How will CN's proposed acquisition of the EJ&E impact you?

I am a resident of Mundelein, Illinois and we have more grade level crossings than I can count on one hand. I also work in Mundelein as well and the train traffic already can be a challenge and cause significant delays in journeys to and from work not to mention the delays in the daily living activities of appointments, shopping and attending church.

Even though the above activities are important none are as important as the delay that could be caused to emergency traffic and those in need of medical assistance. The closest medical facilities are in Libertyville, Illinois and possibly Grayslake, IL and both require crossing at a minimum one railroad track, any increase in delays on these lines is unacceptable in an emergency situation.
