Environmental Filing  
**STB Finance Docket No 35087**  
Surface Transportation Board  
39 E St SW  
Washington , D. C. 20423

Dear Sirs:

This is to inform you that I have NOT found any special toads that would halt the sale of the E. J. & E. to the Canadian National Railway Company.

I do, however, live in Frankfort, IL, and I am worried about several items:

1. This will have a negative effect on the quality of my life and a negative effect on the value of my home.
2. I am worried about the Frankfort spur area becoming a storge side track for hazardous materials, and the proximity of the electical towers to the rails.
3. Have any decibel readings been taken at the Frankfort area, and if so what are they?

I realize that this is a private sale, but shouldn't our government make sure that the purchasing company (A FOREIGN ENTITY) pledges in writing to upgrade crossings, construct noise barriers, and address all safety concerns of the people BEFORE allowing them to complete the purchase?

Sincerely,

Al Levering
