Environmental Impact Statement

Comment Form

Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

STB Finance Docket No. 35087

Date: 8/27/08

Comments must be submitted by September 30, 2008.

To whom it may concern,

Increasing the train congestion in Barrington is not beneficial. Barrington is one of the bigger communities that [redacted] already has trains passing through many times daily. With so many people going through the community it will just cause more traffic congestion which therefore relates in longer car rides. This will cause more pollution in the air, difficulty with construction [redacted], and a multitude of other difficulties. It takes me half an hour to get to the hospital as is and adding more time is life threatening. There have been 3 deaths in the past year at our school, and one of them was a close friend of mine. As I recall, this was the same train company of the train that took his life. Whether it was suicide or not, the multitude of trains leads for more opportunities of these deaths. With increased trains Barrington will no longer be an enjoyable, clean, stress-free community for me.

[redacted] Katie McNulty
Barrington Tennis
