Part of
Public Record

As part of the investigation into the viability of GLBT's proposal for a new rail line around Chicago please consider:

- 1) making public the source(s) of funding for the proposed line
- 2) why current rail lines in the very near proximity to the proposed route and are under-utilized cannot be re-furbished to accomplish the same objective
- 3) level of commitment from GLBTs customers
- 4) if current actions to relieve rail congestion around Chicago are being effective or not
- 5) impact to the environment including a worst case scenario toxic spill
- 6) impact to traffic patterns
- 7) impact to personal property values

Without knowing the answers to these items, I am presently opposed to GLBT's proposal.
