Message:

I live within the village limits of Plainfield, IL. Virtually everyone in my town and the surrounding areas cross the EJE tracks during our daily commute to work. This has been one of the fastest growing areas in the U. S. over the last 10-15 years. The infrastructure has not kept pace with the population growth. The train traffic already exacerbates a bad traffic situation. Adding additional trains, together with more cars on the trains, is not reasonable. If CN wants to put this much additional traffic into the area, they should put in overpasses at the 143rd Street, Route 126 and Renwick Road crossings. Thank you.
