I thought you might get a kick out of this. I guess he will need to reroute like I told him around our 990 foot flood plain. Hope you get to watch the whole thing. Listening to him reinforces that he is not qualified to build a class 1 railroad. If you guys are at all considering letting him go through with this- please move it way West as it makes more sense. Our hopes are that you say- no way!

Thanks Dave
