A comment is added on your issue:

Re: CSX Transportation Abandonment in Boone County, WV

A number of marks at first appear to be along this stretch of rail. But after reviewing the descriptions of all marks I can confidently state that none of them actually do, rather they are described as being set along the road which runs parallel to the rail some 300-400 feet away.

I see no impact to any NGS published control for this abandonment.
