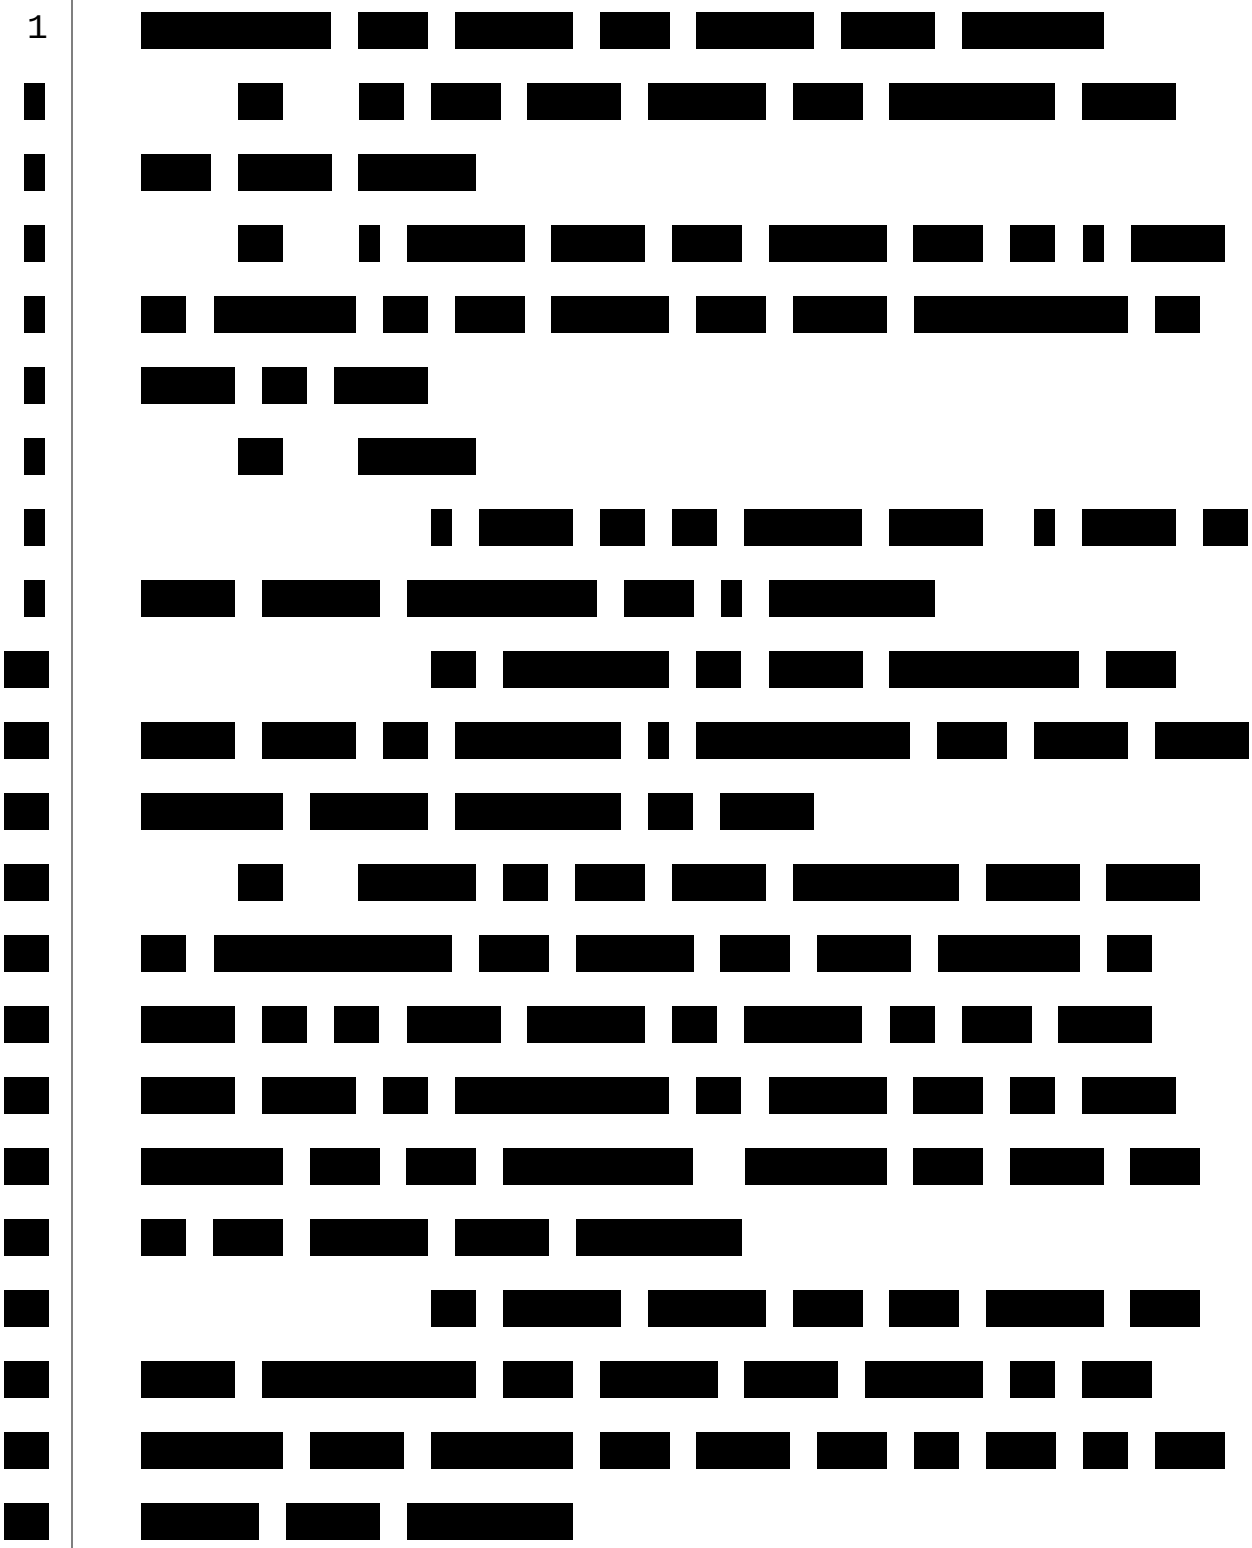
THE VIDEOGRAPHER: We are going off the record. The time is 1:30 p.m.

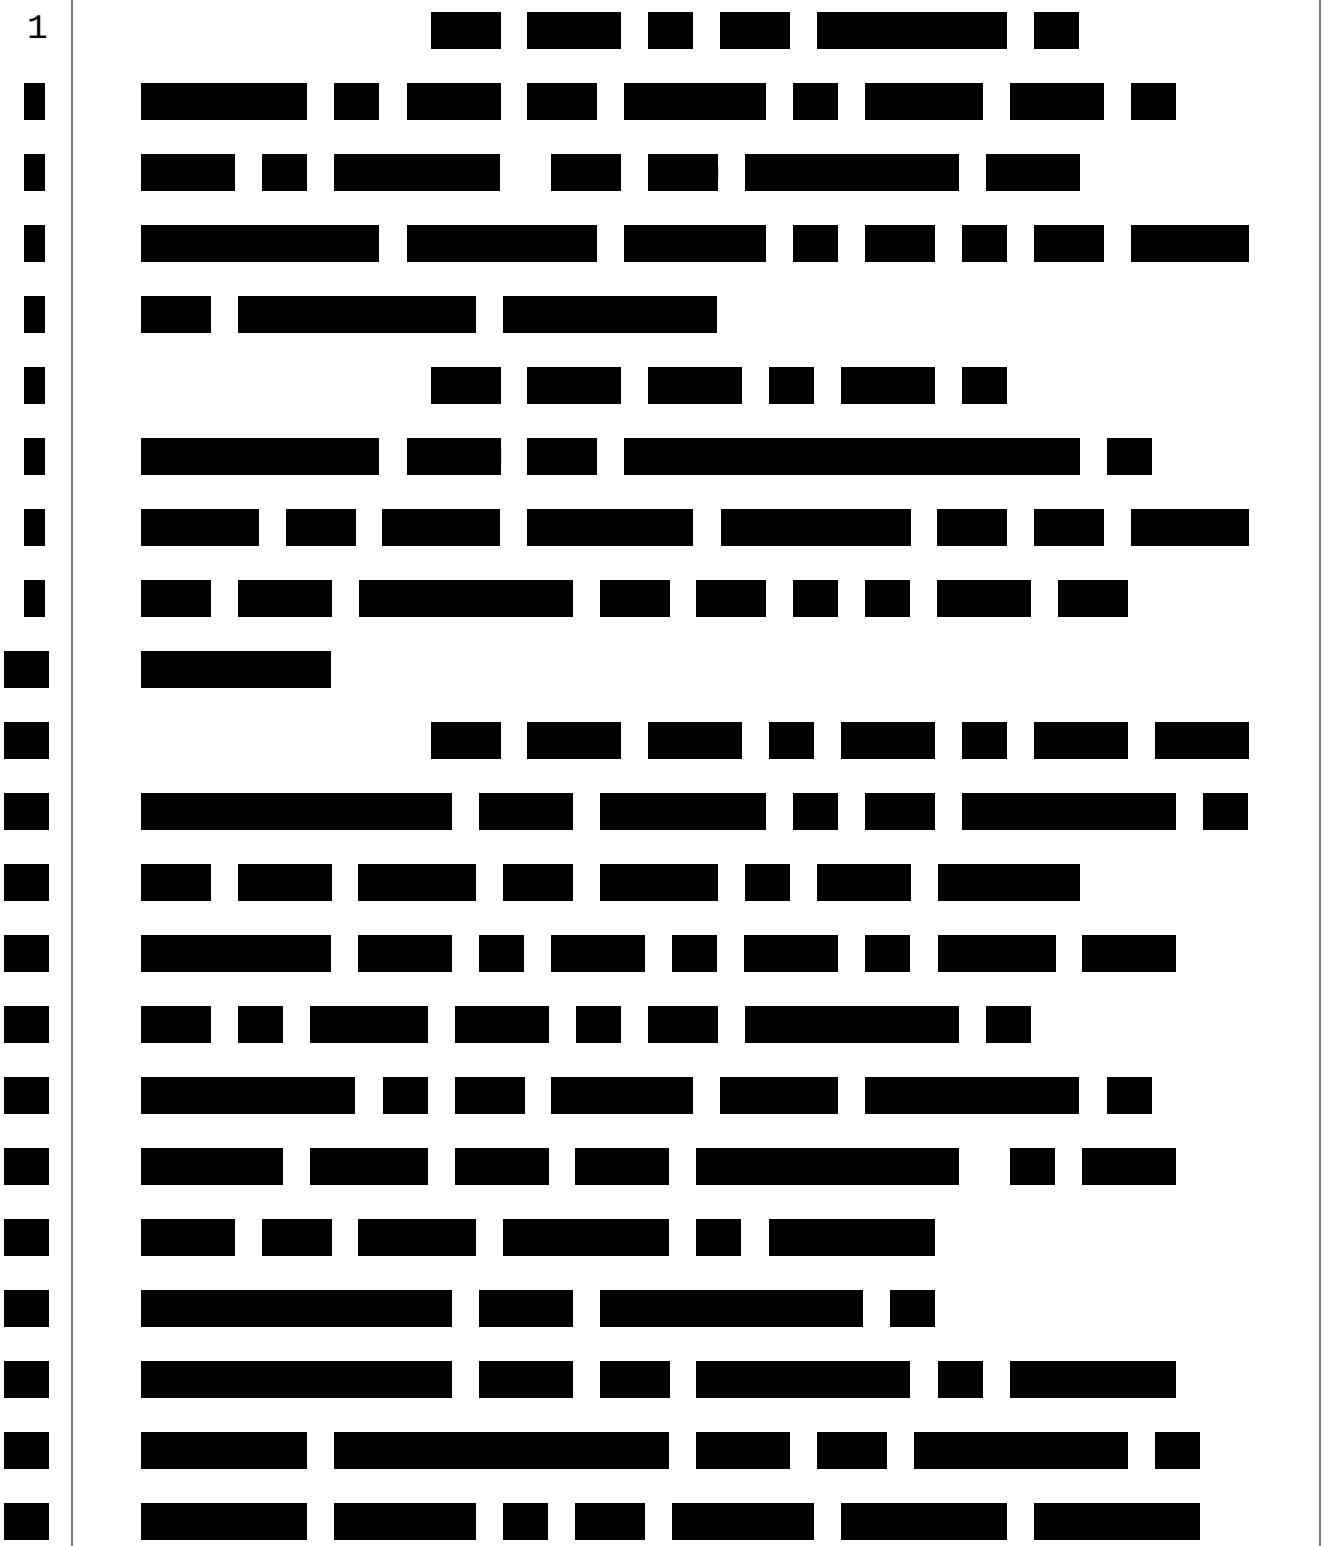


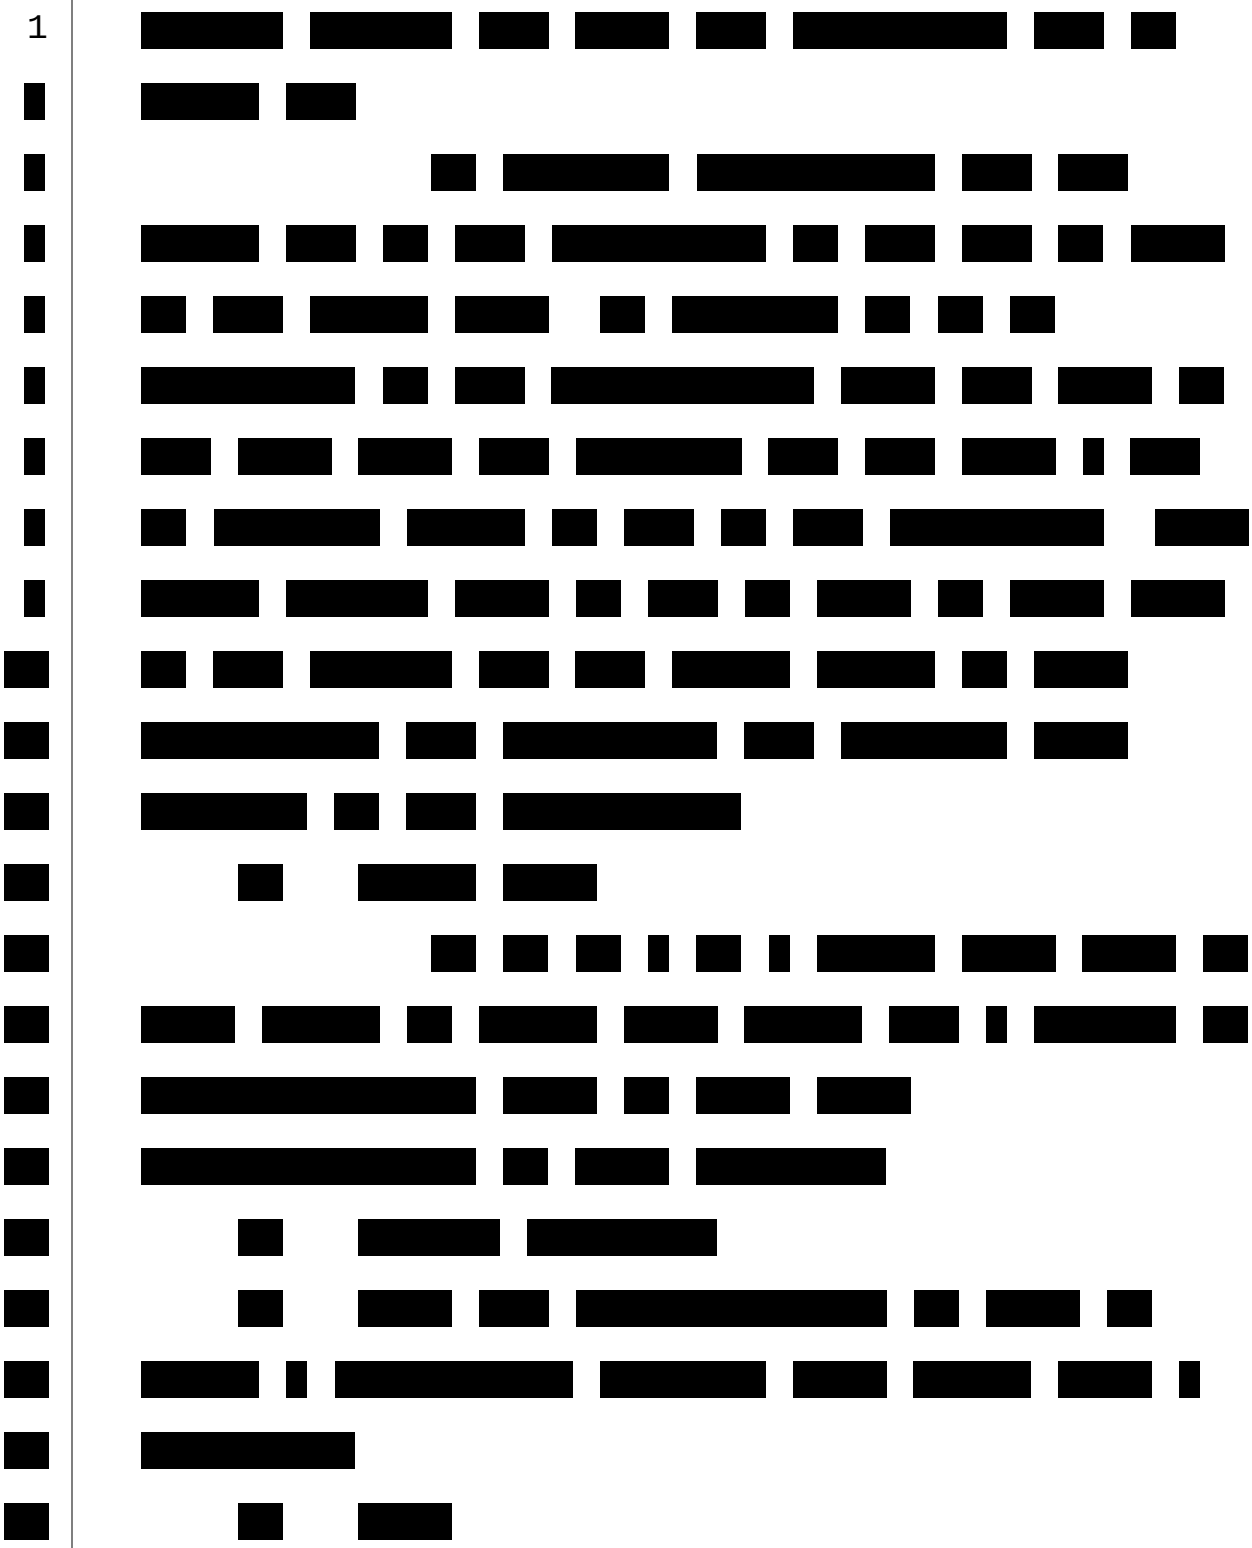
(Whereupon, a recess was taken at the above time.)

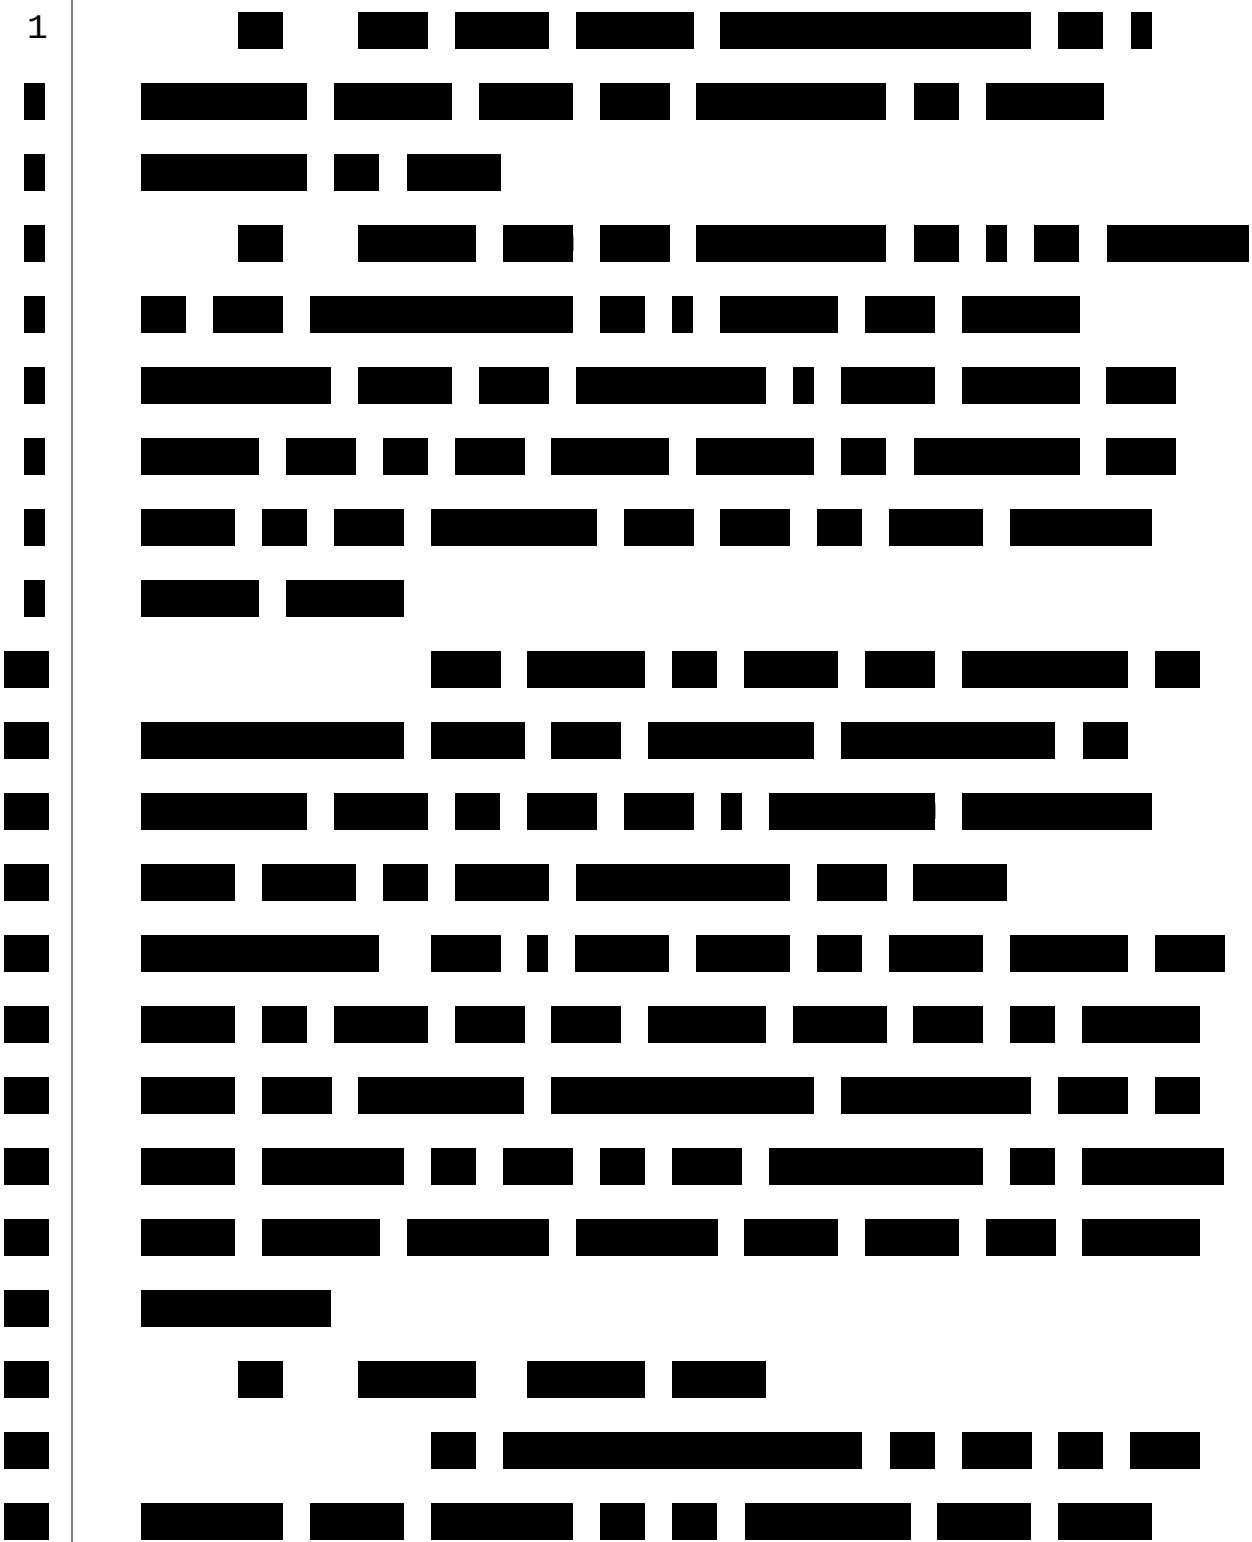


THE VIDEOGRAPHER: We are back on the record. The time is 1:42 p.m.



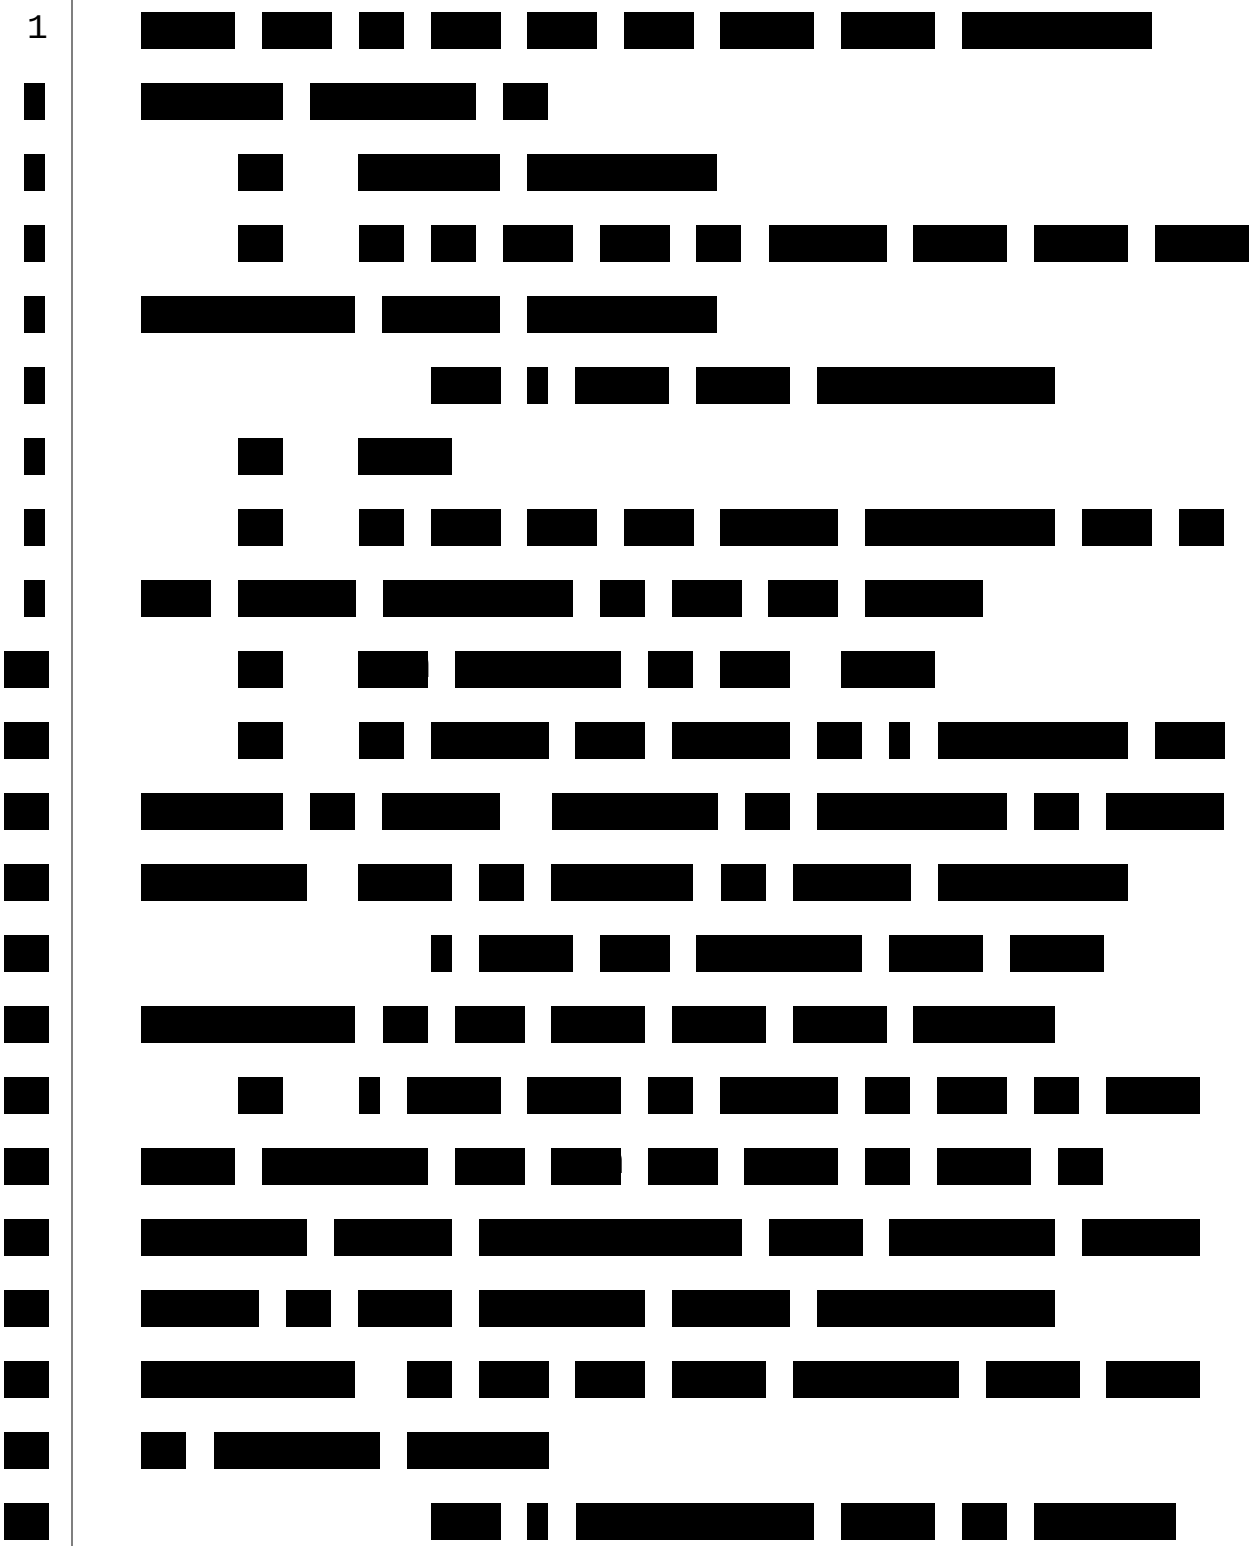




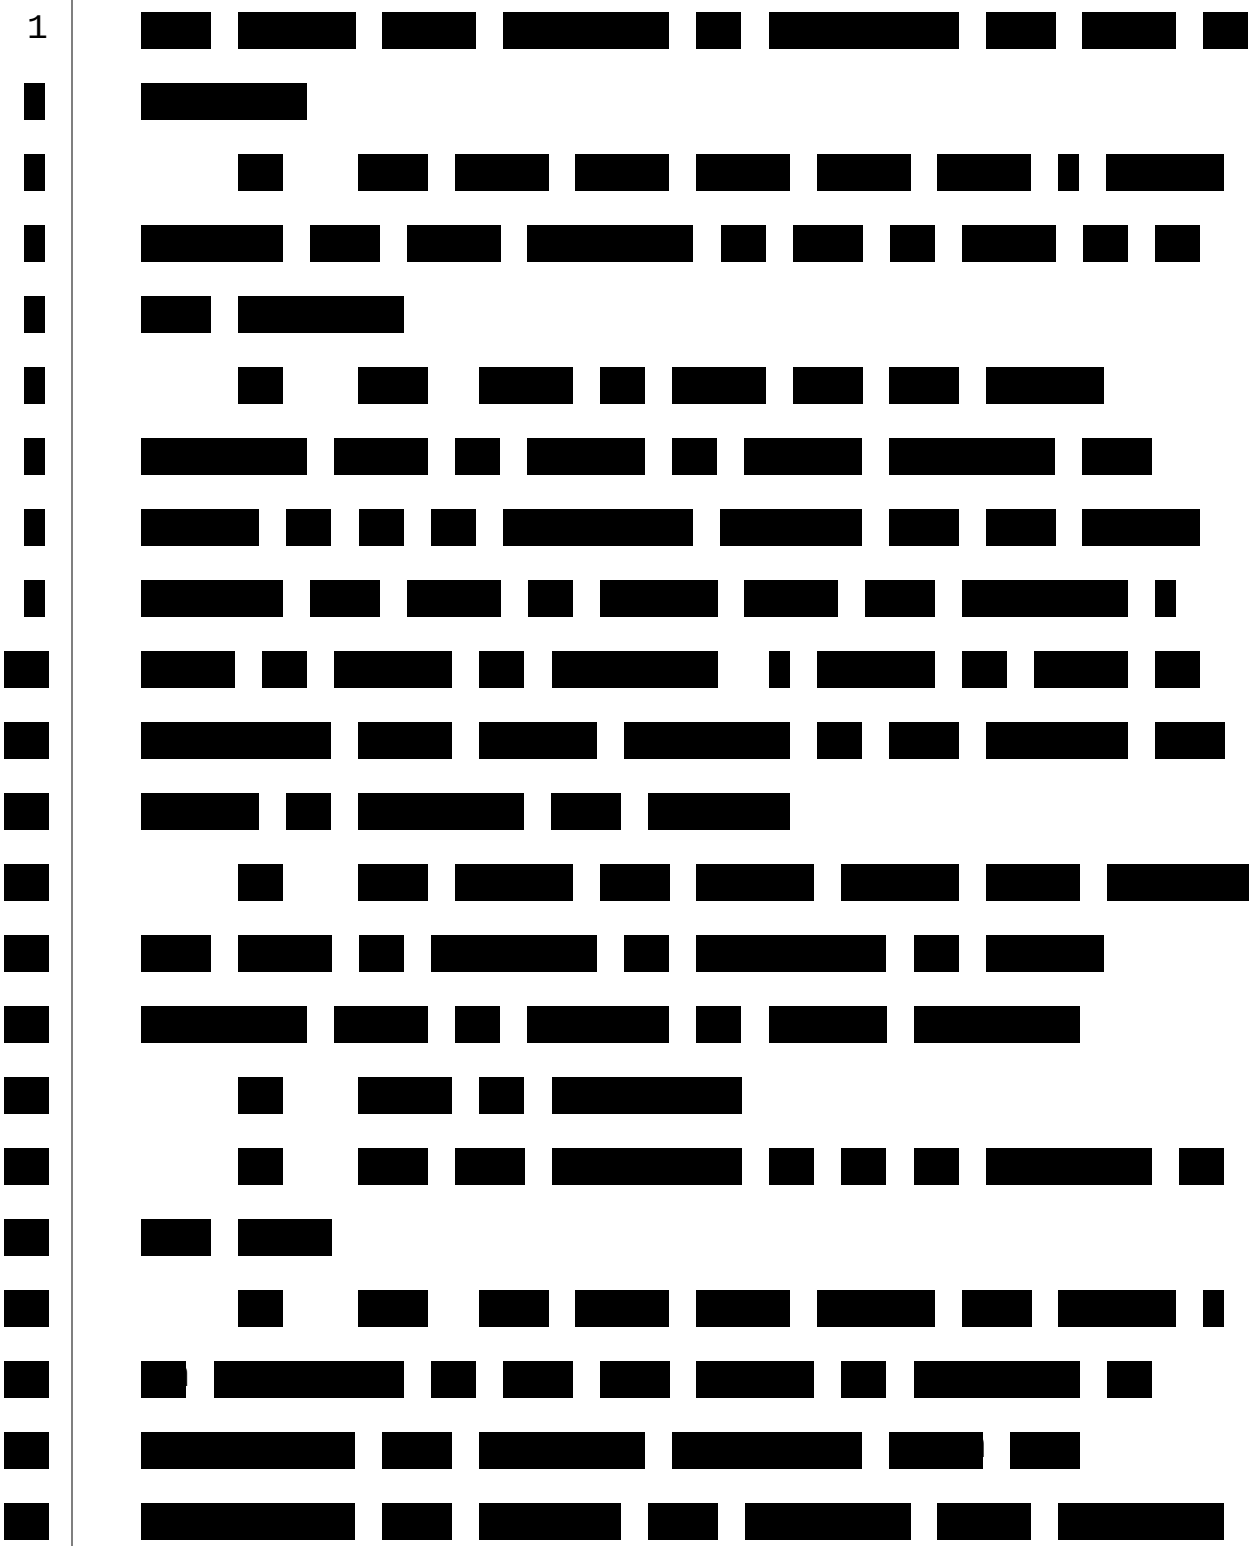


[redacted]

MR. HEFLIN: We're getting closer to the end, I promise.



Okay. Let's look at the document in Envelope G.



MR. KAVANAGH: I think you used -- did you use that already?

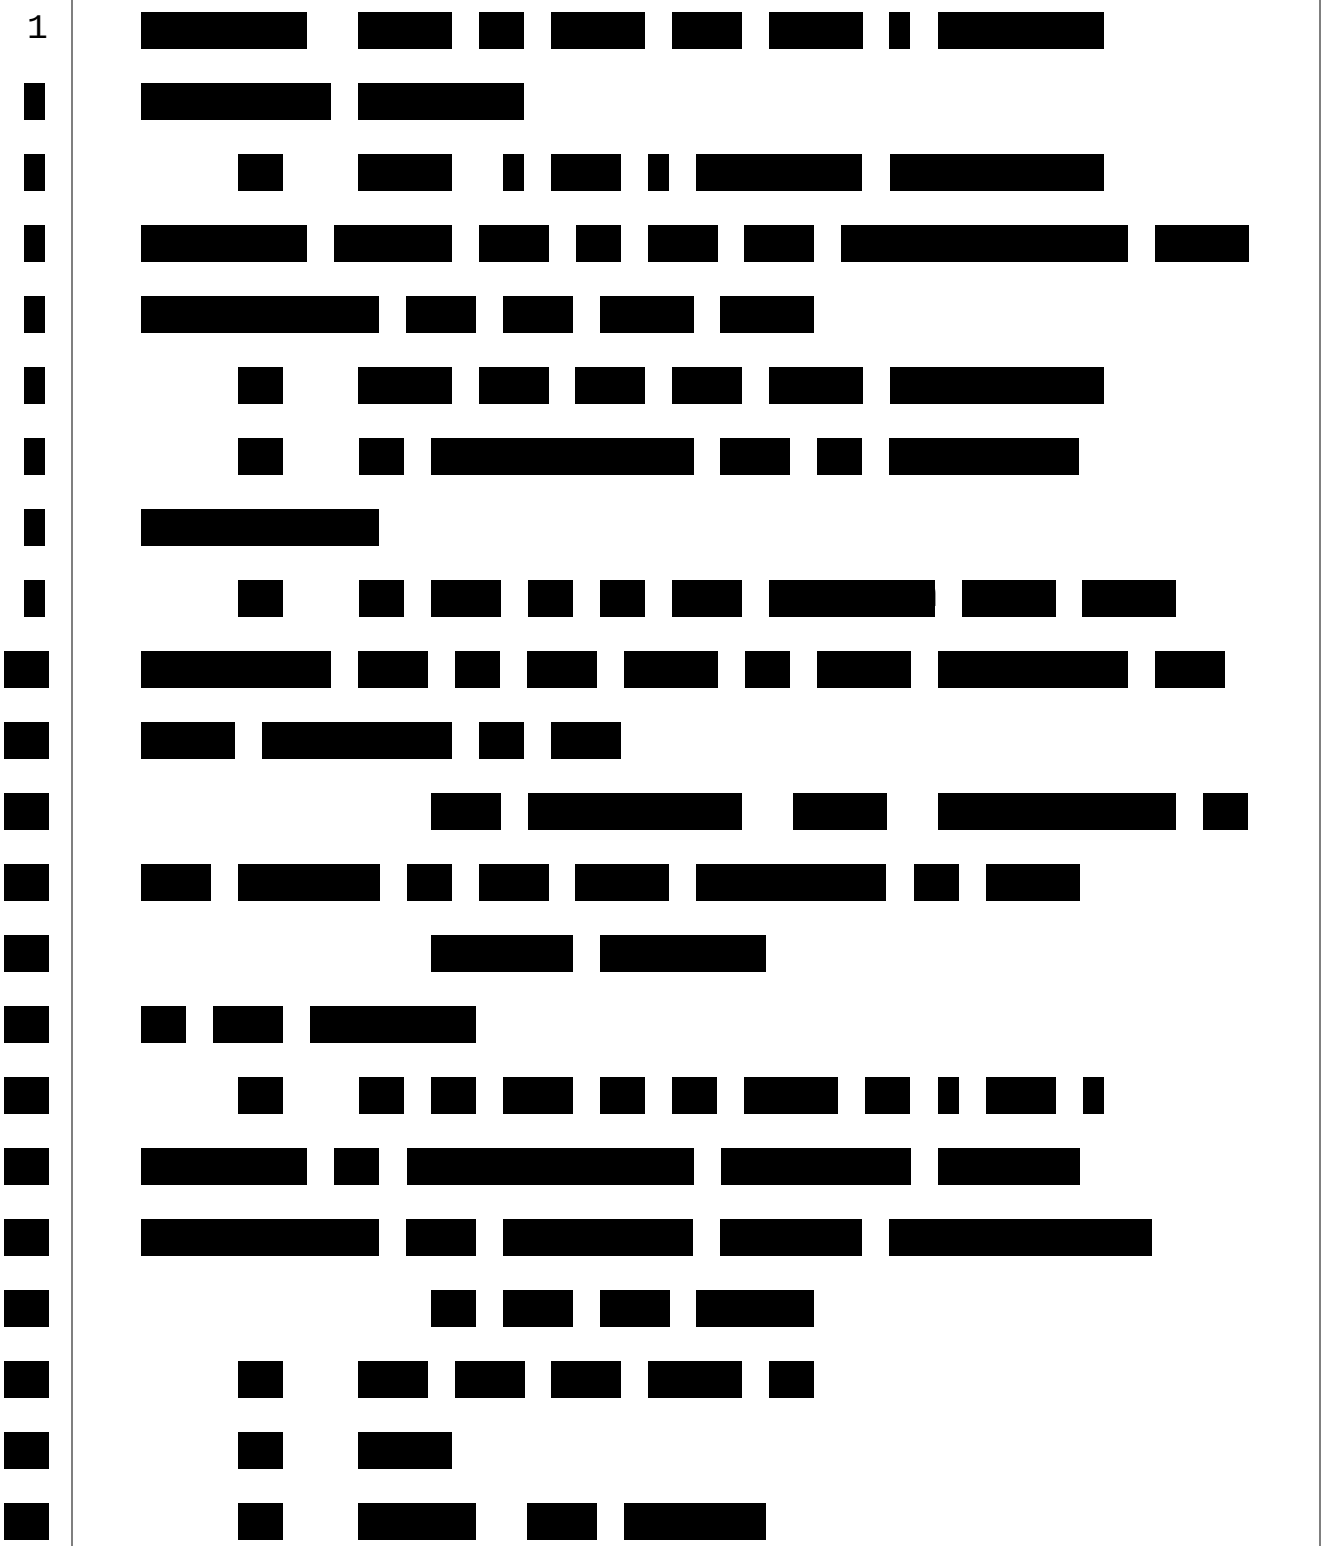
MR. HEFLIN: Oh, we did use G already. Okay. That makes it easier.

Exhibit 3, I meant to say. I just want to come back to this for a couple of quick questions.

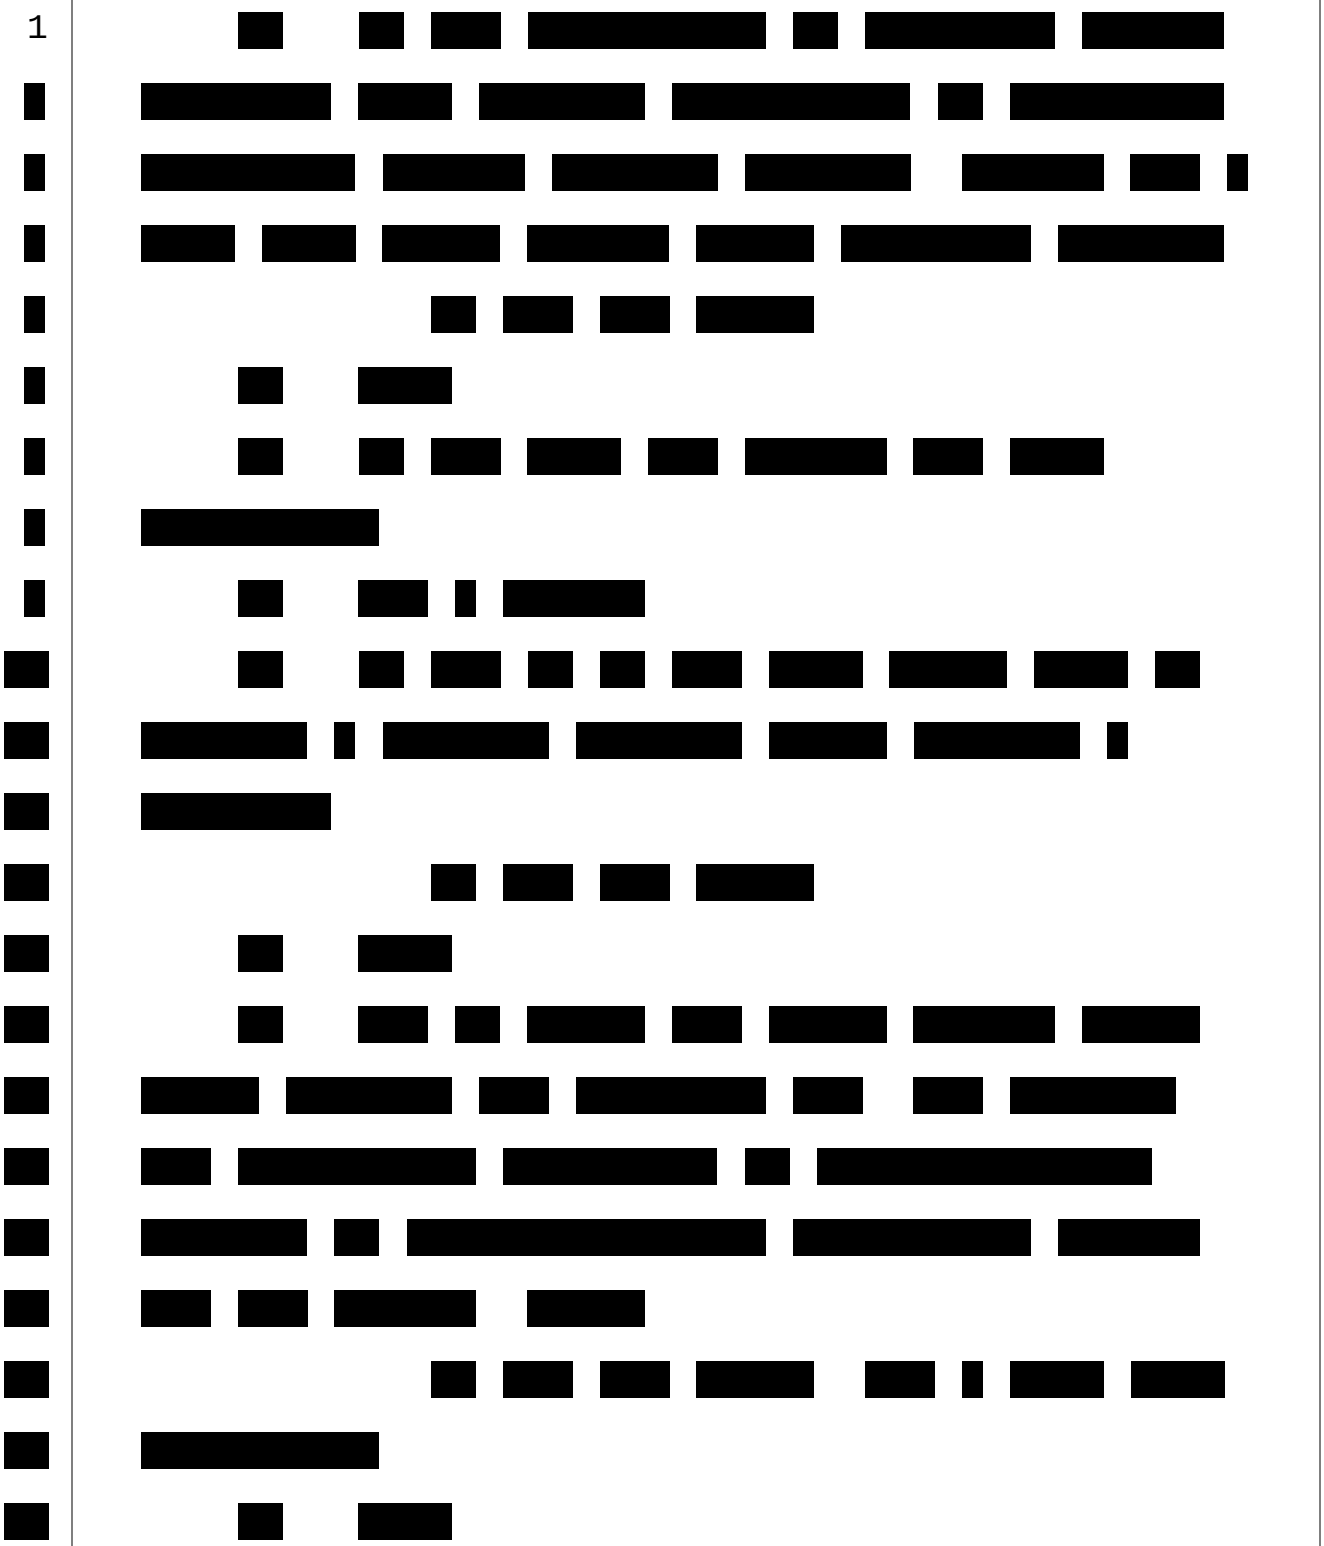
[redacted]

[redacted]

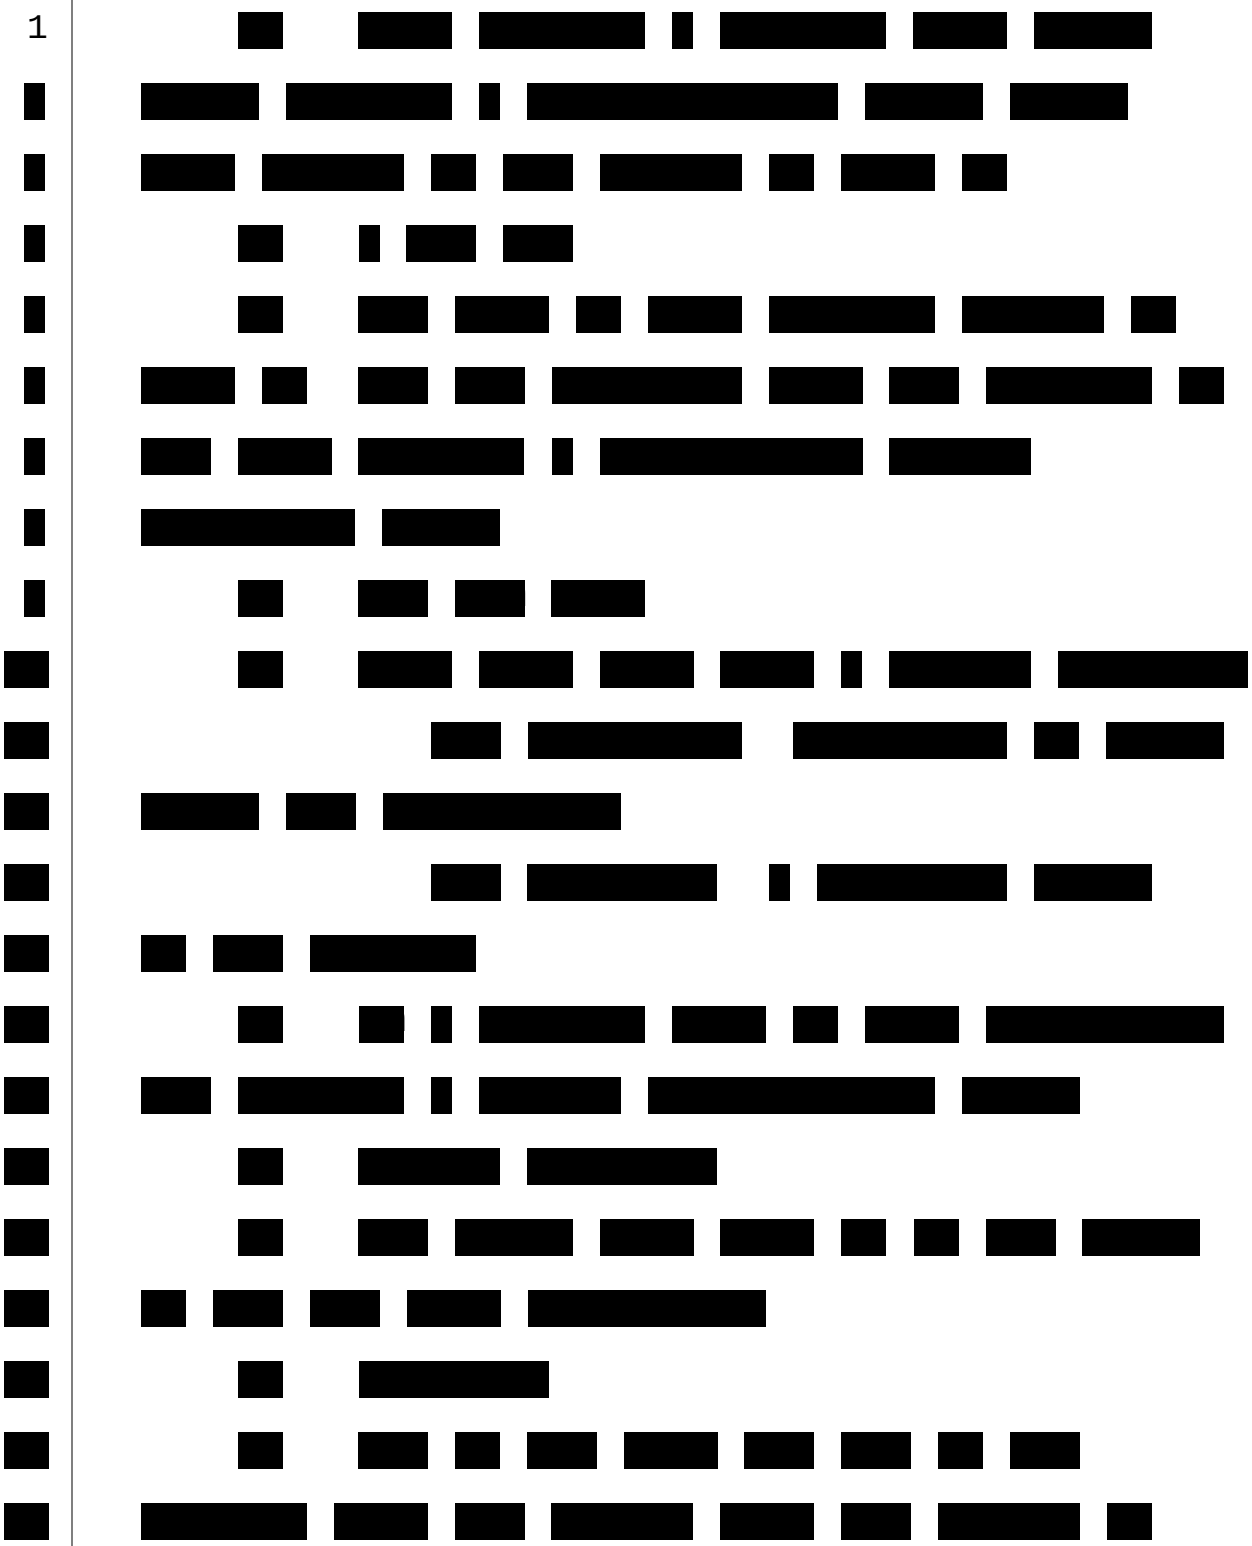
MR. HEFLIN: Now, I do want to introduce another document. This should be Envelope H, Exhibit 12.



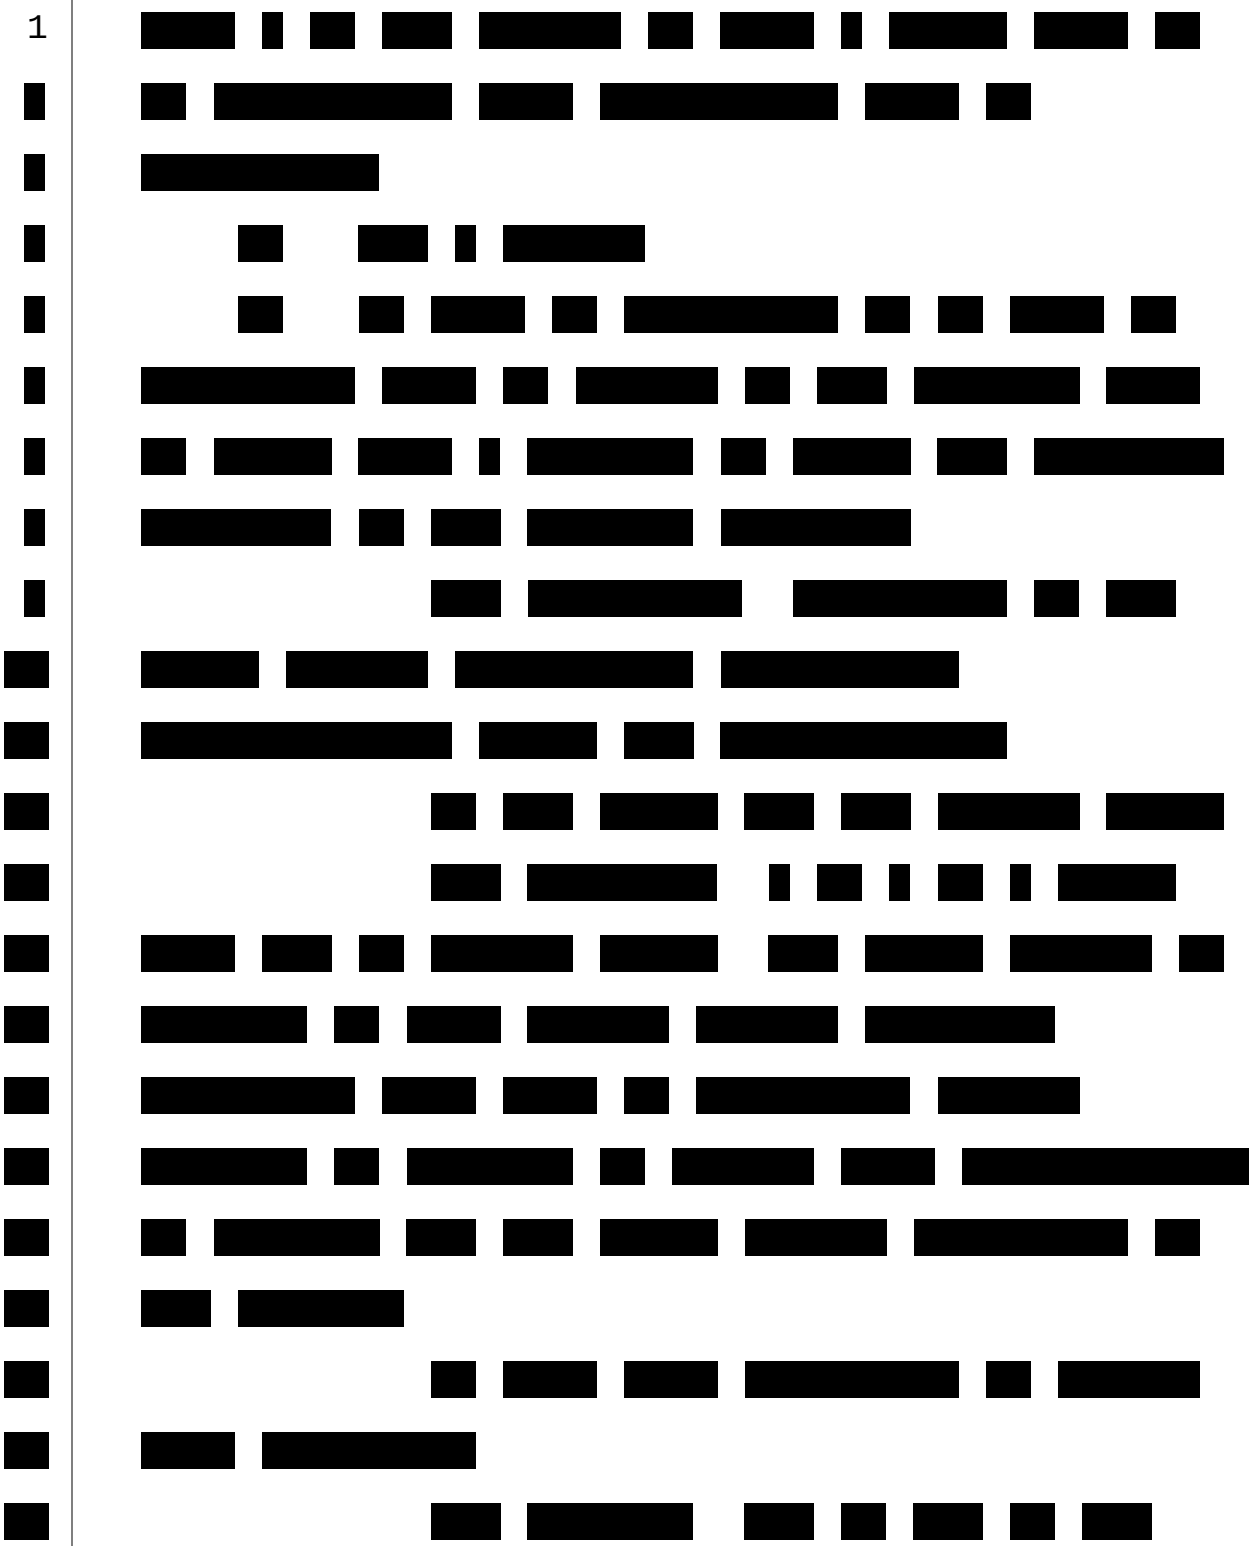
(Whereupon, a document was marked, for identification purposes, as Exhibit 0012.)



MR. KAVANAGH: 12.



MR. HEFLIN: Let me know when you have the document, please.



THE WITNESS: I do.

THE VIDEOGRAPHER: We are now on the record. Today's date is June 9th, 2022, and the time is 7:08 a.m.

This is the video deposition of Greg Godfrey in the matter of Canadian Pacific, et al., versus Kansas City Southern, et al. This deposition is taking place at 511 North Columbus Drive, Chicago, Illinois.

Will attorneys please identify themselves.

MR. MEYER: David Meyer, Law Office of David L. Meyer, for Canadian Pacific.

MR. GOLDEN: Ethan Golden, Sullivan & Cromwell, also for Canadian Pacific.

MR. SPITULNIK: Charles Spitulnik, Kaplan Kirsch & Rockwell, for Metra.

MS. KLEBANER: Mara Klebaner, Sidley Austin, for Canadian National.

MS. ROSEN: Sue-Ann Rosen for Metra.

THE VIDEOGRAPHER: Will the court reporter please swear in the witness.

(Witness sworn.)

GREG GODFREY,

having been duly sworn, was examined and testified as follows:

If you have other things you want to say, your lawyer can ask you at the end of the day if he has time.

MR. SPITULNIK: Mr. Meyer, he's answering your question. If you would let him answer --

MR. MEYER: No, I --

MR. SPITULNIK: If you would rephrase the question, if he's not answering it, that's fine, but he is answering your question.

MR. MEYER: Well, I think the record will speak for itself about whether the witness is answering the question. I asked -- I was referring to lines used by Metra and I think the witness decided to talk about ownership, and that's fine --

MR. SPITULNIK: Perhaps --

MR. MEYER: -- he can talk about anything he wants but not in response to my questions --

MR. SPITULNIK: Perhaps your question wasn't clear. If you could try again, then he'll answer your question.

BY MR. MEYER:

Q At some point, CP decided to adopt/install TMDS software for the PTC systems on the lines that Metra and Canadian Pacific share?

A Correct.
Q Okay. Do you know when that was?
A That was -- that predated my arrival at Metra.
Q Okay.
A I don't have a specific date.
Q Okay. And was there a date by which that TMDS system needed to be active?
A There was, and there was a transition because of -- it's a critical safety system, so several systems at CP/Metra were in service at the same time as we made a critical safety transition and validated all the data, so I was part of that transition. I don't recall the exact date. We got rid of, quote, the old computers.
Q Okay. As a critical safety system, I assume you would agree that it was important for Canadian Pacific to install TMDS on its systems in a way that ensured that it would be operated safely?
A Yes.
Q Did CP and Metra spend considerable time working together to provide for TMDS to function safely on CP's dispatching systems?
A Absolutely.

Q And CP invested significant resources in doing that; is that correct?

A Yes.

Q And is TMDS working today on CP's dispatching systems?

A It is.

Q And are there still glitches in the way PTC functions on CP's dispatched lines that Metra uses?

A I believe we are less than five open tickets as my -- out of my last memory, so I wouldn't call them glitches. They're what they're called tickets.

I just want to clarify that CP and Metra have worked very hard to prioritize anything that could potentially have a safety impact. So there are five open tickets that we are working with CP on closing with our vendor.

Q And that vendor would be Wabtec?

A Correct.

Q And so some of the -- well, strike that.

This process of implementing TMDS on CP's dispatching systems involved close cooperation between CP and Metra and also Wabtec?

A Yes.

Q Has -- in -- with respect to Metra's own installation of TMDS on its dispatching systems, are there any open tickets?

A There are.

Q How many?

A 27.

Q Okay.

A May -- may I caveat my remark?

Q I suppose you will.

A I want to stress that in the partnership for safety, because it is hard to manage between two large organizations, Metra and CP worked to reduce their safety or the perceived or the potential safety defects in the system first.

The remaining tickets where we're currently at, Metra allowed, preferred -- whatever term you choose -- to resolve all the CP defects first because they were a partner in the safety component.

The balance of the 27 on our end are not as -- were not as important as the CP tickets, so even though there's a disparity in the number, Metra acted as -- in -- in the best interests of both parties and both of our customers, and of course the neighborhoods that we go through, to

to -- the part I have access to, I can pull delays from.

Q Okay. And are you able to pull delays from the TOPS database relating to any cause category associated with those delays?

A Yes.

Q So delays for any reason --

A Yes.

Q -- you have access to them?

A Yes.

Q So I want to ask some questions specifically about the Milwaukee District North and Milwaukee District West lines.

You refer to them as MD-W, and MD-N.

So let's start with MD-N or metro -- Milwaukee District North. Roughly, how many trains are operated by Metra on that line in a month? And I know this number changes over time. So I'll ask you, you know, today, this month, approximately how many trains is Metra operating over that line?

A Oh, I don't -- I'd have to calculate that. I use Excel for all that sort of thing, so I know we run some-odd-40 trains a day type of thing between both lines but I don't have that off the

top of my head. We'd had so many COVID schedule changes that I just don't have that off top of my head on a monthly basis.

Q Okay. And how would you -- you're familiar with the pattern of -- strike that.

So let's go back to when you arrived from HDR at Metra. That was before COVID?

A Before COVID, yeah.

Q And Metra was operating its pre-COVID schedule.

A [Nonverbal response.]

Q Do you know approximately how many trains it was operating on the Milwaukee District North line at that point in time?

A I don't have the figure off the top of my head. You have to understand, I am responsible for 680-some-odd trains. To go break down all these trains each day, it's -- I'm in a volume business, right, so...

Q So when you -- when you referred earlier today to work that you did in connection with this deposition to calculate a percentage, the percentages you were calculating weren't percentages that involved the percentage that certain delays represented to all of Metra's train

movements on a particular line, were they?

A I calculated counts of trains in my graph. They weren't percentages. So these are counts of delays. So you're -- yes, yes, yeah.

Q So when you referred to -- I think you referred earlier today to having come up with a percentage of -- or a ratio. That wasn't a ratio that involved going to look at how many trains Metra operated?

A Correct.

Q You were only looking at delays.

A Correct.

Q And so I think this is fairly clear, but when you went to the TOPS database for purposes of building Figure 1, you only went to that database to get data on delays?

A Correct.

Q And what specific delays did you pull from the TOPS database?

A What we call D delays and D-1 delays.

D delays are freight priority delays. D-1 delays are cascading delays that resulted from those freight delays.

Q And by "cascading," and I think this is fairly clear in your testimony, well, I got -- so

a D-1 delay is a delay that someone at Metra has assign the D-1 code to?

A Correct.

Q You don't do the assignment of delay codes, do you?

A I have input on them, not final decision.

Q And so a D-1 is referring to a situation where that -- the train was delayed because of something that happened previously to another train?

A Correct.

Q So if what you were looking for was the number of times a bad dispatching decision delayed -- a bad dispatching decision was made, you wouldn't look at the D-1 delays to ask -- to answer that question, would you?

A Which is exactly why I separated out D-1 and D so we can get an accurate picture of the core versus the echo.

Q So the word "echo" that you just used was referring to the D-1 category?

A Yes. Cascading.

Q Thank you.

When you did this analysis reflected in your verified statement of the TOPS data, did you

look at any other freight railroads?

A At the time, no.

Q And did you look at any other delay causes?

A At the time, no.

Q Okay. And you agree it would be possible to go to the TOPS data and add to your graph or prepare a new graph reflecting not just D delay causes but other causes?

A Yes.

Q Would it also be possible to go to -- this graph on page 4 of your verified statement, was that prepared in Excel?

A Yes.

Q And it would be possible to go into the Excel spreadsheet underlying this graph and add a field for the total number of trains that were not delayed by D causes and replot the graph; is that right?

A And that would equal 88 percent of the other causes and the D and D-1s are 12 to 13 percent of the causes, yes.

Q Okay.

A So, yes, it's possible.

Q My question may have been imprecise, and I

apologize, but let me follow-up on what you answered, which is -- I think what you just said was that if you were to put into your graph delays during -- delays for causes other than D, those other causes would represent 88 percent of all of the delays?

A Yes.

Q And that the Ds would represent approximately 12 percent of all of the delays?

A Correct.

Q So of all the trains on MD North and MD West lines that are delayed for any reason, 88 percent of the delays are for reasons other than D?

A Correct.

Q Now, my question was actually asking something different, which is if you knew the total number of trains that Metra operated on those lines in that same period, okay, you could plot that on the graph too?

A Yes, you could.

Q And so you could see what the graph would look like if you saw the entire landscape of Metra trains and how the -- the portion that were delayed for D reasons represent -- looked relative

to that?

A Correct.

Q But you haven't done that?

A I have not done that.

Q Because you didn't look at trains that weren't delayed at all?

A Correct.

Q So you were in Chicago at Amtrak in 2014. I think we established that?

A Yes.

Q 2014 was a bad year in Chicago, wasn't it?

A For everyone, yes.

Q And freight railroads suffered a great deal in the winter of 2014?

A If -- if I may, passengers and freight and customers suffered a huge deal. The railroads tried to service their customers, and we tried to service our passengers. It was a horrible year for customer service for all partners.

Q So is that one of the reasons, if you know, why the freight delay shown on Figure 1 had this spike in 2014?

A I do not know the cause of the spike in 2014 on this graph, if that particular --

Q Okay. If you don't know, that's fine.

A Yes.

Q Okay. In paragraph 10, you talk about a different source of data from the TOPS data that we have been discussing and you refer to it as, in quotes, CP delay data.

A Uh-huh.

Q What is that data?

A We accumulate a variety of reports in-house to my office as well as through other staff members, and so it's a general bucket. It's compiled of my trained dispatchers' interactions with the Canadian Pacific dispatchers.

So, for example, if there's circumstances where they're asked to put a freight train ahead of a passenger train or route a train differently or for whatever reason, my train dispatchers usually send out a note to a group message that includes like our passenger notification center so we can, you know, notify customers if they're delayed.

There is, of course, Mr. Oppenheim and his full staff. All of them are out and do their job every day, and so when we get information that we're waiting on a freight delay, they'll share that with us, and then we'll also message it out

on their behalf.

And then Dave Rodriguez, who is on my team, he'll do his best to compile the real-time alerting as well as some of the TOPS data as well as the staff messages and try to compile that in the spreadsheets which I believe he provided as part of his review of -- of the CP delays. We do that for all partner railroads. It's a collection of general information that we hear organizationally.

Q Okay. And I think you're referring to a -- you referred to a spreadsheet just now, and your testimony refers to this data being recorded in a spreadsheet. That's referring to what Mr. Rodriguez provided?

A Yes. So if my staff or Rich puts out an -- Mr. Oppenheim puts out a note, Dave, who is on my team, is responsible for grabbing that information and then trying to assimilate it into something that's hopefully usable by the partners, because ultimately the objective is, when we see something that is controllable, and respectfully such as freight priority, we would like to minimize controllable delays.

Q The court reporter yesterday marked

Mr. Rodriguez's statement as an exhibit, and I am trying to see if I can find that so I can hand it to you.

MR. MEYER: There's two. I don't see where we did one. Oh, here it is.

(Rodriguez Exhibit 1 is referred to.)

BY MR. MEYER:

Q I'll show you the document marked Exhibit 1. It's Mr. Rodriguez's verified statement and the materials accompanying it that were labeled Exhibit D-1 by -- by Metra's counsel, I believe.

Are those the spreadsheets that you were referring to?

A Yes, that is correct.

Q And so you, for purposes of your statement, you reviewed those spreadsheets?

A Yes, I review all these spreadsheets, this is -- this is a common business product that my office produces so we review these regularly. Their -- their purpose is wholly constructive. We aim to go into weekly or biweekly meetings with the various partners and say: These are our issues. Can we work on controllable components, et cetera.

Q Okay. And do you regard these spreadsheets as better data on train delay than the TOPS data?

A No.

Q Why not?

A The audience is different. These are compiled reports for discussion. The TOPS data is a raw warehouse of information for which to provide analysis and future analysis. They're simply different.

Q Okay. You -- you refer to these spreadsheets as including delays that aren't in the TOPS database --

A Yes.

Q -- is that right?

A Correct. Or operational impacts.

Q What -- are you referring to operational impacts that are different from delays?

A Yes. So, for example, if a freight train is blocking a customer boarding their normal platform -- and so, for example, I suffer customer anxiety, right, or traveler's anxiety, and so I know what that is; and so if our customer base goes to a train station and sees a freight train, and they don't know how to get to their passenger

I didn't want to give you a freight delay on Canadian National or Union Pacific. The goal was to isolate out the analysis to the discussion.

Q And is it possible -- I'm not talking about these delays in particular, but, you know, in the TOPS database, a freight delay can occur on a line that is owned or dispatched by a freight railroad. But the delay isn't necessarily the responsibility of that freight railroad; it might be the responsibility of a different freight railroad; is that right?

A Can you rephrase the question. I don't want to create a misleading answer because it's Chicago, and it's a complex environment. So I just want to understand the question.

Q You can have -- you can have a delay that occurs to a Milwaukee District West train that may be the responsibility of the Indiana Harbor Belt.

A If I'm aware of that and the discussion is present.

Q But that would be -- it would still show up as a Milwaukee District West delay because the train is still operating on the service?

A Correct.

Q But it wouldn't necessarily be the

responsibility of Canadian Pacific in every instance necessarily?

A That is not necessarily correct.

Q It could be correct in some cases?

A It could be in some cases, it could not in others.

Q Right. Understood.

So the train number is the Metra train number, I assume?

A Correct.

Q Date is the date that the --

A Correct.

Q -- operated?

A Correct.

Q I'm hoping Year is self-explanatory.

A Yeah; and in transparency, for graph purposes, I added that Year column to extract out the year so I could simplify the graphical display.

Q Oh, I see. So you aggregated all of the 2020s --

A And 2018s. I created a basic Excel capture formula just to make the graph pretty, unquote.

Q Okay. That way you didn't have to

Q Okay. The next is Sub Group.
A Don't I don't know what that -- that column is.
Q The next is Controllable.
A That means whether or not on Metra's delay code matrix, Metra's delay, the committee that reviews the delay codes believes that is something that a human factor or human influence could have mitigated.
So if -- I'll give a non-CP example for example.
If a conductor is brand-new and he or she may have trouble opening the doors quick enough, and is getting used to that, they may take an extra minute to do so, and if that delays the train, well, then that, to us, is controllable because that employee was brand-new and could have done it -- done the work a little bit more efficiently.
Q And so am I right in understanding that each delay code will have associated with it some judgment by Metra whether that was controllable or not controllable?
A According to our agreed-to delay matrix.
Q So if it's a D, do you know what the

corresponding entry would be in the controllable field?

A It's controllable. Whereas DE -- so if Canadian Pacific has a locomotive failure, we understand that Canadian Pacific has locomotives, as do all railroads, and occasionally locomotive failures occur. That's a DE code. We understand that that is not necessarily controllable, so that's not controllable, and we don't count that against anyone because while you can generally predict lifecycle failure, you can't always predict operational immediacy failure.

Q So you would not want dispatchers making dispatching decisions on the assumption that a locomotive was going to fail in that, like, next ten minutes when something was supposed to happen?

A They -- all dispatchers should assume all infrastructure and trains are working as intended. We do not -- we do not hold accountable the train dispatcher or the railroad accountable if there is a noncontrollable.

Caveat to that is if you're railroad X and you have 16 locomotive failures that month, well, something else is going on and we're going to want to have a dialogue.

Q Okay. Have you ever seen the Controllable field associated with delay code D filled in?

A Yes, in the previous years. The same testimony I gave earlier with the export and some data not being exported to me, it is there. It's just in a larger archive that has the additional fields, and so I was navigating through. So I -- to be clear, it is there. It's just not in the raw data here.

Q And it's your understanding that for any given delay code, there would either be a controllable or a not controllable?

A Correct.

Q Nothing else?

MR. MEYER: Let's mark this as Godfrey Exhibit 3.

(Godfrey Exhibit 3 is introduced for the record.)

BY MR. MEYER:

Q Mr. Godfrey, I'm showing you a document that's been marked by the court reporter as Godfrey Exhibit 3, and I will represent that it is an extract from the same database, same Excel file as Exhibit 2.

This one is for an earlier period, January

of 2016, and as you were suggesting, many of the fields that were blank in the prior version are filled in in this particular extract. I think the field we have just been talking about is on the second page, all the way to the right, under Controllable.

You see -- you see that?

A Yes, I do.

Q It says here for these trains, all of which have delay codes D or D-1, in the controllable field it says, semi-controllable?

A Yes, it does.

Q So is that refreshing your recollection of what this field contains for delay codes D and D-1?

A It is. I'm referencing our current -- when I said controllable, not controllable, I'm referencing our current delay matrix. I'd have to -- I don't recall why it says semi-controllable in this case. I just don't recall.

Q So you think today Metra regards Ds as "controllable," is that what you're saying?

A Yeah, because -- yes.

Q But at some point Metra regarded those

delays as "semi-controllable" as reflected on Exhibit 3, correct?

A I'm not seeing that. So the data here is stating semi-controllable. I am not going to comment on what that "semi" means without further understanding from the data pool experts that assigned those codes in the system.

Q Okay.

A Just to refer back to my point about controllable and not controllable, is Metra does fairly extract out what is beyond a human being's direct control from what is not. And so, you know, we can't control when an engine is going to fail. We can control the discussion that occurs when a freight needs priority.

Q Well, let me make sure -- you used the word "priority." Not every time that a Metra train is -- let me back up and start the question over.

Do you agree with me that a Metra train can be delayed by a freight train? And let's assume that the freight train wasn't subject to a mechanical failure, so we're not in the whatever code that would be; DE, I think you said earlier.

A Correct.

Q There can be a delay of the sort that I'm positing where the freight train wasn't given priority over the Metra train; isn't that right?

A Can you rephrase? I just don't understand. Sorry.

Q Isn't it possible for there to be a delay caused by the presence of a freight train where there was not a mechanical failure to the freight train and there was no priority given to the freight train over a Metra train?

A It would be good to know that from Canadian Pacific when that occurred, but that real-time understanding or even the post facto understanding of that is not there consistent with the other freight railroads. So I don't know that.

Q Well, I'm not talking about a Canadian Pacific freight train necessarily.

I'm talking about a freight train somewhere in the Chicagoland area on any Metra line. There can be situations where a Metra train is delayed by the presence of freight trains, where if you went and looked, you wouldn't find that a dispatcher made a decision to give a freight train priority, but there were freight

trains that Metra had to be run around?

A Actually, I have specifically instructed my staff to hold Metra trains for freight trains.

Q So your answer is yes?

A My answer is absolutely yes, because it's a network decision, not a train-based decision.

Q And what do you mean by "a network decision"?

A So a network decision means that under the Chicago protocols, there is prioritization of trains that basically goes, you know, passenger operations, and then there's a list of other types of freight priorities. But because the Chicagoland network is so complicated, it is possible if Metra and the partner railroads don't have dialogue in order to manage the network correctly, that one -- not delaying one Metra train, let's say at 9:00 a.m., could result in delaying six Metra trains at 1:00 p.m.

And so with respect to this conversation, all of the partner railroads and Metra, and again, respectful to CP except until recent time, literally talk in real time about how to manage the network so we protect the health of Chicago, so freight services their customers; Metra

services their customers.

So it is a good decision to manage the network under the protocol so that the network management manages capacity. With respect to CP, especially the vicinity of Bensenville, you're quite right.

It's possible that another partner railroad causes that delay on to Canadian Pacific track, but the dialogue of understanding why needs to generally improve, especially in light of the B-1 project at Franklin Park West, where I was recently asked to provide external support for the project, that it was a success for freight and passenger.

Out of respect for the Canadian Pacific, because the delays actually got 1 percent worse, because I believe in the Chicago protocols and the general integrity of the network, I told this external party, I cannot comment, because the relationship with CP was that important to me to figure out how to better use Franklin Park.

But with due respect, 1 percent worse at Franklin Park may be another railroad. I just don't know that.

Q Okay. I think you were describing -- and

I'm not intending to ask this question about Bensenville in particular or Canadian Pacific in particular, but if I understood your testimony a minute ago about decisions being network decisions, not ones about an individual train only, do I understand correctly that the appropriate dispatching decision in a particular case about a particular train needs to consider the implications of a particular move, not just for that train but for consequences that may occur later to other trains?

A Correct.

Q And the consequences that could occur later to other trains could include consequences from activity that at the time of the dispatching decision is geographically somewhere else on the network, but will end up affecting or could end up affecting the same part of the network where the dispatching decision was made. Or it could affect operations on a different part of the network?

A That is correct. And that is why partnerships absolutely matter in Chicago because there's always joint benefits. And I have for ten -- I actually celebrated ten years in Chicago, and I've always gone to bat for another

railroad when we know another railroad partner is not there.

But I say this with the greatest level of respect. We've not heard those reasons and needs from CP.

Union Pacific, who is struggling tremendously right now, has told us their get well program, they have shared where they need to go. We discuss the challenges daily. We need to get back to partnership.

Q Fair enough.

The kinds of dispatching -- strike that.

The dynamics or the factors that go into a good dispatching decision associated with an individual train, as I was describing in my prior question, and I think you confirmed, also apply, do they not, even when the factors relate to other things going on on a single railroad's network?

A Correct.

Q So to know whether a dispatcher made the right decision in a particular case, you would need to know about things going on elsewhere on that network, and things that might happen later in the day as a result of a different decision being made in a particular case?

A Respectful to CP, they're the only partner, capital P, that is not having that dialogue, so we don't know. So you're exactly correct.

Q But their -- their decisions are the dispatching decisions that need to take into account these factors, correct?

A They are, but we are also a partner, we own the line. We should understand what is going on.

Q Going back to the Exhibit 3, I think we got as far as the controllable column. And we are nearing the end, fortunately, I think.

The next -- and maybe it would be helpful to look at Exhibit 3, since more of the fields are filled in and that might help us understand what's in this spreadsheet.

The next column is Delay Location, and in the Exhibit 3 version of this, I see some of the rows have dashes and some have numbers.

Do you know what that represents?

A There's a table that I do not have access to. It's on our corporate intranet. Those locations correspond to either passenger stations or what we call interlocking or control point

stations. They're like basically where we switch the tracks. There's a -- there's a database of what that means, so you can generally figure out where. If the dashes are there, that means the conductor did not enter that data point into their trip report.

Q I see.

And do you know if the delay location is intended to be the location where the Metra train was when it was delayed or the location where the freight train was when the Metra train was delayed?

A That is subject to the interpretation of the conductor filling out that portion of the report, which is why Metra is looking and deploying a more improved system to track delays. It's called our Acorn system. This column in the future will be substantially more granular because technology has changed.

Q You'll have a GPS coordinate for the train, for example?

A We'll know exactly where it is.

Q So when you adopt the Acorn system, will the field be intended to represent where the Metra train was paused?

A Yes.
Q Not necessarily where the freight train was located?
A Correct.
Q Okay. I think you testified earlier that Max/Mins is the maximum number of minutes, so that's the length of the delay?
A The max/min is the maximum amount that train was delayed at a given -- any location on the line, not the final arrival time.
Q So it's intended to say there was some station where the train was this many minutes late?
A Correct.
Q And then Max Delay Formula, I see some alphanumeric.
A I don't know what that is. That is a corporate formula system in our system and the -- the TOPS experts would be better suited to answer that.
Q Okay. Fair.
Next is Delay Explanation.
A Those are the notes that either the train dispatcher or the train crew or through final resolution -- Metra has a monthly meeting called

Gripes. We review all the -- the data for accuracy as managers, and we make edits as -- as when we say, no, that's not quite right. For example, that freight train had an engine failure that day; and a D can become a DE. That is the explanation from a variety of parties on what occurred with that train.

Q Okay. And the next column says Original Delay Data, and it looks like it's mostly the same, at least for the entries that are showing on this page, but could you explain what original delay data is?

A That is, again, according to TOPS experts. We've had several evolutions of the system over time. I believe that is some legacy column that either replicates, but I -- other experts would be better suited.

Q So you - you would rely on the Delay Explanation column?

A Correct.

Q The next column is Date Type.

A That's whether it's a weekday or a weekend or a holiday.

Q And Peak 2 is, I assume, the same information as would have been in the Peak column?

A Correct. I believe the earlier column is a Y or an N, and this is off-peak/peak --

Q So --

A -- scaled down.

Q Let's go -- let's go back to that column on Exhibit 3, and I just want to ask you if you know what -- in the Peak column, I see Ns and I see Ys, and I think we all understand Ns are no and Y is yes.

What is an R?

A That's interesting. I don't know the answer to that question.

Q Okay.

A Oh. But I can suspect it. That was on January 4th. That means it was probably a holiday, and 19 of January is Martin Luther King Day so that's an R. So by deduction, I can let you know that's a holiday code. You wouldn't have had a peak on the holidays.

Q I see.

So it's a weekday without a peak?

A Exactly.

Q Okay. Then the next column from Peak 2 is Minute Grouping.

And is that an indication of whether the

Q Are you sure about that?
A I'd have to go consult my data pool, but...
Q Why don't we look at Mr. Rodriguez's spreadsheet for 2020.
A Sure. You're referencing February 2020?
Q February 2020, yes.
A Okay.
Q So you say in paragraph 13 that in February of 2020, there were 22 freight-related delays on 11 different days. You see that?
A I do.
Q And when I look at the spreadsheet for February of 2020, in Rodriguez Exhibit 1, count the number of days that have delays -- one, two, three, four, five, six, seven, eight, nine, ten, 11 -- that matches the 11 in your paragraph 13, correct?
A Yes.
Q And if I look at the number of delays to freight trains -- or excuse me -- number of delays to Metra trains, that number is 22, correct?
A Yes.
Q Okay. So does that refresh your recollection that you used this table for purposes

of paragraph 13?

A I -- I don't, I don't want to say conclusively either yes or no.

Q Well, conveniently, Godfrey Exhibit 2 is the period from February of 2020 from the TOPS database that you relied upon.

And we can -- we can count the number of days and the number of delays there as well, correct?

A Yes, we can.

Q And what number of --

A It's 19 versus 22, and so by deduction I can potentially agree with you, so yeah, if I got my dates, numbers right.

Q And how many different days had delays according to the TOPS data?

A Nine.

Q Okay. So I think earlier you said you can potentially agree with me. Can -- can we in fact agree that the data that supports paragraph -

A I can now conclusively say yes.

Q Finishing my question:

We can say -- we can agree that the data that supports your statement in paragraph 13 is the data on the February 2020 spreadsheet from

Mr. Godfrey -- I mean Mr. Rodriguez?

A Yes, sir.

Q Thank you. Get the record clear. All right.

So when you tallied up the numbers for paragraph 13, you included every delay that's reflected on the Rodriguez Exhibit 1, February 2020 page, correct?

A Correct.

Q And that includes the delays that are shown in blue, blue shading?

A Correct.

Q That have, in the far right, in the column C/NC, the indication NC?

A Correct.

Q And can we agree that that refers, that NC refers to the fact that these delays were not controllable?

A Correct.

Q In fact, involved equipment-related issues on freight trains?

A Correct.

Q So those were not examples of Canadian Pacific's dispatchers prioritizing freight trains ahead of Metra's trains, correct?

A Correct.

Q So it was your --

A My statement says freight related. I don't -- I understand the general spirit and intent.

You're correct. I used a number that states 22, and some of those were noncontrollable.

When you factor in line experience of our customers, freight-related delays were -- it -- a customer doesn't always question whether or not it's an engine failure versus not.

The point is they were delayed due to some reason. And, yes, I agree with you, I'm trying to focus on controllable; and, yes, I agree with you, those engine codes are certainly not controllable.

Q Okay. So in the next paragraph of your verified statement, paragraph 14, you refer to an incident that occurred on March 28th, 2020.

And do you know whether you were referring to the reporting of that incident in the Rodriguez tables or in the TOPS data?

A I believe -- let me say this:

That incident, I believe -- I'm going from recollection -- was in discussions with Mr. Oppenheim, because, again, we were at the

point where Franklin Park West was coming online, we were trying to manage traffic in the area.

Why were we changing a crew on the line? It was -- there was no phone call that said, you know:

Dear Metra: We really have no crew, we're going to need your help to manage the network.

It was purely reactionary. And that is the spirit and intent of line 14, is we want to get out of reacting to network problems and crew shortages. All of us are always going to have operational limitations.

In this case, a phone call in advance:

Dear Metra, we got a real bad problem. Can you do some fancy footwork here?

Q Uh-huh.

A That is the spirit and intent, because in that case, that didn't happen.

Q So the spirit and intent is to suggest that more communication would be desirable?

A It's needed.

Q But that is the spirit and intent?

A That is the spirit -- absolutely.

Q So this particular CP train changing crews outside the Bensenville Yard, do you have an

earlier today, and -- and is there in the PTC or the dispatching world, a meaning to the terms "control" and "authority"?

A There is.

Q And what is the meaning of those terms, and let me start by asking:

Is that -- are those terms used in the dispatching world separate from PTC?

A They are. And to be -- to not -- to not put like a watercolor brush on this, each railroad has slightly different terms concerning what I believe you are referencing.

Q Okay. So what -- what's your understanding of the meaning of those terms as they would apply to the Canadian Pacific?

A So Canadian Pacific has timetable authority through -- through legacy agreements that it is the timetable railroad of record on the lines that Metra owns that we are discussing.

So that means that their rule book governs the operating rules and protocols on that line and that they become the timetable, if -- if you like. The rules, the operating safety rules, we will use as Metra, their rules or anybody going on the territory that, like I said, we own but they have

authority on, they will use their authority types. Those authorities can be anywhere from an inch to two inches because the rules are extensive. So that's "authority."

In terms of "control," that is a train dispatching term generally that means the employee that has final say and authority as to when a switch is thrown, when a signal is displayed, when an operating instruction is issued to a train, that authority can be delegated as it is currently in terms of some of the sections that Metra oversees. So we have two employees that assist the Canadian National train dispatcher to execute their authorities and control.

Q Okay. And so on -- I think I've learned this, but you can correct me if I've misunderstood.

On at least a portion of the MD West Line, there are locations where CP has authority and Metra has control as we have been using those terms just now.

A No, actually. It's the opposite.

So, for example, there's switching stations called A-4, A-5, A-6 and like B-6. That is -- we have -- on our TMDS workstation, we have

programmed it as the Canadian Pacific Rule Book that my train dispatcher can control, but under the authority only of the Canadian Pacific train dispatcher, so that means that dispatcher can tell my employee to put a freight train ahead of a passenger train.

And by law, by federal law, I have to reply and be respectful of and be governed by the Canadian Pacific because that is what the law says.

Q So in that -- in that setting that you just described, and again, just to make sure we're using the vocabulary the same way, Canadian Pacific's dispatcher has the authority. The Metra operator or dispatcher --

A Because we call it train dispatcher, but correct.

Q Essentially -- this is a tower operator essentially?

A Correct.

Q The tower operator is the one who does the keystrokes or whatever physical activity is involved in lining the track and controlling the signal?

A That is correct.

Q That's what the word "control" means in the vernacular we have been discussing?

A Correct. But it also means who has final decision authority.

So there's authority, and then there's control. If -- if -- respectful to this conversation, if our dispatchers were dispatching and controlling the lines we own, we would make different decisions than Canadian Pacific.

Q Are you sure?

A We certainly wouldn't put a freight train ahead of a passenger train without dialogue and discussion with the Canadian Pacific as a partner.

Q You might make different decisions in circumstances where your judgment about the right dispatching decision might have been different?

A Correct.

Q Okay. Well, you don't know whether all of the dispatching decisions that Canadian Pacific makes would be made differently by a Metra dispatcher.

A We certainly know that the lion's share of decisions of the D and D-1 -- correction, the D delays would have been made differently.

Q You don't know what percent of all of the

decisions that CP dispatchers make affecting Metra are in that category?

A Correct. In this analysis, I did not calculate the -- again, getting back to our OTP, I did not calculate that percentage, correct.

Q So going back -- coming back to the discussion we have had about authority versus control, the responsibility for exercising the dispatching judgment about which trains should move at a particular point on a line and across the network, as you described earlier, that's a set of decisions that goes along with authority and the dispatching authority; is that right?

A If I understand your question, there's no other railroad that owns the track that doesn't control and have the authority in a commuter setting.

Q That doesn't sound like that's responsive at all to my question. I'm asking just a building block question really. Which is:

The way you've been defining the term "timetable authority," that goes along with dispatching responsibility?

A Yes, and it's usually -- and what is -- why I'm trying to just understand your

question is all of that is usually attached to ownership. So there's authority, control, and ownership usually in one section of track.

Q Have you canvassed dispatching arrangements across the U.S. rail network to assess whether there are circumstances where one railroad owns the track that another railroad dispatches?

A I have not canvassed it, but certainly in a commuter setting, my general knowledge of the industry is it's not -- it's it is not a common arrangement.

Q Okay. It's not common. But, again, I'm really asking a different question.

A Okay.

Q Which is, the job of the person who has the control is to safely line the route in accordance with the instructions and the judgments made by the dispatcher who has the authority; is that correct?

A That is correct.

Q That's what it means for there to be -- strike that.

Okay. So I want to turn your attention to paragraph 16 of your verified statement.

A You said 16?
Q 16.
A Oh, wait, you mean 6.
Q 16.
MR. SPITULNIK: On page 6.
THE WITNESS: Oh, number 16. Excuse me. I was looking for pages.
BY MR. MEYER:
Q Sorry, sorry. Yes. Paragraph 16.
So looking at the last sentence of paragraph 16, that sentence is talking about timetable authority in the same sense we have just been talking about timetable authority here, right?
A That is correct.
Q And so when you say:
Sometimes Metra train dispatchers are forced or even forced and required by CP to follow these instructions, what you're describing is the relationship between authority and control?
A Respectfully, authority is the rule book, control is who is actually making the decisions in the dispatching office.
Q Well --
A But the point -- generally the answer is

yes. They have authority and control -- CP has authority and control of the line.

Q But -- okay. So the Metra train dispatchers in this case are the dispatchers who have the physical control over lining the route and displaying the signals, which we discussed as representing what control means in the prior colloquy; is that right?

A Yes.

Q Okay. So when you say:

Metra's dispatchers follow these instructions to display signals for freight trains, their job is to line routes that the dispatcher selects as the appropriate dispatching decision?

A Correct.

Q Okay. So when you say "forced and required," you're really just saying that the CP dispatchers had authority over those decisions?

A The debate is that a Metra dispatcher is not going to ordinarily make that decision without a dialogue, because it is incongruent to the Chicago protocols, which says a passenger train shall be go -- shall be routed first. Or have a dialogue about why we are doing a freight train

first.

Q Understood. But those Metra dispatchers aren't the people who have responsibility for considering the entire network perspective involving the factors that go into making a dispatching decision, correct? Their job -

A From the --

Q -- is to line the route?

A From the word "authority," you are correct. From the overall management of Chicago's network, that's not correct.

Q Those Metra dispatchers, as you refer to them, aren't the ones who are deciding what dispatching decisions to make on a day-to-day basis.

A Correct.

Q They're not looking at the broader CP network on a day-to-day basis?

A Correct.

Q And they're not interacting with Bensenville Yard regarding conditions in the yard on a day-to-day basis?

A Correct.

Q I'd like to direct your attention to the previous sentence in paragraph 16.

You refer to:

A number of recent occasions when my staff and I have witnessed CP dispatchers who are able to prioritize or avoid delay to Metra being directly told by senior management to move CP trains, regardless of the impact on the network?

Do you see that?

A I do.

Q Do you have personal firsthand knowledge of any of those occasions?

A I received calls from Rich Oppenheim, and then I went around and verified, so yeah. But I -- did I look at it specifically? No.

Q So you weren't --

A I have a phone call from a colleague, and then we're looking at it on the screen and with a freight train ahead of a passenger train where it's...

Q Okay. So you weren't involved personally in seeing any CP management issue instructions or hear any CP manager issue instructions?

A I heard it because I was managing a scenario and I was in it with Rich and my staff, like trying to figure out what was going on. Did I physically hear the instruction? No.

Q Okay. And so let's -- let's start the occasions that you're referring to in this sentence are occasions that were brought to your attention by Rich Oppenheim.

A Yes.

Q Are there any other occasions that were outside of that scope?

A There -- I don't fully recall, but we may have discussed this at one or two of our weekly meetings with CP. I just don't recall those -- those meeting dates.

Q Okay. In terms of the occasions you're referring to, these are ones where Rich Oppenheim contacted you to alert you to the existence of a situation?

A Exactly.

Q And when you say "my staff and I have witnessed," you're referring to Rich Oppenheim as part of your staff?

A No, I'm referring to Rich and I as colleague, and then I go to my staff to see if there's anything we can do, how do we manage the network, what's going on, and then you're now in an operating environment where you're trying to figure things out.

So from that standpoint, that's where I'm saying I witnessed this whole -- what is going on, I get a phone call, I run out of my office, what's going on and that sort of thing.

Q And how many specific occasions are you referring to in this sentence?

A I recall at least one or two, but I don't recall the dates.

Q Okay. And do you recall -- well, strike that.

When you say "being directly told by senior management," who was senior management?

A I don't recall the name at this time. I know a name was mentioned.

Q For one incident?

A For at least one incident.

Q And so what's -- let me break this down.

I think you said you recall one or two incidents?

A Generally, yeah.

Q And do you have a recollection of the job description of the CP person who issued the instructions that you're referring to in paragraph 16?

A It was higher than a mid-level manager.

So it goes like train dispatcher, chief, and then either director of the office -- I -- I'm almost certain it was from above that level that that came from.

Q So someone in the dispatching office?

A Or -- or higher.

Q But you don't know?

A I don't know specifically the title of that person.

Q That's -- that's one incident you're referring to?

A That would be the two incidents that I'm referring to.

Q And do you recall approximately when this occurred?

A I do not.

Q Okay. You don't have any records of this of your own?

A I -- I do not. These -- these are experiential operating office. It's like an operating emergency room, like what's going on.

And again, the -- to go back to spirit and intent is every railroad reserves the right to make decisions, but a senior officer should then call a senior officer, and it should cascade and

Examination by Mr. Spitulnik:	118

RODRIGUEZ DEPOSITION EXHIBITS

NUMBER	DESCRIPTION	PAGE
Exhibit 1	Metra Fact Book 2019 No Bates numbers - 20 pgs	7
Exhibit 2	Metra Milwaukee West Line Schedule - Effective 7/12/2021	50
Exhibit 3	(Oppenheim - previously marked) March 2022 Metra document On-Time Performance	23

THE VIDEOGRAPHER: We are now on the record.

Today's date is June 8th, 2022, and the time is 9:32 a.m. This is the video deposition of David Rodriguez in the matter of Canadian Pacific et al., v. Kansas City Southern, et al.

This deposition is being held at 511 North Columbus Drive, Chicago, Illinois.

Will attorneys please identify themselves.

MR. MEYER: David Meyer, with the Law Offices of David L. Meyer, for Canadian Pacific.

MR. GOLDEN: Nathan Golden, Sullivan & Cromwell, also for Canadian Pacific.

MR. SPITULNIK: Charles Spitulnik, Kaplan Kirsch & Rockwell, for Metra.

MS. KLEBANER: Mara Klebaner, from Sidley Austin, for Canadian National Railway.

MS. ROSEN: Sue-Ann Rosen, Metra.

THE VIDEOGRAPHER: Would the court reporter please swear in the witness.

(Witness sworn.)

DAVID RODRIGUEZ,

having been duly sworn, was examined and testified as follows:

statement in this proceeding, which she'll hand you, and that copy includes both the two-page written portion of your verified statement and Exhibit D-1, which is described as a spreadsheet of 2020 to 2021 CP delays.

A Is that the third sheet?

Q Well, my understanding is that exhibit --

A Oh, the whole --

Q -- D-1 is the third sheet and then everything after it.

A Okay.

Q Does this look to be a complete copy of your testimony in this case?

A Yes.

Q Okay. We'll -- we'll be talking about this during the course of the day. But before I get us there -- and maybe we can start by referencing paragraph 1 of the -- of the statement.

I gather your current position is manager of train operations/CTCO?

A Correct.

Q What does that position entail?

A So the manager of train operations/CTCO, in that role, I -- my primary role is to work with

the other freight carriers on systemic issues, fluidity issues, any type of issues that may delay Metras or may have delayed Metras, try and figure out what could be done better in the future. If there's something that we need to do on our side communication-wise, if there's something that the freight carriers can convey to us as to why a specific delay occurred.

And then the CTCO part of that is that each one of the railroads -- not each one, most of the railroads that operate in Chicago have a representative. That CTCO stands for Chicago Terminal Coordination Office. And so I'm Metra's representative in that office. That's why the CTCO at the end.

Q So you work -- during the day you work in the CTCO?

A Yes.

Q And is your role in interfacing with other freight carriers to address systemic issues, fluidity issues, and so forth, as you just described, is that part of the CTCO --

A Yes.

Q -- role?

A Yes.

Q And do you interface with all of the freight carriers serving Chicago?

A To -- in various degrees, yes. Through CTCO, I interface with the railroads that are represented in CTCO. If there's not -- there are a couple of railroads that aren't represented at CTCO, and in those cases, it's mostly dealing with people in the yards or in the operation at those railroads.

Q So if a railroad doesn't have a representative at CTCO, you -- you still interface with them by reaching out and contacting them directly?

A Correct.

Q Okay. And the railroads in CTCO, you interface with their representative at CTCO?

A Yes.

Q And do you also interface with other operation -- operational personnel for those railroads?

A Yes.

Q And does this experience, interfacing with the railroads serving Chicago, give you an understanding of the sources of delays to Metra trains --

A Yes.
Q -- as a result of freight operations?
A Yes. Sorry, didn't mean to cut you off.
Q And do you have an understanding of which freight railroads' trains interfere with Metra most often?
A Yes.
Q Which railroad would that be?
A The Union Pacific.
MS. ROSEN: Are you talking about currently?
BY MR. MEYER:
Q Did you have an understanding of the time frame with respect to which my question was addressing?
A Was there a specific time frame?
Q When you answered Union Pacific, what time frame --
A I was talking about currently.
Q Okay. Has that been true over any period of time?
A I can recollect the last 18 months that has been true.
Q Okay. Do you have a recollection that precedes the last 18 months?

A It may have been a different railroad at some point, but for the last 18 months it's been consistently UP.

Q And -- and where -- where in the Chicago area do UP's operations most often cause delay for Metra transit?

A Around the Proviso Yard area and that -- the Geneva line, the West line.

Q Okay. And the -- we marked an exhibit yesterday at Mr. Oppenheim's deposition that was Oppenheim Exhibit 1, and it has a helpful system map that I will hand to you. Feel free to look at any part of this exhibit that you -- that you wish.

I really, at the moment at least, just have a question about --

A Okay.

Q -- the map. Not so much a question about the map, but interested in using the map to help orient myself --

A Sure.

Q -- about the Geneva line, and you mentioned Proviso Yard.

So do I understand correctly that Proviso Yard -- well, first, I'm sorry, let's back up.

So there's the line heading straight west from Chicago that's labeled UP-W. Is that -- that's the UP-West line you were referring to?

A That is the UP-West line, correct.

Q Okay. And the Proviso Yard is -- it's very small print. I'm not sure -- I'm not sure whether I can see what station is closest to Proviso Yard here, but it's -- Proviso Yard is approximately where the IHB crosses the Union Pacific?

A That's correct. Just west of there.

Q And what Metra station is closest to that?

A I really can't see these.

MR. SPITULNIK: If you don't know --

THE WITNESS: Yeah, I would have to...

BY MR. MEYER:

Q Not particularly important but -- and so the delays -- the types of delays you're talking about involve operations of freight trains into and out of Proviso Yard, is that -- is that what you're telling --

A Proviso, yes.

Q -- me?

And who dispatches that railroad?

A The UP dispatchers.

Q Okay. Are there delays caused to Metra trains on all of the lines that Metra operates?

A No. The Metra Electric, we don't -- there are delays, yes. Is that the question? Delays or freight delays?

Q Well, let's -- let's start with delays caused by freight trains.

A Okay.

Q And you -- I think you started to answer my question --

A I did.

Q -- about freight train-caused delays, and if I understand correctly, Metra electric lines don't have any freight trains on them; is that right?

A That is correct.

Q Do all the other Metra lines have freight trains on them?

A Give me one second to just go through them and make sure.

There is an element of freight impact on every other line.

Q Okay. So at least to some degree, freight trains cause delays to Metra trains on every one of the lines that Metra operates?

what happened and determine whether the codes were accurately assigned?

A Yes.

Q Okay. So while we've got this document open in front of us, the -- if you turn to page 8, you'll see there's a table that reports -- it's Table 3 that reports weekday trains less than 85% on time?

A Yes.

Q Okay. And then it looks like -- I'm tempted to go to the next page and -- because you mentioned the UP-West line, and talk about a train 36.

A Do you want me -- did you want me to go to 8 -- page 8 or page --

Q Sure. Go to page 9.

A Which train were you referencing?

Q So the top row is -- if I'm reading this correctly, and one of the things I'd like you to confirm is that I'm reading this correctly, that this row refers to a train, Train 36, that's scheduled to operate on the UP-West line, and -- and then there is a bold indication that that train was 65 percent on time.

I think OT is on time; is that right?

A That is correct.
Q And -- and that's referring to the month of March.
So in the month of March the train arrived late -- get the math right -- 35 percent of the time.
A That's correct.
Q And "on time" meaning within 5 minutes and 59 seconds of its schedule 65 percent of the time?
A Correct.
Q And then do I understand that what this table is doing is it's listing the days when the train was late?
A It's listing the occurrences during that month where the train was reportable.
Q And then it's tell -- it's indicating how late it was, minutes late. Is that -- that's minutes late at destination?
A Correct. That's the minutes after the scheduled arrival time.
Q Okay. And then there's a delay code associated with each one of those instances?
A That's correct.
Q And these are all -- well, it's actually not all codes that we've talked about already, so

let me -- let me ask about those.

A Sure.

Q So I see a D code, and the delay explanation is negative 15 minutes, freight train interference, okay.

And I see -- just, by the way, I see that in that case 15 minutes matches the number of minutes the train was late, but I see other instances where the delay was either more or fewer minutes than the number of minutes late. Is that --

A That's correct.

Q So the TOPS system is recording the number of minutes of delay associated with the event?

A Based on the information that's put in by the clerk or whoever did the entry, yes.

Q So in a case where -- and I'm not sure any of these are examples of that, so I'm not -- I'm not trying to be specific about a particular train, but in a case where a train encounters a certain number of minutes of delay for freight train interference and then a certain number of minutes of delay because of accommodating an ADA passenger or some other problem, is more than one code assigned?

A No. Whatever the purp- -- the greatest number of delay is, that's what the code goes under.

So the example you gave, if it was five minutes for freight, three minutes for an ADA, three minutes for a single issue, that would be coded for freight.

Q Even though the predominant number of minutes is from things that weren't freight train interference in that example you just gave?

A That's correct.

Q Okay. But it's whichever delay code is the -- accounts for the largest number of minutes by itself.

A Correct.

Q Okay. So what is a D-1 code?

A So when a train is delayed, the first train encounters the delay, there's a potential for subsequent routes or subsequent runs from that same equipment to then be delayed at their departing, because in some cases we have trains that arrive and then depart right out as another assigned train.

So in a circumstance where a train is scheduled to leave 5 minutes after it arrives, but

it arrives 17 minutes late, it's obviously going to depart late.

Now, that train wasn't delayed for freight, but it was late as a result of a train that was delayed for freight.

So the subsequent, the secondaries in those are coded with a 1, so we know that that's not the primary.

Q Okay. So -- so in a case where -- and let me know if it's important for this to be a more specific example, and I'm happy to try. I think I understand what you're saying.

In a case where there's a -- a dispatcher stops a freight train on a Metra track and that freight train sits there for an hour or two hours, every -- every single train that goes past that freight -- has to go around that freight train that may be delayed by a few minutes, every single time that happens that would be a D code?

A That would be a D code.

Q And then a D-1 code is if some of those trains get to their destination late, and so when they -- I think the term is "flip"?

A Flip.

Q Train -- they turn -- they go the other

way out of that station, if they're late, because of having started late --

A Uh-huh.

Q -- and you trace the started late back to the freight train, that's the D-1 code?

A Correct.

Q And you could have a -- you could have a 1 attached to other kinds of delays also?

A Yes.

Q So it could have been a mechanical breakdown that delayed a train, and then the train is delayed on its next run, not the -- the same train but the next train is delayed, and that would --

A You would assign a 1 to that.

Q Okay. So can I ask you to turn to Table 5?

A What page is that?

Q 11.

So I'm looking -- maybe -- maybe let me start just to orient us.

You see that this table is labeled Train Delays By Cause and Line for March 2022?

A Correct.

Q And then in the left-hand column there are

43rd Street, and then Metra dispatches mains 1 and 2 between 59th and 74th.

The NS dispatches the NS mains between 21st Street and CB518, which is approximately 43rd Street, and they also dispatch between 74th Street and Manhattan, which is 189th, I think.

Q So are -- are there freight trains on all the tracks that Metra dispatches?

A There are -- yes. We run Norfolk Southern trains on those tracks.

Q And so if a -- if I see a freight interference on the SouthWest Service line, what does that indicate?

A If you see a freight interference on the SouthWest Service line, it indicates that a SouthWest Service train was delayed at one of the locations that is physically controlled by another foreign carrier.

Could be the IHB at -- at Chicago Ridge, could be the CSX at Forest Hill, could be the NS at CB518, could be the BRC at Belt Junction.

So it's -- this is not going to break it down by carrier. This is just going to give you the collective total.

Q All right. So if you could turn to

your -- turn back to your verified statement. In paragraph 5, you say:

In response to instructions from my supervisor, from February 2020 to early November 2021, I collected data on freight-caused delays on the Met- -- Milwaukee District-North line and Milwaukee District-West line, as well as for the portion of the North Central Service that shares the MD-W.

What data are you referring to here?

A TOPS information, information out of TOPS, utilizing information provided to me via e-mail from dispatchers to again tell the whole story on as much as I can of each delay. And that's what you see in these exhibits.

Q Okay. So the exhibits reflect all of the data that you collected?

A Yes.

Q And you started collecting that data at the beginning of February 2020?

A Yes.

Q When did you receive instructions to do that?

A I don't remember -- to be honest, I don't remember the specific date. I know at some point

I was told that we needed to do it.

UNIDENTIFIED PERSON: We have a delivery.

MR. MEYER: Let's go off the record.

THE VIDEOGRAPHER: Off the record, 10:25 a.m.

(Recess taken from 10:25 a.m. to a.m.)

THE VIDEOGRAPHER: Going on the record at 10:40 a.m.

MR. MEYER: We went off the record because the court reporter's computer connection to power was being delivered.

BY MR. MEYER:

Q And just before that, I believe we were talking about paragraph 5 of your verified statement. And you said, I believe, that you did not recall when you were told to start collecting data on freight-caused delays on the Milwaukee District lines.

Does that bring us back to where --

A Yeah.

Q -- we left off?

A Uh-huh.

Q But those instructions came sometime before February?

percentages are automatically changed based on the number of freight delays attributed to any carrier. That isn't part of anything that's in here for whatever reason, but I could provide that.

Q And when did you start preparing that? Two years? Three years?

A Yes, yes.

Q Was it at the same time that you were asked --

A Yes.

Q -- to prepare the more detailed --

A Yes.

Q Strike that.

You were asked to embark upon the project that resulted in the tables that are in your exhibit --

A Yes.

Q -- detail?

And you didn't report any of the results of that in your testimony?

A No.

Q Okay. The -- where is BNSF responsible for freight interference delay?

A BNSF, it can be responsible for delays on

the BNSF. They can also be responsible for delays at core width on the Heritage Corridor because they control traffic across that line. So there are two locations where BNSF can impact us.

Q And where on Metra's services is UP responsible for freight interference?

A UP could be responsible on the Geneva Sub, they can be responsible on the UP North, they can be responsible on the UP Northwest, they can be responsible at Daval, delaying trains on the Milwaukee North. They could be responsible on the Heritage Corridor, delaying trains at Joliet.

Q You referred to something as "the val"?

A Daval, D-A-V-A-L. That's the name of the location.

Q Where is that, roughly?

A It's on the -- it's on the UP at -- I believe it's -- I -- I don't want to guess. I'm not sure exactly what the location is.

Q I think you mentioned it in connection with the Metra -- at the Milwaukee --

A It crosses the Milwaukee North line, yes.

Q Is that at A-20, by chance?

A I'd be guessing.

Q Okay. But in any event, UP controls --

A Yes.
Q -- some point that is a crossing with the Milwaukee District North line.
A Correct. And so when there's a delay on the Milwaukee North at Daval, we attribute that to the UP, not to the CP.
Q Okay. So if I were to look back at the Metra District North row in the Table 5 from the prior exhibit, where there's freight interference on the Metra Milwaukee District North line --
A Correct.
Q -- that -- some of that freight interference might theoretically be the responsibility of Union Pacific, not Canadian Pacific?
A That's correct, because that table breaks it down by line, not by carrier.
Q Okay. Where can CN be responsible for or where is CN responsible for freight interference?
A It's a long list. The North Central Service. They can be responsible on the -- they can delay trains at the Barrington on the Milwaukee North. They can be responsible for delaying trains on the Heritage Corridor because they dispatch it.

They can be responsible for delaying trains at Joliet, even though the Rock Island dispatcher dispatches that because, like I explained earlier, there are circumstances in time where we give them a window to clear and they don't. They can -- it's the same opportunity at 16th Street on the Rock Island. I think I hit them all.

Q I just want to make sure that --

A Sure.

Q -- you didn't misstate something, and -- and I -- it may reflect my lack of understanding of the Chicago area. You mentioned Barrington --

A That's right.

Q -- as a -- as a place where Canadian National can cause interference, and I think you mentioned in connection with the Milwaukee District North line?

A Correct.

Q Is Barring- -- my understanding was that Barrington was located along the EJ&E, former EJ&E line of Canadian National?

A That's correct.

Q And at least my understanding was that that wasn't close to the Milwaukee District North

line, so perhaps there's some connection I'm not understanding.

A Milwaukee North crosses the UP Northwest at that location. The Milwaukee North crosses the UP Northwest at that location.

Q And Canadian National is responsible for dispatching that?

A They control the signals at Barrington, yes.

Q Okay. So the pie chart on this page, again, I'm not asking you about the numbers but just the identity of the slices, so it -- the next smaller slices here on this particular pie include Norfolk Southern.

We talked a bit about this before, but just for completeness, where does Norfolk Southern -- where is Norfolk Southern responsible for freight interference?

A There's three locations where the Norfolk Southern comes into like Metra for freight.

The first one is head-room moves at Landers. The Landers operator controls those. And that line is -- that portion of the SouthWest Service is dispatched by the NS.

They can delay us at CB518, which is

around 43rd Street. On the SouthWest Service, they can delay us at Brighton Park on the Heritage Corridor. Those three locations.

Q Okay. The next pie slice on this chart is Metra. So can Metra be responsible for freight interference?

A Metra can be responsible for freight interference on the Rock Island. If a dispatcher were to run an Iowa train or a CRL or a CSX on the Rock Island without an adequate window or without adequate coordination and that delayed, that would be a Metra delay.

Q That's an example of --

A Right.

Q -- what we were talking about earlier?

A Exactly.

Q And then IHB. I think you mentioned IHB a few times, but for completeness again --

A Two locations the IHB can delay us, CB Canal on the Heritage Corridor and Chicago Ridge on the SouthWest Service.

Q CSX?

A CSX can delay us at Forest Hill on the SouthWest Service, could potentially delay us on the Rock Island if they committed to clearing at a

specific time and did not.

Q What about situations -- well, let me ask about the last one, and then I'll come back to that.

A Sure.

Q The last -- last one here is BRC.

A BRC can delay us at Des Moines on the Heritage Corridor, and they can delay us at Bell Junction on the SouthWest Service.

Q What about a situation where a train, a freight train interferes with Metra or causes a delay to a Metra train because the train is not allowed on to the BRC at tower -- well, at the point on the Milwaukee District West line where BRC connects to the Milwaukee District West line?

A So that's part of what I do in my investigation in talk -- communicating with the railroads.

The assumption would be that the train got stopped on the Milwaukee West at -- I think that's Galewood We- -- Galewood East.

If the train got stopped, a freight train got stopped there because the BRC wouldn't allow them on, we would look at how that was coordinated.

So if there was a commitment from the BRC to take the train and they didn't take the train, I would assign that to the BRC. That's rare, but it happens. I would assign it to BRC.

If there's -- if there wasn't clear communication and the train was run with an assumption that they were going to be able to take them and then they couldn't take them, that would be assigned to the CP because they are the dispatchers of that territory.

Q And the same -- would the same be true of a train that caused a delay on the Milwaukee District West line heading to the IHB?

A Correct.

Q Same principles --

A Same principles --

Q -- for allocating responsibility?

A -- same principles for allocating responsibility, yes.

Q And what about a train that caused delay at Tower B-17, a freight train that caused delay at Tower B-17 because the dispatcher wouldn't allow it to occupy UP track at Bryn Mawr?

A We'd do the same thing. We'd try to determine how it was -- how it was coordinated,

and there's a certain number, length of train that can fit between Bryn Mawr and the Milwaukee West line.

If there wasn't clear communication, and that train is stopped across the line delaying Metra on the Milwaukee West, then it's assigned to the CP. If the UP made a commitment and then did not honor the commitment, we would assign it to the UP.

Q Okay.

A But, again, just depend -- that's where the more information we have, the better we are at assigning those things.

Q You could set this one aside. Thank you.

A This one?

Q Yes.

So your compilation of monthly data ends in October of 2021?

A It ends in October 2021 in the submission. I continue these chart -- these every month.

Q Do you know why the submission concludes with --

A I have --

Q -- October 2021?

A I have no idea.

Q You haven't stopped doing this?
A No.
Q And you do the same thing for every carrier?
A Correct. Every carrier's breakdown.
Q And is this -- are the individual trains reported in these tables all ones where you have assigned the delay responsibility to CP?
A No. Oh, in these? Yes. In these? Yes. In these tables, these are CP tables, yes.
Q So that the tables you have for each of the carriers reflect -- for every carrier in Chicago, all the tables you've created, they're broken down into which carrier was assigned the responsibility.
A Correct. So this says -- I'm looking at March -- CP - 2020 March. This was -- and so in it you've got UP -- I'm sorry, Milwaukee North, Milwaukee West and NCS.
There's also, in what I keep, a UP table which also has Milwaukee West and North Central Service because they can be delayed at Daval.
So anywhere that there's a potential, then you'll see this carrier on those tables also.
Q So -- so UP -- so on UP's report there

would be a Milwaukee West?

A Yes, Milwaukee North.

Q Milwaukee North. And other lines.

A Yes.

Q So let's -- did Mr. Godfrey, when he, prior to February of 2020 asked you to keep track of CP delays, explain why he was asking you to do it at that point in time?

A Prior to or at -- or on -- in February?

Q Well, you testified earlier, I think, that you were asked by Mr. Godfrey sometime prior to February.

A Right. But I also testified that I kept those prior to then.

So I want to clarify whether you're talking about prior or you're talking about those instructions in February.

Q Well, so why don't -- what I'm trying to understand is whether Mr. Godfrey told you why he was asking you to do something different from what you were already doing.

A No, he didn't tell me exactly why he wanted it. He just told me to make sure that I was documenting everything.

Q Okay. And these tables were -- are only

or more, then it would have shown up in the on-time reporting.

A Correct.

Q Okay. And something that was less than negative 6 would not show up in the on-time reporting?

A Correct.

Q So just going back to the -- we talked about the duration column, and then I think minutes is self-explanatory. I assume that's the number of minutes between the beginning and end of the delay?

A Yes.

Q And then there's a column for cause?

A Yes.

Q Where did the contents of that column come from? Did you write that or did that come from somewhere else?

A Comes from TOPS.

In some examples, I may have been able to secure additional information after the fact. Maybe I got the length of a train, and I would insert that into here. But predominantly if it came out of TOPS, that's what I put in here.

Q Okay. And then type, it looks like all of

these are, at least on this particular page, all of them are FRT. I assume that means freight?

A Correct.

Q And is that -- is it the case that -- we could check this, but if I understood -- well, no, I apologize.

In April there's a -- there's a DISP. That's dispatcher error?

A April? Yeah, DISP is dispatcher.

Q So those are RF codes --

A Yes.

Q -- which you talked about earlier.

A Correct.

Q Okay. So but -- we have freight and we have dispatcher, and all of the types are going to fall into one of those two categories; is that right?

A Correct.

Q Okay. And then the code, that's the code from TOPS that corresponds to the table that we were looking at that has the delay codes?

A Yes.

Q And again, consistent with the testimony from earlier today, if there's a 1 at the end, that means it's a delay to a train that was --

that was not itself delayed but was delayed departing because of a prior delay to the equipment?

A Correct. We refer to those as secondaries.

Q Those are the secondaries.

A Right.

Q Okay. The ARR, I was going to ask you about that, but you've answered the question already. That's how late the train was when it arrived to its final destination?

A Correct.

Q And then the C/NC, I think you referred to controllable or not controllable?

A Correct. That's what that designates, yes, controllable or not controllable.

Q And is -- is the C always assigned -- if it's -- if it's a freight delay that's not equipment related, it's always going to be considered a controllable delay?

A Yes. Unless I have information of un- -- of, you know, unforeseen circumstances that delayed the move, it's coded as a controllable freight delay.

Q Okay. Are there any individual delays in

any of these tables that did not come from the TOPS database?

A No. There -- okay. Let's -- let's go back one second, though.

Any of these in the table that we are looking at in February, the answer is no because they're all highlighted red, which means they all -- they all arrived over six minutes late.

There are some cases where I do have information in here of trains that were delayed en route. Very few, to be honest with you.

If you look at September 2020, there's a train in here, 2209 -- I'm sorry -- Milwaukee West, date 23, 2209, location B-12, minutes delayed, 6. I don't have the duration because that information came from the dispatcher. They were delayed for a Q165, but they arrived on time. That won't show up in TOPS.

Q Which page are you referring to?

A I'm sorry. September 2020.

Q I see, yes. So --

A But the train was on time.

Q So it won't show up in TOPS because TOPS only contains trains that arrive more than six minutes late?

A TOPS doesn't only contain information on trains that arrived six minutes late. It contains all information that is put into it, and in some cases, information is automatically generated through our CAD system.

In some cases, information is put in manually for trains that are not reportable, not over six minutes late, but it's not a consistent practice. It doesn't happen a hundred percent of the time.

Q Okay. So this Train 2209 on September 2020 -- I'm sorry -- September 23rd, 2020, that train would have been in TOPS?

A This train would have been in TOPS.

Q It would have been in TOPS indicating an on-time arrival?

A Yes.

Q And -- but TOPS would not have indicated that there was a six-minute delay?

A There are thousands and thousands and thousands of entries in TOPS. I can't say unequivocally that that one is not in here, because in some cases information for trains that are delayed but not reportable at their arrival does end up in TOPS, but this particular

information I know for a fact came from the dispatcher.

Q Okay. And so the addition of this particular delay by you based on information from the dispatcher was part of the objective of yours to capture every single delay?

A To capture everything I'm aware of, yes.

Q Not just those that show up in TOPS.

A Correct.

Q Okay. And if I were looking for the other examples of that, I'd look for other places where the -- the entry is not in red; is that right?

A Correct. And there are not many in here. September of 2021, the second-to-last page.

Q Okay. So you gathered all of this information, put it in these tables. You did this for CP, but during the same time period you're doing it for every other carrier in Chicago?

A Correct.

Q It appears you've compiled certain of the information from these tables in a spreadsheet which is attached to Exhibit D-2. Is that work that you performed? It's actually called Exhibit D-1. Spreadsheet of 2020 to 2021 CP Delays.

Sorry. I was referring -- I think I misspoke when I was referring to your tables as D2. Your tables and the spreadsheet with the tabulations are all part of Exhibit D-1. So you see the table?

A I see it. I'm looking at it. I'm trying to remember if I did -- to be honest with you, I'm trying to remember if I did this.

I've done tables similar to this for all carriers. This one I don't particular -- I don't remember specifically if I did this one, to be frank.

Q Okay. Well, I want to try and understand what the -- what the numbers represent.

A Sure.

Q And since it's your table, I will ask you to help me.

The -- it appears that you have rows in this table for each of the months for which you have tables indicating delays --

A Uh-huh.

Q -- is that right?

A Yes.

Q And for each month -- take February right at the top -- you have number of days in the

THE VIDEOGRAPHER: Going on the record at 11:48 a.m.

BY MR. MEYER:

Q Okay. Mr. Rodriguez, I wanted to continue reviewing your Exhibit D-1 for various delays reflected in these tables, and the first thing I want to ask you about, we were looking at the table or the tables for February 2020, and I noticed starting in March -- in March, I'm not sure how consistent this is, but at least it appears consistent after February that the SAL column and the duration column are no longer filled in.

A That's correct.

Q Is there a reason for that?

A I'm not getting information.

Q It's not coming from TOPS any longer?

A Those columns are not in TOPS. Those columns are -- that's me asking dispatchers and asking people for information, and the sources where I was getting that information, I don't -- I don't have information any longer.

Q You don't have access to the same sources?

A No.

Q Why not?

A It's a great question.

People were providing this information to me, and they haven't been providing it to me, so I have a lot to do with all these other -- with every other carrier, and so I don't have that information.

Q And is that true for other railroads too?

A It is, yeah, correct.

Q And had your tables from the period prior to February of 2020, had those tables contained a SAL and operation information?

A Not a hundred percent, but a good number, yes.

Q Okay. So for February, we're able to see whether -- at a particular location where a delay occurred, whether the Metra train arrived at that location late relative to its schedule?

A Correct.

Q But for March, we can't tell?

A No.

Q And anywhere that the SAL, the SAL column is empty, we can't tell -- we can' whether the Metra train was already late when it was delayed --

A Correct.

Q -- for a reason in this table?
A Correct.
Q How did locations get assigned or particular delays get assigned to Milwaukee District North or Milwaukee District West?
A Based on what line they operate on.
Q So I just want to look at the table for August of 2021. And in the Milwaukee District West table --
A Uh-huh.
Q -- on August 3rd, you see there's a delay at a location called Rondout?
A August 2021?
Q August 2021.
A Sorry. I was looking at 2020.
That is an errant entry.
Q So the location is wrong?
A The location is incorrect.
Q The train is on -- Train 2212 is on the Milwaukee West line?
A Correct.
Q And Rondout is a location on the Milwaukee North line, right?
A Correct.
Q Do you know where the six-minute delay

actually occurred?

A Based on this table, no.

Q The location is coming out of the TOPS database?

A Yes.

Q So the TOPS database is wrong in this case?

A This is not -- it's me populating it. This is my error. It may be correct in TOPS. I may have put the wrong location.

Q Okay. So some of the causes for delay contain some indication of what happened. Some -- some just say "freight train interference."

A Correct.

Q Which doesn't provide a lot of information about what actually happened.

A That's correct.

Q Is that because you didn't have the information?

A That's correct.

Q So do we know in those cases whether CP's dispatchers did something inappropriate?

A I can't say unequivocally the answer is yes. My answer would only be that the CP dispatcher dispatches the railroad at those

locations and makes the decisions on when freight trains operate.

Q So freight train interference just means that there was a freight train?

A Correct.

Q There might have been no way for any dispatcher to avoid the interference?

A That's fair.

Q Some of the delays in here just refer to a particular -- what appears to be a particular freight train. An example actually was the one you referenced earlier today from September of 2020 on September 23rd, where the cause is listed as Q165 with 31 cars. Is Q165 a freight train?

A That's a freight symbol, correct.

Q Is that a CP freight train?

A I'm not sure whose freight symbol that is.

Q Okay. And the location here is listed as B-12?

A Correct.

Q Is that east of Bensenville Yard?

A Yes.

Q And my question about this is perhaps similar to my question about freight train interference.

The reference to a freight train just tells us that it was that freight train that was in the way of a Metra train?

A Correct.

Q It doesn't tell us whether a -- better dispatching could have avoided the delay?

A It does not.

Q So just to take another example, January of 2021, looking at the 18th of January, B-17, there's a reference to CP 470?

A Yes.

Q That's just a reference to a train. There's no --

A That's all the information I had, yeah.

THE REPORTER: I'm sorry, I didn't catch your answer.

THE WITNESS: That's all the information I had.

BY MR. MEYER:

Q And again, we don't know whether better dispatching could have avoided that delay?

A I do not know.

Q And if you look down at 27th of January of 2021, there's a reference to two trains, CP 286 and CP 473.

A Yes.
Q Any -- do you have any information on what happened with those trains?
A An 11,000-foot train and a 12,000-foot train running during p.m. peak, there's no window where those trains would fit without delaying Metra.
Q Okay. So that's -- that's an example of something that -- where a dispatcher should not have run those trains --
A Absolutely.
Q Would you be able to go through these delays and identify other cases where you know the dispatcher should not have run the train?
A Yes.
Q Do you know how many situ- -- how many cases there would be?
A Not off the top of my head. I'd have to go through it.
Q So let me ask you about July 2021. So I'm sorry, I was looking at the wrong page. July 2021 -- on the 21st of July, I see a reference to Metra Train 2242 at Spaulding?
A Yes.
Q Spaulding is where the CN crosses, right?

A Correct.
Q And there's a reference to CN freight traffic at Spaulding.
A Yes.
Q And then a type -- type code of dispatcher, RF code.
A Correct.
Q So that's a dispatcher error there, not a freight train interference delay?
A I -- for some reason it's coded RF. Just based on what's here, it should probably be coded DD, but I don't have any of the background information because it's not -- it's not included in here. There could have been a reason why we did it as an RF.
Q So RF is an error dispatching a Metra train?
A It's an error dispatching that doesn't involve -- it didn't -- that doesn't involve freight, a physical freight train. It's a dispatcher error. Did you ask me if DD or RF?
Q Well, I was asking about RF.
A Okay. RF is a freight dispatcher error that does not involve a physical freight train.
Q And then you -- you said perhaps it should

have been coded a DD. That's a dispatcher error involving a freight train?

A Yes.

Q But what made it a dispatcher error rather than a freight train delay?

A Based on this information, I couldn't answer that. Because this -- based on this information it should be coded DD.

Q So -- but it -- as a dispatcher error, a DD dispatcher error, it would still be a dispatcher error rather than a general freight interference?

A Correct.

Q And what made it a dispatcher error rather than a general freight error?

A The decision to run the freight train instead of the Metra train.

Q Which may have been an error?

A Yes.

Q By the dispatcher?

A Correct.

Q A mistake?

A Yes.

Q Not an intentional move?

A No.

Q Is it possible that delays caused by freight train interference that are coded D also reflect situations where the dispatcher was not intending to delay a Metra train?

A It's possible, but short of having that information, we code those D.

Q Okay. So if I'm looking at the tables here and the locations, is it possible for me to assess where -- which of these delays related to freight trains that were operating on the Milwaukee District West line originating at Bensenville and heading west or arriving and terminating at Bensenville from the west?

A For you to be able to determine that from this information?

Q Yeah.

A Only if we included it in the delay information.

Q Well, there's -- some -- some of the delays could be ruled out as involving those kinds of trains, right?

So, for example, Milwaukee North delays wouldn't have anything to do with a train between Bensenville and the west or between the west and Bensenville, would it?

A West of Bensenville?
Q Yeah.
A No.
Q And a North Central Service train wouldn't be delayed by a freight train that was moving between the west and Bensenville or between Bensenville and the west, would it?
A No. Unless that train came east of Bensenville, that would be the only way.
Q So a train would have to come east of Bensenville --
A Correct.
Q -- to delay an NCS train?
A Correct.
Q And -- and if we were to go through the locations here, we could identify locations that were east of Bensenville that would not be -- would not have involved a train that was operating only between Bensenville and the west?
A Correct.
Q So if I look at February 2020, the first -- the first line item in Milwaukee West is Bensenville. We can come back and talk about that later. There's B-17. That's west of Bensenville.
The next one's blank. Is that -- is there

a reason for there to be a blank location?

A It's -- it's blank because the location was not entered in TOPS. So when I took the information, I included it in the cause but didn't assign it a location.

Q Based on this information, we just don't know where that delay occurred. Well, actually, maybe we do.

A You do -- you do in cause between B-12 and B-17.

Q Okay. But just reading down -- further down in the column, B-12, if we see B-12, we know this was a delay that resulted from freight interference east of Bensenville; is that right?

A Yes, yes.

Q Similarly, if we see Galewood, we know it happened east of Bensenville?

A Correct.

Q A-5 is also east of Bensenville?

A Correct.

Q So if the question were how many of these delays were related to freight trains that were moving between Bensenville and the west, we could at least eliminate the ones that are at locations east of Bensenville from consideration.

A Correct.

Q Now, we wouldn't -- we wouldn't know solely from that -- like, it will -- if there's a location at Bensenville at B-17, we'd need more information to determine whether the freight train that caused the delay was operating between Bensenville and the west or was operating past Bensenville and heading north?

A Correct.

Q Or moving past Bensenville to the east and perhaps making a crew change at Bensenville?

A Correct.

Q So the only place we could look for that information is in the cause --

A Correct.

Q -- explanation?

So if we look at Bensenville -- the first item, date, February 1st, Bensenville location, there's a delay. It says:

Delayed for CP 286 yarding at Bensenville?

So we'd have to know whether CP 286 was a train that operated between Bensenville and the west or came from another location, the north, into Bensenville?

A We know that it's yarding. It's going

into the yard, right.

Q And do you know where the CP 286 train symbol operates?

A Not off the top of my head, no.

Q Okay. But if someone did know that --

A Yes.

Q -- they could assess whether it was a train from the west or a train from the north?

A Yes.

Q Similarly, the next line is at B-17, so that's, again, the control point west of Bensenville, and then what we know from the cause, single tracking around CP 681, an emergency, we'd have to know whether that particular CP 681 was a train that came from the west or was going to the west or going to the north?

A Okay. So the delay is to the westbound train. I could -- I could do this for you if you want.

The train is a westbound train.

Q You mean the 2717 is a westbound train?

A Yes.

Q Is that what you mean?

A Yes. 2717 is a westbound train. So they were delayed for CP 681, an emergency, 35 minutes.

THE VIDEOGRAPHER: We are now on the record. Today's date is June 7th, 2022. And the time is 10:03 a.m.

This is the video deposition of Rich Oppenheim in the matter of Canadian Pacific, et al., versus Kansas City Southern, et al.

Will the attorneys please identify themselves.

MR. MEYER: I'm David Meyer, Law Office of David L. Meyer, for Canadian Pacific.

MR. GOLDEN: Nathan Golden, Sullivan and Cromwell, also for Canadian Pacific.

MR. SPITULNIK: I'm Charles Spitulnik with Kaplan Kirsch & Rockwell for Metra.

MS. ROSEN: Susan Rosen, in-house Metra.

MS. KLEBANER: Mara Klebaner from Sidley Austin for International Airway.

THE VIDEOGRAPHER: Will the court reporter please swear in the witness.

RICHARD OPPENHEIM,

having been duly sworn, was examined and testified as follows:

EXAMINATION

BY MR. MEYER:

Q Good morning, Mr. Oppenheim.

that time?

A Yes, it was.

Q And those commuter trains, were they Milwaukee Road commuter trains or someone else?

A By 1980 -- you know, whether the office first opened in 1980, I believe they were still operated by Milwaukee Road at that point. Shortly thereafter, the State of Illinois intervened and Metra was established.

Q Okay. And the same was true on the MD North line?

A Yes.

Q And do you recall approximately how many freight trains there were on the MD West line at that point in time on -- on a daily basis?

A Yes, on a normal day, there were five westbounds, and I want to say seven or eight eastbounds fluctuating, you know, periodically, on business levels and that sort of thing, but I think there were five main primary trains that operated on the West line then.

Q So the westbounds -- well -- strike that.

The freight trains you're describing, the five westbounds and seven to eight eastbounds, were those scheduled manifest trains, or...

A They were -- there was a -- a -- an ideal -- an optimum schedule. There was a schedule that was approached. I don't think that in those days that people really considered them scheduled. You know, it was just when the trains ran and we knew when they would run, but -- and there was a fairly regular pattern to it, but I wouldn't call it a schedule, per se.

Q Fair enough. I was actually meaning to emphasize the aspect of schedule to mean these were manifest trains that would operate on a regular basis between Chicago and some point west or vice versa; is that -- is that right?

A That's right, yes.

Q And they included trains between Chicago and Kansas City?

A Yes.

Q And were there also trains between Chicago and other points that used the MD West line?

A Yes, we had a train that ran out to Davis Junction, and north towards Janesville at one point. Occasionally, there would be trains that ran on Milwaukee West that would, once they got to Savannah would go up the Dubuque line, Marquette to Mason City and so forth.

Q Okay. And if I were to take the number you gave me earlier, the five westbounds, and seven to eight eastbounds, if I -- would I -- would that include local trains?

A No, those were just the through trains. We also had a -- we also did have local trains. Took care of the various industries in the Chicago area that were located on that line.

Q Between, say, Bensenville and Elgin, how many trains operated local on a daily basis?

A On a regular day, it was -- it was just the one.

Q Okay. So that would be a local out from Bensenville and then back?

A Correct.

Q And then in addition to that, would there have been bulk trains, unit trains, other sort of unscheduled trains?

A Yes, yes.

Q How often would those run?

A There -- there was basically a grain season every year in the fall, and that's when you would see most of them.

Q And during grain season, how many trains would typically operate on a daily basis?

A I would say the -- in addition to the five and the seven I mentioned, there might be maybe two more, two or three more, possibly.

Q And would that be loaded trains, destined to market?

A Usually in one direction they would be loaded, in the other direction they would be empty.

Q But there's a two or three -- what I'm asking is does the two or three include both empties and loads, or is it two or three loads?

A I would say both, yeah, two to three -- make it two to four.

Q Okay. And when you were dispatching -- well, let me maybe establish some foundation.

When you were in the Chicago dispatching office that had responsibility in this time period for dispatching the MD West line, how did -- how did you dispatch those freight trains in connection with the passenger operations that were on the same line?

A Well, the good news was for the larger part of that period, the five westbound Kansas City trains operated late at night. The first

couple might -- may have come out when there were one or two Metra trains left out there running, but for the most part they were finished. There was one -- one freight train that did operate during the day every day around noon, and basically we would look for the Metra trains -- midday ran hourly, it ran hourly service, and we'd typically look for a window after a Metra train had passed and then have the freight train come out behind them.

Q And so let me see if I understand what you just said.

You're talking about a westbound train?

A Yes.

Q Departing Bensenville; is that correct?

A Um-hmm, um-hmm. Yes.

Q And so you would -- well, was the -- was the MD West line double track in that era?

A Except for about a mile crossing the Fox River, outside of Elgin. It narrowed to a single track across the Fox River, Tower B-35, and otherwise there were -- there were two tracks. We called it two main track centralized traffic control.

And then beyond Elgin, it was double track

your verified statement about the effect of the CP-KCS transaction on Metra.

A Right.

Q What I'm asking you is, what assumptions did you make?

A The assumptions that I made were that traffic between the Twin Cities and Kansas City would increase, which is essentially the point of the whole thing, from my perspective. That the traffic would increase, that CP would intend -- intentions would be to funnel all of the stuff up and down the Marquette Sub, that the Marquette Sub would be incapable of handling the increased traffic and that there would be an overflow that would wind up coming through Chicago. And I believe that -- well, that was the assumption.

Q So your assumption, the assumption in your testimony about the adverse impact at CP-KCS on Metra is predicated on the routing of Kansas City, Twin Cities traffic through Chicago?

A Partially, yeah, partially.

Q What about the other partially?

A The other partially is that there would -- it would be very odd to not have an

increase in other traffic to Kansas City from places like Portage and Milwaukee and Racine and anywhere up and down the line. I know it's not included in the -- in the submission, but we all know CP isn't going to turn down some business if it shows up and why wouldn't it? I guess that's part of my assumptions as well.

Q Help me understand what you mean when you say, "CP wouldn't turn down business between places like Portage and Kansas City."

What does -- how does that bear on your assessment of the impact of the transaction?

A It bears the assessment, in that, if there was an increase in traffic due to concerns, customers of CP that were already online and as a result of the merger wanted to send more of their products to Kansas City, that it would eventually -- not eventually. It would, by definition, wind up coming through Chicago.

Q So if a train that's coming to Chicago from Milwaukee has an extra car on it, does that affect Metra?

A Shouldn't unless it puts it over 10,000 feet. No. No. It shouldn't.

Q So really what you're saying is that

you're concerned that there would be additional trains?

A Yes.

Q And -- and you're concerned that there will be additional trains between Milwaukee and Chicago?

A Milwaukee and Chicago destined to Kansas City.

Q And why the latter component?

A I guess because the location of KCS. It's just basic logic that the point of the merger would be that additional traffic would be flowing to and from Kansas City as a result of going through all this to -- to merge the two railroads that didn't seem --

Q Okay. So -- so now let me --

A Too much of a stretch --

Q Let me unpack it.

A Yeah.

Q Let me -- let me make sure I've got -- I've got this right. I do not -- I do not want to mischaracterize your assumptions or your testimony. So I'm asking you, not trying to testify here.

Category 1, the assumptions that lead to

concerns are that there will be trains between Kansas City and St. Paul that operate via Chicago?

A Yes.

Q There are added trains because of the transaction?

A Yes.

Q Okay. And then the second category is that there will be growth in trains between points north of Chicago and Kansas City added because of the transaction?

A Yes.

Q Is there any other category?

A Well, you need to include -- just so I understand what you're asking me, are we talking just Milwaukee North or are we talking north --

Q Talking about the CP-KCS transaction --

A Yes.

Q -- causing impacts to Metra --

A Yes.

Q -- about which you're testifying?

A Yes.

Q Okay.

A And the other concern would be traffic that originates in Kansas City or is going to Kansas City and is going to the other railroads in

the Chicago area that CP interchanges with that would have to get to the IHB or the BRC and be in our way in so doing.

Q Okay. So third category, let's make sure I've got this right, this traffic that's going from Kansas City -- or between Kansas City and Chicago as a result of the merger -- they're trains between Kansas City and Chicago as a result of the merger where there are additional trains going east of Bensenville to BRC or IHB?

A Yes.

Q Okay. And that -- that would get in Metra's way, is what you're saying?

A Yes.

Q Okay.

That's the third category?

A Yes.

Q Okay. Anything else?

A There's always the unforeseen when you're talking about the future and what's going to happen in the future, I certainly can't predict all the possibilities. Yes, there's other possibilities.

Q But none of the other possibilities are what you're testifying about in --

A No, that is accurate, yes.

Q Okay. So a little bit earlier today we talked about on-time performance, and you're familiar with on-time performance reports that Metra provides to the public; is that right?

A Yes.

Q Okay. And I think maybe to facilitate our discussion about this topic, let me mark an exhibit.

(Oppenheim Exhibit 3 is introduced for the record.)

MR. GOLDEN: Oppenheim 3.

BY MR. MEYER:

Q Okay. I've asked the court reporter to mark as Oppenheim Exhibit 3 Metra's on-time performance document for March 2022. And I'll represent that that was pulled right off the website, Metra's website. Obviously, if there's something about what I'm showing you that doesn't look right, let me know, but... have you seen this report before?

A I have not.

Q You've seen monthly on-time performance reports that Metra produces for other months; is that right?

And then if you look at Table 5A, which is on page 11.

A Okay.

Q This table is labeled "Train Delays by Cause and Line, March 2022." We're looking at the same page?

A Yes.

Q Okay. And this table is providing a breakdown by cause category of the train delays that occurred during March of 2022 on each of the lines that Metra operates, correct?

A Yes.

Q And so if we look at the MD West column, I think the way to read this, and I'd ask you to confirm, is if you look all the way at the bottom, there are three rows at the bottom that are giving totals. The total trains delayed row shows 33 total trains delayed in March 2022 on the MD West line. That matches the 33 that was on the table that we just looked at for the MD West line in the column "Total Translate."

So that's the 33 late trains during March of 2022 on MD West, correct?

A As far as I can see, yes.

Q And then the entries in the various cause

categories are sort of breaking that 33 down into the various causes. And do you know who at Metra assigns causes to a delayed train?

A That -- that also involves a process in which the various departments discuss every morning the trains that arrive beyond tolerance and have to agree on a cause. And sometimes it's not clear what the cause was, or could be multiple causes, and somebody's got to take the blame for it, essentially.

Q So there's a team of people at Metra every day that discusses each of the delays and assigns a cause. Is that what you just said?

A Theoretically. I mean, essentially that is. And there is a conference call every morning in which the various lines and the transportation, engineering and mechanical people from each line discuss the trains that wound up on the report and come up with a code. And usually the code is fairly clear, but a lot of times it is not, and if it's not clear, there's a discussion.

Q Okay. So I just want to go back to that column on page 11 for MD West, since we have been talking about MD West, and go out all the way to the bottom, there are 33 total trains delayed.

And bottom two rows appear to break that 33 down into two different categories. One is total Metra/PSA delays and the other is total foreign carrier delays.

Do you see that?

A I see that.

Q Do you know what a Metra/PSA delay is?

A That would be the lines that are -- let me preface it by saying I'm not a hundred percent sure, but I -- my understanding is that this would be delays that were caused on the lines that Metra owns and dispatches, plus the delays that occurred on BNSF and UP, which are the PSA carriers.

Q Well, in MD-W there are 23 Metra/PSA delays in March of 2022.

Do you see that?

A Yes.

Q So MD West isn't a line dispatched by Metra, is it?

A No.

Q And it's not a line that has a PSA operator, is it?

A No.

Q So what are those 23 delays?

MR. SPITULNIK: If you know.

Q Someone in the legal department was tasked with reviewing that archive. What were the instructions that that reviewer had for purposes of that review? Do you know?

A I know they were -- they were supposed to be looking for e-mails that I sent directly to individuals responsible for -- for delays or -- delays or inconvenience or any situation that made us less than the service organization we would like to be. Any of those e-mails that were sent out in regards to handling by CP, outlining the situation, a lot of them contained suggestions of better ways to have handled it, in attempt to improve things moving forward. But the specific instructions, I don't remember, but it was something to that effect.

Q So something to the effect of look in the e-mail archive for any action by CP that caused any situation, including a delay, including inconvenience, that resulted in Metra not providing what -- would it be unfair to say perfect customer service?

A The desired customer service, that way.

Q Is desired customer service different from perfect customer service?

A Yeah, I don't believe we're ever going to get perfect. It's not going to happen.

Q But a one-minute delay would be the kind of thing that you believe would fall into this category of providing less than what Metra --

A It can, yeah, it can.

Q Just so I understand the scope of what was being asked --

A It would depend on the situation.

Q -- did you know what time period was covered by this archive?

A I think they went back to 2016.

Q And do you know if there was a reason for not going back farther?

A I do not, no.

Q Okay.

A All right.

Q So the intention was to capture 100 percent of the e-mails that you sent since January of 2016 addressing any of the situations within the scope of what you just described?

A I think that's probably accurate, yes.

Q Okay. And do you know how many separate instances of CP action or --

A I do not.

Q -- are reflected in your e-mails?
A I -- no, I do not know.
Q I'm going to ask you to look at the end of your e-mail compilation which is Exhibit B-2. There's the table, which is Exhibit B3, which you describe in your verified statement at paragraph 32 as a:
Spreadsheet documenting these events to better quantify the delays and interference recorded in these e-mails.
You see that?
A Is it from --
Q I was reading from paragraph 32. Take your time. It's farther back.
So your statement is right after tab 2. Here.
A Oh.
Q Too far forward, yeah.
A 32.
Q So I was reading from that paragraph what you testified to about what Exhibit B3 is. And now I'd like to ask you to go to Exhibit B3 and confirm for me if it's correct that you reviewed that Exhibit B3 for correctness as a summary or a documentation that quantifies the delays in

Q Heading to where?
A Heading toward A-5 in order to go toward Milwaukee.
Q Okay. And I think you said earlier that that northbounds via A-5 are only occasional?
A No, the southbounds are occasional. The old 281, which is 247, that's every day and they try to leave Bensenville, I think they're scheduled to leave at 10 o'clock or 10:30. So every single day they're out there when 2232 shows up at 11:10.
Q So when this happens, when this kind of thing happens where the train is -- a Metra train calls at a platform other than the one that you've described as typical, you'll send an e-mail off to Canadian Pacific complaining about --
A Yes, yes.
Q Every time.
A I'm sure I've missed more than I've documented, but yes, we try -- I try to.
Q You try to send it every time.
A Yes.
Q Okay. And let me ask you about the way Metra's stations are configured. I know there's an exception to this in Bartlett, I think, but we

can come back to that.

The platforms on the MD West line anyway are right across from each other at grade level, so you can cross from one side to the other, assuming there are no trains there, understand that.

A Right. Our passengers don't understand that sometimes, but yes, you're correct.

Q So let me just understand, so don't passengers all have to cross the tracks to get to the platform to get to and from Chicago?

A Not necessarily.

Q So, well, passengers get to Metra stations by foot or by car mostly?

A Yes.

Q And they come from either their home or a parking lot where they park their car?

A Yes.

Q And that's on one side of the tracks or the other, right?

A Yes.

Q So if their train is to Chicago in the morning, and they anticipate that would normally be on track 2, they come to the platform on track 2, maybe they parked south of the tracks, but when

they come home in the evening or midday, assuming they're coming back on the train, typically they will alight -- I think that's the right word, right --

A Sure.

Q -- on the platform of track 1?

A Yes.

Q Okay. And now they're home or their car is on the other side of the tracks?

A Yes.

Q Across the tracks?

A Yes.

Q And same would be true for someone coming to the station from the other side. They'd have to cross the tracks either in the morning or at night typically?

A Yes.

Q So it's kind of designed into the system that passengers are crossing the tracks.

A Okay. Yes.

Q You agree? "Okay" is not an acceptable answer.

A Yes, I wouldn't -- I would say that on a regular basis, passengers do cross the tracks.

Q Okay. Thank you.

So now, and again, we are going to talk about --

MR. SPITULNIK: Could you let him finish his answer.

MR. MEYER: It was a yes-no answer; yes-no question. You can follow-up on redirect if you want.

BY MR. MEYER:

Q The -- in situations where a train is going to come on the track, that as you've described it, wouldn't be typical, so if the eastbound in the morning to Chicago is going to come on track 1 instead of track 2, Metra would notify those passengers via a loudspeaker system at the station; isn't that right?

A We would attempt to notify them.

Q Well, there is a loudspeaker system at every station, isn't there?

A Right, but believe it or not, our passengers don't all get there ahead of time and paying attention. A lot of them sit in their cars until the very last minute and they wouldn't hear the announcements. We have some English-as-a-second-language folks that are -- don't understand the announcements.

Yes, we do make announcements, but it's not -- it's not a foolproof system.

Q Fair enough. If I'm -- strike that.

Would you say it's typical that there's only one person getting on a Metra train at a given station?

A It's not typical, no.

Q And so if -- if one person understands the loudspeaker and heads over to the proper platform, that's a pretty good indication that other -- other passengers will get the idea that the train's coming on a different platform from what they might have thought at first?

A You would think that would be true. However, I live in Deerfield, and for a lot of years rode the first train in in the morning. And periodically my train would be on the opposite track, and there would be an announcement, and three-quarters of the people would go over to the proper side where the train was coming, and at least a quarter of them would stand there holding their newspapers as if nothing had happened, waiting for their train to come in. And on occasions I had to go over and actually tap people on the shoulder and say, "go to the other side."

Q And so if I were to look at all the times 473 delayed Metra trains in the kind of scenario you're describing, what you're saying is I should look not just at 2225; I should look at 2227 and 2233 as well; is that what you're saying?

A Yeah, if you're looking at recent ones, yes. As far as going back, I mean, you got to understand that there were periods where documenting this stuff was more of a -- of a focus, shall we say. I mean, there are a lot of things that I get involved with, you know, new schedules coming up, events. I don't capture every delay, nor do I purport to capture every delay. I think, more accurately, this is a representative sampling of things that occur out there rather than a documentation of every single incident.

Q Well, it was intended to be a documentation that went beyond the TOPS data that you said is incomplete?

A That's true.

Q But the only way we can know what happened, if you didn't document it, is to look at the TOPS data, right?

A That's probably true.

Q And I think what you said is that there were situations where you wouldn't have recorded a delay if it didn't result in a five- or six-minute delay --

A There are -- there were periods of times -- time where that was our primary focus.

Q Okay. And what changed?

A What changed?

Q You said you had periods of time where it was your primary focus. Did something happen to cause you to document more delays?

A We have -- I don't want to bore you, but I guess this is the time to mention this. We have had a long history with CP and Metra trying to comingle on the same piece of real estate, and there are good periods, and there are bad periods, and a lot of the bad periods came about when new individuals would come over at the helm of CP and issue edicts and mandates to their dispatchers to handle traffic in a certain way.

In the most notable change, we had a big Metra supporter, very high ranking at CP for a number of years, that was on our side, went so far as to fire some of the dispatchers that were moving freight trains in front of Metra, and then

somewhere along the line just did a complete total about-face. And then -- now he was the one telling the dispatchers "move that freight train in front of Metra."

Q Okay. So you just made an allegation about a particular CP employee who was in a position that allowed him -- was it a he?

A It was a he.

Q To fire dispatchers?

A Yes.

Q Okay. Someone who worked where at CP?

A I think he was headquartered in Calgary, I believe.

Q And what was his position?

A I think he was either an assistant vice president or a vice president of operations.

Q And do you have a name?

A I don't know if that's appropriate.

Q I'm asking.

A I do have a name.

Q Tell me.

A Robert Johnson.

Q Okay. And you're saying that Robert Johnson fired dispatchers who dispatched Metra trains improperly?

A That did happen once or twice, yes, from my understanding. I mean, nobody sent me a piece of paper saying it happened, but I certainly heard about it.

Q And then you said that he was the one who did, I think you said, an about-face?

A Yes.

Q Okay. And issued instructions to dispatchers?

A Now, whether they were written or verbal, I couldn't tell you. But there was definitely a push to move the freight trains, irregardless of how it affected Metra and Amtrak.

Q So the instructions related to both Metra and Amtrak?

A As far as I understood, yes.

Q Okay. And when did this occur?

A I would have to go back and look.

Q Well, you testify about instructions in your verified statement.

A I don't remember the exact date. It would have been before 2018, I can tell you that.

Q Let's look at paragraph 35 of your verified statement if we may. Do see the paragraph that begins "troublingly"?

A Yes.
Q Okay. So the second sentence:
CP dispatchers who are able to prioritize or avoid delay to Metra have been recently directly told by senior management to move CP trains regardless of the impact on the network.
Do you see that?
A Yes, I do.
Q You wrote that?
A I did.
Q And is that referring to Mr. Johnson's instructions?
A It is not.
Q What is it referring to?
A It was a -- in response to another transportation officer at CP.
All right. So we're talking about 473, and I guarantee you, this has got to be documented in here somewhere.
Q I'm asking you about paragraph 35.
A Okay. I'm trying to explain.
Q Okay.
A And I don't -- it's really not appropriate for me to be throwing people's names out because --

Q Well, you testified under oath that this happened.

A Yes.

Q I'm entitled to ask about circumstances and try -- and try and see whether you have knowledge that's accurate and what that information is. We're entitled to respond to your allegations.

A So -- so the situation involves a 473 train on a weekday in the peak period that was moved out of Bensenville while trains -- no, back up, back up.

It was a 286 coming off the cutoff from Bryn Mawr, going into Bensenville Yard.

Q Can I pause you for one second?

A Yes.

Q Because I'm not -- I want you to continue that answer. I believe you're talking about a specific e-mail that's part of your compilation.

A Yes.

Q Is the e-mail 204? Is that right?

A I think I can find it here if you give me a minute. 204, you say?

Q Well, that's what you cite in your index.

A In the index? How do I find 204? That

would be helpful, certainly, to find it.

Q Yeah, they're numbered at the bottom.

MR. SPITULNIK: This one?

THE WITNESS: Yes, that's the one.

BY MR. MEYER:

Q You're welcome to remove it from the binder if it would be more convenient to have it in front of you.

A So -- so the person who directed this name was given to me in confidence. And I don't know -- if you feel it's important enough, I'm -- I mean, at this point I don't have any compunction about it, but somebody told me who this came from. A reliable source told me that.

Q Okay. So I'm going to ask a few questions, and I'll decide whether I want to ask you for the name.

A Okay.

Q And we can designate that part of the transcript highly confidential.

A Uh-huh.

Q At least as to the outside world. It won't be highly confidential as to my client --

A Okay.

Q -- if it's the name of someone at my

client. I think that's fair.
A Okay.
Q My judgment, okay?
So first question:
If I understand the sequence of events here, there was a 286 --
A Yes.
Q -- coming into Bensenville.
A Correct.
Q 286 is coming from the north, right?
A Correct.
Q So it has to cross over the B-17 interlocking plant to get into Bensenville?
A Correct.
Q It was going into the yard, right?
A Correct.
Q Okay. And there were -- I think what you say in this e-mail is that you didn't think there was enough time between Metra trains for that move to have occurred successfully?
A No, not with 11,500 feet, no way.
Q So the first thing that happened here is a dispatcher made a -- in your opinion, a bad judgment; is that fair?
A Or was directed to do something. I -- the

dispatcher --

Q Okay.

A -- intimated that he was directed to do this. It was not his decision.

Q So was that the Elgin dispatcher that would have given 286 --

A Yes.

Q -- the clearance or whatever the right word is --

A The Elgin --

Q -- to proceed?

A The Elgin dispatcher would have directed the operator, the tower operator at Tower B-17 to bring 286 in, regardless of whether there was enough time to do it or not.

Q So -- and this goes back to this question we had earlier today about what the tower operators do versus what dispatchers do, right? So in this case, the B-17 operator is a CP employee?

A Yes.

Q But in a B-12 situation, it would be a Metra employee?

A Yes.

Q Metra would follow the instructions of the

dispatcher in terms of what trains to allow through the plant, right?

A Yes.

Q And the operator implements that by lighting switches and doing things more tactically, right?

A Correct.

Q Okay. So in this case, 286 is coming from the north, it's crossing through B-17 to get to the yard. I think you say the windows were probably too tight, but at least had a chance of succeeding. Okay. You did say that?

A Okay.

Q You wrote that, right?

A I'll go -- I'll stick with it then, if I said that.

Q Well, you see it there, right? I'm just asking whether I'm reading this right.

MR. SPITULNIK: Can you give him second to read the document.

THE WITNESS: "... too tight, but at least had a chance of succeeding." On these windows...

BY MR. MEYER:

Q Those are --

A Right.

Q I'm reading your words --
A Yes.
Q -- from this e-mail, right?
A And if you like, in conference with CP management, that we did have occasionally, I was asked if I could provide a spreadsheet showing the windows or I may have offered to do it, and I did just that. I gave them a spreadsheet that showed windows between scheduled Metra trains and when those windows were, and I believe they had that at this time, if I remember correctly. I'm not going to swear that they did, but maybe that came after this happened.
Q Do you still have that document, sir?
A I don't have it with me, no.
Q Do you possess it?
A It's somewhere in my computer.
MR. MEYER: Chuck, could I ask if we could get a copy of that? Happy to followup with a formal discovery request if you think it's necessary.
MR. SPITULNIK: I don't think a discovery request is necessary, but if you put it in writing exactly what it is you're looking for, that would be useful. Just send an e-mail.

BY MR. MEYER:

Q And this is -- you're referring to a document that is on your computer that you shared with CP prior to 2021 that identified windows, right?

A Again, I'm not a hundred percent sure if that document was produced -- produced before or after this particular occurrence. Now that I'm looking at it, it says it was January 2021, so it may have been produced afterwards as an attempt to --

Q Provide clear instructions for CP to follow?

A Right, right. In other words, a way to move forward.

Q Okay. In any event --

A Yeah.

Q -- that's the document I'm asking for, whatever that is, and we'll follow-up with an e-mail. Thank you.

So then -- so 286 was moved in a 13-minute window?

A Correct.

Q Pardon?

A Yes.

Q We're just following -- just trying to follow the sequence of events here.

2237, that would be a westbound Metra train --

A Yes.

Q -- outbound. That was stopped at B-17, stopped to let 286 pass.

A Correct.

Q The dispatcher told that train to stop or --

A Well, in moving 286, it would have been physically impossible for the operator of B-17 to line the signal for 2237. It would have been physically impossible to do that because the interlocking would have prevented it.

So 286 is going across all the tracks, pulling into the yard --

Q Okay.

A -- and 2237 is here, and the eastbound train is here [Indicating]. They're both waiting at a red signal, waiting for 286 to clear so the operator can line them up.

Q Okay. So the first part of this e-mail and this concern has to do with the movement of 286 in a window that was, in your judgement, too

Bensenville Yard and whether there were other needs for that track?

A Nothing that -- that the --

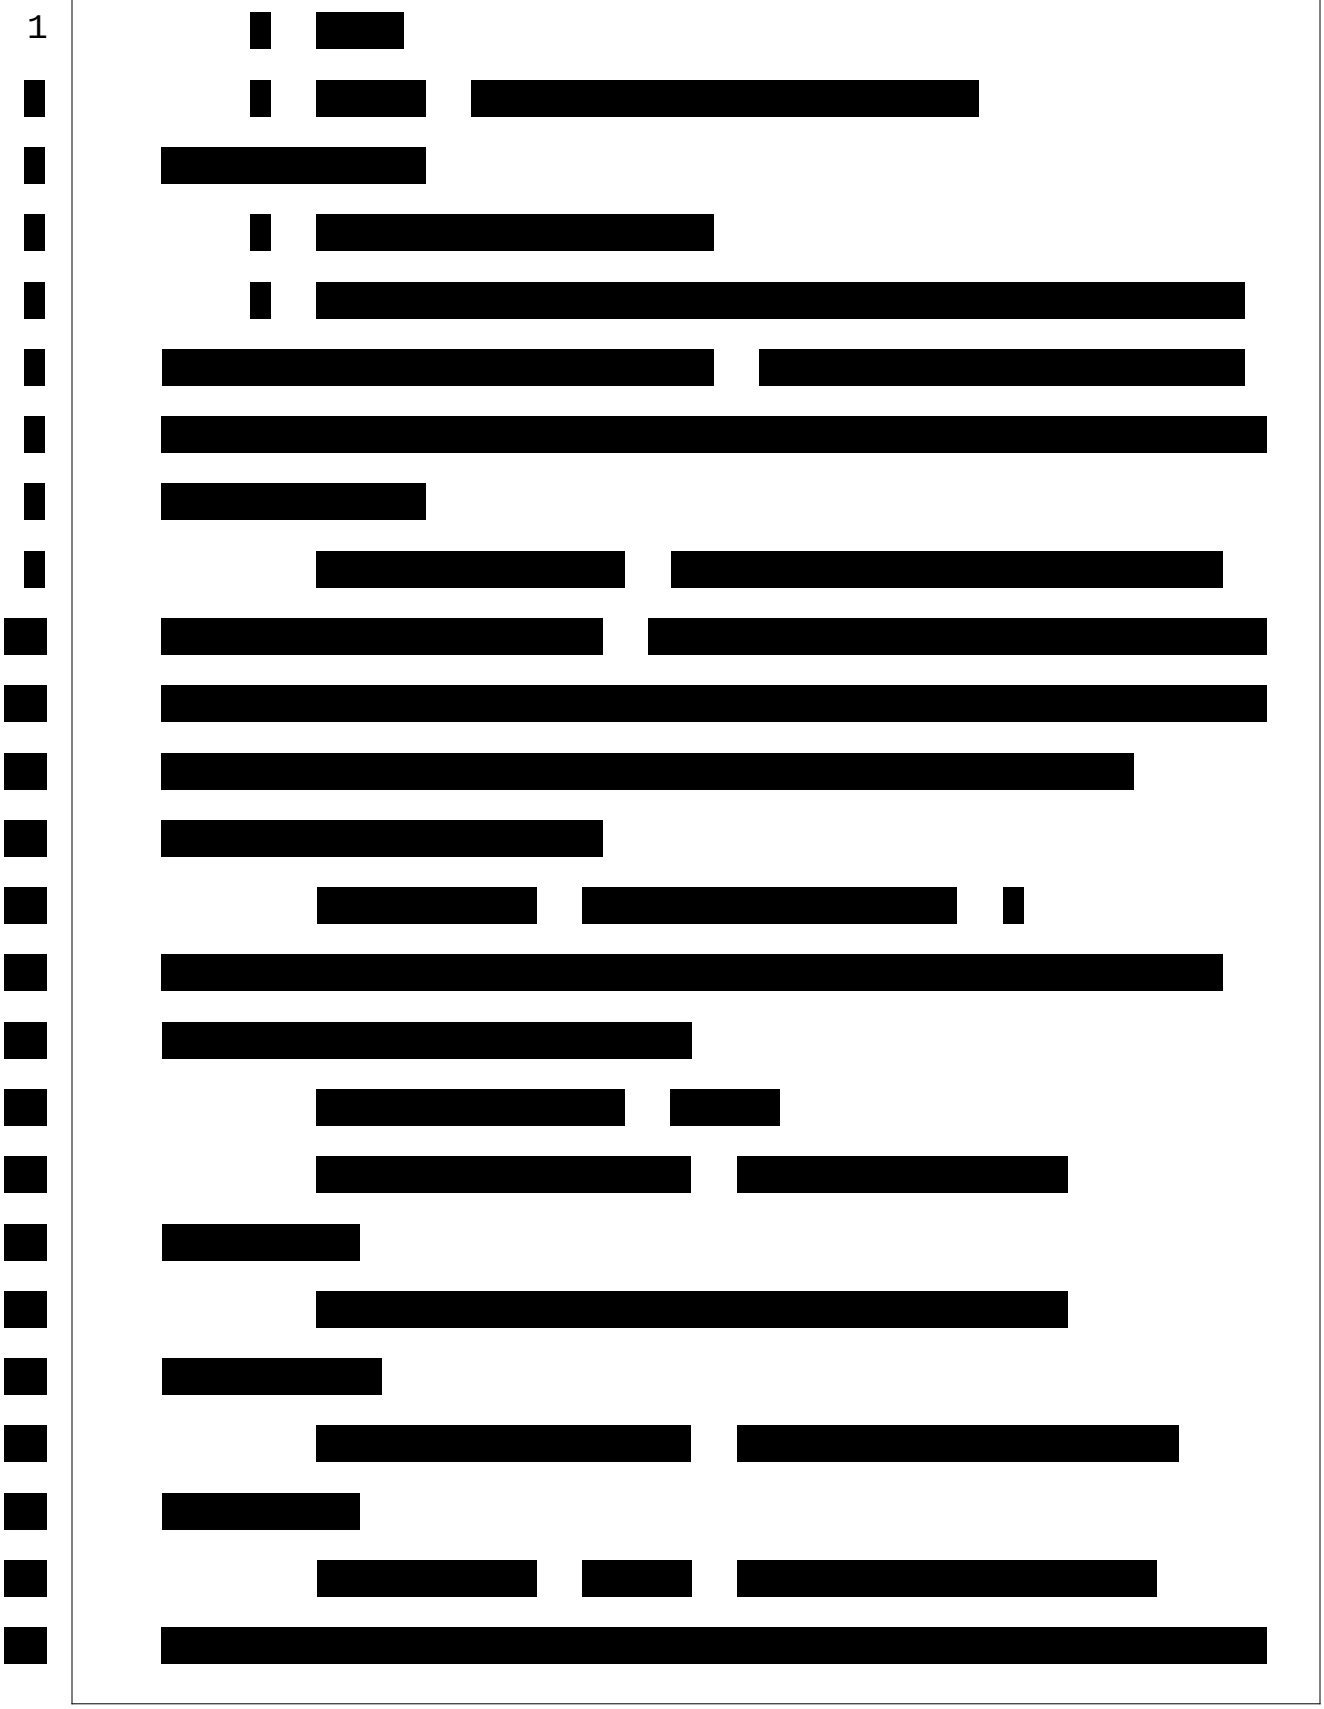
Q I asked: Were you aware?

A Yes.

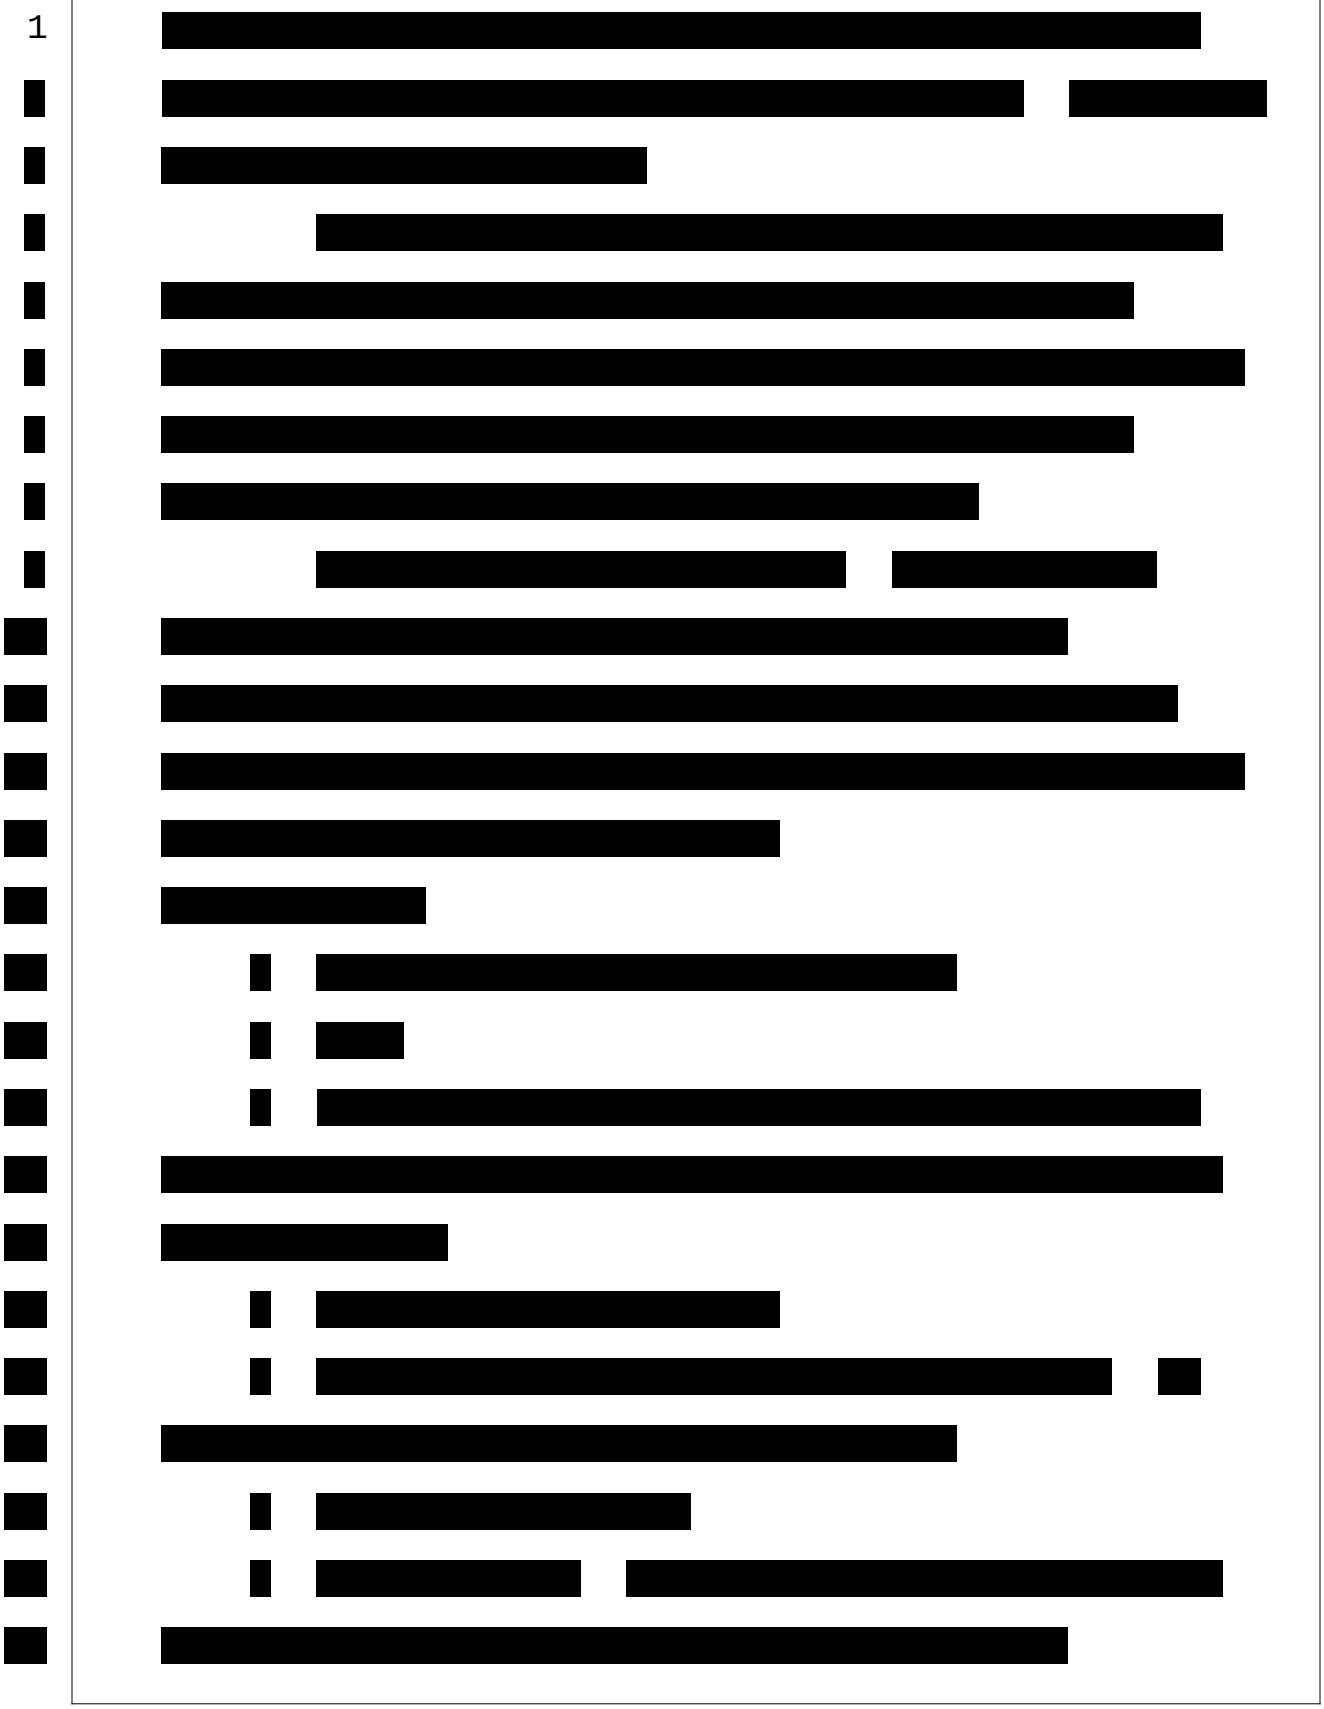
Q I asked: Were you aware?

A I am aware that there are no operating considerations or concerns going on in Bensenville Yard that waiting another five minutes for two Metra trains to go through the interlocking would have mitigated.

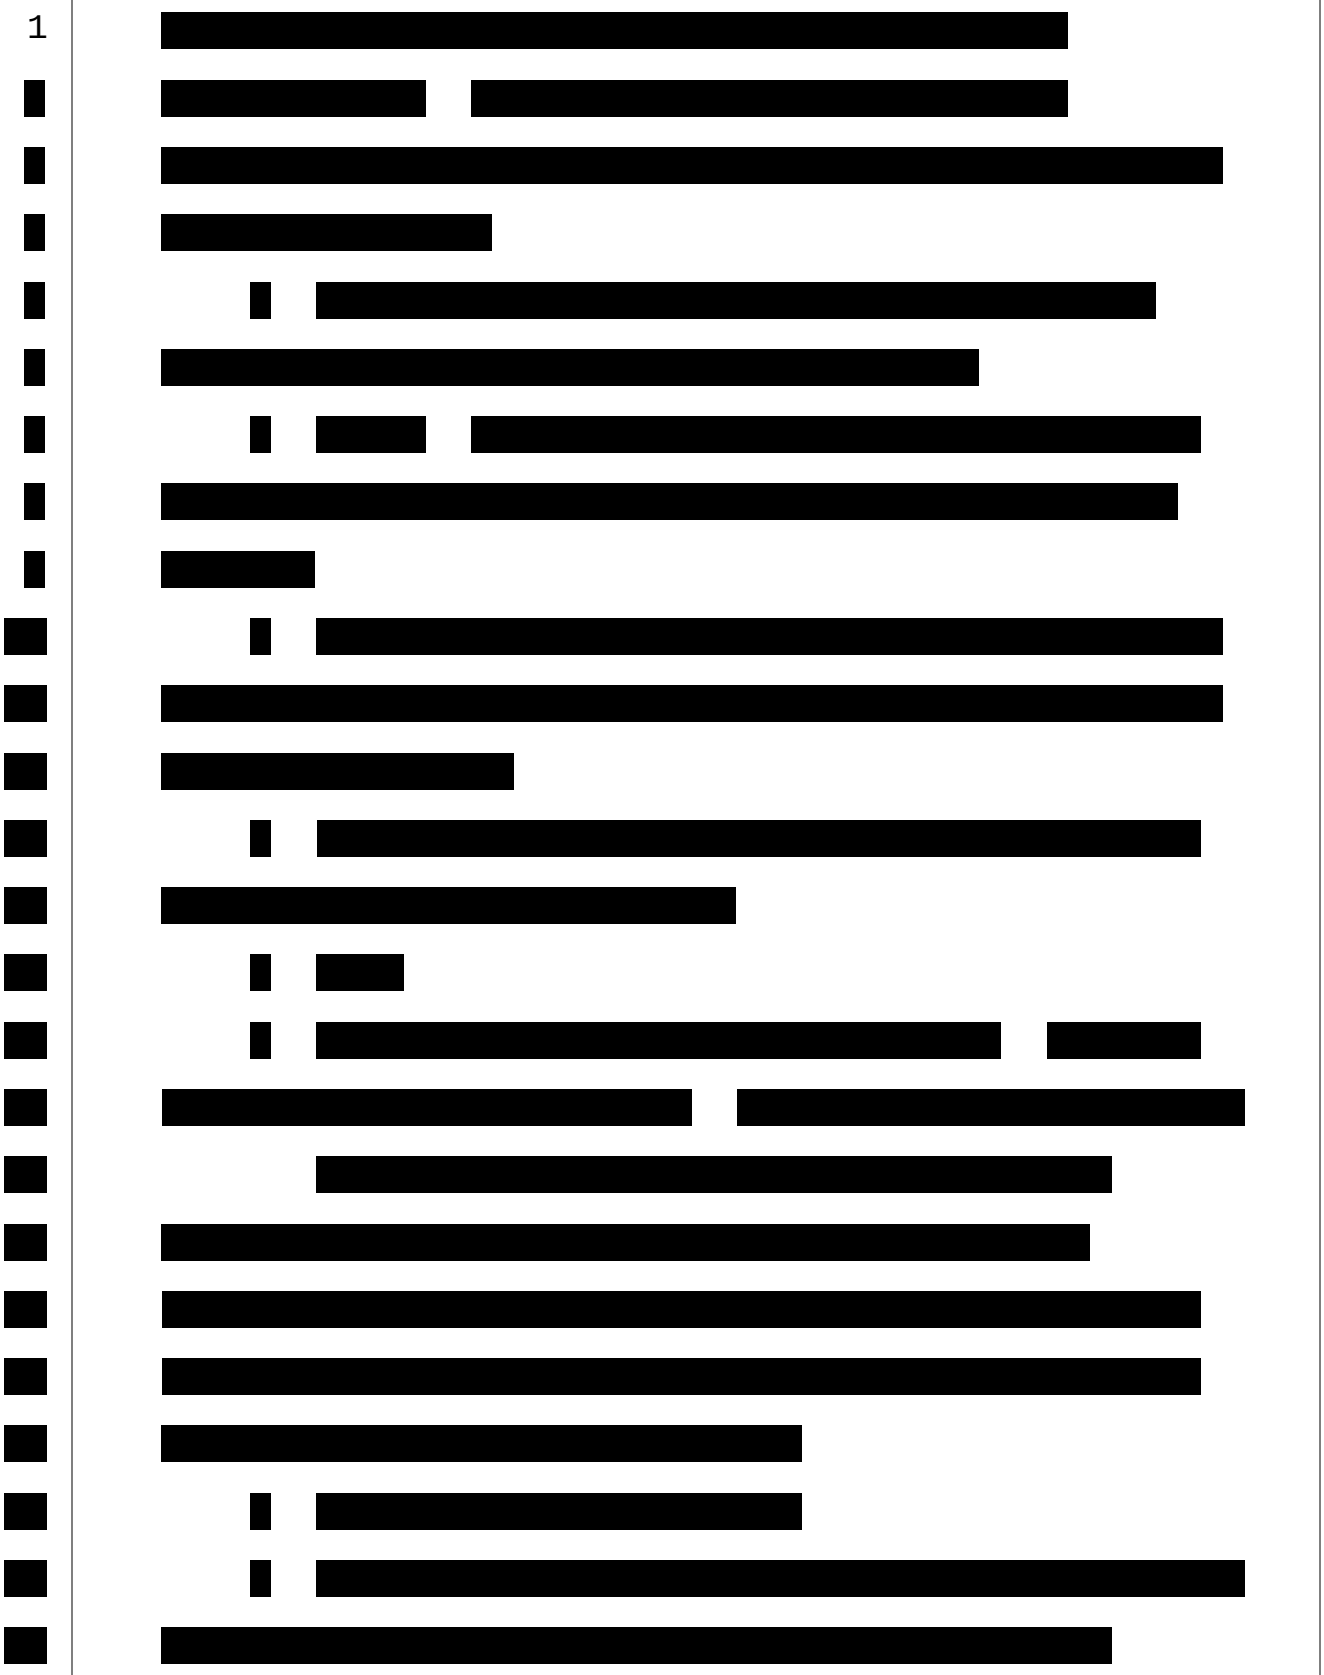
Q I'm not asking whether they would have mitigated. I'm asking:



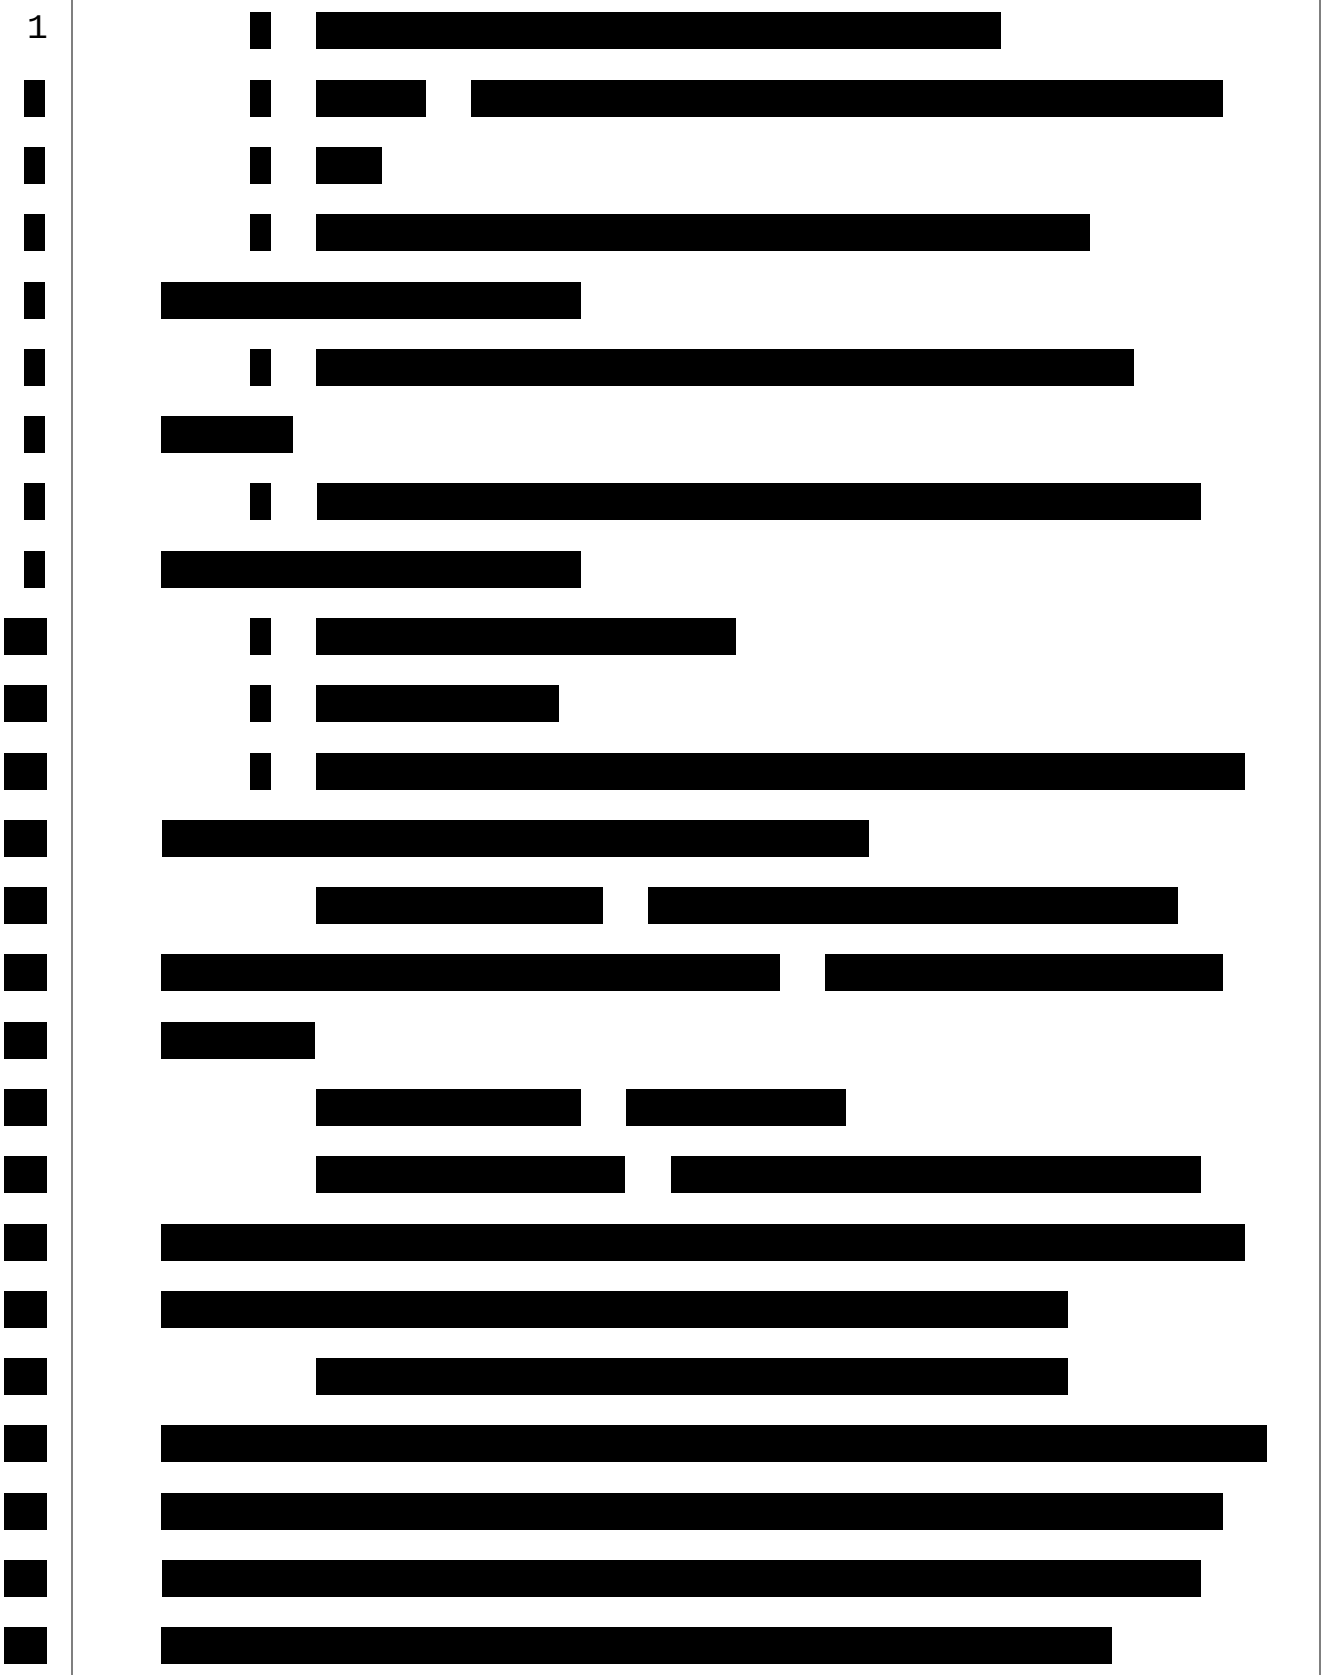
Do you know what operating circumstances were in Bensenville Yard? Period. Full stop.



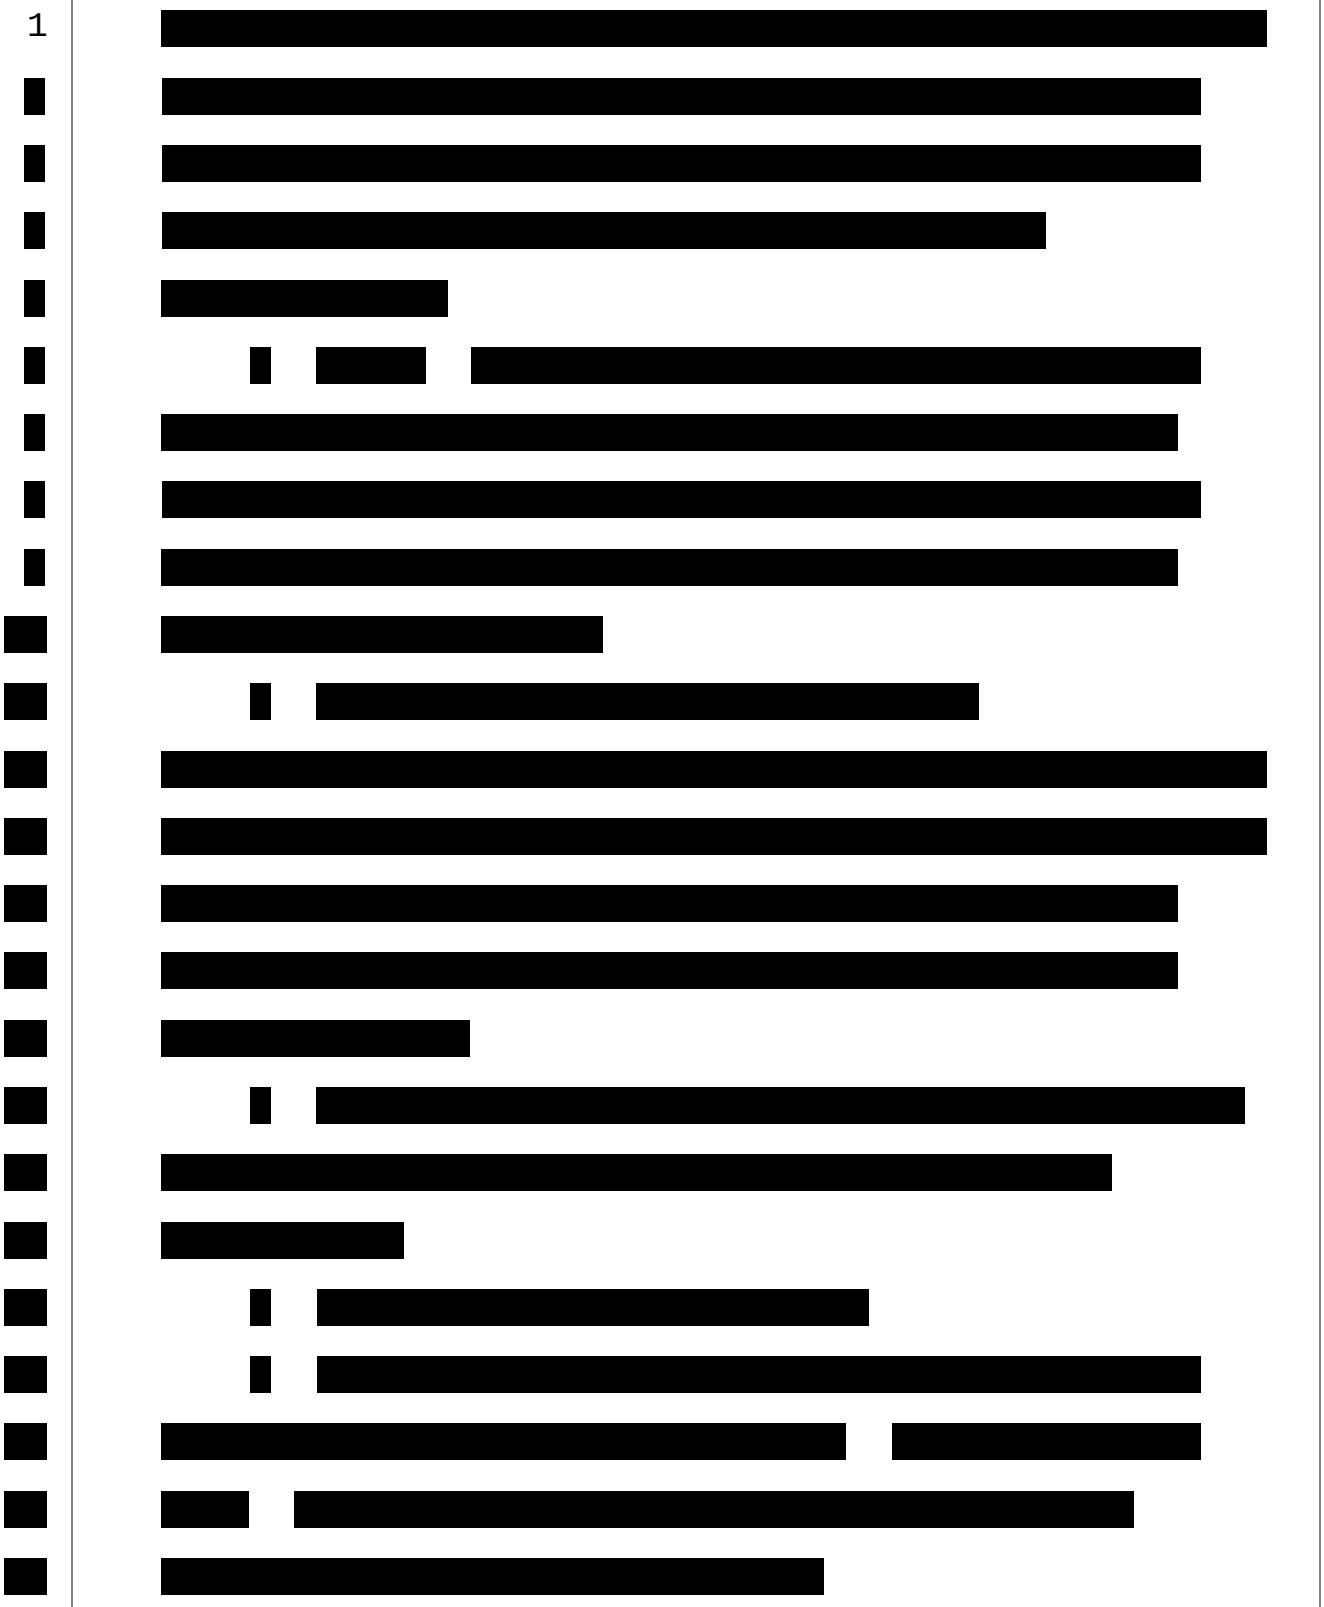
A I'm aware that there could not have been any circumstances in Bensenville Yard that waiting five more minutes would have interfered with.



Q So you didn't know all of the circumstances. You just know that in your opinion nothing could have justified waiting five minutes?



A Yes. Bingo, you got it.



[redacted]

THE WITNESS: Find it?

(Document tendered to witness by Counsel.)

THE WITNESS: Okay. I don't believe this one involved a direct order from anybody but more a suggestion of how to fix the problem.

BY MR. MEYER:

Q So there's nothing in this e-mail that talks about an instruction from anybody, is there?

A No.

Q And you're making a suggestion about CP advising its crews which switches have to be lined and getting information about how long it will take them to do it --

A Yes.

Q -- as a good practice?

A Yes.

Q Do you think CP generally does follow that practice?

A I monitor the radio pretty much all day when I'm sitting at my desk. I have heard the -- I have heard dispatchers ask this question maybe 20 percent of the time. I'll be generous, I'll say 30.

Q On occasions when -- strike that.

So we asked the question of your counsel in discovery for any additional evidence of

instructions being given in support of the allegation in your verified statement, and we got a list of a couple of other instances --

A Okay.

Q -- that are in your e-mail compilation, okay. One was at 250-253.

And I'm trying to understand. This one looks like it's not about any particular dispatching decision but about an issue with CAD software?

A There is a PTC element to this, if I can elaborate a little bit --

Q That's what I'm asking, is --

A Yeah.

Q -- is there a dispatcher being told to --

A There was a dispatcher being asked to provide an upgrade from an Item 1 which requires trains to stop, a crew member to get out to go walk in the middle of traffic at a crossing and ensure that it's stopped and then motion the train across and then get back on it; a process that takes 10 to 15 minutes typically to do, versus an Item 2, which the -- which the they had been authorized to do, and the objection was that the current software for PTC would have required the

dispatcher to cancel the first restriction with the Item 1 on it and then issue a whole new one with an Item 2, as opposed to the pre-PTC procedure which would have merely involved getting on the radio and telling the crew that the Item 1 had been upgraded to an Item 2. This occurred in the morning, I guess that's not material, but...

Q I don't see an instruction given to this dispatcher by anyone.

A No, I don't believe this -- yes, last bullet point:

Even without this embellishment, the CP dispatcher did in fact have the ability to cancel the track bulletin that contained the Item 1, and issue a new one containing the Item 2. When asked, the dispatcher refused to do this.

I guess that's the issue.

Q Okay. Again, I don't see any instruction being given to the dispatcher by anyone in management.

A No. No, no. No.

Q Okay. Fair enough.

Then the next one given to us by counsel in the interrogatory response was 256.

So I see here an e-mail on December 10,

2021. I assume this is what is being referenced by counsel, but I'll -- if there's something different, by all means let me know.

"Worth mentioning that Bensenville terminal superintendents saw the problem with 12,000 foot 286 showing up at the same time as 13,000 foot 241. I knew there would be a problem. He says he called dispatching in Minneapolis and requested 286 be held back. He was overruled.

Was that the instruction?

A Yes.

Q The dispatching office is in Minneapolis?

A Right, the terminal superintendent was in Bensenville trying to avert -- trying to help us out essentially and evert what was unquestionably going to be a delay and --

Q I understand that part.

A Yeah, and --

Q But the dispatchers are in Minneapolis?

A Yes.

Q So we are talking -- so this is the Elgin dispatcher in Minneapolis?

A Right.

Q Making a decision to overrule the superintendent in Bensenville?

A I --
Q Is that right?
A I don't believe it is right. I believe it was one of the managers in Minneapolis above the Elgin dispatcher directing him to do this. I -- I --
Q That's not what's written here, is it? Just says -- all it says is dispatcher --
A The Elgin dispatcher could not override -- overrule the superintendent in Bensenville. That was a given. I -- I didn't realize at the time I wrote this that it was going to be scrutinized in a legal proceeding, in which case I would have --
Q Well, you submitted it in a legal proceeding, didn't you?
A All I'm saying is it goes without saying that if the Elgin dispatcher would refuse to stop 286, as instructed by the Bensenville superintendent, somebody above him was instructing him to do that. That's not something the Elgin dispatcher would have done on his own.
Q So someone in the dispatching office?
A Yes.
Q Okay. And you regard that as senior management at CP?

A I would say.
Q Yeah? So anyone above the line dispatcher is senior management?
A There's levels and levels, but it was definitely some -- some form of management that directed this move, which clearly the Bensenville terminal superintendent, who ought to have a little say over what happens in his yard --
Q Yeah --
A -- was overruled.
Q Sir, I think maybe stick to the question.
A The questions, I don't know who directed it.
Q Then that's the answer.
A Okay.
Q You don't know who directed it.
A I don't know.
Q Do you regard anyone who's a nonagreement person in the dispatching office as senior management?
A I would be very happy if you -- if you -- if you wanted to take the word "senior" out of that statement and just say it was management.
Q Okay. The next one in this list was 291.
So you tell me how to interpret this.

There's a reference here, saying:

Following from Train Master Marshall Beecher was received.

Who is Trainmaster Marshall Beecher?

A He is one of my trainmasters who works for Metra on the C West district who is -- works afternoons and tries to keep his finger on top of what's going on out there when I'm not personally able to do so.

Q Okay. So this is another -- this is another example, and we've seen this -- we've seen this actually quite a few times already today, where CP 286 is coming into Bensenville.

A Yes.

Q All right. Again, that's coming up from the north, crossing over the -- your tracks at B-17?

A And for the record, if an inbound train coming via that route is over 10,000 feet, the choice is move it -- keep it moving or stop it, in which case it's going to block the UP.

Remember, CP runs on UP between Bryn Mawr and Shermer and if they stop a train that's bigger than 10,000 feet at B-17, it's going to keep the UP blocked, and quite often, quite frequently, CP

was to pull down right into the control point with everything, cut off the cars, pull down by the hand throw, shove in, pull out whatever they were picking up, put the train back together, but that -- by positioning it there on the switch where you go into Spaulding Yard took away our ability to cross back over at Spaulding when we run around the train.

And that was what I was referring to when I answered this customer complaint, that yes, there was a way to avoid what you're saying and -- but we needed CP's cooperation to do that, and they weren't cooperating.

Q Huh, interesting, because I don't see that third option anywhere covered in this response.

A Way more detail than I would typically go into with a customer, and I try not to make their eyes glaze over.

I'm sure if somebody wanted to take the time to do it, you could find correspondence between myself and people at CP asking that they -- when switching at Spaulding they leave the train west of the -- of the control point. There were many conversations with the people that ran the operation at the time, and they did it a lot

of the times. A lot of the times they did leave their train back there.

Q But let me get this straight, though.

Either way -- well, this operation at Spaulding, if I understand the configuration of the trackage at Spaulding, the interchange tracks are on the south side of the main line, right?

A Correct.

Q So in order to switch there, track 2 is going to be blocked?

A Correct, it's just a question of if they block it in the interlocking or they block it west of the interlocking. If they block it west of the interlocking, we can come down on number 1, go through the crossover at Spaulding at number 2, hit Bartlett, Hannover Park, and Schaumburg on the right platform.

If they block the -- if they block the interlocking while they're doing their switching at Spaulding, now we're forced to stay on number 1 all the way to Roselle West.

Q Because that's the next crossover?

A That's correct, that is the next crossover, and it has the split Bartlett platform problem to contend with and all the other ones of

being on the wrong track.

Q But just -- just to focus on the dispatching question of whether to send a train from one track to another, either way, the right dispatching move is to cross the Metra train from track 2 to track 1 to avoid delay; isn't that right?

A No, if that is the only way -- the only option that you have to run, yes --

Q You're not going to leave the Metra train stopped on track 2 --

A No, no, we're not suggesting that. What I'm suggesting is there was a way to do this to satisfy Metra and take care of Spaulding, and the customer was told the truth. With CP's cooperation they would not have had to deal with getting their train a block to the -- a block to the west and on the wrong side. It was a very simple request to CP that could have prevented them from having to do that, and we'll keep asking them. That's basically what I told them.

Q So if we could go to page 233.

So I think this is an e-mail where you are talking about passengers having to cross tracks to board and having to dodge the freight train?

the MD West and MD North lines?

A It would not really make sense to split it up, no. I think Metra should dispatch trains on the territory that it owns and maintains and operates.

Q Why wouldn't it make sense to split it up?

Assuming -- if you -- if you assume with me for a moment, and I'm not asking you to agree with this, but assume with me for a moment that the only increase in the number of trains resulting with the -- from the transaction is west of Bensenville Yard?

A Well, I -- I'm having -- based on my knowledge of the operation, I do not believe that these -- these trains are going to materialize in Bensenville and disappear when they go into Bensenville. They're all going to go somewhere. They're going to go to the harbor, they're going to go to the belt, they're going to go north, they're going to go somewhere.

There's going to be more traffic on all the lines regardless of what the -- the projections may say, and I -- I would stake my 50 years on that statement.

Q And it's that belief that is motivating

the need to dispatch the entirety of Metra's own lines?

A It's a combination of the experiences that we have had on a regular basis, problems that affect our service that we need to have control over -- over, in order to prevent them from happening. And the problems will only be exacerbated with more freight trains out there.

There -- I always am amused when the statement is made, oh, you don't need to worry about, what is it, 7.1 more freight trains on the west line west of Bensenville?

I mean, right now CP is running essentially two trains on the line west of Bensenville, and we're still getting delayed every other day or having problems of some sort or another. It's -- it's just unrealistic to -- to say that that's going to be the only source of our problems though.

Q So I --

A Yeah.

Q I asked a question a few questions ago that I don't think you actually answered, which was:

Why -- if you -- if you assume with me

that the only increase in freight trains will occur west of Bensenville, and I understand you did disagree with that view.

A Yes.

Q Okay. But I'm asking you to assume with me that that's the case, why would it not make sense to split up the dispatching?

A It would just be very awkward, trying to hand things off.

Situations occur on one -- would occur, excuse me, on one side of the dividing line that would have to be rectified on the other side of the dividing line. It would just -- you know, our Metra -- Metra trains don't run from Elgin to Bensenville and end there. It's a through operation [indicating.] It needs to be handled as such.

Q Because dispatching that handles both sides of a divide is more efficient than dispatching that handles only one?

A In certain cases it would be. But, yeah, as far as splitting the Metra traffic, I mean, we could make it work. It just would be very awkward.

MR. MEYER: I think that's all I've got.

way to avoid interference during peak periods is to operate no freight trains at all during peak periods, are you?

A I'm going to go back to the statement I made at the time, and I truly sincerely believe this:

The agreement says that CP will not interfere with the operation of Metra peak period trains. So it doesn't say:

Well, we got about an 80 or 90 percent chance we're not going to interfere. Let's try this and see if it works. It doesn't say that.

So if the end result is a Metra train being interfered with by a CP freight train during peak periods, as far as I can see, CP has violated the terms of the operating agreement, and the violation is in the results.

Q If you were dispatching Metra's lines, does that mean that you would never allow a train onto Metra's lines -- a freight train onto Metra's lines during a peak period?

A It does not mean that, but it does mean that a lot of information and consideration would have to go into that decision of whether to run that train or not, and if it were 12,000 feet long

and we had a tiny window in there, no, I would absolutely not run that train.

If it were a 5,000-foot train with lots of power and a good crew, and I knew clearly what was going to go on, and I talked to Bensenville and determined ahead of time that the route was lined for them to pull into the yard, yeah, I would run that train.

MR. MEYER: Okay. I've got nothing further. Thank you.

FURTHER EXAMINATION

By MR. SPITULNIK:

Q I just want to make sure that you are not testifying today that if -- that there -- that there should be no freight train operations during peak -- during peak periods.

A Absolutely, I'm not saying that at all.

MR. SPITULNIK: Thank you. I have nothing further.

THE VIDEOGRAPHER: Going off the record 6:38 p.m.

(Ending time noted: 6:38 p.m.)

CERTIFICATE OF COURT REPORTER - NOTARY PUBLIC

I, Cynthia J. Conforti, Certified Shorthand Reporter No. 084-003064, CSR, CRR, and a Notary Public in and for the County of Cook, State of Illinois, the officer before whom the foregoing deposition was taken, do hereby certify that the foregoing transcript is a true and correct record of the testimony given; that said testimony was taken by me stenographically and thereafter reduced to typewriting under my direction; that reading and signing was requested; and that I am neither counsel for, related to, nor employed by any of the parties to this case and have no interest, financial or otherwise, in its outcome.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed my notarial seal this 8th day of June, 2022.

My commission expires: October 30, 2023
