Message:

Please consider disallowing CN to acquire the EJ&E Railroad, without requiring substantial infrastructure improvements throughout NW Indiana. NW Indiana already has far too many train crossings, and the increased traffic from this acquisition would place severe hardships on the surrounding communities in NW Indiana. If CN wants to create new overpasses and viaducts to channel the trains over or under existing major roads, then this proposed acquisition would be less objectionable. But, unfortunately, they have not proposed substantial improvements in the surrounding infrastructure to accomodate this level of increased train traffic. Disapprove this outrageous proposal.

Bill Howe
