Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date: Oct. 27, 2008

Please do not destroy a special community. ^{i. This railway would only bring} ~~with~~ terrible traffic, pollution, noise, the transfer of hazardous materials, and, most importantly, decreased ~~traffic~~ safety in our area.

We have chosen to live here and have invested in our home here because we wanted a safe, small suburban community. It would be emotionally devastating to have to move our family to a different place at this point in our lives.

② We also treasure our natural areas in forest preserves - these areas and the species are now protected - this rail traffic would greatly disturb those natural areas.

Please, do not continue with this proposal. We long for positive change -
Not negative!
