A comment is added on your issue:

Re: NGS Response: STB Docket No. AB-290 (405X)

Greetings Diana,

I have searched the NGS IDB (Intergrated DataBase) and conclude that there are no survey control marks within the area to be abandoned. It appears that the rails were removed long ago, as they were not visible to me in aerial photos until examining those dated back to 2010.

I see no actual or perceived impact to any published survey control in the area of this abandonment, thus no impact to NGS.

We appreciate your time in working with the National Geodetic Survey to inform us of this venture.

Thank you.
