

Dave Navecky,

My name is Laurie Allen, and I am greatly concerned about the Great Lakes Basin Rail Line. This is a private enterprise that wants to take prime farm land away from private owners and ruin the land for their profit only.

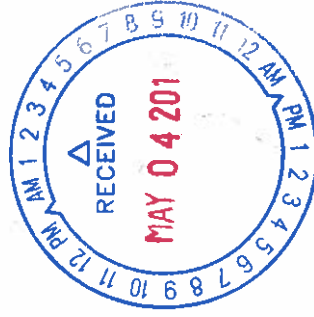

This project doesn't want to acknowledge that Chicago already has established tracks to be used nearby. GLB rail way is only to be built for one reason and that is money. These investors want to make money as long as it's not in their backyard.

What do the GLB rail way investors care about the pollution of our environment, our air quality, the closing of our roads, noise pollution, decreasing the time for first responders - police - fireman to help us when needed, the ruining of our soil, increased vibration levels, just to name a few.

Please stop the Great Lakes Basin Rail line before it ruins our lives and our land.

Sincerely,
Laurie Allen
