

Docket # FD-35952 Great Lakes Basin Rail Project

Good Morning Mr Navecky,

I have questions in regards to the decision on the merits and viability of the GLB project;

- * When in the approval time frame will the merit and viability of the project be studied and decided?
- * What areas are being studied in the above decision making process?
- * How far in the future will the committee look as far as the usefulness of this rail? Is this a 100 year project?
- * Who will be the decision makers in regards to the merit and viability?
- * Where in the process is public comment possible?

In regards to the EIS process I have the following questions;

- * Will the EIS crew request permission of the landowners to enter their property?
- * Will the EIS crew have identification and if so what does this identification look like?
- * What are the consequences if a land owner refuses permission for the EIS crew to enter his/her property?
- * Will anyone associated with GLB accompany the EIS crew?
- * Will land owners be notified when EIS crew will come to their area or to their farm?

Thank you for your prompt response,

Sincerely

Mirjam Melin
