

Re: Docket No. FD - 35952

Dear Mr. Navecky,

I have a question that many of us would like answered to end the confusion that we have on the upcoming EIS for the proposed route of Great Lakes Basin Railroad.

When asked at the May 2, 2016, meeting in Morris, Illinois, ..."How many homes will be impacted? Mr. Frank Patton, co-founder of GLB RR, answered, "Don't know, don't know the route yet".

He was also asked at the same information meeting, ..."What about livestock reproduction and less milk production?" Mr. Patton responded, "Will know better when we know the route."

Questions have been asked about the proposed route or questions concerning a situation on the route and Mr. Patton continues to answer, both publicly and in articles that he can't answer that because he doesn't know the route yet.

So the question is:

When will the EIS begin?

Will it be the proposed route that has been mapped and satellite photographed and follow the GLB Narrative?

If not, what/when would be the circumstances to go ahead with the EIS?

Will the EIS be the route plus the 30 miles plus on either side? An EIS of distances 60 miles across plus the 200 feet and a 270+/-mile long?

And one last question.

Its been written that the EIS will cost between \$30 - \$50 million dollars and that Great Lakes Basin RR would pay for it.

Is that accurate - they would pay for all of it?

Thank you.

Regards,

April Gerstung
