Message:

I am all for the improvement of commerce, however, to allow CN to aquire the J and not contribute a fair amount to road crossings is not acceptable. The major issue I have with this aquisition is the impact on emergency vehicles and the number of trains passing thru on a daily basis. If this is approved, we need CN to contribute enough money to pay for AL LEAST one bridge crossing in every community. Otherwise, traffic in an already congested community will be hell. Please reject this application by CN, or at a minimum, make them contribute substantially to road and bridge contstruction. US taxpayers are already on the hook for 700 billion to bail out investment banks. Why should we let a foreign company skate thru this without any contribution.
