To whom it may concern:

I am concerned from the findings I have seen that the takeover of the EJ&E will cause very negative conditions for the area in which I live, and overall, will not be a benefit to the United States.

The traffic on the tracks behind my house is likely to double

There will be a significant increase in crossing delays

This will be a detriment to the air quality

Causing concern for school bus safety and emergency vehicle response time

US ports will loose business and jobs

Thank you for your Concern,

Torri Peterson
