Subject: RE: Uintah Basin Railway paleontological data

Kevin,

We are still in discussions with Julia and Nicole regarding the Purpose & Need statement. I understand their concern to be that our NEPA purpose and need statement may not be worded appropriately for the Section 404. I will let you know if there are any developments that the Coalition should be aware of as you plan for the Section 404 permitting process.

Best,
Josh

So far everyone is safe and sound. Hope it's the same on your side.

On our call last week, you mentioned that you had reached some kind of agreement with Julia and Nicole on the Purpose & Need statement. Can you tell me again what the two changes are?

Thanks!

Kevin

Hi Josh,

I wanted to let you know that the paleo GIS data have been uploaded to the sharepoint site. The paleo report is done but needs an edit, and will be completed early next week.

Kevin

Subject: Uintah Basin Railway paleontological data

Hi Josh-

We were waiting to deliver this with the revised report but Kevin Keller said you needed this ASAP. The report should follow shortly after it goes through our technical editing process. I am instructed by our paleontologist to note the following:

BLM and USFS paleontological locality data are protected under PRPA from the Freedom of Information Act; therefore the data can be used for in house analysis by other agencies but cannot be released. In addition, the state of Utah, who provided much of the data, has similar guidance for paleontological locality confidentiality; and therefore none of the paleontological locality data provide in this package regardless of ownership can be released without approval.

Thanks,

Anne
