EI 34172.pdf;

Good morning. I am attaching a letter we received from CERA confirming that it would not be undertaking any salvage activities within the Lake Erie and Western Depot Historic District. Based on the fact that there would be no changes within the historic district, and the tracks will be left in place, we have determined that a no adverse effect finding is appropriate in this case. This is consistent with your statement in a letter dated November 25, 2025, that if the tracks were left in place "following the abandonment, then we do not believe the characteristics that qualify the above identified historic property for inclusion in the National Register will be diminished as a result of the project."

If you need any additional information or wish to discuss this determination in more detail, please let me know.

Thanks very much.
