

Environmental Impact Statement

Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date: 8/27/08

I realize ~~that~~ Progress is Progress and in the name of progress someone has to lose.

My Question is how bad do I have to lose.
Will the trains be 2 mins. long or 15 min long.
20 times a day or 30 times a day.

There has been no information coming forward about what the rules are for the length and duration of the trains.

It seems hard to make good decisions in lue of lack of facts.

P.S. make the railroad pay for the second fire station in Barrytown. I am not getting any younger and sooner or latter may require emergency services.
