Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date: 8-27-08

I am very concerned about several inevitable effects of the added train scheduled traffic.

#1. Increased tragedies from accidents involving young + old drivers at train crossings. There are already too many accidents.

#2. Our town will be so unpleasant to drive through that our local businesses will suffer due to people avoiding town, like I will do.

#3 I will choose to move away if it gets too bad with traffic!
